

KraneShares Emerging Markets Consumer Technology ETF

Investment Strategy:

KEMQ seeks to track the Solactive Emerging Markets Consumer Technology Index. The Index selects companies from 26 eligible countries within emerging markets whose primary business or businesses are internet retail, internet software/services, purchase, payment processing, or software for internet and E-Commerce transactions.

Emerging Markets Consumer Technology Highlights:

- Internet adoption has been expanding rapidly within emerging markets at the same time that domestic consumption and retail sales have steadily increased and frequently take place online.
- According to a seminal study from the The Organization for Economic Cooperation and Development (OECD), emerging middle class consumption could reach 52% of total global consumption by the year 2030¹.
- We believe the growth of internet adoption within emerging markets is a long term secular theme that may continue to play out over the course of decades.

KEMQ features:

- Access to emerging market internet companies that provide similar services as Google, Facebook, PayPal, Amazon, etc.
- Exposure to companies that stand to benefit from increasing domestic consumption by emerging markets' growing middle class
- Exposure to emerging market companies facilitating mobile E-Commerce sales

ETF shares are not redeemable with the issuing fund other than in large Creation Unit aggregations. Instead, investors must buy or sell ETF Shares in the secondary market with the assistance of a stockbroker. In doing so, the investor may incur brokerage commissions and may pay more than net asset value (NAV) when buying and receive less than net asset value when selling. The NAV of the Fund's shares is calculated each day the national securities exchanges are open for trading as of the close of regular trading on the New York Stock Exchange ("NYSE"), normally 4:00 P.M. Eastern time (the "NAV Calculation Time"). Shares are bought and sold at market price not NAV. Closing price returns are based on the midpoint of the bid/ask spread at 4:00 P.M. Eastern Time (when NAV is normally determined).

Index returns are for illustrative purposes only. Index performance returns do not reflect any management fees, transaction costs or expenses. Indexes are unmanaged and one cannot invest directly in an index.
