

KRANESHARES TRUST

KraneShares Boserá MSCI China A Share ETF (the “Fund”)

Supplement dated July 10, 2015 to the Statutory Prospectus and Summary Prospectus for the Fund (each, a “Prospectus” and together, the “Prospectuses”)

This supplement provides new and additional information beyond that contained in the currently effective Statutory Prospectus and Summary Prospectus listed above and should be read in conjunction with the Prospectuses.

The Chinese A Shares market has recently been subject to numerous, widespread and extensive trading halts, the risk of which is currently described in the Prospectuses. These trading halts have increased the volatility and reduced the liquidity of the A Shares market.

Accordingly, the Fund does not currently expect to continue to replicate the MSCI China A International Index (“Underlying Index”), but rather will employ a representative sampling strategy. Utilizing such a strategy will provide the Fund’s Adviser, Krane Funds Advisors, LLC (“Krane”), and Co-Adviser, Boserá Asset Management (International) Co., Ltd. (“Boserá”), with greater flexibility to invest Fund assets in securities that are not subject to trading halts and are relatively liquid. The Fund may also hold cash and cash equivalents in lieu of investing cash in A Shares in an effort to ensure the liquidity of the Fund portfolio.

As a result of employing a representative sampling strategy and holding cash and cash equivalents, the Fund may experience greater tracking error. Accordingly, the below changes apply to the Prospectuses:

- The third and fourth paragraphs in the “Principal Investment Strategies of the Fund” section of the Prospectuses are deleted in their entirety and replaced with the following:

In managing the Fund, Boserá uses a “passive” investment strategy — meaning that Boserá does not attempt to select securities based on their individual potential to outperform the Underlying Index or the market. In seeking to track the performance of the Underlying Index, Boserá intends to employ a representative sampling strategy on behalf of the Fund, which means that the Fund will typically invest in a representative sample of securities that collectively have an investment profile similar to the Underlying Index. Boserá performs this function at its discretion, subject to the investment strategy and restrictions of the Fund and oversight by Krane Funds Advisors, LLC (“Krane”) and the Board of Trustees. The Fund’s securities are expected to have, in the aggregate, investment characteristics (based on factors such as market capitalization and industry weightings), fundamental characteristics (such as return variability and yield) and liquidity measures similar to those of the Underlying Index. Unlike many investment companies, the Fund does not try to “beat” the Underlying Index and does not seek temporary defensive positions when markets decline or appear overvalued.

The Fund may invest up to 20% of its assets in investments that are not included in the Underlying Index, but which Krane and/or Boserá believes will help the Fund track the Underlying Index. These investments include B shares of companies whose A Shares are in the Underlying Index, B shares of other companies listed on the Shanghai or Shenzhen Stock Exchanges, H shares of companies incorporated in mainland China and listed on the Hong Kong Stock Exchange, shares of Red Chip companies with controlling Chinese shareholders that are incorporated outside of mainland China and listed on the Hong Kong Stock Exchange, shares of China-related companies listed on the Hong Kong Stock Exchange, depository receipts representing securities not in the Underlying Index, derivative instruments, including swaps and futures contracts, including index futures, investment company securities, including exchange-traded funds (“ETFs”), and cash or cash equivalents, including money market funds. The Fund may also invest in cash and cash equivalents in anticipation of any reduced liquidity in the A Shares market.

- In the “Principal Risks” section of the Prospectuses, the following is added prior to the “Management Risk” sub-section:

Liquidity Risk. The Fund’s investments, and particularly its investments in A Shares, are subject to liquidity risk, which exists when an investment is or becomes difficult to purchase or sell. If a transaction is particularly large or if the relevant market is illiquid, it may not be possible to initiate a transaction or liquidate a position at an advantageous time or price, which may result in significant losses to the Fund.

- In the “Principal Risks” section of the Prospectuses, the “Management Risk” sub-section is deleted in its entirety and replaced with the following:

Management Risk. Because the Fund employs a representative sampling strategy to track the performance of the Underlying Index and invests less than the total number of securities in the Underlying Index, the Fund is subject to management risk. This is the risk that Boserá’s security selection process may not produce the intended results.

- The last sentence of the “Passive Investment Risk” sub-section in the “Principal Risks” section of the Prospectuses is deleted in its entirety.
- In the “Principal Risks” section of the Prospectuses, the “Tracking Error Risk” sub-section is deleted in its entirety and replaced with the following:

Tracking Error Risk. The Fund’s return may not match or achieve a high degree of correlation with the return of the Underlying Index due to, among other factors, the Fund’s use of a representative sampling strategy and the Fund holding cash under certain circumstances in lieu of Underlying Index securities. In addition, securities included in the Underlying Index may be unavailable for investment from time to time.

- In the “Additional Information About the Fund” section of the Statutory Prospectus, the first paragraph in the “Principal Investment Strategies” sub-section is deleted in its entirety and replaced with the following:

Principal Investment Strategies. In managing the Fund, Bosera uses a “passive” investment strategy — meaning that Bosera does not attempt to select securities based on their individual potential to outperform the Underlying Index or the market. In seeking to track the performance of the Underlying Index, Bosera intends to employ a representative sampling index strategy. “Representative sampling” is an indexing strategy that involves investing in a representative sample of securities that collectively have an investment profile similar to the Underlying Index.

- In the “Additional Information About the Fund” section of the Statutory Prospectus, the fourth paragraph in the “Principal Investment Strategies” sub-section is deleted in its entirety and replaced with the following:

The Fund may invest up to 20% of its assets in investments that are not included in the Underlying Index, but which Krane and/or Bosera believes will help the Fund track its Underlying Index, including B shares of companies whose A Shares are listed on the Underlying Index, B shares of other companies, H shares, Red Chips, shares of China-related companies listed on the Hong Kong Stock Exchange, depositary receipts representing securities not in the Underlying Index, swap contracts, other securities not in the Underlying Index, investment company securities, including ETFs, cash and cash equivalents, money market instruments, such as repurchase agreements or money market funds (including money market funds advised by Krane, Bosera or their affiliates subject to applicable limitations under the 1940 Act or exemptions therefrom), convertible securities, structured notes (notes on which the amount of principal repayment and interest payments are based on the movement of one or more specified factors, such as the movement of a particular stock or stock index) and in futures contracts, including index futures. The Fund expects to use futures contracts to a limited extent in seeking performance that corresponds to the Underlying Index. Bosera does not engage in temporary defensive investing and seeks to keep the Fund’s assets fully invested in all market environments. As a result, the Fund may be more vulnerable to adverse market movements than a fund that engages in temporary defensive strategies. The Fund may, however, invest in cash and cash equivalents in response to reduced liquidity, or an expectation of reduced liquidity, in the A Shares market.

- In the “Additional Information About the Fund” section of the Statutory Prospectus, the last paragraph under “Foreign Exchange Control” is deleted in its entirety and replaced with the following:

The PRC government imposes restrictions on the remittance of RMB out of and into China. The Fund will be required to remit RMB from Hong Kong to the PRC to settle the purchase of A Shares and other permissible securities by the Fund from time to time. In the event such remittance is disrupted, the Fund could be adversely affected and, among other matters, may increase the tracking error of the Fund. Any delay in repatriation of RMB out of China may result in delay in payment of redemption proceeds to the redeeming investors. The Chinese government’s policies on exchange control and repatriation restrictions are subject to change, and the Fund’s performance may be adversely affected.

- In the “Additional Information About the Fund” section of the Statutory Prospectus, the “Passive Investment Risk” sub-sub-section is deleted in its entirety and replaced with the following:

Passive Investment Risk. The Fund is not actively managed. Therefore, unless a specific security is removed from the Fund’s Underlying Index, the Fund generally would not sell a security because the security’s issuer was in financial trouble. If a specific security is removed from the Underlying Index, the Fund may be forced to sell such security at an inopportune time or for a price other than the security’s current market value. It is anticipated that the value of Fund shares will decline, more or less, in correspondence with any decline in value of the Underlying Index. The Underlying Index may not contain the appropriate mix of securities for any particular economic cycle, and the timing of movements from one type of security to another in seeking to track the Underlying Index could have a negative effect on the Fund. Unlike an actively managed fund, the Fund does not use techniques or defensive strategies designed to lessen the effects of market volatility or to reduce the impact of periods of market decline. This means that, based on market and economic conditions, the Fund’s performance could be lower than other types of registered investment companies that may actively shift their portfolio assets to take advantage of market opportunities or to lessen the impact of a market decline. Because the Fund uses representative sampling approach, it is expected to hold a smaller number of securities than are in the Underlying Index. As a result, an adverse development to an issuer of securities that the Fund holds could result in a greater decline in NAV than would be the case if the Fund held more of the securities in the Underlying Index.

- In the “Additional Information About the Fund” section of the Statutory Prospectus, the “Tracking Error Risk” sub-sub-section is deleted in its entirety and replaced with the following:

Tracking Error Risk. Tracking error refers to the risk that the Fund’s performance may not match or correlate to that of its Underlying Index, either on a daily or aggregate basis. Tracking error may cause the Fund’s performance to be less than expected. There are a number of factors that may contribute to the Fund’s tracking error, such as Fund expenses, imperfect correlation between the Fund’s investments and those of the Underlying Index, the use of representative sampling, asset valuation differences, tax considerations, the unavailability of securities in the Underlying Index from time to time, holding cash and cash equivalents, and other liquidity constraints. Mathematical compounding may prevent the Fund from correlating with the monthly, quarterly, annual or other period performance of its benchmark. In addition, the Fund may not invest in certain securities and other instruments included in the Underlying Index, or invest in them in the exact proportions they represent of the Underlying Index, including due to legal restrictions or limitations imposed by the government of China or a lack of liquidity on stock exchanges in which such securities trade. Moreover, the Fund may be delayed in purchasing or selling securities and other instruments included in the Underlying Index. Any issues the Fund encounters with regard to currency convertibility (including the cost of borrowing funds, if any) and repatriation may also increase the Fund’s tracking error.

PLEASE RETAIN THIS SUPPLEMENT FOR FUTURE REFERENCE.

KRANESHARES TRUST

KraneShares Boserá MSCI China A Share ETF (the “Fund”)

Supplement dated December 24, 2014 to the Statutory Prospectus and Summary Prospectus for the Fund (each, a “Prospectus” and together, the “Prospectuses”)

This supplement provides new and additional information beyond that contained in the currently effective Statutory Prospectus and Summary Prospectus listed above and should be read in conjunction with the Prospectuses.

Effective November 17, 2014, Chinese authorities issued a circular (Caishui [2014] 79) clarifying the corporate income tax policy of the People’s Republic of China (“PRC”) in respect of renminbi qualified foreign institutional investors (“RQFIIs”). Pursuant to the circular, capital gains generated prior to November 17, 2014 by RQFIIs were generally made subject to the 10% PRC withholding income tax (“WHT”). Since inception through November 17, 2014, the Fund’s investment activities were conducted through an RQFII and generated capital gains potentially subject to approximately USD 40,000 of PRC WHT.

To date, the Fund has not withheld or established a reserve for the tax, and management is reviewing the applicability of tax treaties that may reduce, or eliminate the applicability of, the PRC WHT for the Fund. If it is ultimately determined, however, that the Fund must pay the tax, management will cause the Fund to withhold or establish a reserve for the tax, or pay the tax (out of current assets or distributable income). Any of these actions would cause shareholders of the Fund at that time to bear the cost of the tax, even if they *did not* benefit from the Fund’s trading activities that precipitated the tax. Conversely, shareholders of the Fund prior to the time that the Fund withholds or establishes a reserve for the tax, or pays the tax (out of current assets or distributable income) would not have borne the tax, even if they *did* benefit from the Fund’s trading activities that precipitated the tax. Any such tax liability would likely materially adversely impact the Fund’s return and net asset value (“NAV”).

As a result of the changes in the PRC tax regime discussed above, the below changes apply to the Prospectuses.

- In the Principal Risks section of the Prospectuses, in the sub-section on China Risk, in the sub-subsection on Specific Risks of Investing in the A-Shares Market, the Tax Risk is deleted in its entirety and replaced with the following:

Tax Risk. Any capital gains generated by the Fund’s trading in A Shares prior to November 17, 2014 will be subject to the PRC WHT, unless the Fund determines, for example, that certain tax treaties reduce, or eliminate the applicability of, the tax for the Fund. The Fund is currently considering the availability of such treaties and has not withheld or otherwise established a reserve for the tax. If it is ultimately determined that the Fund must pay the PRC WHT, shareholders of the Fund at the time that the Fund withholds or establishes a reserve for the tax, or pays the tax (out of current assets or distributable income) will bear the tax, even if they did not benefit from the trading

activities that precipitated the tax. Conversely, shareholders of the Fund prior to the time that the Fund withholds or establishes a reserve for the tax, or pays the tax (out of current assets or distributable income) will not have borne the tax, even if they did benefit from the Fund's trading activities that precipitated the tax. The amount of any withholding accrued by the Fund, reserve established by the Fund, or tax paid by the Fund will be disclosed in the Fund's annual and semi-annual reports to shareholders. The imposition of the tax on the Fund would likely materially adversely affect the Fund's return and NAV. The Fund is expected to be temporarily exempt from the PRC WHT on its trading in A Shares as of November 17, 2014.

The PRC WHT on dividends and interest, if any, is normally withheld by the Fund's custodian bank. To the extent such WHT was not withheld by the Fund's custodian bank, however, Krane has made or would generally need to make relevant provision for the tax on dividends from A Shares and any relevant interest.

- In the "Additional Information About the Fund" section of the Statutory Prospectus, in the sub-section on Principal Risks of Investing in the Fund, in the sub-subsection on China Risk, the first five paragraphs of Tax Risk are deleted in their entirety and replaced with the following:

Tax Risk. Prior to November 14, 2014, the applicability of the PRC WHT to capital gains generated by RQFIIs' trading activities in A Shares was uncertain. At that time, Chinese authorities issued a circular, which indicated that any such capital gains of RQFIIs, prior to November 17, 2014, would generally be subject to the tax, unless reduced or eliminated by applicable tax treaties.

The Fund's trading through an RQFII generated capital gains prior to November 17, 2014, but the Fund has not withheld or established a reserve for the tax. If it is ultimately determined that the Fund must pay the tax, shareholders of the Fund at the time that the tax is withheld, reserved or paid (out of current assets or distributable income) will bear the cost of the tax, even if they did not benefit from the trading activities that precipitated the tax. Conversely, shareholders of the Fund prior to the time that the Fund withholds or establishes a reserve for the tax, or pays the tax (out of current assets or distributable income) will not have borne the tax, even if they did benefit from the Fund's trading activities that precipitated the tax. The amount of any withholding accrued by the Fund, reserve established by the Fund, or tax paid by the Fund will be disclosed in the Fund's annual and semi-annual reports to shareholders. Although PRC tax bureaus have not actively enforced the collection of WHT on capital gains derived by RQFIIs in the past, there is a risk that PRC tax authorities may, in fact, seek to collect the tax, as imposed by the circular. To the extent that the Fund invested in swaps linked to A Shares prior to November 17, 2014, the Fund may also be required to pay the capital gains PRC WHT to or on behalf of such swap counterparties. The imposition of the tax on the Fund would likely materially adversely affect the Fund's return and NAV.

Per the circular, the Fund is expected to be temporarily exempt from the capital gains PRC WHT on and after November 17, 2014. There is no indication as to how long the temporary exemption will remain in effect. Accordingly, the Fund may be subject to such taxes in the future. If Krane expects the capital gains PRC WHT to be re-imposed,

Krane reserves the right to establish a reserve for such tax. If the Fund establishes such a reserve but is not ultimately subject to the tax, shareholders who redeemed or sold their shares while the reserve was in place will effectively bear the tax and may not benefit from the later release, if any, of the reserve. Conversely, if the Fund does not establish such a reserve but ultimately is subject to the tax, shareholders who redeemed or sold their shares prior to the tax being withheld, reserved or paid will have effectively avoided the tax, even if they benefited from the trading that precipitated it.

The PRC WHT on dividends and interest, if any, is normally withheld by the Fund's custodian bank. To the extent such WHT was not withheld by the Fund's custodian bank, however, Krane has made or would generally need to make relevant provision for the tax on dividends from A Shares and any relevant interest.

- In the "Additional Tax Information" portion of the Statutory Prospectus, the first paragraph in the section titled "Chinese Tax Considerations" is deleted in its entirety and replaced with the following:

The Fund traded through an RQFII, generating capital gains, prior to November 17, 2014, but has not withheld or established a reserve for the related PRC WHT. If it is ultimately determined that the Fund must pay the tax, shareholders of the Fund at the time that the tax is withheld, reserved or paid (out of current assets or distributable income) will bear the cost of the tax, even if they did not benefit from the trading activities that precipitated the tax. Conversely, shareholders of the Fund prior to the time that the Fund withholds, establishes a reserve or pays the tax (out of current assets or distributable income) will not have borne the tax, even if they did benefit from the Fund's trading activities that precipitated the tax. The amount of any withholding accrued by the Fund, reserve established by the Fund, or tax paid by the Fund will be disclosed in the Fund's annual and semi-annual reports to investors. PRC tax bureaus have not actively enforced the collection of WHT on capital gains derived by RQFIIs in the past. There is a risk, however, that PRC tax authorities may, in fact, seek to collect the tax, as imposed by the circular. To the extent that the Fund, prior to November 17, 2014, invested in swaps linked to A Shares, the Fund may also be required to pay the PRC WHT on capital gains to or on behalf of such swap counterparties. The imposition of the tax on the Fund would likely materially adversely impact the Fund's return and NAV.

Per the circular, the Fund is expected to be temporarily exempt from the capital gains PRC WHT on trading in A Shares on and after November 17, 2014. There is no indication as to how long the temporary exemption will remain in effect. Accordingly, the Fund may be subject to such taxes in the future. If Krane expects such WHT on trading in A Shares to be re-imposed, Krane reserves the right to establish a reserve for such tax. If the Fund establishes such a reserve but is not ultimately subject to the tax, shareholders who redeemed or sold their shares while the reserve was in place will effectively bear the tax and may not benefit from the later release, if any, of the reserve. Conversely, if the Fund does not establish such a reserve but ultimately is subject to the tax, shareholders who redeemed or sold their shares prior to the tax being withheld, reserved or paid will have effectively avoided the tax, even if they benefited from the trading that precipitated the Fund's payment of it.

The PRC WHT on dividends and interest, if any, is normally withheld by the Fund's custodian bank. To the extent such WHT was not withheld by the Fund's custodian bank, however, Krane has made or would generally need to make relevant provision for the tax on dividends from A Shares and any relevant interest.

PLEASE RETAIN THIS SUPPLEMENT FOR FUTURE REFERENCE.

KRANESHARES TRUST

KraneShares Boserá MSCI China A Share ETF

Supplement dated August 4, 2014 to the currently effective Statutory Prospectus and Summary Prospectus for the KraneShares Boserá MSCI China A Share ETF

This supplement provides new and additional information beyond that contained in the currently effective Statutory Prospectus and Summary Prospectus (each, a “Prospectus” and together, the “Prospectuses”) listed above and should be read in conjunction with the Prospectuses.

Effective October 3, 2014, the KraneShares Boserá MSCI China A Share ETF’s current benchmark will change from the MSCI China A Index to the MSCI China A International Index and the following changes will apply to the Prospectuses:

- In the Fund Summary section of the Prospectus, the disclosure included under the “Investment Objective” heading is deleted in its entirety and replaced with the following:

The KraneShares Boserá MSCI China A Share ETF (the “Fund”) seeks to provide investment results that, before fees and expenses, correspond to the price and yield performance of a specific foreign equity securities benchmark. The Fund’s current benchmark is the MSCI China A International Index (the “Underlying Index”).

- In the Fund Summary section of the Prospectus, the first two paragraphs under the “Principal Investment Strategies of the Fund” heading are deleted in their entirety and replaced with the following:

In order to seek to track the Underlying Index, under normal circumstances, the Fund will invest at least 80% of its total assets in securities of the Underlying Index and depository receipts, including American Depositary Receipts (“ADRs”) representing such securities.

The Underlying Index is a free-float adjusted market capitalization weighted index and represents large-cap and mid-cap Chinese securities (“A Shares”). Free-float market capitalization is calculated by multiplying a security’s price by the number of shares available in the market, rather than the total number of shares outstanding. As of June 30, 2014, the Underlying Index included approximately 220 securities of companies with a market capitalization range of \$415.35 million to \$10.2 billion and an average market capitalization of \$1.8 billion. A Shares are equity securities issued by companies incorporated in mainland China and are traded in renminbi (“RMB”) on the Shenzhen or Shanghai Stock Exchanges. Subject to minor exceptions, under current regulations in the People’s Republic of China (“China” or the “PRC”), foreign investors can invest in A Shares only through certain institutional investors that have obtained a license and quota from the Chinese regulators. Boser Asset Management (International) Co., Ltd. (“Bosera”), the Fund’s Co-Adviser, has received a license as a Renminbi Qualified Foreign Institutional Investor (“RQFII”) from the China Securities Regulatory Commission (“CSRC”) and has received an initial A Shares quota by China’s State Administration of Foreign Exchange (“SAFE”) for use by the investment products it manages, including the Fund. Bosera may also obtain a license on behalf of the Fund as a Qualified Foreign Institutional Investor (“QFII”). Bosera, on behalf of the investment products it manages, may invest in A Shares and other permitted China securities listed on the Shanghai or Shenzhen Stock Exchanges up to the relevant A Shares quota(s).

- In the Statutory Prospectus, the disclosure included under the “Additional Information About the Fund- Investment Objective” heading is deleted in its entirety and replaced with the following:

The KraneShares Bosera MSCI China A Share ETF seeks to provide investment results that, before fees and expenses, correspond to the price and yield performance of a specific foreign equity securities benchmark. The Fund’s current benchmark is the MSCI China A International Index (the “Underlying Index”). The Fund’s investment objective is non-fundamental. As a result, it may be changed without shareholder approval upon 60 days’ prior written notice to shareholders.

- In the Statutory Prospectus, the disclosure included under the “Additional Information About the Fund- Underlying Index” heading is deleted in its entirety and replaced with the following:

The Fund’s Underlying Index is calculated and maintained by MSCI Inc. (the “Index Provider”).

The Underlying Index is a free float adjusted market capitalization weighted index that is compiled and published by the Index Provider. Free-float market capitalization is calculated by multiplying a security’s price by the number of shares available in the market, rather than the total number of shares outstanding. The Underlying Index

represents large-cap and mid-cap Chinese securities listed on the Shanghai Stock Exchange or the Shenzhen Stock Exchange.

The Underlying Index was created on November 25, 2008 with a base value of 1,000 and launched on June 24, 2014. The Underlying Index is constructed and maintained under the MSCI Global Investable Market Indices (“GIMI”) Methodology. The MSCI GIMI methodology is a rules-based methodology used for the construction of the MSCI Global Equity Index series. The Underlying Index represents the A Share constituents of the MSCI China All Securities Index. As of June 30, 2014, the Underlying Index had a free float adjusted market capitalization of \$401.052 billion and 220 constituents. Additional information about the Underlying Index is available on the Index Provider’s website.

KraneShares Bosera MSCI China A Share ETF

Investment Objective

The KraneShares Bosera MSCI China A Share ETF (the “Fund”) seeks to provide investment results that, before fees and expenses, correspond to the price and yield performance of a specific foreign equity securities benchmark. The Fund’s current benchmark is the MSCI China A Index (the “Underlying Index”).

Fees and Expenses of the Fund

The following table describes the fees and expenses you may pay if you buy and hold shares of the Fund. This table does not include the brokerage commissions that you may pay when purchasing or selling shares of the Fund.

Shareholder Fees (fees paid directly from your investment)	None
Annual Fund Operating Expenses⁽¹⁾ (expenses that you pay each year as a percentage of the value of your investment)	
Management Fees	1.10%
Distribution and/or Service (12b-1) Fees ⁽²⁾	0.00%
Other Expenses ⁽³⁾	0.00%
Total Annual Fund Operating Expenses	1.10%
Fee Waiver ⁽⁴⁾	0.25%
Total Annual Fund Operating Expenses After Fee Waiver	0.85%

- (1) *The expense information in the table has been restated to reflect the addition of a contractual fee waiver for the Fund.*
- (2) *Pursuant to a Distribution Plan, the Fund may bear a Rule 12b-1 fee not to exceed 0.25% per year of the Fund’s average daily net assets. However, no such fee is currently paid by the Fund, and the Board of Trustees has not currently approved the commencement of any payments under the Distribution Plan.*
- (3) *Other Expenses are based on estimated amounts for the current fiscal year.*
- (4) *Effective July 10, 2014, pursuant to the terms of an Expense Limitation Agreement, Krane has contractually agreed to reduce its management fee to the extent necessary to keep the Fund’s total annual operating expenses after fee waivers (except interest expense, taxes, Acquired Fund Fees and Expenses, if any, brokerage commissions, derivative counterparty fees, and other expenses connected with the execution of portfolio transactions, expenses of the Independent Trustees (including any Trustees’ counsel fees), extraordinary expenses, distribution fees and expenses paid by the Trust under any distribution plan adopted pursuant to Rule 12b-1 under the Investment Company Act of 1940, as amended (“1940 Act”), if any (collectively, “Excluded Expenses”)) from exceeding 0.85% of the Fund’s average daily net assets until July 31, 2015. The Fund’s expenses may be higher than 0.85% during the term of the Expense Limitation Agreement if the Fund incurs Excluded Expenses. The Expense Limitation Agreement may be terminated by the Board upon sixty (60) days’ written notice to Krane.*

Example

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds.

The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then sell all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses (including one year of capped expenses each period) remain the same. The Example does not reflect any brokerage commissions that you may pay on purchases and sales of Fund shares. Although your actual costs may be higher or lower, based on these assumptions your cost would be:

<u>1 Year</u>	<u>3 Years</u>
\$87	\$325

KraneShares Bosera MSCI China A Share ETF

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in Annual Fund Operating Expenses or in the Example, affect the Fund’s performance. For the fiscal period March 4, 2014 to March 31, 2014, the Fund’s portfolio turnover rate was 0% of the average value of its portfolio.

Principal Investment Strategies of the Fund

In order to seek to track the Underlying Index, under normal circumstances, the Fund will invest at least 80% of its total assets in securities of the Underlying Index and depositary receipts, including American Depositary Receipts (“ADRs”) representing such securities.

The Underlying Index is a free-float adjusted market capitalization weighted index that is designed to track the equity market performance of large-cap and mid-cap Chinese securities (“A Shares”). The Underlying Index aims to capture approximately 85% of the free float market capitalization of the investible domestic Chinese equity universe. Free-float market capitalization is calculated by multiplying a security’s price by the number of shares available in the market, rather than the total number of shares outstanding. As of June 30, 2014, the Underlying Index included approximately 441 securities of companies with a market capitalization range of US\$349 million to US\$22.8 billion and an average market capitalization of US\$1.8 billion. These amounts are subject to change. A Shares are equity securities issued by companies incorporated in mainland China and are traded in renminbi (“RMB”) on the Shenzhen or Shanghai Stock Exchanges. Subject to minor exceptions, under current regulations in the People’s Republic of China (“China” or the “PRC”), foreign investors can invest in A Shares only through certain foreign institutional investors that have obtained a license and quota from the Chinese regulators. Bosera Asset Management (International) Co., Ltd. (“Bosera”), the Fund’s Co-Adviser, has received a license as a Renminbi Qualified Foreign Institutional Investor (“RQFII”) from the China Securities Regulatory Commission (“CSRC”) and has received an initial A Shares quota by China’s State Administration of Foreign Exchange (“SAFE”) for use by the investment products it manages, including the Fund. Bosera may also obtain a license on behalf of the Fund as a Qualified Foreign Institutional Investor (“QFII”). Bosera, on behalf of the investment products it manages, may invest RMB in A Shares and other permitted China securities listed on the Shanghai and Shenzhen Stock Exchanges up to the relevant A Share quota(s).

In managing the Fund, Bosera uses a “passive” investment strategy — meaning that Bosera does not attempt to select securities based on their individual potential to outperform the Underlying Index or the market. In seeking to track the performance of the Underlying Index, Bosera intends to employ a replication strategy on behalf of the Fund, which means that the Fund will typically invest in substantially all of the components of the Underlying Index in approximately the same weights as they appear in the Underlying Index. Bosera performs this function at its discretion, subject to the investment strategy and restrictions of the Fund and oversight by Krane Funds Advisors, LLC (“Krane”) and the Board of Trustees. The Fund’s securities are expected to have, in the aggregate, investment characteristics (based on factors such as market capitalization and industry weightings), fundamental characteristics (such as return variability and yield) and liquidity measures similar to those of the Underlying Index. Unlike many investment companies, the Fund does not try to “beat” the Underlying Index and does not seek temporary defensive positions when markets decline or appear overvalued.

KraneShares Boserá MSCI China A Share ETF

The Fund may invest up to 20% of its assets in investments that are not included in the Underlying Index, but which Krane and/or Boserá believes will help the Fund track the Underlying Index. These investments include B shares of companies whose A Shares are in the Underlying Index, B shares of other companies listed on the Shanghai or Shenzhen Stock Exchanges, H shares of companies incorporated in mainland China and listed on the Hong Kong Stock Exchange, shares of Red Chip companies with controlling Chinese shareholders that are incorporated outside of mainland China and listed on the Hong Kong Stock Exchange, shares of China-related companies listed on the Hong Kong Stock Exchange, depository receipts representing securities not in the Underlying Index, derivative instruments, including swaps and futures contracts, including index futures, investment company securities, including exchange-traded funds (“ETFs”), and cash or cash equivalents, including money market funds.

To the extent the Underlying Index is concentrated in a particular industry, the Fund will necessarily be concentrated in that industry. As of June 30, 2014, the Underlying Index was concentrated in the financial services sector and had significant exposure to the industrials and consumer discretionary sectors. The Underlying Index is provided by MSCI, Inc., a U.S. (Delaware) corporation.

Principal Risks

As with all ETFs, a shareholder of the Fund is subject to the risk that his or her investment could lose money. The Fund may not achieve its investment objective and an investment in the Fund is not by itself a complete or balanced investment program. An investment in the Fund is not a deposit with a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. In addition to these risks, the Fund is subject to a number of additional risks that may affect the value of its shares, including:

China Risk. The Fund’s investments are concentrated in China, and therefore the Fund will be susceptible to adverse market, political, regulatory, and geographic events affecting China. The Chinese economy is generally considered an emerging market and can be significantly affected by economic and political conditions and policy in China and surrounding Asian countries. In addition, the Chinese economy is export-driven and highly reliant on trade. A downturn in the economies of China’s primary trading partners could slow or eliminate the growth of the Chinese economy and adversely impact the Fund’s investments. The Chinese government strictly regulates the payment of foreign currency denominated obligations and sets monetary policy, and may introduce new laws and regulations that have an adverse effect on the Fund. Although China has begun the process of privatizing certain sectors of its economy, privatized entities may lose money and/or be re-nationalized. Accordingly, an investment in the Fund involves a risk of total loss. In the Chinese securities markets, a small number of issuers may represent a large portion of the entire market. The Chinese securities markets are characterized by relatively frequent trading halts and low trading volume, resulting in substantially less liquidity and greater price volatility. These risks may be more pronounced for the A Share market than for Chinese securities markets generally because the A Share market is subject to greater government restrictions and control, including the risk of nationalization or expropriation of private assets which could result in a total loss of an investment in the Fund. However, the risks associated with investing in China apply whether the Fund invests in A Shares, B shares, H shares, Red Chips, or shares of China-related companies listed on the Hong Kong Stock Exchange, or if the Fund obtains exposure to China through depository receipts or derivative instruments designed to obtain exposure to Chinese companies.

KraneShares Bosera MSCI China A Share ETF

Specific Risks of Investing in the A-Shares Market

An RQFII or QFII license and A Share quota are required to invest in A Shares. The ability of the Fund to achieve its investment objective by tracking the performance of the Underlying Index is dependent on the continuous availability of A Shares and Bosera's ability to maintain a continuous supply of A Shares quota and willingness to allocate sufficient portions of that quota for the Fund's use. If the QFII/RQFII A Share quota is not used within a limited time period, it may be lost or reduced. The QFII and RQFII programs are an exception to Chinese laws, which generally restrict foreign investment in A Shares. The RQII rules were only recently announced and are novel. Chinese regulators may alter or eliminate the programs at any time. Should the A Share quota be or become inadequate to meet the investment needs of the Fund or if Bosera is unable to maintain its RQFII or QFII status or fails to allocate sufficient quota for the Fund's use, the Fund is expected to be adversely affected. In addition, the A Share quota may be reduced or revoked by the Chinese regulators if, among other things, Bosera fails to observe SAFE and other applicable Chinese regulations, which could lead to other adverse consequences, including the requirement that the Fund dispose of its A Shares holdings at an inopportune time.

If the Fund is unable to obtain sufficient exposure to the performance of the Underlying Index due to the limited availability of A Share quota, the Fund could seek exposure to the component securities of the Underlying Index by investing in depositary receipts, H shares or B shares of the component securities. The Fund may also use derivatives or invest in ETFs that provide comparable exposures. If necessary, the Fund may suspend the sale of shares in Creation Units until Krane and Bosera determine that the requisite exposure to the component securities of the Underlying Index is obtainable. During the period that creations are suspended, Fund shares may trade at a significant premium or discount to net asset value (the "NAV"). Alternatively, the Fund may change its investment objective and another index of Chinese-related stocks. In extreme circumstances beyond the control of the Fund, the Fund may incur significant losses due to limited investment capabilities, including based on investment restrictions on RQFIIs and QFIIs (if a QFII license is obtained), illiquidity of the Chinese securities markets, or delay or disruption in execution or settlement of trades.

A Shares may be subject to more frequent and/or extended trading halts than other exchange-traded securities.

Custody Risks. In accordance with Chinese regulations and the terms of the RQFII or QFII license, A Shares are held in the joint names of the Fund and Bosera. While Bosera may not use such an account for any purpose other than for maintaining the Fund's assets, the Fund's assets may not be as well protected as they would be if it were possible for them to be registered and held solely in the name of the Fund. There is a risk that creditors of Bosera may assert that the securities are owned by Bosera and that regulatory actions taken against Bosera by PRC government authorities may affect the Fund.

Tax Risk. Although Chinese law provides for a 10% withholding tax ("WHT") on capital gains realized by non-residents, significant uncertainties surround the implementation of this law, particularly with respect to trading of PRC securities by QFIIs and RQFIIs. In light of this uncertainty and in order to meet this potential WHT liability for capital gains, Krane reserves the right to establish a reserve for any WHT on such gains that may be assessed by the Chinese tax authorities. If the Fund establishes such a reserve but is not ultimately subject to the WHT, shareholders who redeemed or sold their shares while the reserve was in place will have

KraneShares Bosera MSCI China A Share ETF

effectively borne the burden of the WHT but will not benefit from the release of the reserve. The amount of any such provision will be disclosed in the Fund's annual and semi-annual reports to investors. Investors should note that such provision may be excessive or inadequate to meet actual WHT liabilities (which could include interest and penalties) on the Fund's investments. As a result, investors may be advantaged or disadvantaged depending on the final rules of the relevant PRC tax authorities. In addition, Krane intends to make relevant provision on dividends from A Shares and interest (if any) if tax is not withheld at the source at the time such income is received.

Currency, Capital Controls and Currency Conversion Risk. Economic conditions and political events may lead to foreign government intervention and the imposition of additional or renewed capital controls, which may impact the ability of the Fund to buy, sell or otherwise transfer securities or currency, and limit the Fund's ability to pay redemptions, and cause the Fund to decline in value. Although the RMB is not presently freely convertible, rather it is subject to the approval of SAFE and other relevant authorities, repatriations by RQFIIIs are permitted daily and Chinese authorities have indicated their plans to move to a fully freely convertible RMB. There is no assurance, however, that repatriation restrictions will not be (re-)imposed in the future. Because the Fund's NAV is determined on the basis of U.S. dollars, the Fund may lose value if the RMB depreciates against the U.S. dollar, even if the local currency value of the Fund's holdings goes up.

The Fund may also be subject to delays in converting or transferring U.S. dollars to RMB for the purpose of purchasing A Shares. This may hinder the Fund's performance, including because any delay could result in the Fund missing an investment opportunity and purchasing securities at a higher price than originally intended, or incurring cash drag.

Depository Receipt Risk. The Fund may hold the securities of Chinese and other non-U.S. companies in the form of depository receipts, including ADRs. The underlying securities of the depository receipts in the Fund's portfolio are subject to fluctuations in foreign currency exchange rates that may affect the value of the Fund's portfolio. In addition, the value of the securities underlying the depository receipts may change materially when the U.S. markets are not open for trading, which will affect the value of the depository receipts. Like direct investments in foreign securities, investments in depository receipts involve political and economic risks distinct from those associated with investing in the securities of U.S. issuers.

Derivatives Risk, Including the Risk of Investments in Swaps and Futures. The Fund may invest in swaps or futures in seeking to track the performance of the Underlying Index. Investments in such derivatives linked to the performance of A Shares are subject to general risks associated with A Shares and the Chinese regulatory system. Because a swap is an obligation of the counterparty rather than a direct investment in A Shares, the Fund may suffer losses potentially equal to, or greater than, the full value of the swap if the counterparty fails to perform its obligations under the swap. Counterparty risks are compounded by the fact that there are only a limited number of firms that are able to obtain A Share quota and, therefore, willing to be counterparties to swaps based on A Shares. Investments in futures or swaps may expose the Fund to leverage, which may cause the Fund to be more volatile than if it had not been leveraged.

Emerging Markets Risk. The Fund's investments in emerging markets are subject to greater risk of loss than investments in developed markets. This is due to, among other things, greater market volatility, lower trading volume, political and economic instability, greater risk of market shutdown and more governmental limitations on foreign investments than typically found in developed markets.

KraneShares Boserá MSCI China A Share ETF

Equity Securities Risk. An investment in the Fund involves risks similar to those of investing in any fund holding equity securities, such as market fluctuations, changes in interest rates and perceived trends in stock prices. Equity securities are subject to volatile changes in value and their values may be more volatile than other asset classes.

ETF Cash Transactions Risk. Like other ETFs, the Fund sells and redeems its shares only in large blocks called Creation Units and only to “Authorized Participants.” Unlike many other ETFs, however, the Fund expects to effect all of its creations and redemptions for cash, rather than in-kind securities. Thus, an investment in the Fund may be less tax-efficient than an investment in other ETFs as the Fund may recognize a capital gain that it could avoid by making redemptions in kind. As a result, the Fund may pay out higher annual capital gains distributions than ETFs that redeem in-kind. Further, paying redemption proceeds in cash rather than through in-kind delivery of portfolio securities may require the Fund to dispose of or sell portfolio investments to obtain the cash needed to distribute redemption proceeds at an inopportune time.

Foreign Securities Risk. Investments in securities of non-U.S. issuers involve certain risks that may not be present with investments in securities of U.S. issuers, such as risk of loss due to foreign currency fluctuations or to political or economic instability. There may be less information publicly available about non-U.S. issuers. Non-U.S. issuers may also be subject to different accounting, auditing, financial reporting and investor protection standards than U.S. issuers.

Income from securities of non-U.S. issuers, including, in the case of Chinese issuers, gain on the sale of such securities, may be subject to foreign taxes. Even if the Fund qualifies to pass these taxes through to shareholders, your ability to claim a credit for such taxes may be limited, particularly in the case of taxes on capital gains.

Industry Concentration Risk. To the extent that the Fund’s investments are concentrated in a particular industry (because the Underlying Index is concentrated in such industry), the Fund will be susceptible to loss due to adverse occurrences affecting that industry to a greater extent than if the Fund’s assets were invested in a wider variety of industries.

Financial Services Sector Risk. The Underlying Index, and thus the Fund, may be concentrated in the financial services sector. Performance of companies in the financial services sector may be adversely impacted by many factors, including, among others, government regulations, economic conditions, credit rating downgrades, changes in interest rates, and decreased liquidity in credit markets. This sector has experienced significant losses in the recent past, and the impact of more stringent capital requirements and of recent or future regulation on any individual financial company or on the sector as a whole cannot be predicted.

Investment in Investment Companies Risk. The Fund may invest in shares of other investment companies, including ETFs. As a result, the Fund will indirectly be exposed to the risks of investments by such funds. Moreover, the Fund will incur its pro rata share of the expenses of the underlying investment companies’ expenses.

Large-Capitalization Risk. Returns on investments in securities of large companies could trail the returns on investments in securities of small and mid-sized companies.

Management Risk. Because the Fund may not fully replicate the Underlying Index and may hold less than the total number of securities in the Underlying Index, the Fund is subject to management risk. This is the risk that Boserá’s security selection process may not produce the intended results.

KraneShares Bosera MSCI China A Share ETF

Market Risk. The values of securities in the Underlying Index could decline generally or could underperform other investments. In addition, there is a risk that policy changes by the U.S. Government and/or Federal Reserve, such as increasing interest rates or the tapering of quantitative easing measures aimed at stimulating the U.S. economy, could cause increased volatility in global financial markets and higher levels of Fund redemptions, which could have a negative impact on the Fund.

Mid-Capitalization Risk. Investing in the securities of medium capitalization companies involves greater risk and the possibility of greater price volatility than investing in larger capitalization companies and more established companies. Since medium-sized companies may have limited operating histories, product lines and financial resources, the securities of these companies may lack sufficient market liquidity and can be sensitive to expected changes in interest rates, borrowing costs and earnings.

New Adviser Risk. Bosera is a newly registered investment adviser and has not previously advised a registered investment company.

Passive Investment Risk. The Fund is not actively managed and therefore may not sell a security due to current or projected underperformance of the security, industry or sector. The Fund's use of a replication strategy may cause it to have higher portfolio turnover, custody and brokerage expenses than it would if it employed representative sampling to seek to track the Underlying Index.

Secondary Market Trading Risk. Investors buying or selling shares in the secondary market will normally pay brokerage commissions, which are often a fixed amount and may be a significant proportional cost for investors buying or selling relatively small amounts of shares.

Shares of the Fund May Trade at Prices Other Than NAV. Although it is expected that the market price of the shares of the Fund will approximate the Fund's NAV, there may be times when the market price of the shares is more than the NAV intra-day (premium) or less than the NAV intra-day (discount). This risk is heightened in times of market volatility or periods of steep market declines.

Tax Risk. In order to qualify for the favorable tax treatment generally available to regulated investment companies, the Fund must satisfy income, asset diversification and distribution requirements each year. If the Fund were to fail to qualify as a regulated investment company, it would be taxed in the same manner as an ordinary corporation, and distributions to its shareholders would not be deductible by the Fund in computing its taxable income.

Tracking Error Risk. The Fund's return may not match or achieve a high degree of correlation with the return of the Underlying Index.

Trading Risk. Secondary market trading in Fund shares may be halted by the NYSE Arca, Inc. (the "Exchange") because of market conditions or other reasons. If a trading halt occurs, a shareholder may temporarily be unable to purchase or sell shares of the Fund. In addition, although the Fund's shares are listed on the Exchange, there can be no assurance that an active trading market for shares will develop or be maintained.

Performance Information

The Fund commenced operations on March 4, 2014 and therefore has not yet completed a full calendar year of performance. Once the Fund has completed a full calendar year of operations, a bar chart and table will be included that will provide some indication of the risks of investing in the Fund by showing the variability of the Fund's return based on net assets and comparing the variability of

KraneShares Bosera MSCI China A Share ETF

the Fund's return to a broad measure of market performance. Once available, the Fund's current performance information will be available at www.kraneshares.com. Past performance does not necessarily indicate how the Fund will perform in the future.

Management

Investment Manager and Co-Adviser

Krane Funds Advisors, LLC serves as the investment manager to the Fund.

Bosera Asset Management (International) Co., Ltd. ("Bosera"), operating out of Hong Kong, serves as the Co-Adviser to the Fund.

Portfolio Manager

Ms. Jean Kong, a Fund Manager at Bosera, has managed the Fund since the Fund's inception.

Purchase and Sale of Fund Shares

Shares may be purchased and redeemed from the Fund only in "Creation Units" of 50,000 shares, or multiples thereof. As a practical matter, only institutions and large investors, such as market makers or other large broker-dealers, purchase or redeem Creation Units. Most investors will buy and sell shares of the Fund on the Exchange. Individual shares can be bought and sold throughout the trading day like other publicly traded securities through a broker-dealer on the Exchange. These transactions do not involve the Fund. The price of an individual Fund share is based on market prices, which may be different from its NAV. As a result, the Fund's shares may trade at a price greater than the NAV (at a premium) or less than the NAV (at a discount). Most investors will incur customary brokerage commissions and charges when buying or selling shares of the Fund through a broker-dealer.

Tax Information

Fund distributions are generally taxable as ordinary income or capital gains (or a combination of both), unless your investment is in an IRA or other tax-advantaged retirement account.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase Fund shares through a broker-dealer or other financial intermediary (such as a bank), the Fund and its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your sales person to recommend the Fund over another investment. Ask your sales person or visit your financial intermediary's website for more information.

Additional Information About the Fund

Additional Investment Objective, Principal Strategies, Underlying Index and Principal Risks Information

Investment Objective. The KraneShares Boserá MSCI China A Share ETF seeks to provide investment results that, before fees and expenses, correspond to the price and yield performance of a specific foreign equity securities benchmark. The Fund's current benchmark is the MSCI China A Index (the "Underlying Index"). The Fund's investment objective is non-fundamental. As a result, it may be changed without shareholder approval upon 60 days' prior written notice to shareholders.

Principal Investment Strategies. In managing the Fund, Boserá uses a "passive" investment strategy — meaning that Boserá does not attempt to select securities based on their individual potential to outperform the Underlying Index or the market. In seeking to track the performance of the Underlying Index, Boserá intends to employ a replication strategy on behalf of the Fund, which means that the Fund will typically invest in substantially all of the components of the Underlying Index in approximately the same weights as they appear in the Underlying Index. If the Fund is unable to fully replicate the Underlying Index, it may use a representative sampling index strategy. "Representative sampling" is an indexing strategy that involves investing in a representative sample of securities that collectively have an investment profile similar to the Underlying Index.

Boserá performs its functions for the Fund at its discretion, subject to the investment strategy and restrictions of the Fund and oversight by Krane and the Board of Trustees. The Fund's securities are expected to have, in the aggregate, investment characteristics (based on factors such as market capitalization and industry weightings), fundamental characteristics (such as return variability and yield) and liquidity measures similar to those of the Underlying Index. There also may be instances in which the Fund may choose to underweight or overweight a security in the Underlying Index, purchase securities not included in the Underlying Index that it believes are appropriate to substitute for certain securities in the Underlying Index or utilize various combinations of other available investment techniques to seek to track as closely as possible, before fees and expenses, the price and yield performance of the Underlying Index. The Fund may sell securities that are represented in the Underlying Index in anticipation of their removal from the Underlying Index or purchase securities not represented in the Underlying Index in anticipation of their addition to the Underlying Index.

In seeking to track the Underlying Index, under normal circumstances, the Fund will invest at least 80% of its total assets in securities of the Underlying Index and depositary receipts representing such securities. Unlike many investment companies, the Fund does not try to "beat" the Underlying Index and does not seek temporary defensive positions when markets decline or appear overvalued. Krane and Boserá seek for the Fund to have a tracking error relative to the performance of its Underlying Index of less than five percent.

The Fund may invest up to 20% of its assets in investments that are not included in the Underlying Index, but which Krane and/or Boserá believes will help the Fund track its Underlying Index, including B shares of companies whose A Shares are listed on the Underlying Index, B shares of other companies, H shares, Red Chips, shares of China-related companies listed on the Hong Kong Stock Exchange, depositary receipts representing securities not in the Underlying Index, swap contracts, other securities not in the Underlying Index, investment company securities, including ETFs, cash and cash equivalents, money market instruments, such as repurchase agreements or money market funds (including money market funds advised by Krane, Boserá or their affiliates subject to applicable limitations under the 1940 Act or exemptions therefrom), convertible securities, structured notes (notes on which the amount of principal repayment and interest payments are based on the movement of one or more specified factors, such as the movement of a particular stock or stock

Additional Information About the Fund

index) and in futures contracts, including index futures. The Fund expects to use futures contracts to a limited extent in seeking performance that corresponds to the Underlying Index. Bosera does not engage in temporary defensive investing and seeks to keep the Fund's assets fully invested in all market environments. As a result, the Fund may be more vulnerable to adverse market movements than a fund that engages in temporary defensive strategies.

Bosera may, but is not required to, apply for an increase of the initial A Share quota if it uses the initial A Share quota in its entirety, but there is no assurance that additional quota will be granted. If an A Share quota is not used within a limited time period, it may be lost or reduced.

To the extent the Underlying Index is concentrated in a particular industry, the Fund is expected to be concentrated in that industry.

Each of the policies described in this Prospectus, including the 80% policy of the Fund, constitutes a non-fundamental policy that may be changed by the Board of Trustees of the Trust without shareholder approval upon 60 days prior written notice to shareholders. Certain fundamental policies of the Fund are set forth in the Fund's SAI.

Underlying Index

The Fund's Underlying Index is calculated and maintained by MSCI Inc. (the "Index Provider").

The Underlying Index is a free float adjusted market capitalization weighted index that is compiled and published by the Index Provider. Free-float market capitalization is calculated by multiplying a security's price by the number of shares available in the market, rather than the total number of shares outstanding. The Underlying Index is designed to track the equity market performance of large-cap and mid-cap Chinese securities listed on the Shanghai Stock Exchange or the Shenzhen Stock Exchange. The Underlying Index aims to capture approximately 85% of the free float market capitalization of the investible Chinese equity universe.

The Underlying Index was created and launched on May 10, 2005 with a base value of 1,000 as of November 30, 2004. The Underlying Index is constructed and maintained under the MSCI Global Investable Market Indices ("GIMI") Methodology. The MSCI GIMI methodology is a rules-based methodology used for the construction of the MSCI Global Equity Index series. As of June 30, 2014, the Underlying Index had a free float adjusted market capitalization of \$822,696 million and 441 constituents. Additional information about the Underlying Index is available on the Index Provider's website.

Principal Risks of Investing in the Fund. The following section provides additional information regarding certain of the principal risks of investing in the Fund.

China Risks. Whether the Fund invests indirectly in China by investing in A Shares available through Bosera in its capacity as an RQFII or QFII or through B shares, H shares, Red Chips, or shares of China-related companies listed on the Hong Kong Stock Exchange, or if the Fund obtains exposure to China through depositary receipts or derivative instruments or other means designed to obtain exposure to Chinese companies, as described in this Prospectus, investments in China involve certain risks and special considerations, including the following:

A Shares. An RQFII or QFII license and A Share quota are required to invest in A Shares. The Fund's investment in A Shares is limited to the A Shares quota obtained by Bosera in its capacity as RQFII or QFII and allocated to the Fund. Currently, there are two stock exchanges in mainland China, the Shanghai and Shenzhen Stock Exchanges. The Shanghai and Shenzhen Stock Exchanges are supervised by the CSRC and are highly automated with trading and settlement

Additional Information About the Fund

executed electronically. The Shanghai and Shenzhen Stock Exchanges are substantially smaller, less liquid and more volatile than the securities markets in the United States.

The Shanghai Stock Exchange commenced trading on December 19, 1990, the Shenzhen Stock Exchange commenced trading on July 3, 1991. The Shanghai and Shenzhen Stock Exchanges divide listed shares into two classes: A Shares and B shares. Companies whose shares are traded on the Shanghai and Shenzhen Stock Exchanges that are incorporated in mainland China may issue both A Shares and B shares. In China, the A Shares and B shares of an issuer may only trade on one exchange. A Shares and B shares may both be listed on either the Shanghai or Shenzhen Stock Exchanges. Both classes represent an ownership interest comparable to a share of common stock and all shares are entitled to substantially the same rights and benefits associated with ownership. A Shares are traded on the Shanghai and Shenzhen Stock Exchanges in RMB. A shares may be subject to more frequent and/or extended trading halts than other exchange-traded securities.

As of April 2014, the CSRC had granted a total of US \$34.4 billion in quotas to RQFII institutions and US \$54.4 billion to QFII investors bringing total investment quotas to US\$88.8 billion in A Shares and other permitted Chinese securities. Because restrictions continue to exist and capital therefore cannot flow freely into the A Share market, it is possible that in the event of a market disruption, the liquidity of the A Share market and trading prices of A Shares could be more severely affected than the liquidity and trading prices of markets where securities are freely tradable and capital therefore flows more freely. The Fund cannot predict the nature or duration of such a market disruption or the impact that it may have on the A Share market and the short-term and long-term prospects of its investments in the A Share market.

The Chinese government has in the past taken actions that benefitted holders of A Shares. As A Shares become more available to foreign investors, such as the Fund, the Chinese government may be less likely to take action that would benefit holders of A Shares. In addition, there is no guarantee that Boserá will continue to maintain its existing A Share quota or be able to obtain additional A Share quota if the A Share quota is reduced or eliminated by SAFE at some point in the future. Boserá has received an initial A Share quota. If the Fund is unable to obtain sufficient exposure to the performance of the Underlying Index due to the limited availability of A Share quota or Boserá not allocating a sufficient portion of the quota for the Fund's use, the Fund could seek exposure to the component securities of the Underlying Index by investing in depositary receipts on the component securities and Hong Kong listed versions of the component securities. Consistent with its exemptive relief, the Fund may, to a limited extent, where applicable, also invest in B shares issued by the same companies that issue A Shares that are in the Underlying Index. The Fund may also use derivatives or invest in ETFs that can obtain comparable exposures. If necessary, the Fund may suspend the sale of Creation Units until Krane and Boserá determine that the requisite exposure to the component securities of the Underlying Index is obtainable. During the period that creations are suspended, Fund shares could trade at a significant premium or discount to NAV and the Fund could experience substantial redemptions. Alternatively, the Fund may change its investment objective and thus track another of Chinese-related stocks, including, but not limited, to A Shares. In extreme circumstances beyond the control of the Fund, the Fund may incur significant losses due to limited investment capabilities, including based on investment objectives or strategies, due to investment restrictions on RQFIIs and QFIIs (if a QFII license is obtained), illiquidity of the Chinese securities markets, or delay or disruption in execution or settlement of trades. Should

Additional Information About the Fund

the A Share quota allocated for the Fund's use be or become inadequate to meet the investment needs of the Fund, the Fund is expected to be adversely affected.

The Chinese government limits foreign investment in the securities of certain Chinese issuers entirely. China may also impose higher local tax rates on transactions involving certain companies. These restrictions or limitations may have adverse effects on the liquidity and performance of the Fund holdings as compared to the performance of the Underlying Index. This may increase the risk of tracking error and, at the worst, the Fund may not be able to achieve its investment objective.

From time to time, certain of the companies in which the Fund expects to invest may operate in, or have dealings with, countries subject to sanctions or embargoes imposed by the U.S. Government and the United Nations and/or countries identified by the U.S. Government as state sponsors of terrorism. A company may suffer damage to its reputation if it is identified as a company which operates in, or has dealings with, countries subject to sanctions or embargoes imposed by the U.S. Government and the United Nations and/or countries identified by the U.S. Government as state sponsors of terrorism. As an investor in such companies, the Fund will be indirectly subject to those risks.

Custody Risks. The Fund is required to select a PRC sub-custodian ("PRC Custodian"). The PRC Custodian maintains the Fund's investments in A Shares in the PRC to ensure their compliance with the rules and regulations of the CSRC and the People's Bank of China. A Shares that are traded on the Shanghai or Shenzhen Stock Exchange are dealt and held in book-entry form through the China Securities Depository and Clearing Corporation Limited ("CSDCC"). A Shares, purchased by Boserá, in its capacity as an RQFII or QFII, may be received by the CSDCC as credited to a securities trading account maintained by the PRC Custodian in the joint names of the Fund and Boserá. The PRC Custodian fees are paid by the Fund. Boserá may not use the account for any other purpose than for maintaining the Fund's assets. However, given that the securities trading account will be maintained in the joint names of Boserá and the Fund, the Fund's assets may not be as well protected as they would be if it were possible for them to be registered and held solely in the name of the Fund. In particular, there is a risk that creditors of Boserá may assert that the securities are owned by Boserá and not the Fund, and that a court would uphold such an assertion, in which case creditors of Boserá could seize assets of the Fund. Because Boserá's A Share quota is in the name of Boserá and the Fund, there is also a risk that regulatory actions taken against Boserá may affect the Fund.

Available Disclosure About Chinese Companies. Disclosure and regulatory standards in emerging market countries, such as China, are in many respects less stringent than U.S. standards. There is substantially less publicly available information about Chinese issuers than there is about U.S. issuers. Therefore, disclosure of certain material information may not be made, and less information may be available to the Fund and other investors than would be the case if the Fund's investments were restricted to securities of U.S. issuers. Chinese issuers are subject to accounting, auditing and financial standards and requirements that differ, in some cases significantly, from those applicable to U.S. issuers. In particular, the assets and profits appearing on the financial statements of a Chinese issuer may not reflect its financial position or results of operations in the way they would be reflected had such financial statements been prepared in accordance with U.S. Generally Accepted Accounting Principles.

Chinese Corporate and Securities Law. The Fund's rights with respect to its investments in A Shares, if any, generally will not be governed by U.S. law, and instead will generally be

Additional Information About the Fund

governed by Chinese law. China operates under a civil law system based on statutes enacted by various state bodies with economic matters such as foreign investment, company organization and governance, taxation and trade. These laws are relatively recent with published court opinions based on these being limited. Further, court precedent is not binding. Thus, there is no binding precedent to interpret existing statutes, and there is uncertainty regarding the implementation of existing law.

Legal principles relating to corporate affairs and the validity of corporate procedures, directors' fiduciary duties and liabilities and stockholders' rights often differ from those that may apply in the United States and other countries. Chinese laws providing protection to investors, such as laws regarding the fiduciary duties of officers and directors, are undeveloped and will not provide investors, such as the Fund, with protection in all situations where protection would be provided by comparable law in the United States. China lacks a national set of laws that address all issues that may arise with regard to a foreign investor such as the Fund. It may therefore be difficult for the Fund to enforce its rights as an investor under Chinese corporate and securities laws, and it may be difficult or impossible for the Fund to obtain a judgment in court. Moreover, the regulations which apply to investments by RQFIs and QFIIs, including the repatriation of capital, are relatively new. The application and interpretation of such regulations are therefore relatively untested. In addition, PRC authorities have broad discretion under such investment regulations and there is little precedent or certainty evidencing how such discretion will be exercised now or in the future.

Chinese Securities Markets. The securities markets in China have a limited operating history and are not as developed as those in the United States. These markets, historically, have had greater volatility than markets in the United States and some other countries. In addition, there is less regulation and monitoring of Chinese securities markets and the activities of investors, brokers and other participants than in the United States. Accordingly, issuers of securities in China generally are not subject to the same degree of regulation as are U.S. issuers with respect to such matters as insider trading rules, tender offer regulation, stockholder proxy requirements and the requirements mandating timely disclosure of information. Stock markets in China are in the process of change and further development. This may lead to additional trading volatility, difficulty in the settlement and recordation of transactions, and difficulty in interpreting and applying the relevant regulations.

Disclosure of Interests and Short Swing Profit Rule. The Fund may be subject to regulations promulgated by the CSRC, which currently require the Fund to make certain public disclosures when the Fund and parties acting in concert with the Fund acquire 5% or more of the issued securities of a listed company (which include A Shares of the listed company). The relevant PRC regulations presumptively treat all affiliated investors and investors under common control as parties acting in concert. As such, the Fund may be deemed as a "concerted party" of other funds managed by Krane, Boserá or their affiliates and therefore may be subject to the risk that the Fund's holdings may be required to be reported in the aggregate with the holdings of such other funds should the aggregate holdings trigger the reporting threshold under the PRC law. If the 5% shareholding threshold is triggered, the Fund would be required to file its report within three days. During the time limit for filing the report, a trading freeze applies and the Fund would not be permitted to make subsequent trades in the invested company's securities. Any such trading freeze may impair the ability of the Fund to achieve its investment objective and undermine the Fund's performance.

Additional Information About the Fund

Further, subject to the interpretation of PRC courts and PRC regulators, the operation of the PRC short swing profit rule may prevent the Fund from reducing its holdings in a company 5% or more of whose shares are deemed to be held by the Fund and its affiliates within six months of the last purchase of shares of the company. The Fund could be subject to these restrictions even though an entity deemed to be an affiliate (and not the Fund) may have triggered the restrictions. Nonetheless, if the Fund violates the rule, it may be required by the listed company to return any profits realized from such trading to the company. In addition, the Fund could not repurchase securities of the listed company within six months of such sale. Finally, under PRC civil procedures, the Fund's assets may be frozen to the extent of the claims made by the company in question.

Foreign Currency Considerations. The Fund's assets will be invested primarily in the securities of issuers in China and the income received by the Fund will be primarily in RMB. Meanwhile, the Fund will compute and expects to distribute its income in U.S. dollars, and the computation of income will be made on the date that the income is earned by the Fund at the foreign exchange rate in effect on that date. Any gain or loss attributable to fluctuations in exchange rates between the time the Fund accrues income or gain and the time the Fund converts such income or gain from RMB to the dollar is generally treated as ordinary income or loss. Therefore, if the value of the RMB increases relative to the U.S. dollar between the accrual of income and the time at which the Fund converts the RMB to U.S. dollars, the Fund will recognize ordinary income when the RMB is converted.

Furthermore, the Fund may incur costs in connection with conversions between U.S. dollars and RMB. Foreign exchange dealers realize a profit based on the difference between the prices at which they are buying and selling various currencies. Thus, a dealer normally will offer to sell a foreign currency to the Fund at one rate, while offering a lesser rate of exchange should the Fund desire immediately to resell that currency to the dealer. The Fund will conduct its foreign currency exchange transactions either on a spot (i.e., cash) basis at the spot rate prevailing in the foreign currency exchange market, or through entering into forward, futures or options contracts to purchase or sell foreign currencies.

RMB can be further categorized into CNY (onshore RMB) and CNH (offshore RMB), traded outside the PRC. CNY and CNH are traded at different exchange rates and their exchange rates may not move in the same direction. Although there has been a growing amount of RMB held offshore, CNH cannot be freely remitted into the PRC and is subject to certain restrictions, and vice versa. The Fund may also be adversely affected by the exchange rates between CNY and CNH.

The use of currency transactions could result in the Fund's incurring losses as a result of the imposition of exchange controls, exchange rate regulation, suspension of settlements or the inability to deliver or receive a specified currency.

The Fund may be subject to delays in converting or transferring U.S. dollars to RMB for the purpose of purchasing A Shares. This may hinder the Fund's performance, including because any delay could result in the Fund missing an investment opportunity, purchasing securities at a higher price than originally intended, or incurring cash drag.

Foreign Exchange Control. RMB is currently not a freely convertible currency as it is subject to foreign exchange control, fiscal policies and repatriation restrictions imposed by the Chinese government. The Chinese government heavily regulates the domestic exchange of foreign

Additional Information About the Fund

currencies within China. Chinese law requires that all domestic transactions must be settled in RMB, places significant restrictions on the remittance of foreign currency and strictly regulates currency exchange from RMB. Under SAFE regulations, Chinese corporations may only purchase foreign currencies through government approved banks. In general, Chinese companies must receive approval from or register with the Chinese government before investing in certain capital account items, including direct investments and loans, and must thereafter maintain separate foreign exchange accounts for the capital items. Foreign investors may only exchange foreign currencies at specially authorized banks after complying with documentation requirements. Such control of currency conversion and movements in the RMB exchange rates may adversely affect the operations and financial results of companies in the PRC. The international community has requested that China ease its restrictions on currency exchange, but it is unclear whether the Chinese government will change its policy.

Since 2005, the exchange rate of the RMB is no longer strictly pegged to the U.S. dollar. The RMB has now moved to a managed floating exchange rate based on market supply and demand with reference to a basket of foreign currencies. The daily trading price of the RMB against other major currencies in the inter-bank foreign exchange market would be allowed to float within a narrow band around the central parity published by the People's Bank of China. As the exchange rates may be based on market forces, the exchange rates for RMB against other currencies, including the U.S. dollar, are susceptible to movements based on external factors. The possibility that the appreciation of RMB will be accelerated cannot be excluded. On the other hand, there can be no assurance that the RMB will not be subject to devaluation. Any devaluation of the RMB could adversely affect the value of the Fund's investments.

The PRC government imposes restrictions on the remittance of RMB out of and into China. The Fund will be required to remit RMB from Hong Kong to the PRC to settle the purchase of A Shares and other permissible securities by the Fund from time to time. In the event such remittance is disrupted, the Fund could be adversely affected and, among other matters, will not be able to fully replicate the Underlying Index by investing in the relevant A Shares and this may increase the tracking error of the Fund. Any delay in repatriation of RMB out of China may result in delay in payment of redemption proceeds to the redeeming investors. The Chinese government's policies on exchange control and repatriation restrictions are subject to change, and the Fund's performance may be adversely affected.

Hong Kong Policy. The economy of Hong Kong has few natural resources and any fluctuation or shortage in the commodity markets could have a significant adverse effect on the Hong Kong economy. Hong Kong is also heavily dependent on international trade and finance. Additionally, the continuation of current political, economic, legal and social policies of Hong Kong is dependent on and subject to the control of the Chinese government.

As part of Hong Kong's transition from British to Chinese sovereignty in 1997, China agreed to allow Hong Kong to maintain a high degree of autonomy with regard to its political, legal and economic systems for a period of at least 50 years. China controls matters that relate to defense and foreign affairs. Under the agreement, China does not tax Hong Kong, does not limit the exchange of the Hong Kong dollar for foreign currencies and does not place restrictions on free trade in Hong Kong. However, there is no guarantee that China will continue to honor the agreement, and China may change its policies regarding Hong Kong at any time. Any such change could adversely affect market conditions and the performance of the Chinese economy and, thus, the value of securities in the Fund's portfolio.

Additional Information About the Fund

Inflation. Economic growth in China has also historically been accompanied by periods of high inflation. Beginning in 2004, the Chinese government commenced the implementation of various measures to control inflation, which included the tightening of the money supply, the raising of interest rates and more stringent control over certain industries. If these measures are not successful, and if inflation were to steadily increase, the performance of the Chinese economy and the Fund's investments could be negatively impacted.

Investment and Repatriation Restrictions. Investments by the Fund in PRC securities are subject to governmental pre-approval limitations on the quantity that the Fund may purchase or limits on the classes of securities in which the Fund may invest.

Repatriations by RQFIs are currently permitted daily and are not subject to repatriation restrictions or prior regulatory approval. However, there is no assurance that PRC rules and regulations will not change or that repatriation restrictions will not be imposed in the future. Further, such changes to the PRC rules and regulations may be applied retroactively. Any restrictions on repatriation of the Fund's portfolio investments may have an adverse effect on the Fund's ability to meet redemption requests. If a QFII license is obtained and used, all repatriations of gains and income on A Shares would require the approval of SAFE. Further, no single underlying foreign investor investing through a QFII (e.g., the Fund) may hold more than 10% of the total outstanding shares in one listed company and all foreign investors investing through QFIIs (e.g., the Fund) may not hold, in aggregate, more than 30% of the total outstanding shares in one listed company. Such limits may not apply where foreign investors make strategic investment in listed companies in accordance with the Measures for the Administration of Strategic Investments in Listed Companies by Foreign Investors.

If the Fund obtains and invests directly in the A Share market with a QFII license, Krane and/or Boserá will be required to transfer the entire investment principal for its A Share quota into a local sub-custodian account within such time period as specified by SAFE (up to six months). Following this, investment capital will be subject to an initial lock-up period (currently three months if the Fund is deemed to be an "open end fund" under Chinese regulations), during which the assets may not be repatriated to the United States, even if they are never invested in A Shares. Following that time, investment principal and earnings may generally only be repatriated with the approval of SAFE, although up to \$50 million may be repatriated each week without SAFE approval if the Fund is deemed to be an "open end fund" under Chinese regulations. These limitations on repatriation of the Fund's assets, if the Fund becomes subject to them, may adversely affect the Fund's ability to meet redemption requests and/or may cause the Fund to borrow money in order to meet its obligations. These limitations may also prevent the Fund from making certain distributions to shareholders.

Loss of Favorable U.S. Tax Treatment Risk. The Fund intends to distribute annually all or substantially all of its investment company taxable income and net capital gain. However, if, among other things, the Fund uses a QFII license and does not receive approval from SAFE to repatriate funds associated with direct investment in A Shares on a timely basis, it may be unable to satisfy the distribution requirements required to qualify for the favorable tax treatment otherwise generally afforded to regulated investment companies ("RICs") under the Internal Revenue Code. If the Fund fails to qualify for any taxable year as a RIC, the Fund would be treated as a corporation subject to U.S. federal income tax, thereby subjecting any income earned by the Fund to tax at the corporate level currently at a 35% U.S. federal tax rate and, when such income is distributed, to a further tax at the stockholder level to the extent of the

Additional Information About the Fund

Fund's current or accumulated earnings and profits. In addition, the Fund would not be eligible for a deduction for dividends paid to shareholders.

To the extent the Fund does not distribute to shareholders all of its investment company taxable income and net capital gain in a given year, it will be required to pay U.S. federal income tax on the retained income and gains, thereby reducing the Fund's return. The Fund may elect to treat its net capital gain as having been distributed to shareholders. In that case, shareholders of record on the last day of the Fund's taxable year will be required to include their attributable share of the retained gain in income for the year as a long-term capital gain despite not actually receiving the dividend, and will be entitled to a tax credit or refund for the tax deemed paid on their behalf by the Fund as well as an increase in the basis of their shares to reflect the difference between their attributable share of the gain and the related credit or refund.

Nationalization and Expropriation. After the formation of the Chinese socialist state in 1949, the Chinese government renounced various debt obligations and nationalized private assets without providing any form of compensation. There can be no assurance that the Chinese government will not take similar actions in the future. Accordingly, an investment in the Fund involves a risk of a total loss.

Political and Economic Risk. The economy of China, which has been in a state of transition from a planned economy to a more market oriented economy, differs from the economies of most developed countries in many respects, including the level of government involvement, its state of development, its growth rate, control of foreign exchange, and allocation of resources. Although the majority of productive assets in China are still owned by the PRC government at various levels, in recent years, the PRC government has implemented economic reform measures emphasizing utilization of market forces in the development of the economy of China and a high level of management autonomy. The economy of China has experienced significant growth in the past 30 years, but growth has been uneven both geographically and among various sectors of the economy. Economic growth has also been accompanied by periods of high inflation. The PRC government has implemented various measures from time to time to control inflation and restrain the rate of economic growth.

For more than 30 years, the PRC government has carried out economic reforms to achieve decentralization and utilization of market forces to develop the economy of the PRC. These reforms have resulted in significant economic growth and social progress. There can, however, be no assurance that the PRC government will continue to pursue such economic policies or, if it does, that those policies will continue to be successful or will not otherwise have a negative effect on the Fund. Any such adjustment and modification of those economic policies may have an adverse impact on the securities market in the PRC as well as the underlying securities of the Underlying Index. Further, the PRC government may from time to time adopt corrective measures to control the growth of the PRC economy which may also have an adverse impact on the capital growth and performance of the Fund.

Political changes, social instability and adverse diplomatic developments in the PRC could result in the imposition of additional government restrictions including expropriation of assets, confiscatory taxes or nationalization of some or all of the property held by the underlying issuers of the A Shares in the Underlying Index. The laws, regulations, including the investment regulations allowing QFIs and RQFIs to invest in A Shares, government policies and political and economic climate in China may change with little or no advance notice. Any such change

Additional Information About the Fund

could adversely affect market conditions and the performance of the Chinese economy and, thus, the value of securities in the Fund's portfolio.

The Chinese government continues to be an active participant in many economic sectors through ownership positions and regulation. The allocation of resources in China is subject to a high level of government control. The Chinese government strictly regulates the payment of foreign currency denominated obligations and sets monetary policy. Through its policies, the government may provide preferential treatment to particular industries or companies. The policies set by the government could have a substantial effect on the Chinese economy and the Fund's investments.

The Chinese economy is export-driven and highly reliant on trade. The performance of the Chinese economy may differ favorably or unfavorably from the U.S. economy in such respects as growth of gross domestic product, rate of inflation, currency depreciation, capital reinvestment, resource self-sufficiency and balance of payments position. Adverse changes to the economic conditions of its primary trading partners, such as the United States, Japan and South Korea, would adversely impact the Chinese economy and the Fund's investments.

Moreover, the slowdown in other significant economies of the world, such as the United States, the European Union and certain Asian countries, may adversely affect economic growth in China. An economic downturn in China would adversely impact the Fund's investments.

PRC Broker Risk. Currently, only a limited number of brokers are available to trade A Shares with the Fund. As a result, Boserá will have limited flexibility to choose among brokers on behalf of the Fund than is typically the case for investment advisers. If Boserá is unable to use a particular broker in the PRC, the operation of the Fund may be adversely affected. Further, the operation of the Fund may be adversely affected in case of any acts or omissions of the PRC broker, which may result in higher tracking error or the Fund being traded at a significant premium or discount to its NAV. If a single PRC broker is appointed, the Fund may not necessarily pay the lowest commission available in the market. There is also a risk that the Fund may suffer losses from the default, bankruptcy or disqualification of the PRC broker. Boserá, however, in its selection of PRC brokers will consider such factors as the competitiveness of PRC brokers' commission rates, size of the relevant orders, and execution standards. In such event, the Fund may be adversely affected in the execution of any transaction.

Tax Risk. Capital gains realized by QFIIs and RQFIIs on the sale of A Shares are likely subject to tax in China; however, the precise method of calculating and collecting the tax has not been determined. There is a risk that PRC tax authorities may seek to collect tax on capital gains realized by QFIIs and RQFIIs on the sale of A Shares on a retroactive basis without giving any prior warning. If such tax is collected, the tax liability will be payable by the QFII or RQFII, which may then pass that tax on to the Fund under the terms of its advisory agreement to the extent such tax is indirectly attributable to the Fund. To the extent the Fund enters into swaps linked to A Shares, any tax liability incurred by the swap counterparty also may be passed on to the Fund. In addition, when the Fund sells a swap on A Shares, the sale price may take account of the QFII or RQFII's tax liability.

Currently, specific PRC tax rules governing the taxation of QFIIs and RQFIIs from the trading of PRC securities (including A and B Shares) have yet to be announced. In this regard, the general principle of the PRC CIT Law should apply. Under the PRC CIT Law, a non-tax resident enterprise without a permanent establishment (PE) in the PRC is subject to CIT on a withholding

Additional Information About the Fund

basis, generally at a rate of 10%, to the extent it directly derives the PRC sourced passive income (such as capital gains and dividend income). According to Circular 47 and Circular 394, assuming that the QFII or RQFII are not PRC tax resident enterprises and do not have a PE in the PRC, the QFII or RQFII should be subject to PRC WHT at a rate of 10% (which may be reduced by applicable tax treaty) with respect to dividends derived from A Shares and interest.

The WHT on dividends and interest should be withheld by the share issuers and interest payers. Circular 47 and Circular 394 did not clarify the WHT treatment in respect of capital gains derived by non PRC resident enterprises (including QFIIs and RQFIIs) from the trading of A Shares. In the absence of specific PRC tax regulations, capital gains realized by QFIIs and RQFIIs on the sale of A Shares should be subject to WHT at a rate of 10% (which may be reduced by applicable tax treaty) in China pursuant to the general principle of the current PRC CIT Law. However, the precise method of calculating and collecting the tax has not been determined. Although the PRC tax bureaus have not actively enforced the collection of WHT on capital gains derived by QFIIs and RQFIIs, in practice there is a risk that PRC tax authorities may seek to collect WHT on capital gains realized by QFIIs and RQFIIs on the sale of A Shares on a retroactive basis without giving any prior warning. If such WHT is collected, the WHT liability should be payable by the QFII and RQFII and may be passed on to and borne by the Fund.

In light of this uncertainty and in order to meet this potential WHT liability for capital gains, Krane reserves the right to establish a reserve for any WHT that may be assessed on such gains by the Chinese tax authorities. If the Fund establishes such a reserve but is not ultimately subject to the WHT, shareholders who redeemed or sold their shares while the reserve was in place will have effectively borne the burden of the WHT but will not benefit from the release of the reserve. The amount of actual provision will be disclosed in the Fund's annual and semi-annual reports to investors. Investors should note that such provision may be excessive or inadequate to meet actual WHT liabilities (which could include interest and penalties) on the Fund's investments. As a result, investors may be advantaged or disadvantaged depending on the final rules of the relevant PRC tax authorities.

In addition, Krane intends to make relevant provisions with respect to dividends from A Shares and interest if the WHT on dividends and interest is not withheld at the source at the time such income is received.

When the QFIIs and RQFIIs transfer A Shares and B shares, PRC Stamp Duty is currently imposed on the seller but not on the purchaser, at a rate of 0.1% on the transacted value. In addition, under the current PRC BT Law, which came into effect on January 1, 2009, a taxpayer would be subject to PRC BT at a rate of 5% in respect of capital gains derived from the trading of A Shares. However, Caishui [2005] 155 grants BT exemption to QFIIs in respect of their gains derived from the trading of PRC securities (including A-Shares) The new BT Law, which came into effect on January 1, 2009, has not changed this exemption treatment at the time of this Prospectus. However, it is not clear whether a similar exemption would be extended to RQFIIs. Dividend income or profit distributions on equity investment derived from China are not included in the taxable scope of BT.

In addition, urban maintenance and construction tax (currently at the rate ranging from 1% to 7%), educational surcharges (currently at the rate of 3%) and local educational surcharges (currently at the rate of 2%) are imposed based on the BT liabilities.

Additional Information About the Fund

Investments in swaps and other derivatives may be subject to special U.S. federal income tax rules that could adversely affect the character, timing and amount of income earned by the Fund (e.g., by causing amounts that would be capital gain to be taxed as ordinary income or to be taken into income earlier than would otherwise be necessary). Also, the Fund may be required to periodically adjust its positions in its swaps and derivatives to comply with certain regulatory requirements which may further cause these investments to be less efficient than a direct investment in the securities themselves. For example, swaps in which the Fund may invest may need to be reset on a regular basis in order to maintain compliance with the 1940 Act, which may increase the likelihood that the Fund will generate short-term capital gains. In addition, because the application of these special rules may be uncertain, it is possible that the manner in which they are applied by the Fund may be determined to be incorrect. In that event, the Fund may be found to have failed to maintain its qualification as a RIC or to be subject to additional U.S. tax liability. Moreover, the Fund may make investments, both directly and through swaps or other derivative positions, in companies classified as passive foreign investment companies for U.S. federal income tax purposes (“PFICs”). Investments in PFICs are subject to special tax rules which may result in adverse tax consequences to the Fund and its shareholders.

Counterparty Risk. Because many derivatives, including swaps, are an obligation of the counterparty rather than a direct investment in A Shares, the Fund may suffer losses potentially equal to, or greater than, the full value of the derivative if the counterparty fails to perform its obligations under the derivative agreement as a result of bankruptcy or otherwise. Any loss would result in a reduction in the NAV of the Fund and will likely impair the Fund’s ability to achieve its investment objective. The counterparty risk associated with the Fund’s investments is expected to be greater than most other funds because there are only a limited number of counterparties that are willing and able to enter into certain derivatives, such as swaps on A Shares. In fact, because there are so few potential counterparties, the Fund, subject to applicable law, may enter into swap transactions with as few as one counterparty at any time.

Depository Receipts. The Fund may invest in depository receipts. Depository receipts include ADRs. ADRs are U.S. dollar-denominated receipts representing shares of foreign-based corporations. ADRs are issued by U.S. banks or trust companies, and entitle the holder to all dividends and capital gains that are paid out on the underlying foreign shares. Investment in ADRs may be less liquid than the underlying shares in their primary trading market. Depository receipts may be sponsored or unsponsored. Sponsored depository receipts are established jointly by a depository and the underlying issuer, whereas unsponsored depository receipts may be established by a depository without participation by the underlying issuer. Holders of an unsponsored depository receipt generally bear all the costs associated with establishing the unsponsored depository receipt. In addition, the issuers of the securities underlying unsponsored depository receipts are not obligated to disclose material information in the United States and, therefore, there may be less information available regarding such issuers and there may not be a correlation between such information and the market value of the depository receipts.

Depository receipts may be unregistered and unlisted. The Fund’s investments may also include ADRs that are not purchased in the public markets and are restricted securities that can be offered and sold only to “qualified institutional buyers” under Rule 144A of the Securities Act of 1933, as amended. Boserá will determine the liquidity of such investments pursuant to guidelines established by the Fund’s Board of Trustees. If a particular investment in such ADRs is deemed illiquid, that investment will be included within the Fund’s limitation on investment in illiquid securities. Moreover, if adverse market conditions were to develop during the period between the Fund’s decision to sell

Additional Information About the Fund

these types of ADRs and the point at which the Fund is permitted or able to sell such security, the Fund might obtain a price less favorable than the price that prevailed when it decided to sell.

Derivatives Risk. Derivatives are financial instruments, such as swaps, index futures, futures contracts, and structured notes, whose values are based on the value of one or more indicators, such as a security, asset, currency, interest rate, or index. Derivatives involve risks different from, and possibly greater than, the risks associated with investing directly in securities and other more traditional investments. For example, derivatives involve the risk of mispricing or improper valuation and the risk that changes in the value of a derivative may not correlate perfectly with the underlying indicator. Derivative transactions can create investment leverage, may be highly volatile and the Fund could lose more than the amount it invests. Many derivative transactions are entered into “over-the-counter” (not on an exchange or contract market); as a result, the value of such a derivative transaction will depend on the ability and the willingness of the Fund’s counterparty to perform its obligations under the transaction. If a counterparty were to default on its obligations, the Fund’s contractual remedies against such counterparty may be subject to bankruptcy and insolvency laws, which could affect the Fund’s rights as a creditor (e.g., the Fund may not receive the net amount of payments that it is contractually entitled to receive). A liquid secondary market may not always exist for the Fund’s derivative positions at any time. If a derivative transaction is centrally cleared, such as a futures contract normally is, it will be subject to the rules of the clearing exchange and subject to risks associated with the exchange.

Futures Risk. Additional risks associated with the use of futures contracts include the following: (i) an imperfect correlation between movements in prices of index futures contracts and movements in the value of the stock index that the instrument is designed to simulate; and (ii) the possibility of an illiquid secondary market for a futures contract and the resulting inability to close a position prior to its maturity date. Investments in futures may expose the Fund to leverage.

Swaps Risk. To the extent the Fund invests in swaps to gain exposure to A Shares in an effort to achieve its investment objective, it will be subject to the risk that the number of counterparties able to enter into swaps to provide exposure to A Shares may be limited. To the extent that the A Share quota of a potential swap counterparty is reduced or eliminated due to actions by the Chinese government or as a result of transactions entered into by the counterparty with other investors, the counterparty’s ability to continue to enter into swaps or other derivative transactions with the Fund may be reduced or eliminated, which could have a material adverse effect on the Fund. These risks are compounded by the fact that at present there are only a limited number of potential counterparties willing and able to enter into swap transactions linked to the performance of A Shares. Furthermore, swaps are of limited duration and there is no guarantee that swaps entered into with a counterparty will continue indefinitely. Accordingly, the duration of a swap depends on, among other things, the ability of the Fund to renew the expiration period of the relevant swap at agreed upon terms. In addition, under the current regulations regarding A Share quotas of QFIIs and RQFIIs administered by SAFE, QFIIs and RQFIIs are prohibited from transferring or selling their quotas to any third party. However, there is uncertainty over how this prohibition is implemented. Therefore, subject to interpretation by SAFE, QFIIs and RQFIIs may be limited or prohibited from providing the Fund access to A Share quotas by entering into swap or other derivative transactions, which, in turn, could adversely affect the Fund.

Additional Information About the Fund

Emerging Markets Risk. The Fund invests a significant portion of its assets in securities and instruments that are traded in developing or emerging markets or that provide exposure to such securities or markets. These investments can involve additional risks relating to political, economic, or regulatory conditions not associated with investments in U.S. securities and instruments. For example, developing and emerging markets may be subject to (i) greater market volatility, (ii) lower trading volume and liquidity, (iii) greater social, political and economic uncertainty, (iv) governmental controls on foreign investments and limitations on repatriation of invested capital, (v) lower disclosure, corporate governance, auditing and financial reporting standards, (vi) fewer protections of property rights, (vii) restrictions on the transfer of securities or currency, and (viii) settlement and trading practices that differ from U.S. markets. Each of these factors may impact the ability of the Fund to buy, sell or otherwise transfer securities, adversely affect the trading market and price for Fund shares, and cause the Fund to decline in value.

Equity Securities Risk. The Fund invests in equity securities, which are subject to volatile changes in value that may be attributable to market perception of a particular issuer or to general stock market fluctuations that affect all issuers. Investments in equity securities may be more volatile than investments in other asset classes.

ETF Cash Transactions Risk. Like other ETFs, the Fund sells and redeems its shares only in large blocks called Creation Units and only to Authorized Participants. Unlike most other ETFs, however, the Fund expects generally to effect its creations and redemptions for cash, rather than in-kind securities. Other ETFs generally are able to make in-kind redemptions and avoid realizing gains in connection with redemption requests. Effecting redemptions for cash may cause the Fund to sell portfolio securities in order to obtain the cash needed to distribute redemption proceeds. Such dispositions may occur at an inopportune time resulting in potential losses to the Fund and involve transaction costs. If the Fund recognizes gain on these sales, this generally will cause the Fund to recognize gain it might not otherwise have recognized if it were to distribute portfolio securities in-kind or to recognize such gain sooner than would otherwise have been required. The Fund generally intends to distribute these gains to shareholders to avoid being taxed on this gain at the Fund level and otherwise comply with the special tax rules that apply to it. This strategy may cause shareholders to be subject to tax on gains they would not otherwise be subject to, or at an earlier date than, if they had made an investment in another ETF.

In addition, cash transactions may have to be carried out over several days if the securities market in which the Fund is trading is relatively illiquid and may involve considerable brokerage fees and taxes. These brokerage fees and taxes, which will be higher than if the Fund sold and redeemed its shares principally in-kind, will generally be passed on to purchasers and redeemers of Creation Units in the form of creation and redemption transaction fees. However, the Fund has capped the total fees that may be charged in connection with the redemption of Creation Units at 2% of the value of the Creation Units redeemed. To the extent transaction and other costs associated with a redemption exceed that cap, those transaction costs will be borne by the Fund's remaining shareholders. These factors may result in wider spreads between the bid and the offered prices of the Fund's shares than for other ETFs.

Foreign Securities Risk. Investment in foreign securities may involve higher costs than investment in U.S. securities, including higher transaction and custody costs as well as the imposition of additional taxes by foreign governments. Foreign investments may also involve risks associated with the level of currency exchange rates, less complete financial information about the issuers, less market liquidity, more market volatility and political instability. Future political and economic

Additional Information About the Fund

developments, the possible imposition of withholding taxes on dividend income, the possible seizure or nationalization of foreign holdings, the possible establishment of exchange controls or freezes on the convertibility of currency, or the adoption of other governmental restrictions might adversely affect an investment in foreign securities. Additionally, foreign issuers may be subject to less stringent regulation, and to different accounting, auditing and recordkeeping requirements.

Income from securities of non-U.S. issuers, including, in the case of Chinese issuers, gain on the sale of such securities, may be subject to foreign taxes. Even if the Fund qualifies to pass these taxes through to shareholders, your ability to claim a credit for such taxes may be limited, particularly in the case of taxes on capital gains.

Industry Concentration Risk. To the extent that the Fund's investments are concentrated in a particular industry because the Underlying Index is concentrated in such industry, the Fund will be susceptible to loss due to adverse occurrences affecting that industry to a greater extent than if the Fund's assets were invested in a wider variety of sectors or industries.

Financial Services Sector Risk. The financial services sector includes companies involved in such activities as banking, commercial and consumer finance, investment banking, brokerage, asset management, custody and insurance. Because, as currently constituted, the Underlying Index is expected to be concentrated in the financial services sector, the Fund will be sensitive to changes in, and its performance may depend on, the overall condition of the financial services sector. Companies in the financial services sector may be subject to extensive government regulation that affects the scope of their activities, the prices they can charge and the amount of capital they must maintain. The profitability of companies in the financial services sector may be adversely affected by increases in interest rates. The profitability of companies in the financial services sector may be adversely affected by loan losses, which usually increase in economic downturns. In addition, the financial services sector in certain countries is undergoing numerous changes, including continuing consolidations, development of new products and structures and changes to its regulatory framework, which may have an impact on the issuers included in the Underlying Index. Furthermore, increased government involvement in the financial services sector, including measures such as taking ownership positions in financial institutions, could result in a dilution of the Fund's investments in financial institutions.

Industrials Sector Risk. The industrials sector includes companies engaged in the manufacture and distribution of capital goods, such as those used in defense, construction and engineering, companies that manufacture and distribute electrical equipment and industrial machinery and those that provide commercial and transportation services and supplies. Companies in the industrials sector may be adversely affected by changes in government regulation, world events and economic conditions. In addition, companies in the industrials sector may be adversely affected by environmental damages, product liability claims and exchange rates. The success of these companies is affected by supply and demand both for their specific product or service and for industrial sector products in general. The products of manufacturing companies may face product obsolescence due to rapid technological developments and frequent new product introduction. In addition, the industrials sector may also be adversely affected by changes or trends in commodity prices, which may be unpredictable.

Consumer Discretionary Sector Risk. Consumer discretionary products and services are non-essential products and services whose demand tends to increase as consumers' disposable income increases, such as automobiles, apparel, electronics, home furnishings, and travel and leisure products and services. These companies may include, for example, publishers; catalog

Additional Information About the Fund

and internet retailers; department stores and specialty retailers including apparel, electronics, automotive, and home furnishing stores; manufacturers of auto parts and accessories, tire and rubber, autos, motorcycles, and scooters; manufacturers of consumer electronic products, including TVs and DVD players; manufacturers of household appliances and home furnishings; residential construction companies; manufacturers of leisure products; manufacturers of apparel, accessories, footwear, textiles, and luxury goods; gaming facility, hotel, cruise and travel agency owners and operators; restaurants and caterers; companies providing educational, home security, legal, and personal services; advertising and public relations companies; and TV and cable companies. To the extent the Underlying Index includes securities of issuers in the consumer discretionary sector, the Fund will invest in securities of issuers in such sector. As such, the Fund may be sensitive to changes in, and its performance may depend on, the overall condition of the consumer discretionary sector. This sector can be significantly affected by the performance of the overall economy, interest rates, competition, and consumer confidence. Success can depend heavily on disposable household income and consumer spending. Changes in demographics and consumer tastes can also affect the demand for, and success of, consumer discretionary products.

Investment in Investment Companies Risk. When the Fund invests in an investment company, in addition to directly bearing the expenses associated with its own operations, it will bear a pro rata portion of the investment company's expenses. In part because of these additional expenses, its performance may differ from that which it would achieve if it invested directly in the underlying investments. In addition, while the risks of owning shares of an investment company generally reflect the risks of owning the underlying investments of the investment company, the Fund may be subject to additional or different risks than if the Fund had invested directly in the underlying investments. For example, shares of an ETF are traded at market prices, which may vary from the NAV of its underlying investments. Also, the lack of liquidity in an ETF can contribute to the increased volatility of its value in comparison to the value of the underlying portfolio securities. To the extent that the Fund invests in investment companies or pooled investment vehicles that are not registered pursuant to the 1940 Act, it will not enjoy the protections of the 1940 Act.

Large or Mid-Capitalization Risk. The Fund's Underlying Index may be composed primarily of, or have significant exposure to, securities in a particular capitalization range, for example, large and mid-cap securities. As a result, the Fund may be subject to the risk that the capitalization range represented in its Underlying Index may underperform other segments of the equity market or the equity market as a whole. In addition, in comparison to securities of companies with larger capitalizations, securities of mid-cap companies may experience more price volatility, greater spreads between their bid and ask prices, significantly lower trading volumes, and cyclical or static growth prospects. Mid-cap companies often have limited product lines, markets or financial resources, and may therefore be more vulnerable to adverse developments than larger capitalization companies. These securities may or may not pay dividends.

Leveraging Risk. The Fund's investment in derivative instruments provide leveraged exposure. The Fund's investment in these instruments generally requires a small investment relative to the amount of investment exposure assumed. As a result, such investments may give rise to losses that exceed the amount invested in those instruments. The use of derivatives and other similar financial instruments may at times be an integral part of the Fund's investment strategy and may expose the Fund to potentially dramatic losses (or gains) in the value of a derivative or other financial instrument and, thus, in the value the Fund's portfolio. The cost of investing in such instruments generally increases as interest rates increase, which will lower the Fund's return.

Additional Information About the Fund

Liquidity Risk. The Fund's investments, including foreign securities and derivatives, may be subject to liquidity risk, which exists when an investment is difficult to purchase or sell. If a transaction is particularly large or if the relevant market is illiquid, it may not be possible to initiate a transaction or liquidate a position at an advantageous time or price, which may result in significant losses to the Fund. This is especially true given the limited number of market participants in certain markets in which the Fund may invest.

Derivatives and, in particular, swap agreements, may be subject to pricing risk, which exists when a particular derivative becomes extraordinarily expensive (or inexpensive) relative to historical prices or the prices of corresponding cash market instruments. It is possible that developments in the derivatives market, including ongoing or potential government regulation, could adversely affect the Fund's ability to enter into new derivatives agreements, terminate existing derivative agreements, or to realize amounts to be received under such instruments.

Market Risk. An investment in the Fund involves risks similar to those of investing in any fund of equity securities, such as market fluctuations caused by such factors as economic and political developments, changes in interest rates and perceived trends in stock prices. The values of equity securities could decline generally or could underperform other investments. Different types of equity securities tend to go through cycles of outperformance and under-performance in comparison to the general securities markets. In addition, securities may decline in value due to factors affecting a specific issuer, market or securities markets generally. An investment in the Fund may lose money.

Turbulence in the financial markets and reduced liquidity in equity, credit and fixed-income markets may negatively affect issuers worldwide, which could have an adverse effect on the Fund. Following the financial crisis that began in 2007, the Federal Reserve has attempted to stabilize the U.S. economy and support the U.S. economic recovery by keeping the federal funds rate at or near zero percent. In addition, the Federal Reserve has purchased large quantities of securities issued or guaranteed by the U.S. Government or its agencies or instrumentalities on the open market, a strategy known as quantitative easing. As the Federal Reserve tapers or reduces quantitative easing, and if the Federal Reserve raises the federal funds rate, there is a risk that interest rates will rise, which may make investments in emerging markets less attractive. These policy changes may expose markets to heightened volatility and may reduce liquidity for certain Fund investments, causing the value of the Fund's investments and share price to decline. To the extent that the Fund experiences high redemptions because of these governmental policy changes, the Fund may experience increased portfolio turnover, which will increase the costs that the Fund incurs and will lower the Fund's performance.

New Adviser Risk. Bosera is a newly registered investment adviser and has not previously advised a registered investment company.

Passive Investment Risk. The Fund is not actively managed. Therefore, unless a specific security is removed from the Fund's Underlying Index, the Fund generally would not sell a security because the security's issuer was in financial trouble. If a specific security is removed from the Underlying Index, the Fund may be forced to sell such security at an inopportune time or for a price other than the security's current market value. It is anticipated that the value of Fund shares will decline, more or less, in correspondence with any decline in value of the Underlying Index. The Underlying Index may not contain the appropriate mix of securities for any particular economic cycle, and the timing of movements from one type of security to another in seeking to replicate the Underlying Index could have a negative effect on the Fund. Unlike an actively managed fund, the Fund does not use techniques or defensive strategies designed to lessen the effects of market volatility or to reduce the

Additional Information About the Fund

impact of periods of market decline. This means that, based on market and economic conditions, the Fund's performance could be lower than other types of registered investment companies that may actively shift their portfolio assets to take advantage of market opportunities or to lessen the impact of a market decline. To the extent the Fund uses representative sampling approach, it will result in the Fund holding a smaller number of securities than are in the Underlying Index. As a result, an adverse development to an issuer of securities that the Fund holds could result in a greater decline in NAV than would be the case if the Fund held more of the securities in the Underlying Index.

Repurchase Agreement Risk. Repurchase agreements are agreements under which the Fund acquires a security for a relatively short period of time (usually within seven days) subject to the obligation of a seller to repurchase and the Fund to resell such security at a fixed time and price (representing the Fund's cost plus interest). The repurchase agreement specifies the yield during the purchaser's holding period. The risks typically associated with repurchase agreements include credit risk (i.e., the risk that the issuer may or will default or otherwise become unable, or be perceived to be unable or unwilling, to honor a financial obligation, such as making payments to the Fund when due), issuer risk, market risk and the risk that the counterparty may not fulfill its obligations under the agreement and the Fund's income declines.

Secondary Market Trading Risk. Investors buying or selling shares in the secondary market will normally pay brokerage commissions, which are often a fixed amount and may be a significant proportional cost for investors buying or selling relatively small amounts of shares. In addition, secondary market investors will incur the cost of the difference between the price that an investor is willing to pay for shares (the bid price) and the price at which an investor is willing to sell shares (the ask price). This difference in bid and ask prices is often referred to as the "spread" or "bid/ask spread." The bid/ask spread varies over time for shares based on trading volume and market liquidity, and is generally lower if the Fund's shares have more trading volume and market liquidity and higher if the Fund's shares have little trading volume and market liquidity. Increased market volatility may cause increased bid/ask spreads.

Shares of the Fund May Trade at Prices Other Than NAV. The NAV of the Fund's shares will generally fluctuate with changes in the market value of the Fund's securities holdings. The market prices of shares will generally fluctuate in accordance with changes in the Fund's NAV and supply and demand of shares on the secondary market. It cannot be predicted whether Fund shares will trade below, at or above their NAV. Price differences may be due, in part, to the fact that supply and demand forces at work in the secondary trading market for shares will be closely related to, but not identical to, the same forces influencing the prices of the securities of the Underlying Index trading individually. The market prices of Fund shares may deviate significantly from the NAV of the shares during periods of market volatility. However, given that shares can be created and redeemed in Creation Units (unlike shares of many closed-end funds, which frequently trade at appreciable discounts from, and sometimes at premiums to, their NAV), Krane believes that large discounts or premiums to the NAV of Fund shares should not be sustained. Disruptions to creations and redemptions may result in trading prices that differ significantly from the Fund's NAV. Investors purchasing and selling Fund shares in the secondary market may not experience investment results consistent with those experienced by those creating and redeeming directly with the Fund.

Tax Risk. In order to qualify for the favorable tax treatment generally available to regulated investment companies, the Fund must satisfy certain income and asset diversification requirements each year. If the Fund were to fail to qualify as a regulated investment company, it would be taxed in

Additional Information About the Fund

the same manner as an ordinary corporation, and distributions to its shareholders would not be deductible by the Fund in computing its taxable income.

Capital controls and currency controls may affect the Fund's ability to meet the applicable distribution requirements. If the Fund fails to satisfy a separate distribution requirement, it will be subject to a Fund-level excise tax. These Fund-level taxes will apply in addition to taxes payable at the shareholder level on distributions.

Tracking Error Risk. Tracking error refers to the risk that the Fund's performance may not match or correlate to that of its Underlying Index, either on a daily or aggregate basis. Tracking error may cause the Fund's performance to be less than expected. There are a number of factors that may contribute to the Fund's tracking error, such as Fund expenses, imperfect correlation between the Fund's investments and those of the Underlying Index, including, if applicable, due to the use of representative sampling, and asset valuation differences, tax considerations and liquidity constraints. Mathematical compounding may prevent the Fund from correlating with the monthly, quarterly, annual or other period performance of its benchmark. In addition, the Fund may not invest in certain securities and other instruments included in the Underlying Index, or invest in them in the exact proportions they represent of the Underlying Index, including due to legal restrictions or limitations imposed by the government of China or a lack of liquidity on stock exchanges in which such securities trade. Moreover, the Fund may be delayed in purchasing or selling securities and other instruments included in the Underlying Index. Any issues the Fund encounters with regard to currency convertibility (including the cost of borrowing funds, if any) and repatriation may also increase the Fund's tracking error.

Trading Risk. Although Fund shares are listed for trading on the Exchange, there can be no assurance that an active trading market for such shares will develop or be maintained. Trading in Fund shares may be halted due to market conditions or for reasons that, in the view of the Exchange, make trading in shares inadvisable. In addition, trading in shares is subject to trading halts caused by extraordinary market volatility pursuant to Exchange "circuit breaker" rules. There can be no assurance that the requirements of the Exchange necessary to maintain the listing of any Fund will continue to be met or will remain unchanged or that the shares will trade with any volume, or at all.

Valuation Risk. Financial information about the Fund's portfolio holdings may be less reliable than information about securities of U.S. issuers, which may make it difficult to obtain a current price for the non-U.S. securities held by the Fund. In certain circumstances, independent market quotations for such securities may not be readily available and securities may be fair valued. The value established for a security through fair valuation may be different from what would be produced if the security had been valued using market quotations. Fund securities that are valued using techniques other than market quotations, including "fair valued" securities, may be subject to greater fluctuations in their value from one day to the next. Because securities in which the Fund invests may trade on days when the Fund does not price its shares, the value of the securities in the Fund's portfolio may change on days when shareholders will not be able to purchase or sell the Fund's shares.

Portfolio Holdings Information

A description of the Fund's policies and procedures with respect to the disclosure of Fund portfolio securities is available in the Fund's Statement of Additional Information ("SAI"). The top holdings of the Fund can be found on the Fund's website at www.kraneshares.com.

Management

Investment Manager

Krane is a registered investment adviser located at 1350 Avenue of the Americas, 2nd Floor, New York, New York 10019 and serves as investment manager of the Fund. Krane has served as the investment manager of the Fund since its inception.

Krane is responsible for the general management and administration of the Trust and oversight of Boserá. Krane is also responsible for arranging transfer agency, custody, fund administration and accounting, and other non-distribution related services necessary for the Fund to operate. Krane administers the Fund's business affairs, provides office facilities and equipment and certain clerical, bookkeeping and administrative services, and permits its officers and employees to serve as officers or Trustees of the KraneShares Trust. The Board of Trustees of the Trust supervises Krane and establishes policies that Krane must follow in its day-to-day management activities. Pursuant to an investment advisory agreement between the Trust and Krane, the Fund pays Krane a fee, which is calculated daily and paid monthly, at an annual rate of 1.10% based on a percentage of the average daily net assets of the Fund.

Krane bears all of its own costs associated with providing these advisory services. As part of its agreement with the Trust, Krane has contractually agreed to pay all operating expenses of the Fund, including the cost of index licensing fees, transfer agency, custody, fund administration, legal, audit and other services, except interest expense, taxes, Acquired Fund Fees and Expenses, if any, brokerage commissions, derivative counterparty fees, and other expenses connected with execution of portfolio transactions, expenses of the Independent Trustees (including any Trustees' counsel fees), extraordinary expenses, distribution fees and expenses paid by the Trust under any distribution plan adopted pursuant to Rule 12b-1 under the 1940 Act, if any, and the advisory fee payable to Krane.

Effective July 10, 2014, Krane has contractually agreed to reduce its management fee to the extent necessary to keep the Fund's total annual operating expenses (except interest expense, taxes, Acquired Fund Fees and Expenses, if any, brokerage commissions, derivative counterparty fees, and other expenses connected with the execution of portfolio transactions, expenses of the Independent Trustees (including any Trustees' counsel fees), extraordinary expenses, distribution fees and expenses paid by the Trust under any distribution plan adopted pursuant to Rule 12b-1 under the 1940 Act, if any) from exceeding 0.85% of the Fund's average daily net assets. This contractual fee waiver will continue in effect through at least July 31, 2015. The Expense Limitation Agreement may be terminated by the Board upon sixty (60) days' written notice to Krane or by Krane, effective at the end of the current term of the Expense Limitation Agreement, upon at least 60 days' written notice prior to the end of such current term, and subject to the consent of the Board of Trustees. In addition, the Expense Limitation Agreement will terminate if the investment advisory agreement for the Fund is terminated with such termination effective upon the effective date of the investment advisory agreement's termination.

For the fiscal period March 4, 2014 to March 31, 2014, Krane received 1.10% of the Fund's average daily net assets.

A discussion regarding the basis for the Board's approval of the Fund's investment advisory agreement is included in the Fund's Annual Report to Shareholders dated March 31, 2014.

Management

Krane has received “manager of managers” exemptive relief from the SEC that permits Krane, subject to the approval of the Board of Trustees, to appoint an unaffiliated sub-adviser or co-adviser or to change the terms of an advisory agreement with an unaffiliated sub-adviser or co-adviser for the Fund without first obtaining shareholder approval. The exemptive order permits the Fund to add or to change unaffiliated sub-advisers or co-advisers or to change the fees paid to such parties from time to time without the expense and delays associated with obtaining shareholder approval of the change. However, any increase in the aggregate advisory fee paid by the Fund remains subject to shareholder approval. In addition, Krane continues to have ultimate responsibility subject to oversight by the Board of Trustees to oversee the sub-advisers or co-advisers and recommend their hiring, termination, and replacement. The order permits the Fund to disclose sub-advisers’ or co-advisers’ fees only in the aggregate in its registration statement. The Fund will notify shareholders of any change in the identity of a sub-adviser or co-adviser or the addition of a co-adviser to the Fund.

Investment Co-Adviser

Bosera, located at Suite 4109, Jardine House, One Connaught Place, Central, Hong Kong, serves as the Co-Adviser of the Fund. Bosera is responsible for the day-to-day investment management of the Fund, subject to the supervision of Krane and the Board of Trustees. For the services it provides to the Fund, Krane pays Bosera a fee equal to 50% of the net revenue Krane receives from the Fund. Net revenue is equal to gross revenue minus any fees waived, Fund expenses reimbursed, and other expenses paid or incurred by Krane.

Bosera, a recently registered investment adviser with the SEC, is a wholly-owned subsidiary of Bosera Asset Management Company Limited, one of the largest fund management companies in China. Headquartered in Shenzhen, Bosera Asset Management Company Limited was established in 1998, among the first fund houses in China. As of December 31, 2013, the Bosera group managed more than \$32 billion in assets for clients in Asia, Europe and North America. With more than 120 investment professionals in China, the Bosera group seeks to offer expertise and on-the-ground insight into China, servicing and advising institutional and retail investors globally, including sovereign wealth funds, central banks and national pensions. Bosera group also has strong experience in managing several index funds and ETFs in China.

In September 2013, the CSRC issued an administrative order to the parent company of Bosera, Bosera Asset Management Company Limited. The order does not imply any violation of applicable PRC law and in nature is different from Administrative Punishment under the PRC law regime. Under the order, for a six-month period, any new application submitted by Bosera’s parent company with respect to any new investment products and business initiatives requiring CSRC’s approval would not be processed by the CSRC. All other business activities operated under Bosera’s parent company would remain as usual and would not be affected by such order. As noted above, the order is limited only to Bosera’s parent company and to new products requiring CSRC’s approval in China. Consequently, the order does not cover the Fund or Bosera. Similarly, Bosera has advised the Board that the order does not relate to the internal controls or investment management services of Bosera or have any practical impact to the investment capabilities of the Bosera.

A discussion regarding the basis for the Board’s approval of the Fund’s investment advisory agreement with Bosera is included in the Fund’s Annual or Report to Shareholders dated March 31, 2014.

Management

Portfolio Manager

Ms. Jean Kong is responsible for managing the Fund. Ms. Kong is currently a Fund Manager at Boserá, where she is responsible for quantitative investment management strategies. Ms. Kong has more than eleven years' experience working in the financial industry and has worked in various capacities ranging from financial modeling to fund management. Ms. Kong graduated with an Honors degree in Mathematics from McGill University and obtained a PhD in Financial Mathematics at The Hong Kong University of Science and Technology.

Additional information about the Portfolio Manager's compensation, other accounts managed by the Portfolio Manager, and the Portfolio Manager's ownership of securities in the Fund is available in the SAI.

Shareholder Information

Calculating NAV

The Fund calculates its NAV by:

- Taking the current market value of its total assets
- Subtracting any liabilities and withholdings (if any) for applicable capital gains
- Dividing that amount by the total number of shares owned by the shareholders

The Fund calculates NAV as of the regularly scheduled close of normal trading on each day that the Exchange is open for business (a “Business Day”) (normally, 4:00 p.m., Eastern time). Any assets or liabilities denominated in currencies other than the U.S. dollar are converted into U.S. dollars at the current market rates on the date of valuation as quoted by one or more sources.

The values of the Fund’s portfolio securities are based on the securities’ closing prices on their local principal markets, where available. In the absence of a last reported sales price, or if no sales were reported, and for other assets for which market quotes are not readily available, values may be based on quotes obtained from a quotation reporting system, established market makers or by an outside independent pricing service. Fixed income securities are normally valued on the basis of quotes from brokers or dealers, established market makers or an outside independent pricing service using data reflecting the earlier closing of the principal markets for those securities.

If reliable market valuations are not readily available or are not deemed to reflect current market values, the security will be fair valued by Krane in accordance with the Trust’s valuation policies and procedures approved by the Board of Trustees. Securities that may be valued using “fair value” pricing may include, but are not limited to, securities for which there are no current market quotations or whose issuer is in default or bankruptcy, securities subject to corporate actions (such as mergers or reorganizations), securities subject to non-U.S. investment limits or currency controls, and securities affected by “significant events” occurring after the close of the market on which the securities principally trade. An example of a significant event is an event occurring after the close of the market in which a security trades but before the Fund’s next NAV calculation time that may materially affect the value of the Fund’s investment (e.g., government action, natural disaster, or significant market fluctuation). Currently, repatriation by RQFIs is permitted daily and is not subject to repatriation restrictions or regulatory approvals. If these regulations change, or the Fund uses a QFII license to invest in A Shares (under which repatriation of proceeds from the sale of A Shares may be limited), the value of the Fund’s holdings in A Shares may be fair valued to take into account all relevant facts and circumstances. In addition, the Fund may fair value certain of the foreign securities held by the Fund each day the Fund calculates its NAV.

Fair value pricing involves subjective judgments and it is possible that a fair value determination for a security is materially different than the value that could be realized upon the sale of the security or that another fund that uses market quotations or its own fair value procedures to price the same securities. In addition, fair value pricing could result in a difference between the prices used to calculate the Fund’s NAV and the prices used by the Underlying Index. This may adversely affect the Fund’s ability to track the Underlying Index.

Trading in securities on many foreign exchanges is normally completed before the close of business on each Business Day. In addition, securities trading in a particular country or countries may not take place on each Business Day or may take place on days that are not Business Days. Changes in valuations on certain securities may occur at times or on days on which the Fund’s NAV is not calculated and on which the Fund does not effect sales, redemptions and exchanges of its shares.

Shareholder Information

Buying and Selling Fund Shares

Shares of the Fund may be purchased or redeemed directly from the Fund only in Creation Units or multiples thereof. Only a broker-dealer (“Authorized Participant”) that enters into an Authorized Participant Agreement with the Fund’s distributor, SEI Investments Distribution Co. (the “Distributor”), may engage in creation and redemption transactions directly with the Fund. Purchases and redemptions directly with the Fund must follow the Fund’s procedures, and are subject to transaction fees, which are described in the SAI.

Once created, shares are listed on the Exchange and trade in the secondary market. When you buy or sell the Fund’s shares in the secondary market, you will pay or receive the market price. Shares can be bought and sold throughout the trading day like other publicly traded securities. Most investors will buy and sell shares through a broker and, thus, will incur customary brokerage commissions and charges when buying or selling shares.

The secondary markets are closed on weekends and also are generally closed on the following holidays: New Year’s Day, Martin Luther King, Jr. Day, Presidents’ Day, Good Friday, Memorial Day (observed), Independence Day, Labor Day, Columbus Day, Veterans’ Day, Thanksgiving Day, and Christmas Day.

Share Trading Prices

The trading prices of the Fund’s shares listed on the Exchange may differ from the Fund’s daily NAV and can be affected by market forces of supply and demand, economic conditions and other factors. The Exchange intends to disseminate the approximate value of the portfolio underlying a share of the Fund every fifteen seconds. This approximate value should not be viewed as a “real-time” update of the NAV of the Fund because the approximate value may not be calculated in the same manner as the NAV, which is computed once a day. The Fund is not involved in, or responsible for, the calculation or dissemination of such values and makes no warranty as to their accuracy.

Active Investors and Market Timing

The Trust’s Board of Trustees has determined not to adopt policies and procedures designed to prevent or monitor for frequent purchases and redemptions of the Fund’s shares because the Fund sells and redeems its shares at NAV only in Creation Units pursuant to the terms of an Authorized Participant Agreement between the Authorized Participant and the Distributor, and such direct trading between the Fund and Authorized Participants is critical to ensuring that the Fund’s shares trade at or close to NAV. Further, the vast majority of trading in Fund shares occurs on the secondary market, which does not involve the Fund directly and therefore does not cause the Fund to experience many of the harmful effects of market timing, such as dilution and disruption of portfolio management. In addition, the Fund imposes a transaction fee on Creation Unit transactions, which is designed to offset transfer and other transaction costs incurred by the Fund in connection with the issuance and redemption of Creation Units and may employ fair valuation pricing to minimize potential dilution from market timing that the Board noted is possible because Creation Unit transactions for Fund shares are generally effected in cash. The Fund reserves the right to reject any purchase order at any time and reserves the right to impose restrictions on disruptive, excessive, or short-term trading.

Shareholder Information

Investments by Registered Investment Companies

Section 12(d)(1) of the 1940 Act restricts investments by investment companies in the securities of other investment companies, including shares of the Fund. Registered investment companies are permitted to invest in the Fund beyond the limits set forth in Section 12(d)(1) subject to certain terms and conditions set forth in an SEC exemptive order issued to the Trust, including that such investment companies enter into an agreement with the Fund.

Payments to Broker-Dealers and other Financial Intermediaries

If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank), Krane, Boserá or an affiliate of either may pay the intermediary for marketing activities or other services related to the sale or promotion of the Fund. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.

Distribution Plan

The Fund has adopted a Distribution Plan (the "Plan") that allows the Fund to pay distribution fees to the Distributor and other firms that provide distribution services ("Service Providers"). If a Service Provider provides distribution services, the Fund will pay distribution fees to the Distributor at an annual rate not to exceed 0.25% of average daily net assets, pursuant to Rule 12b-1 under the 1940 Act. The Distributor will, in turn, pay the Service Provider out of its fees.

The Board of Trustees has determined that no payments pursuant to the Plan will be made through at least July 31, 2015. Thereafter, 12b-1 fees may only be imposed after approval by the Board of Trustees. Any forgone 12b-1 fees during the next 12 months will not be recoverable during any subsequent period. Because any distribution fees would be paid out of the Fund's assets on an on-going basis, if payments are made in the future, the distribution fees will increase the cost of your investment and may cost you more than paying other types of sales charges.

Dividends and Distributions

The Fund pays out dividends to shareholders at least annually. The Fund distributes its net capital gains, if any, to shareholders annually. The Fund may make distributions on a more frequent basis. The Fund reserves the right to declare special distributions if, in its reasonable discretion, such action is necessary or advisable to preserve the status of the Fund as a regulated investment company under the Internal Revenue Code, to avoid imposition of income or excise taxes on undistributed income.

Additional Tax Information

The following is a summary of some important tax issues that affect the Fund and its shareholders. The summary is based on current tax laws, which may be changed by legislative, judicial or administrative action. You should not consider this summary to be a detailed explanation of the tax treatment of the Fund, or the tax consequences of an investment in the Fund. More information about taxes is located in the SAI. You are urged to consult your tax adviser regarding specific questions as to federal, state and local income taxes.

Tax Status of the Fund

The Fund is treated as a separate entity for federal tax purposes, and intends to qualify for the special tax treatment afforded to regulated investment companies. As long as the Fund qualifies as a regulated investment company, it pays no federal income tax on the earnings it distributes to shareholders.

Tax Status of Distributions

The Fund will, at least annually, distribute substantially all of its net investment taxable income, and net capital gains income.

The income dividends you receive from the Fund (which include the Fund's short-term capital gains) will be taxed as either ordinary income or qualified dividend income. For non-corporate shareholders, dividends that are reported as qualified dividend income are generally taxable at reduced maximum tax rates to the extent that the Fund receives qualified dividend income and subject to certain limitations. Corporate shareholders may be entitled to a dividends-received deduction for the portion of dividends they receive that is attributable to dividends received by the Fund from U.S. corporations, subject to certain limitations. Because of the Fund's investment objective, it does not expect to distribute dividends eligible for qualified dividend income treatment or the dividends received deduction.

Distributions of the Fund's short-term capital gains are taxable as ordinary income. Any long-term capital gains distributions you receive from the Fund are taxable as long-term capital gains regardless of how long you have owned your shares. For non-corporate shareholders, long-term capital gains are taxable at reduced maximum tax rates.

The Fund may invest in complex securities. These investments may be subject to numerous special and complex rules. These rules could affect whether gains and losses recognized by the Fund are treated as ordinary income or capital gain, accelerate the recognition of income to the Fund and/or defer the Fund's ability to recognize losses. In turn, these rules may affect the amount, timing or character of the income distributed to you by the Fund.

Dividends and distributions are generally taxable to you whether you receive them in cash or in additional shares.

Distributions paid in January but declared by the Fund in October, November or December of the previous year may be taxable to you in the previous year.

Your broker will inform you of the amount of your ordinary income dividends, qualified dividend income, and capital gains distributions shortly after the close of each calendar year.

Some foreign governments levy withholding taxes against dividend and interest income. Although in some countries a portion of these withholding taxes is recoverable, the non-recovered portion will reduce the income received from the securities in the Fund. In addition, the Fund may be able to pass along a tax credit for foreign income taxes that it pays. The Fund will provide you with the

Additional Tax Information

information necessary to reflect foreign taxes paid on your income tax return if it makes this election. Please see “— Chinese Tax Considerations” below for a further discussion of these issues with respect to China, which imposes withholding taxes on interest payments, dividends and possibly capital gains from A Shares.

Tax Status of Share Transactions

Currently, any capital gain or loss upon a sale of Fund shares is generally treated as a long-term gain or loss if the shares have been held for more than one year and otherwise as short-term gain or loss. Any capital loss on the sale of Fund shares held for six months or less is treated as long-term capital loss to the extent that any capital gain distributions were paid with respect to such shares.

If you hold your shares in a tax-qualified retirement account, you generally will not be subject to federal taxation on income and capital gains distribution from the Fund, until you begin receiving payments from your retirement account. You should consult your tax adviser regarding the tax rules that apply to your retirement account.

Medicare Contribution Tax

U.S. individuals with income exceeding \$200,000 (\$250,000 if married and filing jointly) are subject to a 3.8% Medicare contribution tax on their “net investment income,” including interest, dividends, and certain capital gains (including capital gains realized on the sale or exchange of shares of the Fund). This 3.8% tax also applies to all or a portion of the undistributed net investment income of certain shareholders that are estates and trusts.

Back-Up Withholding

The Fund will be required in certain cases to withhold at the applicable backup withholding rate and remit to the United States Treasury the amount withheld on amounts payable to any shareholder who (1) has provided the Fund either an incorrect tax identification number or no number at all, (2) is subject to back-up withholding by the Internal Revenue Service for failure to properly report payments of interest or dividends, (3) has failed to certify to the Fund that such shareholder is not subject to back-up withholding, or (4) has not certified that such shareholder is a U.S. person (including a U.S. resident alien).

State Tax Considerations

In addition to federal taxes, distributions by the Fund and ownership of Fund shares may be subject to state and local taxes. You should consult your tax adviser regarding how state and local tax laws affect your investment in Fund shares.

Non-U.S. Investors

If you are not a citizen or permanent resident of the United States or if you are a non-U.S. entity, the Fund’s ordinary income dividends (which include distributions of net short-term capital gains) will generally be subject to a 30% U.S. withholding tax, unless a lower treaty rate applies, provided that withholding tax will generally not apply to any gain or income realized by a non-U.S. shareholder in respect of any distributions of long-term capital gains or upon the sale or other disposition of shares of the Fund. You also may potentially be subject to U.S. estate taxes.

Additional Tax Information

Under the Foreign Account Tax Compliance Act (“FATCA”), a 30% withholding tax will be imposed on dividends paid by the Fund after June 30, 2014, and on long-term capital gain dividends and redemption proceeds paid after December 31, 2016, to (i) foreign financial institutions including non-U.S. investment funds unless they agree to collect and disclose to the IRS information regarding their direct and indirect U.S. account holders and (ii) certain other foreign entities, unless they certify certain information regarding their direct and indirect U.S. owners. A non-U.S. shareholder resident or doing business in a country that has entered into an intergovernmental agreement with the U.S. to implement a similar reporting regime will be exempt from this withholding tax if the shareholder and the applicable foreign government comply with the terms of such agreement.

Chinese Tax Considerations

Although Chinese law provides for a 10% withholding tax (“WHT”) on capital gains realized by non-residents, significant uncertainties remain regarding the implementation of this law, particularly with respect to trading of PRC securities (including A and B shares) by QFIIs and RQFIIs. Such uncertainties may result in capital gains imposed upon the Fund relative to companies headquartered, managed or listed in China. While the application and enforcement of this law with respect to the Fund remain subject to clarification, to the extent that such taxes are imposed on any capital gains of the Fund relative to companies headquartered, managed or listed in China, the Fund’s NAV or returns may be adversely impacted. In light of this uncertainty and in order to meet this potential WHT liability for capital gains, Krane reserves the right to establish a reserve for any WHT on such gains that may be assessed by the Chinese tax authorities. If the Fund establishes such a reserve but is not ultimately subject to the WHT, shareholders who redeemed or sold their shares while the reserve was in place will have effectively borne the burden of the WHT but will not benefit from the release of the reserve. The amount of any actual provision will be disclosed in the Fund’s annual and semi-annual reports to investors. Investors should note that such provision may be excessive or inadequate to meet actual WHT liabilities (which could include interest and penalties) on the Fund’s investments. As a result, investors may be advantaged or disadvantaged depending on the final rules of the relevant PRC tax authorities. In addition, Krane intends to make relevant provisions with respect to dividends from A Shares and interest (if any) if tax is not withheld at the source at the time such income is received.

Even if the Fund qualifies and elects to pass through foreign taxes to its shareholders, as described above, your ability to claim a credit for such taxes may be limited. See the SAI for further information.

Taxes on Creations and Redemptions of Creation Units

A person who purchases a Creation Unit by exchanging securities in-kind generally will recognize a gain or loss equal to the difference between (i) the market value of the Creation Units at the time of the exchange and (ii) the purchaser’s aggregate basis in the securities surrendered and any net amount of cash paid for the Creation Units. A person who redeems Creation Units and receives securities in-kind from the Fund will generally recognize a gain or loss equal to the difference between the redeemer’s basis in the Creation Units, and the aggregate market value of the securities received and any net cash received. The Internal Revenue Service, however, may assert that a loss realized upon an in-kind exchange of securities for Creation Units or an exchange of Creation Units for securities cannot be deducted currently under the rules governing “wash sales,” or on the basis that there has been no significant change in economic position. Persons effecting in-kind creations or redemptions should consult their own tax adviser with respect to these matters.

Additional Tax Information

The Fund has the right to reject an order for Creation Units if the purchase (or group of purchasers) would, upon obtaining the shares so ordered, own 80% or more of the outstanding shares of the Fund and if, pursuant to section 351 of the Code, the Fund would have a basis in the deposit securities different from the market value of such securities on the date of deposit. The Fund also has the right to require information necessary to determine beneficial share ownership for purposes of the 80% determinations.

Other Information

Premium/Discount Information

Information showing the number of days the market price of the Fund's shares was greater than the Fund's NAV per share (*i.e.*, at a premium) and the number of days it was less than the Fund's NAV per share (*i.e.*, at a discount) for various time periods is available by visiting the Fund's website at www.kraneshares.com.

Continuous Offering

The method by which Creation Units of Fund shares are created and traded may raise certain issues under applicable securities laws. Because new Creation Units of shares are issued and sold by the Fund on an ongoing basis, a "distribution," as such term is used in the Securities Act of 1933, as amended (the "Securities Act"), may occur at any point. Broker-dealers and other persons are cautioned that some activities on their part may, depending on the circumstances, result in their being deemed participants in a distribution in a manner which could render them statutory underwriters and subject them to the prospectus delivery requirement and liability provisions of the Securities Act.

For example, a broker-dealer firm or its client may be deemed a statutory underwriter if it takes Creation Units after placing an order with the Distributor, breaks them down into constituent shares and sells the shares directly to customers or if it chooses to couple the creation of a supply of new shares with an active selling effort involving solicitation of secondary market demand for shares. A determination of whether one is an underwriter for purposes of the Securities Act must take into account all the facts and circumstances pertaining to the activities of the broker-dealer or its client in the particular case, and the examples mentioned above should not be considered a complete description of all the activities that could lead to a characterization as an underwriter.

Broker-dealer firms should also note that dealers who are not "underwriters" but are effecting transactions in shares, whether or not participating in the distribution of shares, are generally required to deliver a prospectus. This is because the prospectus delivery exemption in Section 4(3) of the Securities Act is not available in respect of such transactions as a result of Section 24(d) of the 1940 Act. As a result, broker-dealer firms should note that dealers who are not "underwriters" but are participating in a distribution (as contrasted with engaging in ordinary secondary market transactions) and thus dealing with the shares that are part of an over-allotment within the meaning of Section 4(3)(C) of the Securities Act, will be unable to take advantage of the prospectus delivery exemption provided by Section 4(3) of the Securities Act. For delivery of prospectuses to exchange members, the prospectus delivery mechanism of Rule 153 under the Securities Act is only available with respect to transactions on a national exchange.

Dealers effecting transactions in the Fund's shares, whether or not participating in this distribution, are generally required to deliver a Prospectus. This is in addition to any obligation of dealers to deliver a Prospectus when acting as underwriters.

Other Information

Householding

To reduce expenses, we mail only one copy of the Prospectus or summary prospectus and each annual and semi-annual report to those addresses shared by two or more accounts. If you wish to receive individual copies of these documents, please call the Trust at 1.855.857.2638 between the hours of 8:30 a.m. and 6:00 p.m. Eastern time on days the Fund is open for business or contact your financial institution. We will begin sending you individual copies thirty days after receiving your request.

MSCI Disclaimer

The Fund is not sponsored, endorsed, sold or promoted by MSCI Inc. (“MSCI”), any of its affiliates, any of its information providers or any other third party involved in, or related to, compiling, computing or creating any MSCI index (collectively, the “MSCI Parties”). The MSCI indexes are the exclusive property of MSCI. MSCI and the MSCI index names are service mark(s) of MSCI or its affiliates and have been licensed for use for certain purposes by Krane. None of the MSCI parties makes any representation or warranty, express or implied, to the issuer or owners of the Fund or any other person or entity regarding the advisability of investing in funds generally or in this fund particularly or the ability of any MSCI index to track corresponding stock market performance. MSCI or its affiliates are the licensors of certain trademarks, service marks and trade names and of the MSCI indexes which are determined, composed and calculated by MSCI without regard to the Fund or the issuer or owners of the Fund or any other person or entity. None of the MSCI Parties has any obligation to take the needs of the issuer or owners of the Fund or any other person or entity into consideration in determining, composing or calculating the MSCI indexes. None of the MSCI Parties is responsible for or has participated in the determination of the timing of, prices at, or quantities of the Fund to be issued or in the determination or calculation of the equation by or the consideration into which the Fund is redeemable. Further, none of the MSCI Parties has any obligation or liability to the issuer or owners of the Fund or any other person or entity in connection with the administration, marketing or offering of the Fund.

Although MSCI shall obtain information for inclusion in or for use in the calculation of the MSCI indexes from sources that MSCI considers reliable, none of the MSCI Parties warrants or guarantees the originality, accuracy and/or the completeness of any MSCI index or any data included therein. None of the MSCI Parties makes any warranty, express or implied, as to results to be obtained by the issuer of the Fund, owners of the Fund, or any other person or entity, from the use of any MSCI Index or any data included therein. None of the MSCI Parties shall have any liability for any errors, omissions or interruptions of or in connection with any MSCI index or any data included therein. Further, none of the MSCI Parties makes any express or implied warranties of any kind, and the MSCI Parties hereby expressly disclaim all warranties of merchantability and fitness for a particular purpose, with respect to each MSCI index and any data included therein. Without limiting any of the foregoing, in no event shall any of the MSCI Parties have any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages. No purchaser, seller or holder of this security, product or fund, or any other person or entity, should use or refer to any MSCI trade name, trademark or service mark to sponsor, endorse, market or promote this security without first contacting MSCI to determine whether MSCI’s permission is required. Under no circumstances may any person or entity claim any affiliation with MSCI without the prior written permission of MSCI.

NYSE Arca Disclaimer

Shares of the Fund are not sponsored, endorsed or promoted by NYSE Arca, Inc. NYSE Arca makes no representation or warranty, express or implied, to the owners of the shares of the Fund or any member of the public regarding the ability of the Fund to track the total return performance of the Underlying Index or the ability of the Underlying Index to track stock market performance. NYSE Arca is not responsible for, nor has it participated in, the determination of the compilation or the calculation of the Underlying Index, nor in the determination of the timing of, prices of, or quantities of shares of the Fund to be issued, nor in the determination or calculation of the equation by which the shares are redeemable. NYSE Arca has no obligation or liability to owners of the shares of the Fund in connection with the administration, marketing or trading of the shares of the Fund.

Disclaimers

NYSE Arca does not guarantee the accuracy and/or the completeness of the Underlying Index or any data included therein. NYSE Arca makes no warranty, express or implied, as to results to be obtained by the Trust on behalf of the Fund as licensee, licensee's customers and counterparties, owners of the shares of the Fund, or any other person or entity from the use of the subject index or any data included therein in connection with the rights licensed as described herein or for any other use. NYSE Arca makes no express or implied warranties and hereby expressly disclaims all warranties of merchantability or fitness for a particular purpose with respect to the Underlying Index or any data included therein. Without limiting any of the foregoing, in no event shall NYSE Arca have any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages.

Krane Disclaimer

Krane does not guarantee the accuracy or the completeness of the Underlying Index or any data included therein and Krane shall have no liability for any errors, omissions or interruptions therein.

Krane makes no warranty, express or implied, to the owners of shares of the Fund or to any other person or entity, as to results to be obtained by the Fund from the use of the Underlying Index or any data included therein. Krane makes no express or implied warranties and expressly disclaims all warranties of merchantability or fitness for a particular purpose or use with respect to the Underlying Index or any data included therein. Without limiting any of the foregoing, in no event shall Krane have any liability for any special, punitive, direct, indirect or consequential damages (including lost profits), even if notified of the possibility of such damages.

Financial Highlights

The table that follows presents the financial highlights for the Fund. The table is intended to help you understand the Fund's financial performance. Certain information reflects financial results for a single Fund share. The total returns in the table represent the rate that an investor would have earned or lost, on an investment in the Fund (assuming reinvestment of all dividends and distributions). This information has been derived from the financial statements audited by PricewaterhouseCoopers LLP, an independent registered public accounting firm, whose report, along with the Fund's financial statements, are included in the Fund's Annual Report, which is available upon request.

Additional Information

Additional and more detailed information about the Fund is included in the SAI dated August 1, 2014. The SAI has been filed with the SEC and is incorporated by reference into this Prospectus and, therefore, legally forms a part of this Prospectus. The SEC maintains the EDGAR database on its website (“<http://www.sec.gov>”) that contains the SAI, material incorporated by reference, and other information regarding registrants that file electronically with the SEC. You may also review and copy documents at the SEC Public Reference room in Washington, D.C. (for information on the operation of the Public Reference Room, call 202.551.8090). You may request documents from the SEC by mail, upon payment of a duplication fee, by writing to: U.S. Securities and Exchange Commission, Public Reference Section, Washington, D.C. 20549-1520 or by emailing the SEC at the following address: publicinfo@sec.gov.

You may obtain a copy of the SAI or the Annual or Semi-Annual Reports or make inquiries, without charge by calling 1.855.857.2638, visiting www.kraneshares.com, or writing the Trust at 1350 Avenue of the Americas, 2nd Floor, New York, New York 10019. Additional information about the Fund’s investments will be available in the Annual and Semi-Annual Reports. Also, in the Fund’s Annual Report, you will find a discussion of the market conditions and investment strategies that significantly affected the Fund’s performance during its last fiscal year.

No one has been authorized to give any information or to make any representations not contained in this Prospectus or in the Fund’s SAI in connection with the offering of Fund shares. Do not rely on any such information or representations as having been authorized by the Fund, Krane or Bosera. This Prospectus does not constitute an offering by the Fund in any jurisdiction where such an offering is not lawful.

The Trust’s Investment Company Act file number is 811-22698.
