

KRANESHARES TRUST

**KraneShares CSI China Five Year Plan ETF
(the “Five Year Plan ETF”)**

**KraneShares CSI China Internet ETF
(the “Internet ETF”)
(each a “Fund” and, together, the “Funds”)**

**Supplement dated September 18, 2013, to the currently effective
Prospectus and Statement of Additional Information (“SAI”) for each of the Funds**

Effective immediately the Funds have made the following changes, discussed in detail below:

1. Each Fund will pay out dividends to shareholders on a semi-annual basis.
2. Each Fund’s Underlying Index, as defined in the Prospectus, may, and currently does, include shares of P-Chip companies (as defined below).
3. Each Fund has revised the amount of maximum creation/redemption transaction fees that will be charged on the purchase and sale of Creation Units.

As a result of the changes noted above, the following changes are made to each Fund’s Prospectus and/or SAI:

- 1. The following replaces the first sentence under the section “Shareholder Information - Dividends and Distributions” in each Fund’s Prospectus:**

The Fund pays out dividends to shareholders at least semi-annually.

Additionally, the following replaces the sentence under the section “Additional Tax Information - Tax Status of Distributions” in each Fund’s Prospectus:

The Fund will distribute substantially all of its net investment taxable income, semi-annually, and net capital gain, annually.

The following replaces the first sentence under “Dividends and Distributions” in each Fund’s SAI:

The Fund intends to pay out dividends, if any, at least semi-annually.

- 2. The following sentence replaces the seventh sentence under “Additional Information About the Fund - Additional Information Regarding the Underlying Index - The CSI Overseas China Five-Year Plan Index” in the Five Year Plan ETF’s Prospectus and the fourth sentence under “Additional Information About the Fund -**

Additional Information About the Underlying Index - The CSI Overseas China Internet Index” in the Internet ETF’s Prospectus:

To be eligible for inclusion in the Underlying Index, securities must be tradeable to foreign investors without restrictions, such as securities of companies that are incorporated in China and are listed on the Hong Kong Exchange (“H-Shares”), securities of companies with main business operations in China that are listed on the Hong Kong Exchange (“Red Chips”) and securities of companies with controlling private Chinese shareholders that are incorporated and traded outside mainland China on the Hong Kong Stock Exchange (“P-Chip Companies”).

The following replaces the text under “Additional Information about the Fund - Additional Investment Strategies” in each Fund’s Prospectus:

Investments in China. In addition to investing in H-Shares, Red Chips and P-Chip Companies, the Fund also may invest in B-Shares and A-Shares to the extent such securities are included as components of the Fund’s Underlying Index. While the Fund does not anticipate doing so initially, the Fund also may invest up to 20% of its assets in B-Shares and P-Chip companies not included as components of the Fund’s Underlying Index if the Adviser and Sub-Adviser believe that such investments will enable the Fund to achieve its investment objective. Should the Adviser or Sub-Adviser become eligible or otherwise be permitted to invest directly in A-Shares, the Fund reserves the right to invest in A-Shares in a manner consistent with the Fund’s investment objective and investment strategy and to the extent permitted by applicable law.

B-Shares. B-Shares are shares of companies listed on the Shanghai or Shenzhen Stock Exchange and are quoted and traded in foreign currencies (currently Hong Kong Dollars and U.S. Dollars) and are generally the only class of shares listed on the Shanghai and Shenzhen Stock Exchanges available to foreign investors other than Qualified Foreign Institutional Investors (“QFIIs”) and Renminbi Qualified Foreign Institutional Investors (“RQFIIs”). The market for B-Shares in China is relatively illiquid so that market opportunities will be limited as compared to other major international stock markets.

A-Shares. A-Shares are issued by companies incorporated in mainland China and that are traded on Chinese exchanges. Investments in A-Shares are made available to domestic Chinese investors and certain foreign investors, mainly those who have been approved as a QFII or a RQFII. Investments by other foreign investors in A-Shares are generally prohibited. Investments in A-Shares are also subject to various restrictions.

3. For the Five Year Plan ETF:

In the SAI, under “Creation and Redemption of Creation Units - Costs Associated with Creation Transactions,” the following replaces the last sentence:

The Fund’s maximum creation transaction fee is \$8,000. The Adviser may adjust the fee from time to time based on actual experience.

In the SAI, under “Creation and Redemption of Creation Units - Costs Associated with Redemption Transactions,” the following replaces the last sentence:

The Fund’s maximum redemption transaction fee is \$8,000. The Adviser may adjust the fee from time to time based on actual experience.

For the Internet ETF:

In the SAI, under “Creation and Redemption of Creation Units - Costs Associated with Creation Transactions,” the following replaces the last sentence:

The Fund’s maximum creation transaction fee is \$1000. The Adviser may adjust the fee from time to time based on actual experience.

In the SAI, under “Creation and Redemption of Creation Units - Costs Associated with Redemption Transactions,” the following replaces the last sentence:

The Fund’s maximum redemption transaction fee is \$1000. The Adviser may adjust the fee from time to time based on actual experience.

PLEASE RETAIN THIS SUPPLEMENT FOR FUTURE REFERENCE.

KRS-SK-001-0100

KraneShares Trust

STATEMENT OF ADDITIONAL INFORMATION

July 22, 2013

KraneShares Trust (the “Trust”) is an investment company offering professionally managed investment portfolios. This Statement of Additional Information (“SAI”) relates to shares of the following portfolio (the “Fund”):

KraneShares CSI China Internet ETF (The NASDAQ Stock Market LLC: KWEB)

This SAI is not a prospectus and should be read in conjunction with the current prospectus for the Fund, dated July 22, 2013, as it may be revised from time to time (the “Prospectus”). Capitalized terms used herein that are not defined have the same meaning as in the Prospectus, unless otherwise noted. A copy of the Prospectus may be obtained, without charge, by calling 1.855.857.2638, visiting www.kraneshares.com, or writing to the Trust at 1350 Avenue of the Americas, 2nd Floor, New York, New York 10019.

GENERAL DESCRIPTION OF THE TRUST AND THE FUND

The Trust was organized as a Delaware statutory trust on February 3, 2012 and is permitted to offer multiple, separate series (*i.e.*, funds). As of the date of this SAI, the Trust offers six separate funds, including the Fund and other funds not offered in this SAI. The Trust is an open-end management investment company registered under the Investment Company Act of 1940, as amended (the “1940 Act”). The offering of the Trust’s shares is registered under the Securities Act of 1933, as amended (the “Securities Act”). All payments received by the Trust for shares of any fund belong to that fund. Each fund will have its own assets and liabilities.

Krane Funds Advisors, LLC (the “Adviser”) serves as the investment adviser to the Fund and is responsible for making investment decisions for the Fund’s assets and continuously reviewing, supervising and administering the Fund’s investment program. Index Management Solutions, LLC (the “Sub-Adviser”) serves as the investment sub-adviser to the Fund and is responsible for trading portfolio securities on behalf of the Fund. The Adviser and the Sub-Adviser may be referred to together as the “Advisers.” SEI Investments Distribution Co. serves as the distributor (the “Distributor”) of the shares of the Fund.

Shares of the Fund are listed on a national securities exchange, such as The NASDAQ Stock Market LLC (the “Exchange”), and trade throughout the day on the Exchange and other secondary markets at market prices that may be below, at or about the net asset value (“NAV”) per share. As in the case of other publicly traded securities, brokers’ commissions on transactions in the Fund’s shares will be based on negotiated commission rates at customary levels.

The Fund issues and redeems shares at their NAV only in large blocks of shares (each, a “Creation Unit”). Currently, Creation Units generally consist of 50,000 shares, though this may change from time to time. Creation Units are not expected to consist of less than 25,000 shares. Shares are redeemable only in Creation Units and, generally, in exchange for a basket of securities and a specified cash payment. Generally, only institutions or large investors purchase or redeem Creation Units.

The Trust reserves the right to offer an “all cash” option for creations and redemptions of Creation Units for the Fund. In addition, Creation Units may be issued in advance of the receipt of a basket of securities subject to various conditions, including a requirement to maintain a cash deposit with the Trust that equals a percentage of the market value of the missing securities specified by the Fund. In each instance, transaction fees may be imposed that will be higher than the transaction fees associated with traditional in-kind creations or redemptions. In all cases, such fees will be limited in accordance with U.S. Securities and Exchange Commission (“SEC”) requirements applicable to management investment companies offering redeemable securities. Please see the “Creation and Redemption of Creation Units” section in this SAI for more detailed information.

The Trust also reserves the right to adjust the prices of shares in the future to maintain convenient trading ranges for investors. Any adjustments would be accomplished through stock splits or reverse stock splits, which would have no effect on the net assets of the Fund.

INVESTMENT POLICIES, TECHNIQUES AND RISK FACTORS

General

The Fund is a passively managed exchange traded fund (“ETF”) that seeks to provide investment results that, before fees and expenses, correspond to the price and yield performance of a specific foreign equity securities benchmark. The Fund will not be actively managed, and the adverse performance of a security in the Fund’s portfolio ordinarily will not result in the elimination of the security from the Fund’s portfolio. The Fund’s current benchmark is the CSI Overseas China Internet Index (the “Underlying Index”).

The Fund seeks to achieve its investment objective by using a “replication” strategy to track the Underlying Index. “Replication” refers to investing in substantially all of the securities in the Underlying Index in approximately the same proportions as in the Underlying Index. The Fund’s investment objective is non-fundamental and may be changed without the consent of the holders of a majority of the Fund’s outstanding shares. Additional information about the Fund’s investment objective and principal investment strategies is contained in the Prospectus. Additional information about the Underlying Index is included below under the heading “Description of the Underlying Index.”

The investment techniques discussed below and in the Prospectus may, consistent with the Fund’s investment objectives and investment limitations, be used by the Fund if, in the opinion of the Adviser and/or the Sub-Adviser, they will be advantageous to the Fund. The Fund is free to reduce or eliminate its activity with respect to any of the investment techniques discussed below without changing the Fund’s fundamental investment policies and without prior notice to shareholders. However, to the extent any such change represents a material change to the Fund’s principal investment strategies, the Fund will attempt to notify shareholders of the change. There is no assurance that any of the Fund’s strategies or any other strategies and methods of investment available to the Fund will result in the achievement of the Fund’s objective.

Principal Investment Policies, Techniques and Risk Factors – The investment policies, techniques and risk factors described below are considered to be principal to the management of the Fund.

Equity Securities

The Fund may invest in equity securities. Equity securities represent ownership interests in a company or partnership and consist of common stocks, preferred stocks, warrants to acquire common stock, securities convertible into common stock, and investments in master limited partnerships. Investments in equity securities in general are subject to market risks that may cause their prices to fluctuate over time. Fluctuations in the value of equity securities in which the Fund invests will cause the NAV of the Fund to fluctuate. Global stock markets, including the U.S. stock market, tend to be cyclical, with periods when stock prices generally rise and periods when stock prices generally decline. The Fund may purchase equity securities traded in the U.S. on registered exchanges or the over-the-counter (“OTC”) market. The Fund may invest in the types of equity securities described in more detail below.

- **Common Stock.** Common stock represents an equity or ownership interest in an issuer. In the event an issuer is liquidated or declares bankruptcy, the claims of owners of bonds and preferred stock take precedence over the claims of those who own common stock.
- **Preferred Stock.** Preferred stock represents an equity or ownership interest in an issuer that pays dividends at a specified rate and that has precedence over common stock in the payment of dividends. In the event an issuer is liquidated or declares bankruptcy, the claims of owners of bonds take precedence over the claims of those who own preferred and common stock.
- **Convertible Securities.** Convertible securities are bonds, debentures, notes, preferred stocks or other securities that may be converted or exchanged (by the holder or by the issuer) into shares of the underlying common stock (or cash or securities of equivalent value) at a stated exchange ratio. A convertible security may also be called for redemption or conversion by the issuer after a particular date and under certain circumstances (including a specified price) established upon issue. If a convertible security held by the Fund is called for redemption or conversion, the Fund could be required to tender it for redemption, convert it into the underlying common stock, or sell it to a third party.

Convertible securities generally have less potential for gain or loss than common stocks. Convertible securities generally provide yields higher than the underlying common stocks, but generally lower than comparable non-convertible securities. Because of this higher yield, convertible securities generally sell at

a price above their “conversion value,” which is the current market value of the stock to be received upon conversion. The difference between this conversion value and the price of convertible securities will vary over time depending on changes in the value of the underlying common stocks and interest rates. When the underlying common stocks decline in value, convertible securities tend not to decline to the same extent because of the interest or dividend payments and the repayment of principal at maturity for certain types of convertible securities. However, securities that are convertible other than at the option of the holder generally do not limit the potential for loss to the same extent as securities convertible at the option of the holder. When the underlying common stocks rise in value, the value of convertible securities may also be expected to increase. At the same time, however, the difference between the market value of convertible securities and their conversion value will narrow, which means that the value of convertible securities will generally not increase to the same extent as the value of the underlying common stocks. Because convertible securities may also be interest-rate sensitive, their value may increase as interest rates fall and decrease as interest rates rise. Convertible securities are also subject to credit risk, and are often lower-quality securities.

- **Small and Medium Capitalization Issuers.** Investing in equity securities of small and medium capitalization companies often involves greater risk than is customarily associated with investments in larger capitalization companies. This increased risk may be due to the greater business risks of smaller size, limited markets and financial resources, narrow product lines and frequent lack of depth of management. The securities of smaller companies are often traded in the OTC market and even if listed on a national securities exchange may not be traded in volumes typical for that exchange. Consequently, the securities of smaller companies are less likely to be liquid, may have limited market stability, and may be subject to more abrupt or erratic market movements than securities of larger, more established growth companies or the market averages in general.
- **Master Limited Partnerships (“MLPs”).** MLPs are limited partnerships in which the ownership units are publicly traded. MLP units are registered with the SEC and are freely traded on a securities exchange or in the OTC market. MLPs often own several properties or businesses (or own interests) that are related to real estate development and oil and gas industries, but they also may finance motion pictures, research and development and other projects. Generally, a MLP is operated under the supervision of one or more managing general partners. Limited partners are not involved in the day-to-day management of the partnership.

The risks of investing in a MLP are generally those involved in investing in a partnership as opposed to a corporation. For example, state law governing partnerships is often less restrictive than state law governing corporations. Accordingly, there may be fewer protections afforded investors in a MLP than investors in a corporation. Additional risks involved with investing in a MLP are risks associated with the specific industry or industries in which the partnership invests, such as the risks of investing in real estate, or oil and gas industries.

- **Warrants.** As a matter of non-fundamental policy, the Fund does not invest in warrants. However, the Fund may from time to time receive warrants as a result of, for example, a corporate action or some other event affecting one or more of the companies in which the Fund invests. In such event, the Fund generally intends to hold such warrants until they expire. The Fund, however, reserves the right to exercise the warrants. Warrants are instruments that entitle the holder to buy an equity security at a specific price for a specific period of time. Changes in the value of a warrant do not necessarily correspond to changes in the value of its underlying security. The price of a warrant may be more volatile than the price of its underlying security, and a warrant may offer greater potential for capital appreciation as well as capital loss. Warrants do not entitle a holder to dividends or voting rights with respect to the underlying security and do not represent any rights in the assets of the issuing company. A warrant ceases to have value if it is

not exercised prior to its expiration date. These factors can make warrants more speculative than other types of investments.

- **Rights.** A right is a privilege granted to existing shareholders of a corporation to subscribe to shares of a new issue of common stock before it is issued. Rights normally have a short life of usually two to four weeks, are freely transferable and entitle the holder to buy the new common stock at a lower price than the public offering price. An investment in rights may entail greater risks than certain other types of investments. Generally, rights do not carry the right to receive dividends or exercise voting rights with respect to the underlying securities, and they do not represent any rights in the assets of the issuer. In addition, their value does not necessarily change with the value of the underlying securities, and they cease to have value if they are not exercised on or before their expiration date. Investing in rights increases the potential profit or loss to be realized from the investment as compared with investing the same amount in the underlying securities.

Foreign Issuers

The Fund may invest in issuers located outside the United States directly, or in financial instruments that are indirectly linked to the performance of foreign issuers. Examples of such financial instruments include ADRs, Global Depositary Receipts (“GDRs”), European Depositary Receipts (“EDRs”), International Depositary Receipts (“IDRs”), “ordinary shares,” and “New York shares” issued and traded in the United States. ADRs are U.S. dollar denominated receipts typically issued by U.S. banks and trust companies that evidence ownership of underlying securities issued by a foreign issuer. The underlying securities may not necessarily be denominated in the same currency as the securities into which they may be converted. The underlying securities are held in trust by a custodian bank or similar financial institution in the issuer’s home country. The depositary bank may not have physical custody of the underlying securities at all times and may charge fees for various services, including forwarding dividends and interest and corporate actions. Generally, ADRs in registered form are designed for use in domestic securities markets and are traded on exchanges or over-the-counter in the United States. GDRs, EDRs, and IDRs are similar to ADRs in that they are certificates evidencing ownership of shares of a foreign issuer, however, GDRs, EDRs, and IDRs may be issued in bearer form and denominated in other currencies, and are generally designed for use in specific or multiple securities markets outside the United States. EDRs, for example, are designed for use in European securities markets while GDRs are designed for use throughout the world. Ordinary shares are shares of foreign issuers that are traded abroad and on a U.S. exchange. New York shares are shares that a foreign issuer has allocated for trading in the United States. ADRs, ordinary shares, and New York shares all may be purchased with and sold for U.S. dollars, which protects the Fund from the foreign settlement risks described below.

Depositary receipts may be sponsored or unsponsored. Although the two types of depositary receipt facilities (unsponsored or sponsored) are similar, there are differences regarding a holder’s rights and obligations and the practices of market participants. A depositary may establish an unsponsored facility without participation by (or acquiescence of) the underlying issuer; typically, however, the depositary requests a letter of non-objection from the underlying issuer prior to establishing the facility. Holders of unsponsored depositary receipts generally bear all the costs of the facility. The depositary usually charges fees upon the deposit and withdrawal of the underlying securities, the conversion of dividends into U.S. dollars or other currency, the disposition of non-cash distributions, and the performance of other services. The depositary of an unsponsored facility frequently is under no obligation to distribute shareholder communications received from the underlying issuer or to pass through voting rights to depositary receipt holders with respect to the underlying securities.

Sponsored depositary receipt facilities are created in generally the same manner as unsponsored facilities, except that sponsored depositary receipts are established jointly by a depositary and the underlying issuer through a deposit agreement. The deposit agreement sets out the rights and responsibilities of the underlying issuer, the depositary, and the depositary receipt holders. With sponsored facilities, the underlying issuer typically bears some of the costs of the depositary receipts (such as dividend payment fees of the depositary), although most

sponsored depositary receipts holders may bear costs such as deposit and withdrawal fees. Depositories of most sponsored depositary receipts agree to distribute notices of shareholder meetings, voting instructions, and other shareholder communications and information to the depositary receipt holders at the underlying issuer's request.

Investing in foreign companies may involve risks not typically associated with investing in companies domiciled in the United States. The value of securities denominated in foreign currencies, and of dividends from such securities, can change significantly when foreign currencies strengthen or weaken relative to the U.S. dollar. Foreign securities markets generally have less trading volume and less liquidity than U.S. markets, and prices in some foreign markets can be very volatile. Many foreign countries lack uniform accounting and disclosure standards comparable to those that apply to U.S. companies, and it may be more difficult to obtain reliable information regarding a foreign issuer's financial condition and operations. In addition, the costs of foreign investing, including withholding taxes, brokerage commissions, and custodial fees, generally are higher than for U.S. investments.

Investing in companies located abroad also carries political and economic risks distinct from those associated with investing in the United States. Foreign investment may be affected by actions of foreign governments adverse to the interests of U.S. investors, including the possibility of seizure, expropriation or nationalization of assets, including foreign deposits, confiscatory taxation, restrictions on U.S. investment, or on the ability to repatriate assets or to convert currency into U.S. dollars. There may be a greater possibility of default by foreign governments or foreign-government sponsored enterprises. Investments in foreign countries also involve a risk of local political, economic, or social instability, military action or unrest, or adverse diplomatic developments.

Foreign Securities

The Fund invests a significant portion of its assets in non-U.S. securities and instruments, or in instruments that provide exposure to such securities and instruments. Investments in non-U.S. securities involve certain risks that may not be present with investments in U.S. securities. For example, investments in non-U.S. securities may be subject to risk of loss due to foreign currency fluctuations or to political or economic instability. There may be less information publicly available about a non-U.S. issuer than a U.S. issuer. Non-U.S. issuers may be subject to different accounting, auditing, financial reporting and investor protection standards than U.S. issuers. Investments in non-U.S. securities may be subject to withholding or other taxes and may be subject to additional trading, settlement, custodial, and operational risks (including restrictions on the transfers of securities). With respect to certain countries, there is the possibility of government intervention and expropriation or nationalization of assets. Because legal systems differ, there is also the possibility that it will be difficult to obtain or enforce legal judgments in certain countries.

Non-U.S. securities markets may not be as developed or efficient as, and may be more volatile than, those in the U.S. While the volume of shares traded on non-U.S. securities markets generally has been growing, such markets usually have substantially less volume than U.S. markets. Therefore, the Fund's investments in non-U.S. equity securities may be less liquid and subject to more rapid and erratic price movements than comparable securities listed for trading on U.S. exchanges. Non-U.S. equity securities may trade at price/earnings multiples higher than comparable U.S. securities and such levels may not be sustainable. There may be less government supervision and regulation of foreign stock exchanges, brokers, banks and listed companies abroad than in the U.S. Moreover, settlement practices for transactions in foreign markets may differ from those in U.S. markets. Such differences may include delays beyond periods customary in the U.S. and practices, such as delivery of securities prior to receipt of payment, that increase the likelihood of a failed settlement, which can result in losses to the Fund. Foreign exchanges may be open on days when the Fund does not price its shares, thus, the value of the securities in the Fund's portfolio may change on days when shareholders will not be able to purchase or sell the Fund's shares. Conversely, Fund shares may trade on days when foreign exchanges are closed. Each of these factors can make investments in the Fund more volatile and potentially less liquid than other types of investments. In addition, the Fund may change its creation or redemption procedures without notice in connection with

restrictions on the transfer of securities. For more information on creation and redemption procedures, see “Creation and Redemption of Creation Units” herein.

Foreign brokerage commissions, custodial expenses and other fees are also generally higher than for securities traded in the U.S. This may cause the Fund to incur higher portfolio transaction costs than domestic equity funds. Fluctuations in exchange rates may also affect the earning power and asset value of the foreign entity issuing a security, even one denominated in U.S. dollars. Dividend and interest payments may be repatriated based on the exchange rate at the time of disbursement, and restrictions on capital flows may be imposed.

Economic conditions, such as volatile currency exchange rates and interest rates, political events and other conditions may, without prior warning, lead to government intervention and the imposition of “capital controls.” Countries use these controls to restrict volatile movements of capital entering (inflows) and exiting (outflows) their country to respond to certain economic conditions. Such controls are mainly applied to short-term capital transactions to counter speculative flows that threaten to undermine the stability of the exchange rate and deplete foreign exchange reserves. Capital controls include the prohibition of, or restrictions on, the ability to transfer currency, securities or other assets. Levies may be placed on profits repatriated by foreign entities (such as the Fund). Capital controls may impact the ability of the Fund to create and redeem Creation Units, adversely affect the trading market for shares of the Fund, and cause the Fund to trade at prices materially different from its NAV. There can be no assurance a country in which the Fund invests will not impose a form of capital control to the possible detriment of the Fund and its shareholders.

Non-U.S. Government Securities. The Fund may invest in short-term securities issued or guaranteed by non-U.S. governments, agencies and instrumentalities. The Fund also may purchase intermediate and long-term obligations issued or guaranteed by non-U.S. governments, agencies and instrumentalities. Non-U.S. government securities include direct obligations, as well as obligations guaranteed by a foreign government including state, territory or local governments.

Geographic Concentration

Funds that are less diversified across countries or geographic regions are generally riskier than more geographically diversified funds. A fund that focuses on a single country or a specific region is more exposed to that country’s or region’s economic cycles, currency exchange rates, stock market valuations and political risks, among others, compared with a more geographically diversified fund. The economies and financial markets of certain regions, such as Asia, can be interdependent and may be adversely affected by the same events. Set forth below for certain markets in which the Fund may invest are brief descriptions of some of the conditions and risks in each such market.

Investments in Emerging Markets Securities. The Fund may invest substantially all of its assets in markets that are considered to be “emerging.” Investing in securities listed and traded in emerging markets may be subject to additional risks associated with emerging market economies. Such risks may include: (i) greater market volatility; (ii) lower trading volume; (iii) greater social, political and economic uncertainty; (iv) governmental controls on foreign investments and limitations on repatriation of invested capital; (v) the risk that companies may be held to lower disclosure, corporate governance, auditing and financial reporting standards than companies in more developed markets; and (vi) the risk that there may be less protection of property rights than in other countries. Emerging markets are generally less liquid and less efficient than developed securities markets.

Investments in China and Hong Kong. The Fund may invest in securities listed and traded on the Hong Kong Stock Exchange. In addition to the aforementioned risks of investing in non-U.S. securities, investing in securities listed and traded in Hong Kong involves special considerations not typically associated with investing in countries with more democratic governments or more established economies or securities markets. Such risks may include: (i) the risk of nationalization or expropriation of assets or confiscatory taxation; (ii) greater social, economic and political uncertainty (including the risk of war); (iii) dependency on exports and the corresponding importance of

international trade; (iv) increasing competition from Asia's other low-cost emerging economies; (v) currency exchange rate fluctuations and the lack of available currency hedging instruments; (vi) higher rates of inflation; (vii) controls on foreign investment and limitations on repatriation of invested capital and on the Fund's ability to exchange local currencies for U.S. dollars; (viii) greater governmental involvement in and control over the economy; (ix) the risk that the Chinese government may decide not to continue to support the economic reform programs implemented since 1978 and could return to the prior, completely centrally planned, economy; (x) the fact that Chinese companies, particularly those located in China, may be smaller, less seasoned and newly organized; (xi) the differences in, or lack of, auditing and financial reporting standards which may result in unavailability of material information about issuers, particularly in China; (xii) the fact that statistical information regarding the economy of China may be inaccurate or not comparable to statistical information regarding the U.S. or other economies; (xiii) the less extensive, and still developing, regulation of the securities markets, business entities and commercial transactions; (xiv) the fact that the settlement period of securities transactions in foreign markets may be longer; (xv) the fact that the willingness and ability of the Chinese government to support the Chinese and Hong Kong economies and markets is uncertain; (xvi) the risk that it may be more difficult, or impossible, to obtain and/or enforce a judgment than in other countries; (xvii) the rapidity and erratic nature of growth, particularly in China, resulting in inefficiencies and dislocations; (xviii) the risk that, because of the degree of interconnectivity between the economies and financial markets of China and Hong Kong, any sizable reduction in the demand for goods from China, or an economic downturn in China, could negatively affect the economy and financial market of Hong Kong as well; and (xix) the risk that certain companies in the Fund's Underlying Index may have dealings with countries subject to sanctions or embargoes imposed by the U.S. Government or identified as state sponsors of terrorism.

Investments in Hong Kong are also subject to certain political risks. Following the establishment of the People's Republic of China by the Communist Party in 1949, the Chinese government renounced various debt obligations incurred by China's predecessor governments, which obligations remain in default, and expropriated assets without compensation. There can be no assurance that the Chinese government will not take similar action in the future. An investment in the Fund involves risk of a total loss. China has committed by treaty to preserve Hong Kong's autonomy and its economic, political and social freedoms for 50 years from the July 1, 1997 transfer of sovereignty from Great Britain to China. However, if China would exert its authority so as to alter the economic, political or legal structures or the existing social policy of Hong Kong, investor and business confidence in Hong Kong could be negatively affected, which in turn could negatively affect markets and business performance. These and other factors could have a negative impact on the Fund's performance.

Repurchase Agreements

The Fund may enter into repurchase agreements with counterparties that are deemed to present acceptable credit risks. A repurchase agreement is a transaction in which the Fund purchases securities or other obligations from a bank or securities dealer (or its affiliate) and simultaneously commits to resell them to a counterparty at an agreed-upon date or upon demand and at a price reflecting a market rate of interest unrelated to the coupon rate or maturity of the purchased obligations. The Fund maintains custody of the underlying obligations prior to their repurchase, either through its regular custodian or through a special "triparty" custodian or sub-custodian that maintains separate accounts for both the Fund and its counterparty. Thus, the obligation of the counterparty to pay the repurchase price on the date agreed to or upon demand is, in effect, secured by such obligations.

Repurchase agreements carry certain risks not associated with direct investments in securities, including a possible decline in the market value of the underlying obligations. If their value becomes less than the repurchase price, plus any agreed-upon additional amount, the counterparty must provide additional collateral so that at all times the collateral is at least equal to the repurchase price plus any agreed-upon additional amount. The difference between the total amount to be received upon repurchase of the obligations and the price that was paid by the Fund upon acquisition is accrued as interest and included in its net investment income. Repurchase agreements involving obligations other than U.S. government securities (such as commercial paper and corporate bonds) may be subject to special risks and may not have the benefit of certain protections in the event of the

counterparty's insolvency. If the seller or guarantor becomes insolvent, the Fund may suffer delays, costs and possible losses in connection with the disposition of collateral.

Tracking Error

The Fund may experience tracking error. A number of factors may contribute to the Fund's tracking error. For example, the following factors may affect the ability of the Fund to achieve correlation with the performance of the Underlying Index: (1) Fund expenses, including brokerage (which may be increased by high portfolio turnover); (2) fluctuations in currency exchange rates; (3) the Fund holding less than all of the securities in the Underlying Index and/or securities not included in the Underlying Index; (4) an imperfect correlation between the performance of instruments held by the Fund, such as futures contracts and options, and the performance of the underlying securities in the market; (5) bid-ask spreads (the effect of which may be increased by portfolio turnover); (6) the Fund holding instruments traded in a market that has become illiquid or disrupted; (7) Fund share prices being rounded to the nearest cent; (8) changes to the Underlying Index that are not disseminated in advance; (9) the need to conform the Fund's portfolio holdings to comply with investment restrictions or policies or regulatory or tax law requirements; (10) the time difference between the close of the foreign market on which foreign securities are traded and the time the Fund prices its shares; or (11) early or unanticipated closings of the markets on which the holdings of the Fund trade, resulting in the inability of the Fund to execute intended portfolio transactions. To the extent the Fund engages in fair value pricing, the day-to-day correlation of the Fund's performance may tend to vary from the closing performance of the Underlying Index.

U.S. Government Securities

The Fund may invest in U.S. government securities. Securities issued or guaranteed by the U.S. government or its agencies or instrumentalities include U.S. Treasury securities, which are backed by the full faith and credit of the U.S. Treasury and which differ only in their interest rates, maturities, and times of issuance. U.S. Treasury bills have initial maturities of one-year or less; U.S. Treasury notes have initial maturities of one to ten years; and U.S. Treasury bonds generally have initial maturities of greater than ten years. Certain U.S. government securities are issued or guaranteed by agencies or instrumentalities of the U.S. government including, but not limited to, obligations of U.S. government agencies or instrumentalities such as Fannie Mae, Freddie Mac, the government National Mortgage Association ("Ginnie Mae"), the Small Business Administration, the Federal Farm Credit Administration, the Federal Home Loan Banks, Banks for Cooperatives (including the Central Bank for Cooperatives), the Federal Land Banks, the Federal Intermediate Credit Banks, the Tennessee Valley Authority, the Export-Import Bank of the United States, the Commodity Credit Corporation, the Federal Financing Bank, the National Credit Union Administration and the Federal Agricultural Mortgage Corporation.

Some obligations issued or guaranteed by U.S. government agencies and instrumentalities, including, for example, Ginnie Mae pass-through certificates, are supported by the full faith and credit of the U.S. Treasury. Other obligations issued by or guaranteed by federal agencies, such as those securities issued by Fannie Mae, are supported by the discretionary authority of the U.S. government to purchase certain obligations of the federal agency, while other obligations issued by or guaranteed by federal agencies, such as those of the Federal Home Loan Banks, are supported by the right of the issuer to borrow from the U.S. Treasury, while the U.S. government provides financial support to such U.S. government-sponsored federal agencies, no assurance can be given that the U.S. government will always do so, since the U.S. government is not so obligated by law. U.S. Treasury notes and bonds typically pay coupon interest semi-annually and repay the principal at maturity.

On September 7, 2008, the U.S. Treasury announced a federal takeover of Fannie Mae, and Freddie Mac, placing the two federal instrumentalities in conservatorship. Under the takeover, the U.S. Treasury agreed to acquire \$1 billion of senior preferred stock of each instrumentality and obtained warrants for the purchase of common stock of each instrumentality (the "Senior Preferred Stock Purchase Agreement" or "Agreement"). Under the Agreement, the U.S. Treasury pledged to provide up to \$200 billion per instrumentality as needed, including the contribution of cash capital to the instrumentalities in the event their liabilities exceed their assets. This was intended to ensure that the instrumentalities maintain a positive net worth and meet their financial obligations,

preventing mandatory triggering of receivership. On December 24, 2009, the U.S. Treasury announced that it was amending the Agreement to allow the \$200 billion cap on the U.S. Treasury's funding commitment to increase as necessary to accommodate any cumulative reduction in net worth until 2012. For the period during which these Agreements were in effect, the investments of holders, including the Fund, of mortgage-backed securities and other obligations issued by Fannie Mae and Freddie Mac are protected.

- **U.S. Treasury Obligations.** U.S. Treasury obligations consist of bills, notes and bonds issued by the U.S. Treasury and separately traded interest and principal component parts of such obligations that are transferable through the federal book-entry system known as Separately Traded Registered Interest and Principal Securities ("STRIPS") and Treasury Receipts ("TRs").
- **Receipts.** Interests in separately traded interest and principal component parts of U.S. government obligations that are issued by banks or brokerage firms and are created by depositing U.S. government obligations into a special account at a custodian bank. The custodian holds the interest and principal payments for the benefit of the registered owners of the certificates or receipts. The custodian arranges for the issuance of the certificates or receipts evidencing ownership and maintains the register. TRs and STRIPS are interests in accounts sponsored by the U.S. Treasury. Receipts are sold as zero coupon securities.
- **U.S. Government Zero Coupon Securities.** STRIPS and receipts are sold as zero coupon securities, that is, fixed income securities that have been stripped of their unmatured interest coupons. Zero coupon securities are sold at a (usually substantial) discount and redeemed at face value at their maturity date without interim cash payments of interest or principal. The amount of this discount is accreted over the life of the security, and the accretion constitutes the income earned on the security for both accounting and tax purposes. Because of these features, the market prices of zero coupon securities are generally more volatile than the market prices of securities that have similar maturity but that pay interest periodically. Zero coupon securities are likely to respond to a greater degree to interest rate changes than are non-zero coupon securities with similar maturity and credit qualities.
- **U.S. Government Agencies.** Some obligations issued or guaranteed by agencies of the U.S. government are supported by the full faith and credit of the U.S. Treasury, others are supported by the right of the issuer to borrow from the U.S. Treasury, while still others are supported only by the credit of the instrumentality. Guarantees of principal by agencies or instrumentalities of the U.S. government may be a guarantee of payment at the maturity of the obligation so that in the event of a default prior to maturity there might not be a market and thus no means of realizing on the obligation prior to maturity. Guarantees as to the timely payment of principal and interest do not extend to the value or yield of these securities nor to the value of the Fund's shares.

Non-Principal Investment Policies, Techniques and Risk Factors – The investment policies, techniques and risk factors described below are not considered to be principal to the management of the Fund. However, the Fund is permitted to, and may from time to time, engage in the investment activities described below if and when the Adviser determines that such activities will help the Fund to achieve its investment objective. Shareholders will be notified if the Fund's use of any of the non-principal investment policies, techniques or instruments described below represents a material change in the Fund's principal investment strategies.

Bank Deposits and Obligations

The Fund may invest in deposits and other obligations of U.S. and non-U.S. banks and financial institutions. Deposits and obligations of banks and financial institutions include certificates of deposit, time deposits, and bankers' acceptances. Certificates of deposit and time deposits represent an institution's obligation to repay funds deposited with it that earn a specified interest rate. Certificates of deposit are negotiable certificates, while time deposits are non-negotiable deposits. A banker's acceptance is a time draft drawn on and accepted by a bank that

becomes a primary and unconditional liability of the bank upon acceptance. Investments in obligations of non-U.S. banks and financial institutions may involve risks that are different from investments in obligations of U.S. banks. These risks include future unfavorable political and economic developments, seizure or nationalization of foreign deposits, currency controls, interest limitations or other governmental restrictions that might affect the payment of principal or interest on the securities held in the Fund.

Borrowing

Although the Fund does not intend to borrow money, the Fund may do so to the extent permitted by the 1940 Act. Borrowing for investment purposes is a form of leverage. Leveraging investments, by purchasing securities with borrowed money, is a speculative technique that increases investment risk, but also increases investment opportunity. Because substantially all of the Fund's assets will fluctuate in value, whereas the interest obligations on borrowings may be fixed, the NAV of the Fund will increase more when the Fund's portfolio assets increase in value and decrease more when the Fund's portfolio assets decrease in value than would otherwise be the case. Moreover, interest costs on borrowings may fluctuate with changing market rates of interest and may partially offset or exceed the returns on the borrowed funds. The Fund also may be required to maintain minimum average balances in connection with a borrowing or to pay a commitment or other fee to maintain a line of credit, which would further increase the cost of borrowing. Under adverse conditions, the Fund might have to sell portfolio securities to meet interest or principal payments at a time when investment considerations would not favor such sales. Generally, the Fund would use this form of leverage during periods when the Adviser believes that the Fund's investment objective would be furthered.

The Fund also may borrow money to facilitate management of the Fund's portfolio by enabling the Fund to meet redemption requests when the liquidation of portfolio instruments would be inconvenient or disadvantageous. Such borrowing is not for investment purposes and will be repaid by the borrowing Fund promptly. As required by the 1940 Act, the Fund must maintain continuous asset coverage (total assets, including assets acquired with borrowed funds, less liabilities exclusive of borrowings) of 300% of all amounts borrowed. If, at any time, the value of the Fund's assets should fail to meet this 300% coverage test, the Fund, within three days (not including Sundays and holidays), will reduce the amount of the Fund's borrowings to the extent necessary to meet this 300% coverage requirement. Maintenance of this percentage limitation may result in the sale of portfolio securities at a time when investment considerations otherwise indicate that it would be disadvantageous to do so.

In addition to the foregoing, the Fund is authorized to borrow money as a temporary measure for extraordinary or emergency purposes in amounts not in excess of 5% of the value of the Fund's total assets. Borrowings for extraordinary or emergency purposes are not subject to the foregoing 300% asset coverage requirement. While the Fund does not anticipate doing so, the Fund is authorized to pledge (*i.e.*, transfer a security interest in) portfolio securities in an amount up to one-third of the value of the Fund's total assets in connection with any borrowing.

Commercial Paper

The Fund may invest in commercial paper. Commercial paper is an unsecured short-term promissory note with a fixed maturity of no more than 270 days issued by corporations, generally to finance short-term business needs. The commercial paper purchased by the Fund generally will be rated in the upper two short-term ratings by at least two NRSROs or, if unrated, deemed to be of equivalent quality by the Adviser or the Sub-Adviser. If a security satisfies the rating requirement upon initial purchase and is subsequently downgraded, the Fund is not required to dispose of the security. In the event of such an occurrence, the Adviser or the Sub-Adviser will determine what action, including potential sale, is in the best interest of the Fund. The Fund also may purchase unrated commercial paper provided that such paper is determined to be of comparable quality by the Adviser or the Sub-Adviser. Commercial paper issues in which the Fund may invest include securities issued by corporations without registration under the Securities Act in reliance on the exemption from such registration afforded by Section 3(a)(3) thereof, and commercial paper issued in reliance on the so-called "private placement" exemption from registration, which is afforded by Section 4(2) of the Securities Act ("Section 4(2) paper"). Section 4(2) paper is restricted as to disposition under the federal securities laws in that any resale must similarly be made in

an exempt transaction. Section 4(2) paper is normally resold to other institutional investors through or with the assistance of investment dealers who make a market in Section 4(2) paper, thus providing liquidity.

Currency Transactions

The Fund may enter into foreign currency forward and foreign currency futures contracts to facilitate local securities settlements or to protect against currency exposure in connection with distributions to shareholders. The Fund does not expect to engage in currency transactions for the purpose of hedging against declines in the value of the Fund's assets that are denominated in one or more foreign currencies.

Forward Foreign Currency Contracts. A forward foreign currency exchange contract ("forward contract") involves an obligation to purchase or sell a specific currency at a future date, which may be any fixed number of days from the date of the contract agreed upon by the parties, at a price set at the time of the contract. These contracts are principally traded in the interbank market conducted directly between currency traders (usually large commercial banks) and their customers. A forward contract generally has no margin deposit requirement, and no commissions are charged at any stage for trades.

A non-deliverable forward contract is a forward contract where there is no physical settlement of two currencies at maturity. Non-deliverable forward contracts are contracts between parties in which one party agrees to make a payment to the other party (the "Counterparty") based on the change in market value or level of a specified currency. In return, the Counterparty agrees to make payment to the first party based on the return of a different specified currency. Non-deliverable forward contracts will usually be done on a net basis, with the Fund receiving or paying only the net amount of the two payments. The net amount of the excess, if any, of the Fund's obligations over its entitlements with respect to each non-deliverable forward contract is accrued on a daily basis and an amount of cash or highly liquid securities having an aggregate value at least equal to the accrued excess is maintained in an account at the Trust's custodian bank. The risk of loss with respect to non-deliverable forward contracts generally is limited to the net amount of payments that the Fund is contractually obligated to make or receive.

Foreign Currency Futures Contracts. A foreign currency futures contract is a contract involving an obligation to deliver or acquire the specified amount of a specific currency, at a specified price and at a specified future time. Futures contracts may be settled on a net cash payment basis rather than by the sale and delivery of the underlying currency.

Currency exchange transactions involve a significant degree of risk and the markets in which currency exchange transactions are effected are highly volatile, highly specialized and highly technical. Significant changes, including changes in liquidity and prices, can occur in such markets within very short periods of time, often within minutes. Currency exchange trading risks include, but are not limited to, exchange rate risk, maturity gap, interest rate risk, and potential interference by foreign governments through regulation of local exchange markets, foreign investment or particular transactions in foreign currency. If the Fund utilizes foreign currency transactions at an inappropriate time, such transactions may not serve their intended purpose of improving the correlation of the Fund's return with the performance of its Underlying Index and may lower the Fund's return. The Fund could experience losses if the value of any currency forwards and futures positions is poorly correlated with its other investments or if it could not close out its positions because of an illiquid market. Such contracts are subject to the risk that the counterparty will default on its obligations. In addition, the Fund will incur transaction costs, including trading commissions, in connection with certain foreign currency transactions.

Derivatives

The Fund may use derivative instruments as part of its investment strategies. Generally, derivatives are financial contracts the value of which depends upon, or is derived from, the value of an underlying asset, reference rate or index, and may relate to bonds, interest rates, currencies, commodities, and related indexes. Examples of derivative instruments include forward currency contracts, currency and interest rate swaps, currency options,

futures contracts, options on futures contracts and swap agreements. The Fund's use of derivative instruments will be underpinned by investments in short term, high-quality U.S. money market securities.

With respect to certain kinds of derivative transactions entered into by the Fund that involve obligations to make future payments to third parties, including, but not limited to, futures contracts, forward contracts, swap contracts, the purchase of securities on a when-issued or delayed delivery basis, or reverse repurchase agreements, under applicable federal securities laws, rules, and interpretations thereof, the Fund must "set aside" (referred to sometimes as "asset segregation") liquid assets, or engage in other measures to "cover" open positions with respect to such transactions. For example, with respect to forward foreign currency exchange contracts and futures contracts that are not contractually required to "cash-settle," the Fund must cover its open positions by setting aside liquid assets equal to the contracts' full, notional value, except that deliverable forward contracts for currencies that are liquid will be treated as the equivalent of "cash-settled" contracts. As such, the Fund may set aside liquid assets in an amount equal to the Fund's daily marked-to-market (net) obligation (*i.e.*, the Fund's daily net liability if any) rather than the full notional amount under such deliverable forward foreign currency exchange contracts. With respect to forward foreign currency exchange contracts and futures contracts that are contractually required to "cash-settle," the Fund may set aside liquid assets in an amount equal to the Fund's daily marked-to-market (net) obligation rather than the notional value. The Fund reserves the right to modify its asset segregation policies in the future.

Swap Agreements. The Fund may enter into swap agreements, including interest rate swaps and currency swaps. A typical interest rate swap involves the exchange of a floating interest rate payment for a fixed interest payment. A typical foreign currency swap involves the exchange of cash flows based on the notional differences among two or more currencies. Swap agreements may be used to hedge or achieve exposure to, for example, currencies, interest rates, and money market securities without actually purchasing such currencies or securities. The Fund may use swap agreements to invest in a market without owning or taking physical custody of the underlying securities in circumstances in which direct investment is restricted for legal reasons or is otherwise impracticable. Swap agreements will tend to shift the Fund's investment exposure from one type of investment to another or from one payment stream to another. Depending on their structure, swap agreements may increase or decrease the Fund's exposure to long- or short-term interest rates (in the United States or abroad), foreign currencies, corporate borrowing rates, or other factors, and may increase or decrease the overall volatility of the Fund's investments and its share price.

Futures, Options and Options on Futures Contracts. The Fund may enter into U.S. or foreign futures contracts and options and options on futures contracts. When the Fund purchases a futures contract, it agrees to purchase a specified underlying instrument at a specified future date. When the Fund sells a futures contract, it agrees to sell the underlying instrument at a specified future date. The price at which the purchase and sale will take place is fixed when the Fund enters into the contract. Futures can be held until their delivery dates, or can be closed out before then if a liquid secondary market is available. To the extent the Fund uses futures and options, it will do so only in accordance with Rule 4.5 of the Commodity Exchange Act ("CEA"). The Trust, on behalf of the Fund, has filed a notice of eligibility for exclusion from the definition of the term "commodity pool operator" in accordance with Rule 4.5 so that the Fund is not subject to registration or regulation as a commodity pool operator under the CEA.

The risk of loss in trading futures contracts or uncovered call options in some strategies (*e.g.*, selling uncovered stock index futures contracts) is potentially unlimited. The Fund does not plan to use futures and options contracts in this way. The risk of a futures position may still be large as traditionally measured due to the low margin deposits required. In many cases, a relatively small price movement in a futures contract may result in immediate and substantial loss or gain to the investor relative to the size of a required margin deposit. The Fund, however, intends to utilize futures and options contracts in a manner designed to limit their risk exposure to levels comparable to direct investment in stocks.

Utilization of futures and options on futures by the Fund involves the risk of imperfect or even negative correlation to the Underlying Index if the index underlying the futures contract differs from the Underlying Index. There is also the risk of loss by the Fund of margin deposits in the event of bankruptcy of a broker with whom the Fund has an open position in the futures contract or option. The purchase of put or call options will be based upon predictions by the Fund as to anticipated trends, which predictions could prove to be incorrect.

The potential for loss related to the purchase of an option on a futures contract is limited to the premium paid for the option plus transaction costs. Because the value of the option is fixed at the point of sale, there are no daily cash payments by the purchaser to reflect changes in the value of the underlying contract; however, the value of the option changes daily and that change would be reflected in the NAV of the Fund. The potential for loss related to writing options is unlimited.

Although the Fund intends to enter into futures contracts only if there is an active market for such contracts, there is no assurance that an active market will exist for the contracts at any particular time.

Fixed Income Securities

The Fund may invest in fixed income securities. The market value of the fixed income securities in which the Fund invests will change in response to interest rate changes and other factors. During periods of falling interest rates, the values of outstanding fixed income securities generally rise. Conversely, during periods of rising interest rates, the values of such securities generally decline. Moreover, while securities with longer maturities tend to produce higher yields, the prices of longer maturity securities are also subject to greater market fluctuations as a result of changes in interest rates. Changes by recognized agencies in the rating of any fixed income security and in the ability of an issuer to make payments of interest and principal also affect the value of these investments. Changes in the value of these securities will not necessarily affect cash income derived from these securities but will affect the Fund's NAV. Additional information regarding fixed income securities is described below:

- **Duration.** Duration is a measure of the expected change in value of a fixed income security for a given change in interest rates. For example, if interest rates changed by one percent, the value of a security having an effective duration of two years generally would vary by two percent. Duration takes the length of the time intervals between the present time and time that the interest and principal payments are scheduled, or in the case of a callable bond, expected to be received, and weighs them by the present values of the cash to be received at each future point in time.
- **Variable and Floating Rate Securities.** Variable and floating rate instruments involve certain obligations that may carry variable or floating rates of interest, and may involve a conditional or unconditional demand feature. Such instruments bear interest at rates which are not fixed, but which vary with changes in specified market rates or indices. The interest rates on these securities may be reset daily, weekly, quarterly, or some other reset period, and may have a set floor or ceiling on interest rate changes. There is a risk that the current interest rate on such obligations may not accurately reflect existing market interest rates. A demand instrument with a demand notice exceeding seven days may be considered illiquid if there is no secondary market for such security.

Debt Securities. The Fund may invest in debt securities. A debt security is a security consisting of a certificate or other evidence of a debt (secured or unsecured) on which the issuing company or governmental body promises to pay the holder thereof a fixed, variable, or floating rate of interest for a specified length of time, and to repay the debt on the specified maturity date. Some debt securities, such as zero coupon bonds, do not make regular interest payments but are issued at a discount to their principal or maturity value. Debt securities include a variety of fixed income obligations, including, but not limited to, corporate bonds, government securities, municipal securities, convertible securities, mortgage-backed securities, and asset-backed securities. Debt securities include investment-grade securities, non-investment-grade securities, and unrated securities. Debt securities are subject to

a variety of risks, such as interest rate risk, income risk, call/prepayment risk, inflation risk, credit risk, and (in the case of foreign securities) country risk and currency risk.

Corporate Debt Securities. The Fund may seek investment in corporate debt securities representative of one or more high yield bond or credit derivative indices, which may change from time to time. Selection will generally not be dependent on independent credit analysis or fundamental analysis performed by the Adviser. The Fund may invest in all grades of corporate debt securities including below investment grade as discussed below. See Appendix B for a description of corporate bond ratings. The Fund may also invest in unrated securities.

Corporate debt securities are typically fixed-income securities issued by businesses to finance their operations, but may also include bank loans to companies. Notes, bonds, debentures and commercial paper are the most common types of corporate debt securities. The primary differences between the different types of corporate debt securities are their maturities and secured or un-secured status. Commercial paper has the shortest term and is usually unsecured. The broad category of corporate debt securities includes debt issued by domestic or foreign companies of all kinds, including those with small-, mid- and large-capitalizations. Corporate debt may be rated investment-grade or below investment-grade and may carry variable or floating rates of interest.

Because of the wide range of types, and maturities, of corporate debt securities, as well as the range of creditworthiness of its issuers, corporate debt securities have widely varying potentials for return and risk profiles. For example, commercial paper issued by a large established domestic corporation that is rated investment-grade may have a modest return on principal, but carries relatively limited risk. On the other hand, a long-term corporate note issued by a small foreign corporation from an emerging market country that has not been rated may have the potential for relatively large returns on principal, but carries a relatively high degree of risk.

Corporate debt securities carry both credit risk and interest rate risk. Credit risk is the risk that the Fund could lose money if the issuer of a corporate debt security is unable to pay interest or repay principal when it is due. Some corporate debt securities that are rated below investment-grade are generally considered speculative because they present a greater risk of loss, including default, than higher quality debt securities. The credit risk of a particular issuer's debt security may vary based on its priority for repayment. For example, higher ranking (senior) debt securities have a higher priority than lower ranking (subordinated) securities. This means that the issuer might not make payments on subordinated securities while continuing to make payments on senior securities. In addition, in the event of bankruptcy, holders of higher-ranking senior securities may receive amounts otherwise payable to the holders of more junior securities. Interest rate risk is the risk that the value of certain corporate debt securities will tend to fall when interest rates rise. In general, corporate debt securities with longer terms tend to fall more in value when interest rates rise than corporate debt securities with shorter terms.

Debt Securities Issued by the World Bank for Reconstruction and Development (“World Bank”). The Fund may invest in debt securities issued by the World Bank. Debt securities issued by the World Bank may include high quality global bonds backed by 185 member governments, including the United States, Japan, Germany, France and the United Kingdom, as well as in bonds in “non-core” currencies, including emerging markets and European accession countries with ratings of AAA or Aaa, structured notes, and discount notes represented by certificates, in bearer form only, or in un-certified form (Book Entry Discount Notes) with maturities of 360 days or less at a discount, and in the case of Discount Notes, in certified form only and on an interest bearing basis in the U.S. and Eurodollar markets.

Illiquid Securities

The Fund may invest up to an aggregate amount of 15% of its net assets in illiquid securities. If the percentage of the Fund's net assets invested in illiquid securities exceeds 15% due to market activity, the Fund will take appropriate measures to reduce its holdings of illiquid securities as soon as reasonably practicable. Appropriate measures may not include the liquidation of an illiquid investment where the Fund would be disadvantaged by such disposition. The term “illiquid securities” for this purpose means securities that cannot be disposed of within

seven days in the ordinary course of business at approximately the amount at which the Fund has valued the securities. Illiquid securities include securities subject to contractual or other restrictions on resale and other instruments that lack readily available markets. The inability of the Fund to readily dispose of illiquid or not readily marketable investments or at a reasonable price could impair the Fund's ability to raise cash for redemptions or other purposes. In addition, the sale of illiquid securities also may require more time and may result in higher dealer discounts and other selling expenses than does the sale of securities that are not illiquid. Illiquid securities also may be more difficult to value due to the unavailability of reliable market quotations for such securities, and investment in illiquid securities may have an adverse impact on the Fund's NAV. The liquidity of securities purchased by the Fund which are eligible for resale pursuant to Rule 144A will be monitored by the Fund on an ongoing basis. In the event that such a security is deemed to be no longer liquid, the Fund's holdings will be reviewed to determine what action, if any, is required to ensure that the retention of such security does not result in the Fund having more than 15% of its assets invested in illiquid or not readily marketable securities.

Investments in Other Investment Companies

The Fund may invest in the securities of other investment companies to the extent that such an investment would be consistent with the requirements of Section 12(d)(1) of the 1940 Act, or any rule, regulation or order of the SEC or interpretation thereof. Generally, the Fund may invest in the securities of another investment company (the "acquired company") provided that the Fund, immediately after such purchase or acquisition, does not own in the aggregate: (i) more than 3% of the total outstanding voting stock of the acquired company; (ii) securities issued by the acquired company having an aggregate value in excess of 5% of the value of the total assets of the Fund; or (iii) securities issued by the acquired company and all other investment companies (other than Treasury stock of the Fund) having an aggregate value in excess of 10% of the value of the total assets of the Fund. In addition, Section 12(d)(1) prohibits another investment company from selling its shares to the Fund if, after the sale (i) the Fund owns more than 3% of the other investment company's voting stock or (ii) the Fund and other investment companies, and companies controlled by them, own more than 10% of the voting stock of such other investment company.

If the Fund invests in, and thus, is a shareholder of, another investment company, the Fund's shareholders will indirectly bear the Fund's proportionate share of the fees and expenses paid by such other investment company, including advisory fees, in addition to both the management fees payable directly by the Fund to the Fund's own investment adviser and the other expenses that the Fund bears directly in connection with the Fund's own operations.

Consistent with the restrictions discussed above, the Fund may invest in several different types of investment companies from time to time, including mutual funds, ETFs, closed-end funds, and business development companies ("BDCs"), when the Adviser believes such an investment is in the best interests of the Fund and its shareholders. For example, the Fund may elect to invest in another investment company when such an investment presents a more efficient investment option than buying securities individually. The Fund also may invest in investment companies that are included as components of an index, such as BDCs, to seek to track the performance of that index. A BDC is a less common type of closed-end investment company that more closely resembles an operating company than a typical investment company. BDCs generally focus on investing in, and providing managerial assistance to, small, developing, financially troubled, private companies or other companies that may have value that can be realized over time and with management assistance. Similar to an operating company, a BDC's total annual operating expense ratio typically reflects all of the operating expenses incurred by the BDC, and is generally greater than the total annual operating expense ratio of a mutual fund that does not bear the same types of operating expenses. However, as a shareholder of a BDC, the Fund does not directly pay for a portion of all of the operating expenses of the BDC, just as a shareholder of computer manufacturer does not directly pay for the cost of labor associated with producing such computers. As a result, the fees and expenses of the Fund that invests in a BDC will be effectively overstated by an amount equal to the "Acquired Fund Fees and

Expenses.” Acquired Fund Fees and Expenses are not included as an operating expense of the Fund in the Fund’s financial statements, which more accurately reflect the Fund’s actual operating expenses.

Investment companies may include index-based investments, such as ETFs that hold substantially all of their assets in securities representing a specific index. The main risk of investing in index-based investments is the same as investing in a portfolio of equity securities comprising the index. The market prices of index-based investments will fluctuate in accordance with both changes in the market value of their underlying portfolio securities and due to supply and demand for the instruments on the exchanges on which they are traded (which may result in their trading at a discount or premium to their NAVs). Index-based investments may not replicate exactly the performance of their specific index because of transaction costs and because of the temporary unavailability of certain component securities of the index.

Non-U.S. Government Securities

The Fund may invest in short-term securities issued or guaranteed by non-U.S. governments, agencies and instrumentalities. The Fund also may purchase intermediate and long-term obligations issued or guaranteed by non-U.S. governments, agencies and instrumentalities. Non-U.S. government securities include direct obligations, as well as obligations guaranteed by a foreign government including state, territory or local governments.

Portfolio Turnover

In general, the Adviser manages the Fund without regard to restrictions on portfolio turnover. The Fund’s investment strategies may, however, produce relatively high portfolio turnover rates from time to time. To the extent the Fund invests in derivative instruments, the instruments generally will have short-term maturities and, thus, be excluded from the calculation of portfolio turnover. The value of portfolio securities received or delivered as a result of in-kind creations or redemptions of the Fund’s shares also is excluded from the calculation of the Fund’s portfolio turnover rate. As a result, the Fund’s reported portfolio turnover may be low despite relatively high portfolio activity which would, in turn, produce correspondingly greater expenses for the Fund, including brokerage commissions or dealer mark-ups and other transaction costs on the sale of securities and reinvestments in other securities. Generally, the higher the rate of portfolio turnover of a fund, the higher these transaction costs borne by the fund and its long-term shareholders. Such sales may result in the realization of taxable capital gains (including short-term capital gains which are generally taxed to shareholders at ordinary income tax rates) for certain taxable shareholders.

“Portfolio Turnover Rate” is defined under the rules of the SEC as the lesser of the value of the securities purchased or of the securities sold, excluding all securities whose maturities at the time of acquisition were one-year or less, divided by the average monthly value of such securities owned during the year. Based on this definition, instruments with a remaining maturity of less than one-year are excluded from the calculation of the portfolio turnover rate. Instruments excluded from the calculation of portfolio turnover generally would include the futures contracts and option contracts in which the Fund invests because such contracts generally have a remaining maturity of less than one-year.

Real Estate Investment Trusts

The Fund may invest in the securities of real estate investment trusts (“REITs”) to the extent allowed by law. Risks associated with investments in securities of REITs include decline in the value of real estate, risks related to general and local economic conditions, overbuilding and increased competition, increases in property taxes and operating expenses, changes in zoning laws, casualty or condemnation losses, variations in rental income, changes in neighborhood values, the appeal of properties to tenants, and increases in interest rates. In addition, equity REITs may be affected by changes in the values of the underlying property owned by the trusts, while mortgage REITs may be affected by the quality of credit extended. REITs are dependent upon management skills, may not be diversified and are subject to the risks of financing projects. REITs are also subject to heavy cash-flow dependency, defaults by borrowers, self-liquidation and the possibility of failing to qualify for the favorable U.S. federal income tax treatment available to REITs under the Internal Revenue Code of 1986, as amended (the

“Internal Revenue Code”), and to maintain exemption from the 1940 Act. If an issuer of debt securities collateralized by real estate defaults, it is conceivable that the REITs could end up holding the underlying real estate.

Reverse Repurchase Agreements

The Fund may enter into reverse repurchase agreements, which involve the sale of securities held by the Fund subject to its agreement to repurchase the securities at an agreed-upon date or upon demand and at a price reflecting a market rate of interest. Reverse repurchase agreements are subject to the Fund’s limitation on borrowings and may be entered into only with banks or securities dealers or their affiliates. While a reverse repurchase agreement is outstanding, the Fund will maintain the segregation, either on its records or with the Trust’s custodian, of cash or other liquid securities, marked to market daily, in an amount at least equal to its obligations under the reverse repurchase agreement.

Reverse repurchase agreements involve the risk that the buyer of the securities sold by the Fund might be unable to deliver them when the Fund seeks to repurchase. If the buyer of securities under a reverse repurchase agreement files for bankruptcy or becomes insolvent, the buyer or trustee or receiver may receive an extension of time to determine whether to enforce the Fund’s obligation to repurchase the securities, and the Fund’s use of the proceeds of the reverse repurchase agreement may effectively be restricted pending such decision.

Securities Lending

The Fund may lend portfolio securities to certain creditworthy borrowers. The borrowers provide collateral that is maintained in an amount at least equal to the current market value of the securities loaned. No securities loan shall be made on behalf of the Fund if, as a result, the aggregate value of all securities loans of the Fund exceeds one-third of the value of the Fund’s total assets (including the value of the collateral received). The Fund may terminate a loan at any time and obtain the return of the securities loaned. The Fund receives the value of any interest or cash or non-cash distributions paid on the loaned securities.

With respect to loans that are collateralized by cash, the borrower will be entitled to receive a fee based on the amount of cash collateral. The Fund is compensated by the difference between the amount earned on the reinvestment of cash collateral and the fee paid to the borrower. In the case of collateral other than cash, the Fund is compensated by a fee paid by the borrower equal to a percentage of the market value of the loaned securities. Any cash collateral may be reinvested in certain short-term instruments either directly on behalf of the Fund or through one or more joint accounts or money market funds; such reinvestments are subject to investment risk. The Adviser may receive compensation for these investments.

Securities lending involves exposure to certain risks, including operational risk (*i.e.*, the risk of losses resulting from problems in the settlement and accounting process), “gap” risk (*i.e.*, the risk of a mismatch between the return on cash collateral reinvestments and the fees the Fund has agreed to pay a borrower), and credit, legal, counterparty and market risk. If a securities lending counterparty were to default, the Fund would be subject to the risk of a possible delay in receiving collateral or in recovering the loaned securities, or to a possible loss of rights in the collateral. In the event a borrower does not return the Fund’s securities as agreed, the Fund may experience losses if the proceeds received from liquidating the collateral do not at least equal the value of the loaned security at the time the collateral is liquidated, plus the transaction costs incurred in purchasing replacement securities. This event could trigger adverse tax consequences for the Fund. Substitute payments for dividends received by the Fund for securities loaned out by the Fund will not be considered qualified dividend income. The Fund may take the tax effects of this difference into account in its securities lending program.

The Fund pays a portion of the interest or fees earned from securities lending to a borrower as described above and to a securities lending agent who administers the lending program in accordance with guidelines approved by the Trust’s Board.

Short Sales

The Fund may engage in short sales transactions in which the Fund sells a security it does not own. To complete such a transaction, the Fund must borrow or otherwise obtain the security to make delivery to the buyer. The Fund then is obligated to replace the security borrowed by purchasing the security at the market price at the time of replacement. The price at such time may be more or less than the price at which the security was sold by the Fund. Until the security is replaced, the Fund is required to pay to the lender amounts equal to any dividends or interest, which accrue during the period of the loan. To borrow the security, the Fund also may be required to pay a premium, which would increase the cost of the security sold. The Fund may also use repurchase agreements to satisfy delivery obligations in short sales transactions. The proceeds of the short sale will be retained by the broker, to the extent necessary to meet the margin requirements, until the short position is closed out.

Until the Fund closes its short position or replaces the borrowed security, the Fund will: (a) maintain a segregated account containing cash or liquid securities at such a level that the amount deposited in the account plus the amount deposited with the broker as collateral will equal the current value of the security sold short; or (b) otherwise cover the Fund's short position. The Fund may use up to 100% of its portfolio to engage in short sales transactions and collateralize its open short positions.

DESCRIPTION OF THE UNDERLYING INDEX

Index Provider Description

The CSI Overseas China Internet Index is created and maintained by China Securities Index, Co., Ltd. ("CSI"). CSI is a professional index service company jointly founded by the Shanghai Stock Exchange and the Shenzhen Stock Exchange, to provide services relating to securities indices. CSI is independent of the Adviser, the Sub-Adviser and their affiliates.

Constituents Selection

a. CSI Overseas China Index Universe

To qualify for index inclusion, a company must first meet the minimum requirements to enter and remain in the CSI Overseas China Index universe.

To be added to a CSI Overseas China Index, a company must:

- Be primarily listed for trading outside of mainland China; and
- Have traded for at least three (3) months.

In addition, to be added to a CSI Overseas China Index a company must meet at least one of the following criteria:

- Be incorporated in mainland China;
- Have its headquarters in mainland China;
- Derive at least 50% of its revenue from goods produced or sold, or services performed, in mainland China.

Securities which are listed on the Hong Kong Exchange (HKEx) (either on the main board or HKEx's alternative stock market exchange Growth Enterprise Market ("GEM")) must also satisfy the following conditions:

- Be either common stock or equity securities issued by real estate investment trusts (“REITs”);
- Be listed for more than three (3) months in the most recent year unless the daily average total market value of the security since listing is ranked in the top 10 out of all HKEx-listed securities;
- Have a daily average close price in the most recent year of no less than \$0.1 (Hong Kong Dollars (“HKD”));
- Have a daily average close price in the most recent year of no less than \$0.5 HKD if the company’s earnings per share report is negative for the most recently completed annual period;
- Have a daily average turnover ratio (trading volume to shares issued) of no less than 0.1% during the most recent three-month period.

b. Selection Criteria

Once the CSI Overseas China Index universe has been identified, to qualify for inclusion in the CSI Overseas China Internet Index, a company must:

- Have a daily average trading value of equal to or more than \$500,000 (U.S. Dollars) in the past year;
- Have a daily average market capitalization of equal to or more than \$500 million (U.S. Dollars) in the past year; and
- Fall within one of the following sectors, as determined by CSI’s proprietary industry classification standards: Internet Software and Services; Internet Retail Services; Internet Commercial Services; Internet Home Entertainment Software; or Mobile Internet.

Index Calculation

The CSI Overseas China Internet Index is market capitalization weighted and is calculated using a Paasche weighted composite price index formula. The formula is:

$$\text{Current Index} = \frac{\text{Current Adjusted Market Cap of Constituents}}{\text{Base Period}} \times 1000$$

Adjusted market cap = Σ (Price X Adjusted No. of shares X Foreign Exchange Rate X Adjustment Factor). Adjustment factor is between 0 and 1. The weight of a component is capped based on the adjusted U.S. Dollar market capitalization, with no individual component exceeding 10%. The adjusted number of shares are calculated using a category-weighted method detailed in the CSI Overseas China Internet Index methodology.

The CSI Overseas China Internet Index is rebalanced on a semi-annual basis, on the first trading day in January and July.

Index Maintenance and Issue Changes

The CSI Overseas China Internet Index is reviewed and rebalanced by CSI on a semi-annual basis, on the first trading day in January and July. Securities will be added to the CSI Overseas China Internet Index at the semi-annual periods if they become eligible. Component securities are adjusted on an ad hoc basis due to corporate

actions including, but not limited to, bankruptcy, suspension, shares issue and stock splits. In addition, adjustments are made based on the following criteria:

(i) IPOs

CSI does not apply the “fast entry” rule, meaning that there is no rule that stocks of recently issued IPOs be added to the index during the semi-annual review periods.

(ii) Delisted Securities

Delisted securities will be deleted from an index. No replacement security will be added.

(iii) Demerged Companies

Demerged companies will remain in the index.

(iv) Merger between Constituents

The new company will remain in the index. No replacement security will be added.

(v) Constituents Acquired by Non-Constituents

The acquiring company will not remain in the index. No replacement security will be added.

Index Rebalancing/Structural Changes

Changes to the CSI Overseas China Internet Index will be published to CSI’s website at www.csindex.com.cn before changes are effected.

Index Availability

Information regarding the CSI Overseas China Internet Index will be disseminated through Reuters.

Exchange Rates and Pricing

WM/Reuters foreign exchange rates are taken daily at 6:30 a.m. Beijing time, and are used in the calculation of the CSI Overseas China Internet Index.

INVESTMENT LIMITATIONS

Unless otherwise noted, whenever a fundamental or non-fundamental investment policy or limitation states a maximum percentage of the Fund’s assets that may be invested in any security or other asset, or sets forth a policy regarding quality standards, such standard or percentage limitation will be determined immediately after and as a result of the Fund’s acquisition of such security or other asset. Accordingly, other than with respect to the Fund’s limitations on borrowings and illiquid securities, any subsequent change in values, net assets, or other circumstances will not be considered when determining whether the investment complies with the Fund’s investment policies and limitations.

Fundamental Policies

The investment limitations below are fundamental policies of the Fund, and cannot be changed without the consent of the holders of a majority of the Fund’s outstanding shares. The term “majority of the outstanding

shares” means the vote of (i) 67% or more of the Fund’s shares present at a meeting, if more than 50% of the outstanding shares of the Fund are present or represented by proxy, or (ii) more than 50% of the Fund’s outstanding shares, whichever is less.

The Fund may not:

1. Issue senior securities, except as permitted under the 1940 Act.
2. Borrow money, except as permitted under the 1940 Act.
3. Act as an underwriter of another issuer’s securities, except to the extent that the Fund may be considered an underwriter within the meaning of the Securities Act in the disposition of portfolio securities.
4. Purchase the securities of any issuer (other than securities issued or guaranteed by the U.S. government, or any non-U.S. government, or their respective agencies or instrumentalities) if, as a result, more than 25% of the Fund’s total assets would be invested in the securities of companies whose principal business activities are in the same industry, except that the Fund will invest more than 25% of its total assets in securities of the same industry to approximately the same extent that the Fund’s Underlying Index concentrates in the securities of a particular industry or group of industries.
5. Purchase or sell real estate unless acquired as a result of ownership of securities or other instruments (but this shall not prevent the Fund from investing in securities or other instruments backed by real estate, real estate investment trusts or securities of companies engaged in the real estate business).
6. Purchase or sell physical commodities unless acquired as a result of ownership of securities or other instruments (but this shall not prevent the Fund from purchasing or selling options and futures contracts or from investing in securities or other instruments backed by physical commodities).
7. Lend any security or make any other loan except as permitted under the 1940 Act. This means that no more than 33 $\frac{1}{3}$ % of the Fund’s total assets would be lent to other parties. This limitation does not apply to purchases of debt securities or to repurchase agreements, or to acquisitions of loans, loan participations or other forms of debt instruments permissible under the Fund’s investment policies.

Non-Fundamental Policies

The investment limitations below are non-fundamental policies of the Fund and may be changed by the Board.

The Fund will:

1. Not purchase illiquid securities if, in the aggregate, more than 15% of its net assets would be invested in illiquid securities. If the percentage of the Fund’s net assets invested in illiquid securities exceeds 15% due to market activity, the Fund will take appropriate measures to reduce its holdings of illiquid securities as soon as reasonably practicable.
2. Under normal circumstances, invest at least 80% of its net assets, plus any borrowings for investment purposes, in securities of “China Internet Companies” (as defined in the Prospectus).

The Fund may change its non-fundamental investment policies without a shareholder vote, provided that the Fund obtains Board approval. The Fund will provide shareholders with at least sixty (60) days’ prior written notice of any change to non-fundamental policy number 2.

CONTINUOUS OFFERING

The method by which Creation Units of shares are created and traded may raise certain issues under applicable securities laws. Because new Creation Units of shares are issued and sold by the Fund on an ongoing basis, at any point a “distribution,” as such term is used in the Securities Act, may occur. Broker-dealers and other persons are cautioned that some activities on their part may, depending on the circumstances, result in their being deemed participants in a distribution in a manner which could render them statutory underwriters and subject them to the prospectus delivery requirement and liability provisions of the Securities Act.

For example, a broker-dealer firm or its client may be deemed a statutory underwriter if it takes Creation Units after placing an order with the Fund’s Distributor, breaks them down into constituent shares, and sells such shares directly to customers, or if it chooses to couple the creation of a supply of new shares with an active selling effort involving solicitation of secondary market demand for shares. A determination of whether one is an underwriter for purposes of the Securities Act must take into account all the facts and circumstances pertaining to the activities of the broker-dealer or its client in the particular case, and the examples mentioned above should not be considered a complete description of all the activities that could lead to a categorization as an underwriter.

Broker-dealer firms should also note that dealers who are not “underwriters” but are effecting transactions in shares, whether or not participating in the distribution of shares, generally are required to deliver a prospectus. This is because the prospectus delivery exemption in Section 4(3) of the Securities Act is not available in respect of such transactions as a result of Section 24(d) of the 1940 Act. Firms that incur a prospectus delivery obligation with respect to shares of the Fund are reminded that, pursuant to Rule 153 under the Securities Act, a prospectus delivery obligation under Section 5(b)(2) of the Securities Act owed to an exchange member in connection with the sale on the Exchange is satisfied by the fact that the prospectus is available at the Exchange upon request. The prospectus delivery mechanism provided in Rule 153 is only available with respect to transactions on an exchange.

MANAGEMENT OF THE TRUST

Board Responsibilities

The Board of Trustees is responsible for overseeing the management and affairs of the Fund and the Trust. The Board has considered and approved contracts, as described herein, under which certain companies provide essential management and administrative services to the Trust. Like most ETFs, the day-to-day business of the Trust, including the day-to-day management of risk, is performed by third-party service providers, such as the Advisers, Distributor and Administrator (as defined below). The Board is responsible for overseeing the Trust’s service providers and, thus, has oversight responsibility with respect to the risk management performed by those service providers. Risk management seeks to identify and eliminate or mitigate the potential effects of risks, *i.e.*, events or circumstances that could have material adverse effects on the business, operations, shareholder services, investment performance or reputation of the Trust or the Fund. Under the overall supervision of the Board and the Audit Committee (discussed in more detail below), the service providers to the Fund employ a variety of processes, procedures and controls to identify risks relevant to the operations of the Trust and the Fund to lessen the probability of their occurrence and/or to mitigate the effects of such events or circumstances if they do occur. Each service provider is responsible for one or more discrete aspects of the Trust’s business (*e.g.*, the Advisers are responsible for the management of the Fund’s portfolio investments) and, consequently, for managing the risks associated with that activity.

The Board’s role in risk management oversight begins before the inception of a fund, at which time the Adviser presents the Board with information concerning the investment objectives, strategies and risks of the fund. Additionally, the Adviser provides the Board with an overview of, among other things, its investment philosophy, brokerage practices and compliance infrastructure. Thereafter, the Board oversees the risk management of the

fund's operations, in part by requesting periodic reports from and otherwise communicating with various personnel of the fund and its service providers, including the Trust's Chief Compliance Officer and the fund's independent accountants. The Board and, with respect to identified risks that relate to its scope of expertise, the Audit Committee oversee efforts by management and service providers to manage risks to which the fund may be exposed.

The Board is responsible for overseeing the nature, extent and quality of the services provided to the Fund by the Adviser and Sub-Adviser and receives information about those services at its regular meetings. In addition, on at least an annual basis, in connection with its consideration of whether to renew the Advisory Agreement and Sub-Advisory Agreement with the Adviser and Sub-Adviser, respectively, the Board meets with the Advisers to review such services. Among other things, the Board regularly considers the Advisers' adherence to the Fund's investment restrictions and compliance with various Fund policies and procedures and with applicable securities regulations. The Board also reviews information about the Fund's performance and investments.

The Trust's Chief Compliance Officer meets regularly with the Board to review and discuss compliance and other issues. At least annually, the Trust's Chief Compliance Officer provides the Board with a report reviewing the adequacy and effectiveness of the Trust's policies and procedures and those of its service providers, including the Advisers. The report addresses the operation of the policies and procedures of the Trust and each service provider since the date of the last report; material changes to the policies and procedures since the date of the last report; any recommendations for material changes to the policies and procedures; and material compliance matters since the date of the last report.

The Board receives reports from the Trust's service providers regarding operational risks, portfolio valuation and other matters. Annually, an independent registered public accounting firm reviews with the Audit Committee its audit of the Trust's financial statements, focusing on major areas of risk encountered by the Trust and noting any significant deficiencies or material weaknesses in the Trust's internal controls.

The Board recognizes that not all risks that may affect the Fund can be identified, that it may not be practical or cost-effective to eliminate or mitigate certain risks, that it may be necessary to bear certain risks (such as investment-related risks) to achieve the Fund's goals, and that the processes, procedures and controls employed to address certain risks may be limited in their effectiveness. Moreover, despite the periodic reports the Board receives and the Board's discussions with the service providers to the Fund, it may not be made aware of all of the relevant information of a particular risk. Most of the Trust's investment management and business affairs are carried out by or through the Advisers and other service providers, each of which has an independent interest in risk management but whose policies and methods by which one or more risk management functions are carried out may differ from the Trust's and each other's in the setting of priorities, the resources available or the effectiveness of relevant controls. As a result of the foregoing and other factors, the Board's risk management oversight is subject to substantial limitations.

Members of the Board and Officers of the Trust

Set forth below are the names, ages, position with the Trust, term of office, and the principal occupations for a minimum of the last five years of each of the persons currently serving as members of the Board and as Executive Officers of the Trust. Also included below is the term of office for each of the Executive Officers of the Trust. The members of the Board serve as Trustees for the life of the Trust or until retirement, removal, or their office is terminated pursuant to the Trust's Declaration of Trust.

The Chairman of the Board, Jonathan Krane, is an interested person of the Trust as that term is defined in the 1940 Act. No single independent Trustee serves as a lead independent Trustee. The Trust has determined its leadership structure is appropriate given the specific characteristics the Trust and its operations. The Trust made this determination in consideration of, among other things, the fact that the Trustees who are not interested persons of the Fund (*i.e.*, "independent Trustees") constitute at least fifty percent (50%) of the Board, the fact that

the Audit Committee is composed of the independent Trustees, and the number of funds (and classes of shares) overseen by the Board. The Board also believes that its leadership structure facilitates the orderly and efficient flow of information to the independent Trustees from Fund management.

Name, Address and Date of Birth of Trustee/Officer	Position(s) Held with the Trust, Term of Office and Length of Time Served	Principal Occupation(s) During Past 5 Years	Number of Portfolios in Fund Complex Overseen by Trustee/Officer	Other Directorships Held by Trustee

* Mr. Krane is an “interested” person of the Trust, as that term is defined in the 1940 Act, by virtue of his ownership and controlling interest in the Adviser. Mr. Ruppenstein is an “interested” person of the Trust, as that term is defined in the 1940 Act, by virtue of his employment with the Adviser.

Board Standing Committees

The Board has established the following standing committees:

Audit Committee. Each independent trustee is a member of the Trust’s Audit Committee (the “Audit Committee”). The principal responsibilities of the Audit Committee are the appointment, compensation and oversight of the Trust’s independent auditors, including the resolution of disagreements regarding financial reporting between Trust management and such independent auditors. The Audit Committee’s responsibilities include, without limitation, to (i) oversee the accounting and financial reporting processes of the Trust and its internal control over financial reporting and, as the Committee deems appropriate, inquire into the internal control over financial reporting of certain third-party service providers; (ii) oversee the quality and integrity of the Fund’s financial statements and the independent audits thereof; (iii) oversee, or, as appropriate, assist Board oversight of, the Trust’s compliance with legal and regulatory requirements that relate to the Trust’s accounting and financial reporting, internal control over financial reporting and independent audits; (iv) approve prior to appointment the engagement of the Trust’s independent auditors and, in connection therewith, review and evaluate the qualifications, independence and performance of the Trust’s independent auditors; and (v) act as a liaison between the Trust’s independent auditors and the full Board. The Board of the Trust has adopted a written charter for the Audit Committee. The independent trustees’ independent legal counsel assists the Audit Committee in connection with these duties.

Nominating Committee. Each independent trustee is also a member of the Trust’s Nominating Committee. The principal responsibilities of the Nominating Committee are to (i) oversee Fund governance matters and (ii) identify individuals qualified to serve as independent trustees of the Trust and to recommend its nominees for consideration by the full Board. While the Nominating Committee is solely responsible for the selection and nomination of the Trust’s independent trustees, it may consider nominations for the office of Trustee made by Trust stockholders as it deems appropriate. The Nominating Committee considers nominees recommended by shareholders if such nominees are submitted in accordance with Rule 14a-8 of the Securities Exchange Act of 1934 (the “1934 Act”), in conjunction with a shareholder meeting to consider the election of Trustees. Trust stockholders who wish to recommend a nominee should send nominations to the Secretary of the Trust that include biographical information and set forth the qualifications of the proposed nominee.

Individual Trustee Qualifications

The Trust has concluded that each of the Trustees should serve on the Board because of his or her ability to review and understand information about the Trust and the Fund provided by management, to identify and request other information he or she may deem relevant to the performance of the Trustees' duties, to question management and other service providers regarding material factors bearing on the management and administration of the Fund, and to exercise his or her business judgment in a manner that serves the best interests of the Fund's shareholders. The Trust has concluded that each of the Trustees should serve as a Trustee based on his or her own experience, qualifications, attributes and skills as described below.

The Trust has concluded that Mr. Krane should serve as Trustee because of his knowledge of, and the executive positions he holds in, the financial services industry. Specifically, Mr. Krane currently serves as Chief Executive Officer of three separate firms within the financial services industry, including the Adviser, a financial consulting firm affiliated with the Adviser, and a distribution company also affiliated with the Adviser. As Chief Executive Officer of these companies, and in particular as Chief Executive Officer of the Adviser, Mr. Krane contributes expertise and institutional knowledge relating to the structure of the "Krane" organization and the way that the "Krane" business operates. Mr. Krane also served as Chief Executive Officer of the China division of a multinational company, where he gained valuable experience in managing a business and critical knowledge of business and investment opportunities in China. In addition, he has served on the boards of different corporations and, in doing so, has first-hand knowledge of the fiduciary duties and responsibilities bestowed upon trustees and directors. Mr. Krane's experience as serving as Chief Executive Officer for multiple businesses in the financial services industry, his familiarity with the "Krane" complex, and his experience in serving on the boards of various companies qualify him to serve as a Trustee of the Trust.

The Trust has concluded that Mr. Ruppenstein should serve as Trustee because of the experience he has gained working in the financial services industry, and specifically in the brokerage industry, over the past fifteen years. As a seasoned broker, Mr. Ruppenstein has provided expertise to some of the largest mutual fund companies, pension funds and hedge funds through the U.S. and Europe. He is an experienced trader and has traded, including but not limited to, a large number of equities, ETFs, and options on both domestic and foreign exchanges. The knowledge he has gained over the years working in the brokerage industry qualify him to serve as Trustee of the Trust.

The Trust has concluded that Mr. Doub should serve as Trustee because of the experience he has gained working in the financial services industry over the years. In particular, Mr. Doub has extensive experience in managing venture capital funds, including sourcing, analyzing, performing due diligence, closing, managing investment and reporting to limited partners, and is general partner of a venture capital firm that invests in and actively assists education, information technology and business services companies. He regularly works with portfolio companies on budgeting, financial reporting, fund raising, acquisition and joint venture strategy, executive recruiting, exit strategy, market strategy, cash management strategy, and product development. Prior to that, Mr. Doub served as an investment analyst at a large mutual fund company, where he gained experience and knowledge regarding the mutual fund industry. Mr. Doub serves as director or conflict advisory board member on a number of different boards, including boards of hedge funds. Mr. Doub's experience in the financial services and mutual fund industries, his day-to-day management of venture capital funds, and his leadership positions in a venture capital firm and on various company boards qualify him to serve as a Trustee of the Trust.

The Trust has concluded that Mr. Ferguson should serve as Trustee because of the experience he has gained working in the financial services and legal industries over the years. In particular, Mr. Ferguson has extensive experience in managing global investment adviser firms, including the management, creation and success of hedge funds. Prior to that, Mr. Ferguson served as a corporate securities and tax attorney assisting and counseling clients with the organization and creation of both domestic and offshore funds. In addition, Mr. Ferguson has served as an officer for two registered investment companies and, in doing so, has gained experience and

knowledge regarding the mutual fund industry. Mr. Ferguson's experience in the financial services, mutual fund and legal industries and his day-to-day work in managing successful investment advisory firms, qualify him to serve as a Trustee of the Trust.

The Trust has concluded that Mr. Stroyman should serve as Trustee because of the experience he has gained working in the financial services and real estate industries. Working as an investment banker early in his career, Mr. Stroyman developed a strong base of knowledge regarding corporate finance, structuring, public and private securities, and company valuations. Through his work in the real estate industry and relationships with large investment management firms, Mr. Stroyman has gained an understanding of sophisticated financial products. He has advised institutional clients including pension funds, endowments and other qualified investors in asset management, risk assessment, and repositioning and disposition of underperforming assets. The knowledge Mr. Stroyman has gained over the years working in the financial services and real estate industries and his value and understanding of fiduciary duties and responsibilities qualify him to serve as Trustee of the Trust.

Fund Shares Owned by Board Members

The Fund is new and, therefore, as of the date of this SAI none of the Trustees beneficially owned shares of the Fund, including the Trust's other funds not offered in this SAI. "Beneficial ownership" is determined in accordance with Rule 16a-1(a)(2) under the 1934 Act.

Board Compensation

The Trust and the Fund are new and as of the date of this SAI, the Board has unanimously voted to forego the receipt of compensation for providing services to the Trust. Therefore, it is not anticipated that the Trustees will receive compensation for serving on the Board for the fiscal year ending March 31, 2014.

INVESTMENT ADVISER

Krane Funds Advisors, LLC, or the Adviser, serves as investment adviser to the Fund pursuant to an Investment Advisory Agreement dated November 8, 2012 between the Trust and the Adviser (the "Advisory Agreement"). The Adviser is a Delaware limited liability company registered as an investment adviser under the Investment Advisers Act of 1940, as amended (the "Advisers Act"). The Adviser is primarily owned and controlled by Mr. Jonathan Krane. The Adviser's offices are located at 1350 Avenue of the Americas, 2nd Floor, New York, New York 10019.

Under the Advisory Agreement, the Adviser has overall responsibility for the general management and administration of the Fund. The Adviser provides a continuous investment program for the Fund. The Adviser also arranges for sub-advisory, transfer agency, custody, fund administration and all other non-distribution-related services necessary for the Fund to operate. The Fund pays the Adviser a fee equal to 0.68% of the Fund's net assets. The Adviser has agreed to pay all expenses of the Fund, except interest expense, taxes, Acquired Fund Fees and Expenses, if any, brokerage commissions and other expenses connected with execution of portfolio transactions, expenses of the Independent Trustees (including any Trustees' counsel fees), extraordinary expenses, distribution fees and expenses paid by the Trust under any distribution plan adopted pursuant to Rule 12b-1 under the 1940 Act, if any, and the advisory fee payable to the Adviser.

The Advisory Agreement with respect to the Fund continues in effect for two years from its effective date, and thereafter is subject to annual approval by (i) the Board of Trustees of the Trust or (ii) the vote of a majority of the outstanding voting securities (as defined in the 1940 Act) of the Fund, provided that in either event such continuance also is approved by a vote of a majority of the Trustees of the Trust who are not interested persons (as defined in the 1940 Act) of the Fund, by a vote cast in person at a meeting called for the purpose of voting on such approval. If the shareholders of the Fund fail to approve the Advisory Agreement, the Adviser may continue to serve in the manner and to the extent permitted by the 1940 Act and rules and regulations thereunder.

The Advisory Agreement with respect to the Fund is terminable without any penalty, by vote of the Board of Trustees of the Trust or by vote of a majority of the outstanding voting securities (as defined in the 1940 Act) of the Fund, or by the Adviser, in each case on not less than sixty (60) days' prior written notice to the other party; provided that a shorter notice period shall be permitted for the Fund in the event its shares are no longer listed on a national securities exchange or in such other circumstances where the Fund waives such notice period. The Advisory Agreement will terminate automatically and immediately in the event of its "assignment" (as defined in the 1940 Act).

SUB-ADVISER

The Adviser has retained Index Management Solutions, LLC, located at One Commerce Square, 2005 Market Street, Suite 2020, Philadelphia, Pennsylvania 19103, to serve as sub-adviser to the Fund. The Sub-Adviser was established in 2009 and is a wholly-owned subsidiary of VTL Associates, LLC. Pursuant to a Sub-Advisory Agreement dated December 12, 2012 (the "Sub-Advisory Agreement"), the Sub-Adviser is responsible for trading portfolio securities on behalf of the Fund, including selecting broker-dealers to execute purchase and sale transactions as instructed by the Adviser or in connection with any rebalancing or reconstitution of the Underlying Index, subject to the supervision of the Adviser and the Board of Trustees. Pursuant to the Sub-Advisory Agreement, the Adviser pays the Sub-Adviser a fee, which is calculated daily and paid monthly, at an annual rate of 0.05% on the Fund's daily average net assets up to \$50 million; 0.04% on the Fund's daily average net assets on the next \$50 million; and 0.03% on the Fund's daily average net assets in excess of \$100 million.

The Sub-Advisory Agreement with respect to the Fund continues in effect for two years from its effective date, and thereafter is subject to annual approval by (i) the Board of Trustees of the Trust or (ii) the vote of a majority of the outstanding voting securities (as defined in the 1940 Act) of the Fund, provided that in either event such continuance is also approved by a vote of a majority of the Trustees of the Trust who are not interested persons (as defined in the 1940 Act) of the Fund, by a vote cast in person at a meeting called for the purpose of voting on such approval.

The Sub-Advisory Agreement with respect to the Fund is terminable without any penalty, by vote of the Board of Trustees of the Trust or by vote of a majority of the outstanding voting securities (as defined in the 1940 Act) of the Fund, or by the Adviser or the Trust at any time, and without the payment of penalty, in each case on sixty (60) days' prior written notice to the Sub-Adviser. The Sub-Adviser may terminate the Sub-Advisory Agreement at any time, without the payment of penalty, on sixty (60) days' prior written notice to the Adviser. The Sub-Advisory Agreement will terminate automatically and immediately in the event of its "assignment" (as defined in the 1940 Act) or upon termination of the Advisory Agreement.

PORTFOLIO MANAGER

Denise Krisko (the "Portfolio Manager") is responsible for the management of the Fund.

Portfolio Manager Fund Ownership. The Fund is required to show the dollar range of the Portfolio Manager's "beneficial ownership" of shares of the Fund as of the end of the most recently completed fiscal year. Dollar amount ranges disclosed are established by the SEC. As of the date of this SAI, the Portfolio Manager did not beneficially own shares of the Fund.

Other Accounts. The Portfolio Manager is responsible for the day-to-day management of certain other accounts, as follows:

Name	Registered Investment Companies*		Other Pooled Investment Vehicles*		Other Accounts*	
	Number of Accounts	Total Assets (\$ millions)	Number of Accounts	Total Assets (\$ millions)	Number of Accounts	Total Assets (\$ millions)
Denise Krisko	11	\$771,911,278	-	\$0	2	\$449,454,391

* Information provided is as of June 30, 2013.

Portfolio Manager Compensation. The Portfolio Manager receives a fixed base salary and incentive awards based on profitability, growth in assets, and long-term investment performance. Key staff members of the Sub-Adviser are eligible to participate in a deferred compensation plan due to their high level of accountability and upon demonstrating a successful long-term performance track record. The value of the award increases during a vesting period based upon the profitability of the firm. Voluntary contributions may be made to a defined contribution plan.

Description of Material Conflicts of Interest. The Portfolio Manager's management of "other accounts" may give rise to potential conflicts of interest in connection with his management of the Fund's investments, on the one hand, and the investments of the other accounts, on the other. The other accounts may have the same investment objective as the Fund. Therefore, a potential conflict of interest may arise as a result of the identical investment objectives, whereby the portfolio manager could favor one account over another. Another potential conflict could include the portfolio manager's knowledge of the size, timing and possible market impact of Fund trades, whereby the portfolio manager could use this information to the advantage of other accounts and to the disadvantage of the Fund. However, the Adviser has established policies and procedures to ensure that the purchase and sale of securities among all accounts it manages are fairly and equitably allocated.

CODES OF ETHICS

The Trust and the Advisers have each adopted a Code of Ethics pursuant to Rule 17j-1 under the 1940 Act. The Codes of Ethics apply to the personal investing activities of trustees, directors, officers and certain employees ("access persons"). Rule 17j-1 and the Codes of Ethics are designed to prevent unlawful practices in connection with the purchase or sale of securities by access persons. Under the Codes of Ethics, access persons are permitted to engage in personal securities transactions, but are required to report their personal securities transactions for monitoring purposes. In addition, certain access persons are required to obtain approval before investing in private placements and are prohibited from investing in initial public offerings. Each Code of Ethics is on file with the SEC and is available to the public.

PROXY VOTING POLICY

The Trust has delegated to the Adviser the authority and responsibility for voting proxies on the portfolio securities held by the Fund. The Adviser's proxy voting guidelines and proxy voting policies and procedures are set forth in Appendix A to this SAI.

The Trust is required to disclose annually the Fund's complete proxy voting record on Form N-PX covering the period from July 1 of one year through June 30 of the next and to file Form N-PX with the SEC no later than August 31 of each year. When available, the current Form N-PX for the Fund may be obtained at no charge upon request by calling 1.855.857.2638 or through the Trust's website at www.kraneshares.com when available, the Fund's Form N-PX will also be available on the SEC's website at www.sec.gov.

ADMINISTRATOR

SEI Investments Global Fund Services (the “Administrator”) serves as administrator for the Fund. SEI Investments Management Corporation (“SIMC”), a wholly-owned subsidiary of SEI Investments Company (“SEI Investments”), is the owner of all beneficial interest in the Administrator. The principal address of the Administrator is One Freedom Valley Drive, Oaks, Pennsylvania 19456. Under an Administration Agreement with the Trust dated December 18, 2012 (the “Administration Agreement”), the Administrator provides necessary administrative and accounting services for the maintenance and operations of the Trust and the Fund. In addition, the Administrator makes available the office space, equipment, personnel and facilities required to provide such services.

For its services under the Administration Agreement, the Administrator is entitled to a fee, based on assets under management, subject to a minimum fee. The Administrator may be reimbursed by the Fund for its out-of-pocket expenses. The Advisory Agreement provides that the Adviser will pay certain operating expenses of the Trust, including the fees due to the Administrator under each of the Administration Agreement.

CUSTODIAN AND TRANSFER AGENT

Brown Brothers Harriman & Co. (“BBH”) serves as custodian and transfer agent for the Trust. The principal address of BBH is 40 Water Street, Boston, Massachusetts 02109. Under a Custodian and Transfer Agent Agreement with the Trust dated December 12, 2012, BBH maintains in separate accounts cash, securities and other assets of the Fund, keeps all necessary accounts and records, and provides other services. BBH is required, upon the order of the Trust, to deliver securities held by it, in its capacity as custodian, and to make payments for securities purchased by the Trust for the Fund. Also under the Custodian and Transfer Agent Agreement, BBH acts as a transfer agent for the Trust’s authorized and issued shares of beneficial interest, and as dividend disbursing agent of the Trust.

DISTRIBUTOR AND DISTRIBUTION ARRANGEMENTS

SEI Investments Distribution Co., a wholly owned subsidiary of SEI Investments, and an affiliate of the Administrator, serves as Distributor for the Trust. The principal address of the Distributor is One Freedom Valley Drive, Oaks, Pennsylvania 19456. The Distributor has entered into a Distribution Agreement with the Trust dated December 18, 2012 (the “Distribution Agreement”) pursuant to which it distributes shares of the Fund. The Distribution Agreement will continue for two years from its effective date and is renewable annually. Shares are continuously offered for sale by the Fund through the Distributor only in Creation Units, as described in the Prospectus and below in the “Creation and Redemption of Creation Units” section. Shares in less than Creation Units are not distributed by the Distributor. The Distributor will deliver the Prospectus and, upon request, this SAI to persons purchasing Creation Units, and will maintain records of both orders placed with it and confirmations of acceptance furnished by it. The Distributor is a broker-dealer registered under the 1934 Act and a member of the Financial Industry Regulatory Authority (“FINRA”). The Distributor is not affiliated with the Advisers or any national securities exchange.

The Distribution Agreement provides that it may be terminated at any time, without the payment of any penalty, on at least thirty (30) days’ prior written notice to the other party (i) by vote of a majority of the independent trustees or (ii) by vote of a majority of the outstanding voting securities (as defined in the 1940 Act) of the Fund. The Distribution Agreement will terminate automatically in the event of its “assignment” (as defined in the 1940 Act).

The Distributor also may enter into agreements with securities dealers (“Soliciting Dealers”) who will solicit purchases of Creation Units of shares. Such Soliciting Dealers also may be Authorized Participants (as defined below) or DTC Participants (as defined below).

The Distributor also may provide trade order processing services pursuant to a service agreement.

Distribution Plan. The Fund has adopted a Distribution Plan applicable to the Fund’s shares. Under the Distribution Plan, the Distributor, or designated Service Providers, may receive up to 0.25% of the Fund’s assets attributable to shares as compensation for distribution services pursuant to Rule 12b-1 of the 1940 Act. Distribution services may include: (i) services in connection with distribution assistance, or (ii) payments to financial institutions and other financial intermediaries, such as broker-dealers, mutual fund “supermarkets” and the Distributor’s affiliates and subsidiaries, as compensation for services or reimbursement of expenses incurred in connection with distribution assistance. The Distributor may, at its discretion, retain a portion of such payments to compensate itself for distribution services and distribution related expenses such as the costs of preparation, printing, mailing or otherwise disseminating sales literature, advertising, and prospectuses (other than those furnished to current shareholders of the Fund), promotional and incentive programs, and such other marketing expenses that the Distributor may incur.

No distribution fees are currently charged to the Fund; there are no plans to impose these fees, and no such fees will be charged prior to the conclusion of one year from the date of the Prospectus. However, in the event that 12b-1 fees are charged in the future, because the Fund pays these fees out of assets on an ongoing basis, over time these fees may cost you more than other types of sales charges and will increase the cost of your investment in the Fund.

Intermediary Compensation. The Adviser or its affiliates, out of their own resources and not out of Fund assets (*i.e.*, without additional cost to the Fund or its shareholders), may pay certain broker dealers, banks and other financial intermediaries (“Intermediaries”) for certain activities related to the Fund, including marketing and education support and the sale of Fund shares. These arrangements are sometimes referred to as “revenue sharing” arrangements. Revenue sharing arrangements are not financed by the Fund and, thus, do not result in increased Fund expenses. They are not reflected in the fees and expenses listed in the fees and expenses sections of the Prospectus and they do not change the price paid by investors for the purchase of the Fund’s shares or the amount received by a shareholder as proceeds from the redemption of Fund shares.

Such compensation may be paid to Intermediaries that provide services to the Fund, including marketing and education support (such as through conferences, webinars and printed communications). Such compensation may also be paid to Intermediaries for inclusion of the Fund on a sales list, including a preferred or select sales list, in other sales programs. The Adviser periodically assesses the advisability of continuing to make these payments.

Payments to an Intermediary may be significant to the Intermediary, and amounts that Intermediaries pay to your adviser, broker or other investment professional, if any, may also be significant to such adviser, broker or investment professional. Because an Intermediary may make decisions about what investment options it will make available or recommend, and what services to provide in connection with various products, based on payments it receives or is eligible to receive, such payments create conflicts of interest between the Intermediary and its clients. For example, these financial incentives may cause the Intermediary to recommend the Fund over other investments. The same conflict of interest exists with respect to your financial adviser, broker or investment professionals if he or she receives similar payments from his or her Intermediary firm.

Intermediary information is current only as of the date of this SAI. Please contact your adviser, broker or other investment professional for more information regarding any payments his or her Intermediary firm may receive. Any payments made by the Adviser or its affiliates to an Intermediary may create an incentive for the Intermediary to encourage customers to buy shares of the Fund.

CONTROL PERSONS AND PRINCIPAL HOLDERS OF SECURITIES

The Fund has not yet commenced operations and, therefore, there were no Beneficial Owners, as that term is defined below, as of the date of this SAI.

EXCHANGE LISTING AND TRADING

A discussion of exchange listing and trading matters associated with an investment in the Fund is contained in the Prospectus. The discussion below supplements, and should be read in conjunction with, such sections of the Prospectus.

The shares of the Fund are listed and traded on the Exchange at prices that may differ from the Fund's NAV. There can be no assurance that the Exchange requirements necessary to maintain the listing of the shares of the Fund will continue to be met. The Exchange may, but is not required to, remove the shares of the Fund from listing if: (i) following the initial 12-month period beginning at the commencement of trading of the Fund, there are fewer than fifty (50) Beneficial Owners (as that term is defined below) of the shares of the Fund for thirty (30) or more consecutive trading days; (ii) the value of the Underlying Index is no longer calculated or available; or (iii) such other event shall occur or condition exist that, in the opinion of the Exchange, makes further dealings on the Exchange inadvisable. The Exchange will remove the shares of the Fund from listing and trading upon termination of the Fund.

As in the case of other stocks traded on the Exchange, broker's commissions on purchases or sales of shares in market transactions will be based on negotiated commission rates at customary levels.

The Trust reserves the right to adjust the price levels of shares in the future to help maintain convenient trading ranges for investors. Any adjustments would be accomplished through stock splits or reverse stock splits, which would have no effect on the net assets of the Fund.

BOOK ENTRY ONLY SYSTEM

The information below supplements and should be read in conjunction with the section in the Prospectus entitled "Shareholder Information."

The Depository Trust Company ("DTC") acts as securities depository for the Fund's shares. Shares of the Fund are represented by securities registered in the name of the DTC or its nominee, Cede & Co., and deposited with, or on behalf of, the DTC.

The DTC, a limited-purpose trust company, was created to hold securities of its participants ("DTC Participants") and to facilitate the clearance and settlement of securities transactions among the DTC Participants in such securities through electronic book-entry changes in accounts of the DTC Participants, thereby eliminating the need for physical movement of securities' certificates. DTC Participants include securities brokers and dealers, banks, trust companies, clearing corporations and certain other organizations, some of whom (and/or their representatives) own the DTC. More specifically, the DTC is owned by a number of its DTC Participants and by the Exchange and FINRA. Access to the DTC system is also available to others such as banks, brokers, dealers and trust companies that clear through or maintain a custodial relationship with a DTC Participant, either directly or indirectly (the "Indirect Participants").

Beneficial ownership of shares is limited to DTC Participants, Indirect Participants and persons holding interests through DTC Participants and Indirect Participants. Ownership of beneficial interests in shares (owners of such beneficial interests are referred to herein as "Beneficial Owners") is shown on, and the transfer of ownership is

effected only through, records maintained by the DTC (with respect to DTC Participants) and on the records of DTC Participants (with respect to Indirect Participants and Beneficial Owners that are not DTC Participants). Beneficial Owners will receive from or through the DTC Participant a written confirmation relating to their purchase of shares. The laws of some jurisdictions may require that certain purchasers of securities take physical delivery of such securities in definitive form. Such laws may impair the ability of certain investors to acquire beneficial interests in shares.

Conveyance of all notices, statements and other communications to Beneficial Owners is effected as follows. Pursuant to the Depositary Agreement between the Trust and the DTC, the DTC is required to make available to the Trust upon request and for a fee to be charged to the Trust a listing of the shares of the Fund held by each DTC Participant. The Trust shall inquire of each such DTC Participant as to the number of Beneficial Owners holding shares, directly or indirectly, through such DTC Participant. The Trust shall provide each such DTC Participant with copies of such notice, statement or other communication, in such form, number and at such place as such DTC Participant may reasonably request, in order that such notice, statement or communication may be transmitted by such DTC Participant, directly or indirectly, to such Beneficial Owners. In addition, the Trust shall pay to each such DTC Participant a fair and reasonable amount as reimbursement for the expenses attendant to such transmittal, all subject to applicable statutory and regulatory requirements.

Share distributions shall be made to the DTC or its nominee, Cede & Co., as the registered holder of all shares. The DTC or its nominee, upon receipt of any such distributions, shall credit immediately DTC Participants' accounts with payments in amounts proportionate to their respective beneficial interests in shares of the applicable Fund as shown on the records of the DTC or its nominee. Payments by DTC Participants to Indirect Participants and Beneficial Owners of shares held through such DTC Participants will be governed by standing instructions and customary practices, as is now the case with securities held for the accounts of customers in bearer form or registered in a "street name," and will be the responsibility of such DTC Participants.

The Trust has no responsibility or liability for any aspect of the records relating to or notices to Beneficial Owners, or payments made on account of beneficial ownership interests in such shares, or for maintaining, supervising or reviewing any records relating to such beneficial ownership interests, or for any other aspect of the relationship between the DTC and DTC Participants or the relationship between such DTC Participants and the Indirect Participants and Beneficial Owners owning through such DTC Participants.

The DTC may decide to discontinue providing its service with respect to shares at any time by giving reasonable notice to the Trust and discharging its responsibilities with respect thereto under applicable law. Under such circumstances, the Trust shall take action to find a replacement for the DTC to perform its functions at a comparable cost.

BROKERAGE TRANSACTIONS

The Sub-Adviser assumes general supervision over placing orders on behalf of the Fund for the purchase and sale of portfolio securities. The Sub-Adviser does not expect to use one particular broker-dealer to effect the Fund's portfolio transactions. In selecting the brokers or dealers for any transaction in portfolio securities, the Sub-Adviser's policy is to make such selection based on factors deemed relevant, including but not limited to, the breadth of the market in the security, the price of the security, the reasonableness of the commission or mark-up or mark-down, if any, execution capability, settlement capability, back office efficiency, and the financial condition of the broker or dealer, both for the specific transaction and on a continuing basis. The overall reasonableness of brokerage commissions paid is evaluated by the Sub-Adviser based upon its knowledge of available information as to the general level of commissions paid by other institutional investors for comparable services. Brokers may also be selected because of their ability to handle special or difficult executions, such as may be involved in large block trades, less liquid securities, broad distributions, or other circumstances.

When one or more broker-dealers is believed capable of providing the best combination of price and execution, the Sub-Adviser is not required to select a broker-dealer based on the lowest commission rate available for a particular transaction. In such cases, the Sub-Adviser may pay a higher commission than otherwise obtainable from other brokers in return for brokerage research services provided to the Sub-Adviser consistent with Section 28(e) of the Securities Exchange Act of 1934 (the “Exchange Act”). Section 28(e) provides that the Sub-Adviser may cause a Fund to pay a broker-dealer a commission for effecting a transaction in excess of the amount of commission another broker or dealer would have charged as long as the Sub-Adviser makes a good faith determination that the amount of commission is reasonable in relation to the value of the brokerage and research services provided by the broker-dealer. To the extent the Sub-Adviser obtains brokerage and research services that it otherwise would acquire at its own expense, the Sub-Adviser may have incentive to place a greater volume of transactions or pay higher commissions than would otherwise be the case.

The Sub-Adviser will only obtain brokerage and research services from broker-dealers in arrangements that are consistent with Section 28(e) of the Exchange Act. The types of products and services that the Sub-Adviser may obtain from broker-dealers through such arrangements will include research reports and other information on the economy, industries, sectors, groups of securities, individual companies, statistical information, political developments, technical market action, pricing and appraisal services, credit analysis, risk measurement analysis, performance and other analysis. The Sub-Adviser may use products and services provided by brokers in servicing all of its client accounts and not all such products and services may necessarily be used in connection with the account that paid commissions to the broker-dealer providing such products and services. Any advisory or other fees paid to the Sub-Adviser are not reduced as a result of the receipt of brokerage and research services.

In some cases, the Sub-Adviser may receive a product or service from a broker that has both a “research” and a “non-research” use. When this occurs, the Sub-Adviser will make a good faith allocation between the research and non-research uses of the product or service. The percentage of the service that is used for research purposes may be paid for with brokerage commissions, while the Sub-Adviser will use its own funds to pay for the percentage of the service that is used for non-research purposes. In making this good faith allocation, the Sub-Adviser faces a potential conflict of interest, but the Sub-Adviser believes that its allocation procedures are reasonably designed to appropriately allocate the anticipated use of such products and services to research and non-research uses.

The Trust has adopted policies and procedures that prohibit the consideration of sales of the Fund’s shares as a factor in the selection of a broker or a dealer to execute its portfolio transactions.

Brokerage Commissions

The Fund is new and therefore has not paid any brokerage commissions.

Affiliated Brokers

The Fund is new and therefore has not paid any commissions to any affiliated brokers.

Regular Broker-Dealers

The Fund is required to identify any securities of its “regular brokers and dealers” (as such term is defined in the 1940 Act) which the Fund may hold at the close of its most recent fiscal year. “Regular brokers or dealers” of the Fund are the ten brokers or dealers that, during the most recent fiscal year: (i) received the greatest dollar amounts of brokerage commissions from the Fund’s portfolio transactions; (ii) engaged as principal in the largest dollar amounts of portfolio transactions of the Fund; or (iii) sold the largest dollar amounts of the Fund’s shares.

The Fund is new and therefore has not acquired securities from its regular brokers or dealers (as defined in the 1940 Act) or their parents.

Portfolio Turnover

Portfolio turnover may vary from year to year, as well as within a year. High turnover rates are likely to result in comparatively greater brokerage expenses. The overall reasonableness of brokerage commissions is evaluated by the Adviser based upon its knowledge of available information as to the general level of commissions paid by the other institutional investors for comparable services. The Fund is new and therefore does not have portfolio turnover rates.

CREATION AND REDEMPTION OF CREATION UNITS

General

The Trust issues and sells shares of the Fund only in Creation Units on a continuous basis through the Distributor, without a sales load, at the NAV next determined after receipt, on any Business Day (as defined below), of an order in proper form. Currently, the number of shares of the Fund that constitute a Creation Unit is 50,000. The Board reserves the right to declare a split or a consolidation in the number of shares outstanding of the Fund, and to make a corresponding change in the number of shares constituting a Creation Unit, in the event that the per share price in the secondary market rises (or declines) to an amount that falls outside the range deemed desirable by the Board.

A “Business Day” with respect to the Fund is any day on which the Exchange is open for business. As of the date of this SAI, the Exchange observes the following holidays, as observed: New Year’s Day, Martin Luther King, Jr. Day, Presidents’ Day, Good Friday, Memorial Day, Independence Day, Labor Day, Thanksgiving Day and Christmas Day.

Fund Deposit

The consideration for purchase of Creation Units of the Fund generally consists of an in-kind deposit of designated portfolio of securities (including any portion of such securities for which cash may be substituted (“Deposit Cash”)) (“Deposit Securities”) and the Cash Component computed as described below. Together, the Deposit Securities and the Cash Component constitute the “Fund Deposit,” which when combined with the Fund’s portfolio securities is designed to generate performance that has a collective investment profile similar to that of the Fund’s Underlying Index. The Fund Deposit represents the minimum initial and subsequent investment amount for a Creation Unit of the Fund.

The “Cash Component” is an amount equal to the difference between the NAV of the shares (per Creation Unit) and the “Deposit Amount,” which is an amount equal to the market value of the Deposit Securities, and serves to compensate for any differences between the NAV per Creation Unit and the Deposit Amount. Payment of any stamp duty or other similar fees and expenses payable upon transfer of beneficial ownership of the Deposit Securities are the sole responsibility of the Authorized Participant purchasing the Creation Unit.

The Custodian makes available through the NSCC on each Business Day prior to the opening of business on the Exchange, the list of names and the required number of shares of each Deposit Security and the estimated amount of the Cash Component to be included in the current Fund Deposit (based on information as of the end of the previous Business Day for the Fund). Such Fund Deposit is applicable, subject to any adjustments as described below, in order to effect purchases of Creation Units of the Fund until such time as the next-announced Fund Deposit is made available.

The identity and number of shares of the Deposit Securities change pursuant to changes in the composition of the Fund’s portfolio and as rebalancing adjustments and corporate action events are reflected from time to time by the Advisers with a view to the investment objective of the Fund. The composition of the Deposit Securities may also change in response to adjustments to the weighting or composition of the component securities constituting the Underlying Index.

The Trust reserves the right to permit or require the substitution of an amount of cash (*i.e.*, a “cash in lieu” amount) to replace any Deposit Security, which shall be added to the Deposit Cash, if applicable, and the Cash Component in the following situations: (i) to the extent there is Deposit Cash, as described herein; (ii) if, on a given Business Day, the Fund announces before the open of trading that all purchases, all redemptions or all purchases and redemptions on that day will be made *entirely in cash*; (iii) if, upon receiving a purchase order from an Authorized Participant, the Fund determines to require the purchase to be made *entirely in cash*; (iv) on a given Business Day, the Fund requires all Authorized Participants purchasing shares on that day to deposit cash in lieu of some or all of the Deposit Securities solely because: (a) such instruments are not eligible for transfer through either the NSCC or DTC systems; or (b) such instruments are not eligible for trading due to local trading restrictions, local restrictions on securities transfers or other similar circumstances; or (v) if the Fund permits an Authorized Participant to deposit cash in lieu of some or all of the Deposit Securities solely because: (a) such instruments are not available in sufficient quantity; or (b) such instruments are not eligible for trading by an Authorized Participant or the investor on whose behalf the Authorized Participant is acting (together with (v)(a), “custom orders”).

The Trust also reserves the right to include or remove Deposit Securities from the basket for one or more of the following reasons: (i) in the case of bonds, for minor differences when it is impossible to break up bonds beyond certain minimum sizes needed for transfer and settlement; (ii) for minor differences when rounding is necessary to eliminate fractional shares or lots that are not tradeable round lots; (iii) TBA Transactions, short positions and other positions that cannot be transferred in kind, including instruments that can be transferred in kind only with the consent of the original counterparty, will be excluded from the Deposit Securities and the Fund Securities; (iv) to the extent the Fund determines, on a given Business Day, to use a representative sampling of the Fund’s portfolio; or (v) for temporary periods, to effect changes in the Fund’s portfolio as a result of the rebalancing of its Underlying Index.

Cash Purchase Method

Although the Trust does not ordinarily permit cash purchases of Creation Units of the Fund, when partial or full cash purchases of Creation Units are available or specified for the Fund, they will be effected in essentially the same manner as in-kind purchases thereof. In the case of a partial or full cash purchase, the Authorized Participant must pay the cash equivalent of the Deposit Securities it would otherwise be required to provide through an in-kind purchase, plus the same Cash Component required to be paid by an in-kind purchaser.

Role of the Authorized Participant

Creation Units may be purchased only by or through a DTC Participant that has entered into an Authorized Participant Agreement with the Distributor (an “Authorized Participant”). Such Authorized Participant will agree, pursuant to the terms of such Authorized Participant Agreement and on behalf of itself or any investor on whose behalf it will act, to certain conditions, including that such Authorized Participant will make available in advance of each purchase of shares an amount of cash sufficient to pay the Cash Component, once the NAV of a Creation Unit is next determined after receipt of the purchase order in proper form, together with the transaction fee described below. The Authorized Participant may require the investor to enter into an agreement with such Authorized Participant with respect to certain matters, including payment of the Cash Component. Investors who are not Authorized Participants must make appropriate arrangements with an Authorized Participant. Investors should be aware that their particular broker may not be a DTC Participant or may not have executed an Authorized Participant Agreement and that orders to purchase Creation Units may have to be placed by the investor’s broker through an Authorized Participant. As a result, purchase orders placed through an Authorized Participant may result in additional charges to such investor. The Trust does not expect to enter into an Authorized Participant Agreement with more than a small number of DTC Participants. A list of current Authorized Participants may be obtained from the Distributor.

Purchase Orders

To initiate an order for a Creation Unit, an Authorized Participant must submit to the Distributor an irrevocable order to purchase shares of the Fund generally no later than 4:00 p.m., Eastern Time on any Business Day to receive that day's NAV. On days when the Exchange closes earlier than normal, the Fund may require orders for Creation Units to be placed earlier in the day. The Distributor will notify the Adviser and the Custodian of such order. The Custodian will then provide such information to any appropriate sub-custodian. Procedures and requirements governing the delivery of the Fund Deposit are set forth in the procedures handbook for Authorized Participants and may change from time to time. Those placing orders to purchase Creation Units through an Authorized Participant should allow sufficient time to permit proper submission of the purchase order to the Distributor by the Cutoff Time (as defined below) on such Business Day.

The Authorized Participant must also make available on or before the contractual settlement date, by means satisfactory to the Fund, immediately available or same day funds estimated by the Fund to be sufficient to pay the Cash Component next determined after acceptance of the purchase order, together with the applicable purchase transaction fees. Any excess funds will be returned following settlement of the issue of the Creation Unit. Those placing orders should ascertain the deadline for cash transfers by contacting the operations department of the broker or depository institution effectuating the transfer of the Cash Component. This deadline is likely to be significantly earlier than the Cutoff Time of the Fund.

The Authorized Participant is responsible for any and all expenses and costs incurred by the Fund, including any applicable cash amounts, in connection with any purchase order.

Investors, other than Authorized Participants, are responsible for making arrangements for a creation request to be made through an Authorized Participant. The Distributor will provide a list of current Authorized Participants upon request. Investors should be aware that an Authorized Participant may require orders for purchases of shares placed with it to be in the particular form required by the individual Authorized Participant.

Timing of Submission of Purchase Orders

An Authorized Participant must submit an irrevocable order to purchase shares of the Fund before 4:00 p.m., Eastern Time on any Business Day in order to receive that day's NAV. Creation Orders must be transmitted by an Authorized Participant by telephone or other transmission method acceptable to the Distributor pursuant to procedures set forth in the Authorized Participant Agreement, as described below. Economic or market disruptions or changes, or telephone or other communication failure, may impede the ability to reach the Distributor or an Authorized Participant. Orders to create shares of the Fund that are submitted on the Business Day immediately preceding a holiday or day (other than a weekend) when the markets in the relevant foreign market are closed may not be accepted. The Fund's deadline specified above for the submission of purchase orders is referred to as the Fund's "Cutoff Time." The Distributor, in its discretion, may permit the submission of such orders and requests by or through an Authorized Participant at any time (including on days on which the Exchange is not open for business) via communication through the facilities of the Distributor's proprietary website maintained for this purpose. Purchase orders and redemption requests, if accepted by the Trust, will be processed based on the NAV next determined after such acceptance in accordance with the Trust's standard Cutoff Times as provided in the Authorized Participant Agreement and disclosed in this SAI.

Acceptance of Orders for Creation Units

Subject to the conditions that (i) an irrevocable purchase order has been submitted by the Authorized Participant (either on its own or another investor's behalf) and (ii) arrangements satisfactory to the Fund are in place for payment of the Cash Component and any other cash amounts which may be due, the Fund will accept the order, subject to the Fund's right (and the right of the Distributor and the Adviser) to reject any order until acceptance.

Once the Fund has accepted an order, upon the next determination of the NAV of the shares, the Fund will confirm the issuance of a Creation Unit, against receipt of payment, at such NAV. The Distributor will then transmit a confirmation of acceptance to the Authorized Participant that placed the order.

The Fund reserves the absolute right to reject or revoke a creation order transmitted to it by the Distributor if (i) the order is not in proper form; (ii) the investor(s), upon obtaining the shares ordered, would own 80% or more of the currently outstanding shares of the Fund; (iii) the Deposit Securities delivered do not conform to the identity and number of shares specified, as described above; (iv) acceptance of the Deposit Securities would have certain adverse tax consequences to the Fund; (v) acceptance of the Fund Deposit would, in the opinion of counsel, be unlawful; (vi) acceptance of the Fund Deposit would, in the discretion of the Fund or the Adviser, have an adverse effect on the Fund or the rights of Beneficial Owners; or (vii) circumstances outside the control of the Fund, the Distributor and the Adviser make it impracticable to process purchase orders. The Distributor shall notify a prospective purchaser of a Creation Unit and/or the Authorized Participant acting on behalf of such purchaser of its rejection of such order. The Fund, the Custodian, sub-custodian, and the Distributor are under no duty, however, to give notification of any defects or irregularities in the delivery of Portfolio Deposits nor shall any of them incur any liability for failure to give such notification.

Issuance of a Creation Unit

Except as provided herein, a Creation Unit will not be issued until the transfer of good title to the Fund of the Deposit Securities and the payment of the Cash Component have been completed. When the sub-custodian has confirmed to the Custodian that the securities included in the Fund Deposit (or the cash value thereof) have been delivered to the account of the relevant sub-custodian or sub-custodians, the Distributor and the Adviser shall be notified of such delivery and the Fund will issue and cause the delivery of the Creation Unit. Creation Units typically are issued on a “T+3 basis” (*i.e.*, three Business Days after trade date). However, as discussed in the Regular Holidays section, the Fund reserves the right to settle Creation Unit transactions on a basis other than T+3 in order to accommodate non-U.S. market holiday schedules, to account for different treatment among non-U.S. and U.S. markets of dividend record dates and ex-dividend dates (*i.e.*, the last day the holder of a security can sell the security and still receive dividends payable on the security) and in certain other circumstances.

To the extent contemplated by an Authorized Participant’s agreement with the Distributor, the Fund will issue Creation Units to such Authorized Participant, notwithstanding the fact that the corresponding Deposit Securities have not been received in part or in whole, in reliance on the undertaking of the Authorized Participant to deliver the missing Deposit Securities as soon as possible, which undertaking shall be secured by such Authorized Participant’s delivery and maintenance of collateral, which may have a value of up to 115%, which percentage the Trust may change at any time, in its sole discretion, of the value of the missing Deposit Securities in accordance with the Fund’s then-effective procedures. The only collateral that is acceptable to the Fund is cash in U.S. dollars. Such cash collateral must be delivered no later than 2:00 p.m., Eastern Time on the contractual settlement date. The cash collateral posted by the Authorized Participant may be invested at the risk of the Authorized Participant, and income, if any, on invested cash collateral will be paid to that Authorized Participant. Information concerning the Fund’s current procedures for collateralization of missing Deposit Securities is available from the Distributor. The Authorized Participant Agreement will permit the Fund to buy the missing Deposit Securities at any time and will subject the Authorized Participant to liability for any shortfall between the cost to the Fund of purchasing such securities and the cash collateral.

In certain cases, Authorized Participants may create and redeem Creation Units on the same trade date and in these instances, the Fund reserves the right to settle these transactions on a net basis or require a representation from the Authorized Participants that the creation and redemption transactions are for separate Beneficial Owners. All questions as to the number of shares of each security in the Deposit Securities and the validity, form, eligibility and acceptance for deposit of any securities to be delivered shall be determined by the Fund and the Fund’s determination shall be final and binding.

Costs Associated with Creation Transactions

A standard creation transaction fee is imposed to offset the transfer and other transaction costs associated with the issuance of Creation Units. The standard creation transaction fee is charged to the Authorized Participant on the day such Authorized Participant creates a Creation Unit, and is the same, regardless of the number of Creation Units purchased by the Authorized Participant on the applicable Business Day.

If a purchase consists of a cash portion, the Authorized Participant may also be required to cover certain brokerage, tax, foreign exchange, execution, market impact and other costs and expenses related to the execution of trades resulting from the cash portion of such transaction, as further described in the Brokerage Transactions section of this SAI. The Authorized Participants may also be required to pay an additional charge (up to the maximum amount shown below) to cover costs related to the creation transaction. Authorized Participants will also bear the costs of transferring the Deposit Securities to the Fund. Investors who use the services of a broker or other financial intermediary may be charged a fee for such services.

The Fund's standard creation transaction fee is \$1,500. The Fund, subject to approval by the Board, may adjust the fee from time to time based on actual experience.

Redemption of Creation Units

Shares of the Fund may be redeemed by Authorized Participants only in Creation Units at their NAV next determined after receipt of a redemption request in proper form by the Distributor and only on a Business Day. The Fund generally redeems Creation Units for Fund Securities. The Fund will not redeem shares in amounts less than Creation Units. There can be no assurance, however, that there will be sufficient liquidity in the secondary market at any time to permit assembly of a Creation Unit. Investors should expect to incur brokerage and other costs in connection with assembling a sufficient number of shares to constitute a Creation Unit that could be redeemed by an Authorized Participant. Beneficial Owners also may sell shares in the secondary market.

The Custodian makes available through the NSCC, prior to the opening of business on the Exchange on each Business Day, the designated portfolio of securities (including any portion of such securities for which cash may be substituted) that will be applicable (subject to possible amendment or correction) to redemption requests received in proper form (as defined below) on that day ("Fund Securities"), and an amount of cash (the "Cash Amount," as described below). Such Fund Securities and the corresponding Cash Amount (each subject to possible amendment or correction) are applicable, in order to effect redemptions of Creation Units of the Fund until such time as the next announced composition of the Fund Securities and Cash Amount is made available. Fund Securities received on redemption may not be identical to Deposit Securities that are applicable to creations of Creation Units.

Unless cash redemptions are available or specified for the Fund, the redemption proceeds for a Creation Unit generally consist of Fund Securities, plus the Cash Amount, which is an amount equal to the difference between the NAV of the shares being redeemed, as next determined after the receipt of a redemption request in proper form, and the value of Fund Securities, less a redemption transaction fee (as described below).

The Trust may substitute a "cash in lieu" amount to replace a Fund Security, which shall be added to the Cash Amount, in the following situations: (i) to the extent there is a Cash Amount, as described herein; (ii) if, on a given Business Day, the Fund announces before the open of trading that all purchases, all redemptions or all purchases and redemptions on that day will be made *entirely in cash*; (iii) if, upon receiving a redemption order from an Authorized Participant, the Fund determines to require the redemption be made *entirely in cash*; (iv) if, on a given Business Day, the Fund requires all Authorized Participants redeeming shares on that day to receive cash in lieu of some or all of the Fund Securities solely because: (a) such instruments are not eligible for transfer through either the NSCC or DTC systems; or (b) such instruments are not eligible for trading due to local trading restrictions, local restrictions on securities transfers or other similar circumstances; or (v) if the Fund permits an Authorized Participant to receive cash in lieu of some or all of the Fund Securities solely because such

instruments are not eligible for trading by an Authorized Participant or the investor on whose behalf the Authorized Participant is acting; or (iii) if a shareholder would be subject to unfavorable income tax treatment if the holder receives redemption proceeds in kind.

The amount of cash paid out in such cases will be equivalent to the value of the substituted security listed as a Fund Security. In the event that the Fund Securities have a value greater than the NAV of the shares, a compensating cash payment equal to the difference is required to be made by or through an Authorized Participant by the redeeming shareholder. The Fund generally redeems shares for Fund Securities, but reserves the right to utilize a cash option for redemption of shares.

Cash Redemption Method

Although the Trust does not ordinarily permit partial or full cash redemptions of Creation Units of the Fund, when partial or full cash redemptions of Creation Units are available or specified for the Fund, they will be effected in essentially the same manner as in-kind redemptions thereof. In the case of partial or full cash redemption, the Authorized Participant receives the cash equivalent of the Fund Securities it would otherwise receive through an in-kind redemption, plus the same Cash Amount to be paid to an in-kind redeemer.

Costs Associated with Redemption Transactions

A redemption transaction fee is imposed to offset transfer and other transaction costs that may be incurred by the Fund. The standard redemption transaction fee is charged to the Authorized Participant on the day such Authorized Participant redeems a Creation Unit, and is the same regardless of the number of Creation Units redeemed by an Authorized Participant on the applicable Business Day. The redeeming investor may be assessed an additional variable charge on the cash in lieu portion of its redemption proceeds, up to a maximum additional variable charge as indicated in the chart below. The standard redemption transaction fee and the additional variable charge for cash in lieu redemptions are set forth below. Authorized Participants will also bear the costs of transferring the Fund Securities from the Fund to their account on their order. Investors who use the services of a broker or other financial intermediary may be charged a fee for such services.

The standard redemption transaction fee for the Fund is \$1,500. The Fund, subject to approval by the Board, may adjust the fee from time to time based on actual experience.

Placement of Redemption Orders

Redemption requests for Creation Units of the Fund must be submitted to the Distributor by or through an Authorized Participant. An Authorized Participant must submit an irrevocable request to redeem shares of the Fund generally before 4:00 p.m., Eastern Time on any Business Day in order to receive that day's NAV. Orders to redeem shares of the Fund that are submitted on the Business Day immediately preceding a holiday or day (other than a weekend) when the markets in the relevant non-U.S. market are closed may not be accepted. Investors other than Authorized Participants are responsible for making arrangements for a redemption request to be made through an Authorized Participant. The Distributor will provide a list of current Authorized Participants upon request.

The Authorized Participant must transmit the request for redemption in the form required by the Fund to the Distributor in accordance with procedures set forth in the Authorized Participant Agreement. Investors should be aware that their particular broker may not have executed an Authorized Participant Agreement. In such cases, requests to redeem Creation Units may have to be placed by the investor's broker through an Authorized Participant who has executed an Authorized Participant Agreement. At any time, only a limited number of broker-dealers will have an Authorized Participant Agreement in effect. Investors making a redemption request should be aware that such request must be in the form specified by such Authorized Participant. Investors making a request to redeem Creation Units should allow sufficient time to permit proper submission of the request by an Authorized Participant and transfer of the shares to the Fund's transfer agent; such investors should allow for the

additional time that may be required to effect redemptions through their banks, brokers or other financial intermediaries if such intermediaries are not Authorized Participants.

A redemption request is considered to be in “proper form” if: (i) an Authorized Participant has transferred or caused to be transferred to the Fund’s transfer agent the Creation Unit being redeemed through the book-entry system of DTC so as to be effective by the Exchange closing time on any Business Day; (ii) a request in a form satisfactory to the Fund is received by the Distributor from the Authorized Participant on behalf of itself or another redeeming investor within the time periods specified above; and (iii) all other procedures set forth in the Authorized Participant Agreement are properly followed. If the transfer agent does not receive the investor’s shares through DTC’s facilities by 10:00 a.m., Eastern Time on the Business Day next following the day that the redemption request is received, the redemption request shall be rejected. Investors should be aware that the deadline for such transfers of shares through the DTC system may be significantly earlier than the close of business on the Exchange. Those making redemption requests should ascertain the deadline applicable to transfers of shares through the DTC system by contacting the operations department of the broker or depositary institution effecting the transfer of the shares.

Upon receiving a redemption request, the Distributor shall notify the Fund and the Fund’s transfer agent of such redemption request. The tender of an investor’s shares for redemption and the distribution of the securities and/or cash included in the redemption payment made in respect of Creation Units redeemed will be made through DTC and the relevant Authorized Participant to the Beneficial Owner thereof as recorded on the book-entry system of DTC or the DTC Participant through which such investor holds, as the case may be, or by such other means specified by the Authorized Participant submitting the redemption request.

A redeeming Beneficial Owner or Authorized Participant acting on behalf of such Beneficial Owner must maintain appropriate security arrangements with a qualified broker-dealer, bank or other custody providers in each jurisdiction in which any of the portfolio securities are customarily traded, to which account such portfolio securities will be delivered.

Deliveries of redemption proceeds by the Fund generally will be made within three Business Days (*i.e.*, “T+3”). However, as discussed in the Regular Holidays section, the Fund reserves the right to settle redemption transactions and deliver redemption proceeds on another basis to accommodate non-U.S. market holiday schedules, to account for different treatment among non-U.S. and U.S. markets of dividend record dates and dividend ex-dates (*i.e.*, the last date the holder of a security can sell the security and still receive dividends payable on the security sold) and in certain other circumstances. The Regular Holidays section hereto identifies the instances, if any, where more than seven days would be needed to deliver redemption proceeds. Pursuant to an order of the SEC, the Trust will make delivery of redemption proceeds within the number of days stated in the Regular Holidays section to be the maximum number of days necessary to deliver redemption proceeds.

If neither the redeeming Beneficial Owner nor the Authorized Participant acting on behalf of such redeeming Beneficial Owner has appropriate arrangements to take delivery of Fund Securities in the applicable non-U.S. jurisdiction and it is not possible to make other such arrangements, or if it is not possible to effect deliveries of Fund Securities in such jurisdiction, the Trust may in its discretion exercise its option to redeem such shares in cash, and the redeeming Beneficial Owner will be required to receive its redemption proceeds in cash. In such case, the investor will receive a cash payment equal to the NAV of its shares based on the NAV of the Fund next determined after the redemption request is received in proper form (minus a redemption transaction fee and additional charges specified above to offset the Trust’s brokerage and other transaction costs associated with the disposition of Fund Securities). Redemptions of shares for Fund Securities will be subject to compliance with applicable U.S. federal and state securities laws and the Fund (whether or not they otherwise permit cash redemptions) reserve the right to redeem Creation Units for cash to the extent that the Fund cannot lawfully deliver specific Fund Securities upon redemptions or cannot do so without first registering the Fund Securities under such laws.

Although the Trust does not ordinarily permit cash redemptions of Creation Units, in the event that cash redemptions are permitted or required by the Trust, proceeds will be paid to the Authorized Participant redeeming shares as soon as practicable after the date of redemption (within seven calendar days thereafter, except for the instances listed in the Regular Holidays section in which more than seven calendar days would be needed).

Because the portfolio securities of the Fund may trade on exchange(s) on days that the Exchange is closed or are otherwise not Business Days for the Fund, shareholders may not be able to redeem their shares of the Fund, or purchase or sell shares of the Fund on the Exchange on days when the NAV of the Fund could be significantly affected by events in the relevant non-U.S. markets.

The right of redemption may be suspended or the date of payment postponed with respect to the Fund (i) for any period during which the Exchange is closed (other than customary weekend and holiday closings), (ii) for any period during which trading on the Exchange is suspended or restricted, (iii) for any period during which an emergency exists as a result of which disposal of the shares of the Fund's portfolio securities or determination of its NAV is not reasonably practicable; or (iv) in such other circumstance as is permitted by the SEC.

Taxation on Creation and Redemptions of Creation Units

An Authorized Participant generally will recognize either gain or loss upon the exchange of Deposit Securities for Creation Units. This gain or loss will generally equal the difference between (i) the sum of the market value of the Creation Units at the time of the exchange and any net amount of cash received by the Authorized Participant in the exchange and (ii) the sum of the Authorized Participant's aggregate basis in the Deposit Securities exchanged therefor and any net amount of cash paid for the Creation Units. However, the U.S. Internal Revenue Service may apply the wash sales rules to determine that any loss realized upon the exchange of Deposit Securities for Creation Units is not currently deductible. Authorized Participants should consult their own tax advisers.

Current U.S. federal tax laws dictate that capital gain or loss realized from the redemption of Creation Units will generally create long-term capital gain or loss if the Authorized Participant holds the Creation Units for more than one year, or short-term capital gain or loss if the Creation Units were held for one year or less, if the Creation Units are held as capital assets.

Regular Holidays

For every occurrence of one or more intervening holidays in the applicable non-U.S. market that are not holidays observed in the U.S. equity market, the redemption settlement cycle will be extended by the number of such intervening holidays. In addition to holidays, other unforeseeable closings in a non-U.S. market due to emergencies may also prevent the Trust from delivering securities within normal settlement period. The securities delivery cycles currently practicable for transferring portfolio securities to redeeming investors, coupled with non-U.S. market holiday schedules, will require a delivery process longer than seven calendar days, in certain circumstances, but in no event longer than fourteen calendar days. The holidays applicable to the Fund during such periods are listed below, as are instances where more than seven days will be needed to deliver redemption proceeds. Although certain holidays may occur on different dates in subsequent years, the number of days required to deliver redemption proceeds in any given year is not expected to exceed the maximum number of days listed below for the Fund. The proclamation of new holidays, the treatment by market participants of certain days as "informal holidays" (e.g., days on which no or limited securities transactions occur, as a result of substantially shortened trading hours), the elimination of existing holidays, or changes in local securities delivery practices, could affect the information set forth herein at some time in the future.

In the calendar year 2013, the dates of regular holidays affecting the relevant securities markets in which the Fund invests are as follows (please note these holiday schedules are subject to potential changes in the relevant securities markets):

China

February 2	February 8	June 6	October 5
February 3	April 4	September 12	October 6
February 4	April 5	October 3	October 7

Hong Kong

February 3	April 25	July 1	December 27
February 4	May 2	September 13	
April 5	May 10	October 5	

The longest redemption cycle for the Fund is a function of the longest redemption cycle among the countries whose stocks comprise the Fund. In calendar year 2013, the dates of regular holidays affecting the following securities markets present the worst case redemption cycles for the Fund as set forth below. This information is based on the information regarding regular holidays, which may be out of date. Changes in the regular holidays may lead to longer redemption cycles than are set forth below.

Country	Trade Date	Settlement Date	Number of Days to Settle
2013			
China	02/04/2013	02/19/2013	15
	02/05/2013	02/20/2013	15
	02/06/2013	02/21/2013	15
	04/26/2013	05/08/2013	12
	04/29/2013	05/09/2013	10
	04/30/2013	05/10/2013	10
	09/25/2013	10/08/2013	13
	09/26/2013	10/09/2013	13
	09/27/2013	10/10/2013	13

TAXES

The following discussion of certain U.S. federal income tax consequences of investing in the Fund is based on the Internal Revenue Code, U.S. Treasury regulations, and other applicable authority, all as in effect as of the date of the filing of this SAI. These authorities are subject to change by legislative or administrative action, possibly with retroactive effect. The following discussion is only a summary of some of the important U.S. federal income tax considerations generally applicable to investments in the Fund. There may be other tax considerations applicable to particular shareholders. Shareholders should consult their own tax advisers regarding their particular situation and the possible application of foreign, state, and local tax laws.

Qualification as a RIC

The Fund has elected or intends to elect to be treated, and intends to qualify each year, as a regulated investment company (a “RIC”) under Subchapter M of the Internal Revenue Code. In order to qualify for the special tax treatment accorded RICs and their shareholders, the Fund must, among other things:

(a) derive at least 90% of its gross income each year from (i) dividends, interest, payments with respect to certain securities loans, gains from the sale or other disposition of stock or securities or foreign currencies, or other income (including but not limited to gains from options, futures or forward contracts) derived with respect to its business of investing in such stock, securities or currencies, and (ii) net income derived from interests in “qualified publicly traded partnerships” (as defined below);

(b) diversify its holdings so that, at the end of each quarter of its taxable year, (i) at least 50% of the market value of the Fund's total assets consists of cash and cash items, U.S. government securities, securities of other RICs and other securities, with investments in such other securities limited with respect to any one issuer to an amount not greater than 5% of the value of the Fund's total assets and not greater than 10% of the outstanding voting securities of such issuer, and (ii) not more than 25% of the value of the Fund's total assets is invested in (1) the securities (other than those of the U.S. government or other RICs) of any one issuer or two or more issuers that are controlled by the Fund and that are engaged in the same, similar or related trades or businesses or (2) the securities of one or more qualified publicly traded partnerships; and

(c) distribute with respect to each taxable year an amount equal to or greater than 90% of its investment company taxable income (as that term is defined in the Internal Revenue Code without regard to the deduction for dividends paid – generally taxable ordinary income and the excess, if any, of net short-term capital gains over net long-term capital losses) and 90% of its net tax-exempt interest income.

In general, for purposes of the 90% of gross income requirement described in (a) above, income derived from a partnership will be treated as qualifying income only to the extent such income is attributable to items of income of the partnership that would be qualifying income if realized directly by the Fund. However, 100% of the net income derived from an interest in a “qualified publicly traded partnership” (generally, a partnership (i) interests in which are traded on an established securities market or are readily tradable on a secondary market or the substantial equivalent thereof, and (ii) that derives less than 90% of its income from the qualifying income described in (a)(i) of the prior paragraph) will be treated as qualifying income. In addition, although in general the passive loss rules of the Internal Revenue Code do not apply to RICs, such rules do apply to a RIC with respect to items attributable to an interest in a qualified publicly traded partnership.

The U.S. Treasury Department has authority to issue regulations that would exclude foreign currency gains from the 90% test described in (a) above if such gains are not directly related to a fund's business of investing in stock or securities. Accordingly, regulations may be issued in the future that could treat some or all of the Fund's non-U.S. currency gains as non-qualifying income, thereby potentially jeopardizing the Fund's status as a RIC for all years to which the regulations are applicable.

Taxation of the Fund

If the Fund qualifies for treatment as a RIC, the Fund will not be subject to federal income tax on income and gains that are distributed in a timely manner to its shareholders in the form of dividends.

If, for any taxable year, the Fund was to fail to qualify as a RIC or were to fail to meet the distribution requirement, it would be taxed in the same manner as an ordinary corporation and distributions to its shareholders would not be deductible by the Fund in computing its taxable income. In addition, the Fund's distributions, to the extent derived from the Fund's current and accumulated earnings and profits, including any distributions of net long-term capital gains, would be taxable to shareholders as ordinary dividend income for federal income tax purposes. However, such dividends would be eligible, subject to any generally applicable limitations, to be treated as qualified dividend income in the case of shareholders taxed as individuals and for the dividends-received deduction in the case of corporate shareholders. Moreover, the Fund would be required to pay out its earnings and profits accumulated in that year in order to qualify for treatment as a RIC in a subsequent year. Under certain circumstances, the Fund may be able to cure a failure to qualify as a RIC, but in order to do so the Fund may incur significant Fund-level taxes and may be forced to dispose of certain assets. If the Fund failed to qualify as a RIC for a period greater than two taxable years, the Fund would generally be required to recognize any net built-in gains with respect to certain of its assets upon a disposition of such assets within ten years of qualifying as a RIC in a subsequent year.

The Fund intends to distribute at least annually to its shareholders substantially all of its net taxable income and its net capital gains. Taxable income that is retained by the Fund will be subject to tax at regular corporate rates. If

the Fund retains any net capital gain, that gain will be subject to tax at corporate rates, but the Fund may designate the retained amount as undistributed capital gains in a notice to its shareholders who (i) will be required to include in income for federal income tax purposes, as long-term capital gain, their shares of such undistributed amount, (ii) will be deemed to have paid their proportionate shares of the tax paid by the Fund on such undistributed amount against their federal income tax liabilities, if any, and (iii) will be entitled to claim refunds on a properly filed U.S. tax return to the extent the credit exceeds such liabilities. For federal income tax purposes, the tax basis of shares owned by a shareholder of the Fund will be increased by an amount equal to the difference between the amount of undistributed capital gains included in the shareholder's gross income and the tax deemed paid by the shareholder.

If the Fund fails to distribute in a calendar year an amount at least equal to the sum of 98% of its ordinary income for such year and 98.2% of its capital gain net income for the one-year period ending October 31 of such year, plus any retained amount from the prior year, the Fund will be subject to a non-deductible 4% excise tax on the undistributed amount. For these purposes, the Fund will be treated as having distributed any amount on which it has been subject to corporate income tax in the taxable year ending within the calendar year. The Fund intends to declare and pay dividends and distributions in the amounts and at the times necessary to avoid the application of the 4% excise tax, although there can be no assurance that the Fund will be able to do so.

Deferral of Late Year Losses

The Fund may elect to treat part or all of any "qualified late year loss" as if it had been incurred in the succeeding taxable year in determining the Fund's taxable income, net capital gain, net short-term capital gain, and earnings and profits. A "qualified late year loss" generally includes net capital loss, net long-term capital loss, or net short-term capital loss incurred after October 31 of the current taxable year, and certain other late-year losses.

Capital Loss Carryovers

If the Fund has a "net capital loss" (that is, capital losses in excess of capital gains), the excess of the Fund's net short-term capital losses over its net long-term capital gains is treated as a short-term capital loss arising on the first day of the Fund's next taxable year, and the excess (if any) of the Fund's net long-term capital losses over its net short-term capital gains is treated as a long-term capital loss arising on the first day of the Fund's next taxable year.

Fund Distributions

Distributions are taxable whether shareholders receive them in cash or reinvest them in additional shares. Moreover, distributions of the Fund's shares are generally subject to federal income tax as described herein to the extent they do not exceed the Fund's realized income and gains, even though such dividends and distributions may economically represent a return of a particular shareholder's investment. Investors may therefore wish to avoid purchasing shares at a time when the Fund's NAV reflects gains that are either unrealized, or realized but not distributed. Realized gains must generally be distributed even when the Fund's NAV also reflects unrealized losses.

Dividends and other distributions by the Fund are generally treated under the Internal Revenue Code as received by the shareholders at the time the dividend or distribution is made. However, if any dividend or distribution is declared by the Fund in October, November or December of any calendar year and payable to its shareholders of record on a specified date in such a month but is actually paid during the following January, such dividend or distribution will be deemed to have been received by each shareholder on December 31 of the year in which the dividend was declared.

Distributions by the Fund of investment income are generally taxable as ordinary income. Taxes on distributions of capital gains are determined by how long the Fund owned the investments that generated those gains, rather than how long a shareholder has owned his or her Fund shares. Sales of assets held by the Fund for more than one year generally result in long-term capital gains and losses, and sales of assets held by the Fund for one year or less

generally result in short-term capital gains and losses. Distributions from the Fund's net capital gain (the excess of the Fund's net long-term capital gain over its net short-term capital loss) that are properly reported by the Fund as capital gain dividends ("Capital Gain Dividends") will be taxable as long-term capital gains. Long-term capital gains are subject to reduced maximum tax rates. In determining its net capital gain for Capital Gain Dividends purposes, a RIC generally must generally treat any net capital loss or any net long-term capital loss incurred after October 31 as if it had been incurred in the succeeding year. Distributions of gains from the sale of investments that the Fund owned for one year or less will be taxable as ordinary income.

Distributions of investment income reported by the Fund as derived from "qualified dividend income" will be taxable in the hands of individuals at the rates applicable to long-term capital gains, provided holding period and other requirements are met at both the shareholder and the Fund level. Qualified dividend income is, in general, dividend income from taxable domestic corporations and certain foreign corporations (*i.e.*, foreign corporations incorporated in a possession of the United States or in certain countries with a comprehensive tax treaty with the United States, which countries include China (but not Hong Kong, which is treated as a separate jurisdiction). Dividends received from foreign corporations may also be treated as qualified dividend income if the stock with respect to which the dividends are paid is readily tradable on an established securities market in the United States. In order for some portion of the dividends received by the Fund shareholder to be qualified dividend income, the Fund must meet holding period and other requirements with respect to some portion of the dividend paying stocks in its portfolio, and the shareholder must meet holding period and other requirements with respect to the Fund's shares. If the aggregate qualified dividend income received by the Fund during any taxable year constitutes 95% or more of the Fund's gross income (excluding net capital gain), then 100% of the Fund's dividends (other than Capital Gain Dividends) will be eligible to be reported as qualified dividend income.

Given the Fund's investment objective, it is not expected that corporate shareholders of the Fund will be eligible for the dividends received deduction on Fund distributions attributable to dividends received because such treatment is available only to distributions made by the Fund from domestic corporations.

To the extent that the Fund makes a distribution of income received by the Fund in lieu of dividends (a "substitute payment") with respect to securities on loan pursuant to a securities lending transaction, such income will not constitute qualified dividend income to individual shareholders and will not be eligible for the dividends received deduction for corporate shareholders.

If the Fund makes distributions to a shareholder in excess of the Fund's current and accumulated earnings and profits in any taxable year, the excess distribution will be treated as a return of capital to the extent of the shareholder's tax basis in its shares, and thereafter as capital gain, assuming the shareholder holds his or her shares as capital assets. A return of capital is not taxable, but reduces a shareholder's tax basis in its shares, thus reducing any loss or increasing any gain on a subsequent taxable disposition by the shareholder of its shares.

Sale or Exchange of Shares

A sale or exchange of shares in the Fund may give rise to a gain or loss. In general, any gain or loss realized upon a taxable disposition of shares will be treated as long-term capital gain or loss if the shares have been held for more than 12 months. Otherwise, the gain or loss on the taxable disposition of shares will be treated as short-term capital gain or loss. However, any loss realized upon a taxable disposition of shares held for six months or less will be treated as long-term, rather than short-term, to the extent of any long-term capital gain distributions received (or deemed received) by the shareholder with respect to the shares. All or a portion of any loss realized upon a taxable disposition of shares will be disallowed if substantially identical shares of the Fund are purchased within 30 days before or after the disposition. In such a case, the basis of the newly purchased shares will be adjusted to reflect the disallowed loss.

Medicare Contribution Tax

Beginning in 2013, a Medicare contribution tax will be imposed at the rate of 3.8% on net investment income, including interest, dividends, and capital gain, of U.S. individuals with income exceeding specified thresholds, and on undistributed net investment income of certain estates and trusts.

Backup Withholding

The Fund (or financial intermediaries, such as brokers, through which a shareholder holds Fund shares) generally are required to withhold and to remit to the U.S. Treasury a percentage of the taxable distributions and sale or redemption proceeds paid to any shareholder who fails to properly furnish a correct taxpayer identification number, who has under-reported dividend or interest income, or who fails to certify that he, she or it is not subject to such withholding. The backup withholding tax rate is currently 28%.

Federal Tax Treatment of Certain Fund Investments

Transactions of the Fund in options, futures contracts, hedging transactions, forward contracts, swap agreements, straddles and foreign currencies may be subject to various special and complex tax rules, including mark-to-market, constructive sale, straddle, wash sale and short sale rules. These rules could affect whether gains and losses recognized by the Fund are treated as ordinary income or capital gain, accelerate the recognition of income to the Fund and/or defer the Fund's ability to recognize losses. These rules may in turn affect the amount, timing or character of the income distributed to shareholders by the Fund.

The Fund is required, for federal income tax purposes, to mark to market and recognize as income for each taxable year its net unrealized gains and losses as of the end of such year on certain regulated futures contracts, foreign currency contracts and options that qualify as Section 1256 contracts in addition to the gains and losses actually realized with respect to such contracts during the year. Except as described below under "Certain Foreign Currency Tax Issues," gain or loss from Section 1256 contracts that are required to be marked to market annually will generally be 60% long-term and 40% short-term capital gain or loss. Application of this rule may alter the timing and character of distributions to shareholders.

Certain Foreign Currency Tax Issues

The Fund's gain or loss on foreign currency denominated debt securities and on certain other financial instruments, such as forward currency contracts and currency swaps, that is attributable to fluctuations in exchange rates occurring between the date of acquisition and the date of settlement or disposition of such securities or instruments generally will be treated under Section 988 of the Internal Revenue Code as ordinary income or loss. Moreover, any gain or loss attributable to fluctuations in exchange rates between the time the Fund accrues income or gain in a foreign currency and the time the Fund converts such income or gain from the foreign currency to the dollar will also generally be treated as ordinary income. The Fund may elect out of the application of Section 988 of the Internal Revenue Code with respect to the tax treatment of each of its foreign currency forward contracts to the extent that (i) such contract is a capital asset in the hands of the Fund and is not part of a straddle transaction and (ii) the Fund makes an election by the close of the day the contract is entered into to treat the gain or loss attributable to such contract as capital gain or loss.

The Fund's forward contracts may qualify as so-called Section 1256 contracts if the underlying currencies are currencies for which there are futures contracts that are traded on and subject to the rules of a qualified board or exchange. However, a forward currency contract that is a Section 1256 contract would, absent an election out of Section 988 of the Internal Revenue Code as described in the preceding paragraph, be subject to Section 988. Accordingly, although such a forward currency contract would be marked to market annually like other Section 1256 contracts, the resulting gain or loss would be ordinary. If the Fund were to elect out of Section 988 with respect to forward currency contracts that qualify as Section 1256 contracts, the tax treatment generally applicable to Section 1256 contracts would apply to those forward currency contracts: that is, the contracts would be marked to market annually and gains and losses with respect to the contracts would be treated as long-term capital gains or losses to the extent of 60% thereof and short-term capital gains or losses to the extent of 40% thereof. If the

Fund were to elect out of Section 988 with respect to any of its forward currency contracts that do not qualify as Section 1256 contracts, such contracts will not be marked to market annually and the Fund will recognize short-term or long-term capital gain or loss depending on the Fund's holding period therein. The Fund may elect out of Section 988 with respect to some, all or none of its forward currency contracts.

Finally, regulated futures contracts and non-equity options that qualify as Section 1256 contracts and are entered into by the Fund with respect to foreign currencies or foreign currency denominated debt instruments will be subject to the tax treatment generally applicable to Section 1256 contracts unless the Fund elects to have Section 988 apply to determine the character of gains and losses from all such regulated futures contracts and non-equity options held or later acquired by the Fund.

Foreign Investments

Income received by the Fund from sources within foreign countries (including, for example, dividends on securities of non-U.S. issuers) may be subject to withholding and other taxes imposed by such countries. In the case of Chinese issuers, gain on the sale of shares may also be subject to foreign tax. Tax treaties between such countries and the U.S. may reduce or eliminate such taxes. Foreign taxes paid by the Fund will reduce the return from the Fund's investments.

If more than 50% of the value of the Fund's assets at the close of any taxable year consists of stock or securities of foreign corporations, which for this purpose may include obligations of foreign governmental issuers, the Fund may elect, for U.S. federal income tax purposes, to treat any foreign income or withholding taxes paid by the Fund as paid by its shareholders. For any year that the Fund is eligible for and makes such an election, each shareholder of the Fund will be required to include in income an amount equal to his or her allocable share of qualified foreign income taxes paid by the Fund, and shareholders will be entitled, subject to certain holding period requirements and other limitations, to credit their portions of these amounts against their U.S. federal income tax due, if any, or to deduct their portions from their U.S. taxable income, if any. No deductions for foreign taxes paid by the Fund may be claimed, however, by non-corporate shareholders who do not itemize deductions.

One of the limitations on a shareholder's ability to claim a credit for foreign taxes is that the amount of the credit claimed cannot exceed the proportion of the shareholder's total liability equal to the ratio of the shareholder's taxable income from non-U.S. sources to the shareholder's total taxable income. In computing that limitation, the portion of Fund distributions that is derived from capital gains on the sale of securities and from currency exchange gain is treated as income from U.S. sources. As a result, it is possible that shareholders may have insufficient income from non-U.S. sources to claim a full credit for taxes passed through by the Fund, particularly to the extent those taxes are imposed on capital gains or on any portion of the Fund's income attributable to currency exchange gain.

Passive Foreign Investment Companies

If the Fund holds shares in "passive foreign investment companies" ("PFICs"), it may be subject to U.S. federal income tax on a portion of any "excess distribution" or gain from the disposition of such shares even if such income is distributed as a taxable dividend by the Fund to its shareholders. Additional charges in the nature of interest may be imposed on the Fund in respect of deferred taxes arising from such distributions or gains. The Fund may be eligible to elect to treat a PFIC as a "qualified electing fund" under the Internal Revenue Code, in which case, the Fund would generally be required to include in income each year a portion of the ordinary earnings and net capital gains of the qualified electing fund, even if not distributed to the Fund, and such amounts would be subject to the 90% and excise tax distribution requirements described above. In order to make this election, the Fund would be required to obtain certain annual information from the PFICs in which it invests, which may be difficult or impossible to obtain. Alternatively, the Fund may make a mark-to-market election that would result in the Fund being treated as if it had sold and repurchased its PFIC stock at the end of each year. In such case, the Fund would report any gains resulting from such deemed sales as ordinary income and would

deduct any losses resulting from such deemed sales as ordinary losses to the extent of previously recognized gains. The election must be made separately for each PFIC owned by the Fund and, once made, would be effective for all subsequent taxable years, unless revoked with the consent of the Internal Revenue Service. By making the election, the Fund could potentially ameliorate the adverse tax consequences with respect to its ownership of shares in a PFIC, but in any particular year may be required to recognize income in excess of the distributions it receives from PFICs and its proceeds from dispositions of PFIC stock. The Fund may have to distribute this excess income and gain to satisfy the 90% distribution requirement and to avoid imposition of the 4% excise tax. In order to distribute this income and avoid a tax at the Fund level, the Fund might be required to liquidate portfolio securities that it might otherwise have continued to hold, potentially resulting in additional taxable gain or loss.

Chinese Tax Disclosure

Although China's enactment of the Enterprise Income Tax Law, effective January 1, 2008, provided a 10% withholding tax upon non-residents with respect to capital gains, significant uncertainties remain. Such uncertainties may result in capital gains imposed upon the Fund relative to companies headquartered, managed or listed in China. While the application and enforcement of this law to the Fund remain subject to clarification, to the extent that such taxes are imposed on any capital gains of the Fund relative to companies headquartered, managed or listed in China, the Fund's NAV or returns may be adversely impacted.

Tax-Exempt Shareholders

Under current law, income of a RIC that would be treated as unrelated business taxable income ("UBTI") if earned directly by a tax-exempt entity generally will not be attributed as UBTI to a tax-exempt entity that is a shareholder in the RIC. Notwithstanding this "blocking" effect, a tax-exempt shareholder could realize UBTI by virtue of its investment in the Fund if shares in the Fund constitute debt-financed property in the hands of the tax-exempt shareholder within the meaning of Code Section 514(b).

Non-U.S. Shareholders

In general, dividends other than Capital Gain Dividends paid by the Fund to a shareholder that is not a "U.S. person" within the meaning of the Internal Revenue Code (a "foreign person") are subject to withholding of U.S. federal income tax at a rate of 30% (or lower applicable treaty rate) even if they are funded by income or gains (such as portfolio interest, short-term capital gains, or foreign-source dividend and interest income) that, if paid to a foreign person directly, would not be subject to withholding.

A beneficial holder of shares who is a non-U.S. person is not, in general, subject to U.S. federal income tax on gains (and is not allowed a U.S. income tax deduction for losses) realized on a sale of shares of the Fund or on Capital Gain Dividends unless (i) such gain or dividend is effectively connected with the conduct of a trade or business carried on by such holder within the United States or (ii) in the case of an individual holder, the holder is present in the United States for a period or periods aggregating 183 days or more during the year of the sale or the receipt of the Capital Gain Dividend and certain other conditions are met.

Ordinary dividends, redemption payments and certain capital gain dividends paid after December 31, 2013 to a non-U.S. shareholder that fails to make certain required certifications, or that is a "foreign financial institution" as defined in Section 1471 of the Internal Revenue Code and that does not meet the requirements imposed on foreign financial institutions by Section 1471, are generally subject to withholding tax at a 30% rate. Under current IRS guidance, withholding on such payments will begin at different times depending on the type of payment, the type of payee, and whether the shareholder's account is opened before or after January 1, 2014. Withholding with respect to ordinary dividends is currently scheduled to begin on January 1, 2014 for accounts opened on or after that date and on certain later dates for accounts opened before January 1, 2014. Withholding on redemption payments and certain Capital Gain Dividends is currently scheduled to begin on January 1, 2017. The extent, if any, to which such withholding tax may be reduced or eliminated by an applicable tax treaty is unclear.

In order for a non-U.S. investor to qualify for an exemption from backup withholding, the foreign investor must comply with special certification and filing requirements. Foreign investors in the Fund should consult their tax advisers in this regard. Backup withholding is not an additional tax. Any amounts withheld may be credited against the shareholder's U.S. federal income tax liability, provided the appropriate information is furnished to the Internal Revenue Service.

A beneficial holder of shares who is a non-U.S. person may be subject to the U.S. federal estate tax in addition to the federal income tax consequences referred to above. If a shareholder is eligible for the benefits of a tax treaty, any effectively connected income or gain will generally be subject to U.S. federal income tax on a net basis only if it is also attributable to a permanent establishment maintained by the shareholder in the United States.

Creation and Redemption of Creation Units

An Authorized Participant who exchanges securities for Creation Units generally will recognize a gain or a loss. The gain or loss will be equal to the difference between (i) the sum of the market value of the Creation Units at the time and any net amount of cash received by the Authorized Participant in the exchange and (ii) the sum of the exchanger's aggregate basis in the securities surrendered and any net amount of cash paid for such Creation Units. A person who redeems Creation Units will generally recognize a gain or loss equal to the difference between the exchanger's basis in the Creation Units and the sum of the aggregate market value of any securities received plus the amount of any cash received for such Creation Units. The Internal Revenue Service, however, may assert that a loss realized upon an exchange of securities for Creation Units cannot be deducted currently under the rules governing "wash sales," or on the basis that there has been no significant change in economic position. All or some portion of any capital gain or loss realized upon the creation of Creation Units will generally be treated as long-term capital gain or loss if securities exchanged for such Creation Units have been held for more than one year.

Any capital gain or loss realized upon the redemption of Creation Units will generally be treated as long-term capital gain or loss if the Creation Units have been held for more than one year. Otherwise, such capital gains or losses will be treated as short-term capital gains or losses.

Persons purchasing or redeeming Creation Units should consult their own tax advisers with respect to the tax treatment of any creation or redemption transaction.

Section 351

The Trust on behalf of the Fund has the right to reject an order for a purchase of shares of the Trust if the purchaser (or group of purchasers) would, upon obtaining the shares so ordered, own 80% or more of the outstanding shares of the Fund and if, pursuant to Section 351 of the Internal Revenue Code, the Fund would have a basis in the securities different from the market value of such securities on the date of deposit. The Trust also has the right to require information necessary to determine beneficial share ownership for purposes of the 80% determination.

Certain Reporting Regulations

Under U.S. Treasury regulations, if a shareholder recognizes a loss of \$2 million or more for an individual shareholder or \$10 million or more for a corporate shareholder, the shareholder must file with the Internal Revenue Service a disclosure statement on Form 8886. Direct shareholders of portfolio securities are in many cases excepted from this reporting requirement, but under current guidance, shareholders of a RIC are not excepted. The fact that a loss is reportable under these regulations does not affect the legal determination of whether the taxpayer's treatment of the loss is proper. Shareholders should consult their tax advisers to determine the applicability of these regulations in light of their individual circumstances.

General Considerations

The federal income tax discussion set forth above is for general information only. Prospective investors should consult their tax advisers regarding the specific federal income tax consequences of purchasing, holding and disposing of shares of the Fund, as well as the effect of state, local and foreign tax law and any proposed tax law changes.

DETERMINATION OF NAV

This information supplements and should be read in conjunction with the section in the Prospectus entitled “Calculating NAV.”

The NAV per share of the Fund is computed by dividing the value of the net assets of the Fund (*i.e.*, the value of its total assets less total liabilities) by the total number of shares of the Fund outstanding, rounded to the nearest cent. Expenses and fees, including without limitation, the management, administration and distribution fees, are accrued daily and taken into account for purposes of determining NAV. The NAV per share for the Fund is calculated by the Custodian and determined as of the close of the regular trading session on the Exchange (ordinarily 4:00 p.m., Eastern Time) on each day that the Exchange is open.

In calculating the Fund’s NAV, the Fund’s investments generally are valued based on their last quoted current price. Price information on listed securities is taken from the exchange where the security is primarily traded. Securities not listed on an exchange or national securities market, or securities in which there was no last reported sales price, are valued at the most recent bid price. Short-term debt securities with remaining maturities of 60 days or less generally are valued on the basis of amortized cost, which approximates fair value. The values of any assets or liabilities denominated in a currency other than the U.S. dollar are converted into U.S. dollars using an exchange rate deemed appropriate by the Fund.

In certain instances, such as when reliable market valuations are not readily available or are not deemed to reflect current market values, the Fund’s investments will be valued in accordance with the Fund’s pricing policy and procedures. Securities that may be valued using “fair value” pricing may include, but are not limited to, securities for which there are no current market quotations or whose issuer is in default or bankruptcy, securities subject to corporate actions (such as mergers or reorganizations), securities subject to non-U.S. investment limits or currency controls, and securities affected by “significant events.” An example of a significant event is an event occurring after the close of the market in which a security trades but before the Fund’s next NAV calculation time that may materially affect the value of the Fund’s investment (*e.g.*, government action, natural disaster, or significant market fluctuation). Price movements in U.S. markets that are deemed to affect the value of foreign securities, or reflect changes to the value of such securities, also may cause securities to be “fair valued.” When fair-value pricing is employed, the prices of securities used by the Fund to calculate its NAV may differ from quoted or published prices for the same securities.

Fund shares are purchased or sold on a national securities exchange at market prices, which may be higher or lower than NAV. No secondary sales will be made to brokers or dealers at a concession by the Distributor or by the Fund. Purchases and sales of shares in the secondary market, which will not involve the Fund, will be subject to customary brokerage commissions and charges. Transactions in Fund shares will be priced at NAV only if you purchase or redeem shares directly from the Fund in Creation Units.

DIVIDENDS AND DISTRIBUTIONS

The Fund intends to pay out dividends, if any, at least quarterly. The Fund distributes its net realized capital gains, if any, to investors annually. The Fund may make distributions on a more frequent basis. The Fund may occasionally be required to make supplemental distributions at some other time during the year. Distributions in cash may be reinvested automatically in additional whole shares only if the broker through whom you purchased

shares makes such option available. Your broker is responsible for distributing the income and capital gain distributions to you.

The Trust reserves the right to declare special distributions if, in its reasonable discretion, such action is necessary or advisable to preserve the status of the Fund as a RIC or to avoid imposition of income or excise taxes on undistributed income.

OTHER INFORMATION

Portfolio Holdings

The Board has approved portfolio holdings disclosure policies and procedures that govern the timing and circumstances of disclosure to shareholders and third parties of the Fund's portfolio holdings and the use of material non-public information about the Fund's holdings. These policies and procedures, as described below, are designed to ensure that disclosure of portfolio holdings is in the best interests of Fund shareholders, and address conflicts of interest between the interests of Fund shareholders and those of the Advisers, Distributor, or any affiliated person of the Fund, the Advisers or the Distributor. The policies and procedures apply to all officers, employees, and agents of the Fund, including the Advisers.

The Fund is an ETF, and therefore information about the Fund's portfolio holdings is made available on a daily basis in accordance with the provisions of any Order of the SEC applicable to the Fund, regulations of the Exchange, and other applicable SEC regulations, orders and no-action relief. Such information typically reflects all or a portion of the Fund's anticipated portfolio holdings as of the next Business Day. This information is used in connection with the creation and redemption process and is disseminated on a daily basis through the facilities of the Exchange, the National Securities Clearing Corporation ("NSCC") and/or other fee-based subscription services to NSCC members and/or subscribers to those other fee-based subscription services, including Authorized Participants, and to entities that publish and/or analyze such information in connection with the process of purchasing or redeeming Creation Units or trading shares of the Fund in the secondary market.

The Fund may disclose on its website at the start of each Business Day the identities and quantities of the securities and other assets held by the Fund that will form the basis of the Fund's calculation of its NAV on that Business Day. The portfolio holdings so disclosed will be based on information as of the close of business on the prior Business Day and/or trades that have been completed prior to the opening of business on that Business Day and that are expected to settle on that Business Day.

Daily access to information concerning the Fund's portfolio holdings also is permitted (i) to certain personnel of those service providers that are involved in portfolio management and providing administrative, operational, risk management, or other support to portfolio management, including affiliated broker-dealers and/or Authorized Participants, and (ii) to other personnel of the Adviser and other service providers, such as the Sub-Adviser, administrator, custodian and fund accountant, who deal directly with, or assist in, functions related to investment management, administration, custody and fund accounting, as may be necessary to conduct business in the ordinary course in a manner consistent with agreements with the Fund and/or the terms of the Fund's current registration statement.

From time to time, information concerning Fund portfolio holdings, other than portfolio holdings information made available in connection with the creation and redemption process, as discussed above, also may be provided to other entities that provide services to the Fund, including, among others, rating or ranking organizations, in the ordinary course of business, no earlier than one business day following the date of the information. Portfolio holdings information made available in connection with the creation and redemption process may be provided to other entities that provide services to the Fund in the ordinary course of business after it has been disseminated to the NSCC.

The Fund's chief compliance officer, or a compliance manager designated by the chief compliance officer, also may grant exceptions to permit additional disclosure of Fund portfolio holdings information at differing times and with different lag times (the period from the date of the information to the date the information is made available), if any, in instances where the Fund has legitimate business purposes for doing so, it is in the best interests of shareholders, and the recipients are subject to a duty of confidentiality, including a duty not to trade on the nonpublic information and are required to execute an agreement to that effect. The Board will be informed of any such disclosures at its next regularly scheduled meeting or as soon as is reasonably practicable thereafter. In no event will the Fund, the Advisers, or any other party receive any direct or indirect compensation in connection with the disclosure of information about the Fund's portfolio holdings.

The Board exercises continuing oversight of the disclosure of the Fund's portfolio holdings by (1) overseeing the implementation and enforcement of the Trust's the portfolio holdings policies and procedures by the Fund's chief compliance officer and the Fund, (2) considering reports and recommendations by the chief compliance officer concerning any material compliance matters (as defined in Rule 38a-1 under the 1940 Act and Rule 206(4)-7 under the Investment Advisers Act of 1940) that may arise in connection with any portfolio holdings policies and procedures, and (3) considering whether to approve or ratify any amendment to any of the portfolio holdings policies and procedures. The Board and the Fund reserve the right to amend the policies and procedures in their sole discretion at any time and from time to time without prior notice to shareholders. For purposes of the policies and procedures, the term "portfolio holdings" means the equity and debt securities (*e.g.*, stocks and bonds) held by the Fund and does not mean the cash investments, derivatives, and other investment positions (collectively, other investment positions) held by the Fund, if any, which are not disclosed.

In addition to the permitted disclosures described above, the Fund must disclose its complete holdings quarterly within 60 days of the end of each fiscal quarter in the Annual Report and Semi-Annual Report to Fund shareholders and in the quarterly holdings report on Form N-Q. These reports are available, free of charge, on the EDGAR database on the SEC's web site at www.sec.gov.

No person is authorized to disclose the Fund's portfolio holdings or other investment positions except in accordance with the Trust's policies and procedures.

Voting Rights

Each share of the Fund is entitled to one vote with respect to matters upon which a shareholder vote is required consistent with the requirements of the 1940 Act and the rules promulgated thereunder. Shareholders receive one vote for every full Fund share owned. At such time as the Trust offers multiple funds, each fund will vote separately on matters relating solely to that fund. All shares of the Fund are freely transferable.

As a Delaware statutory trust, the Trust is not required to hold annual shareholder meetings unless otherwise required by the 1940 Act. However, a meeting may be called by shareholders owning at least 10% of the outstanding shares of the Trust. If a meeting is requested by shareholders, the Trust will provide appropriate assistance and information to the shareholders who requested the meeting. Shareholder inquiries can be made by contacting the Trust at the number and website address provided under "Shareholder Inquiries" below.

Shareholder Inquiries

Shareholders may visit the Trust's web site at www.kraneshares.com or call 1.855.857.2638 or call to obtain information about account statements, procedures, and other related information.

INDEX/TRADEMARK LICENSES/DISCLAIMERS

China Securities Index Co., Ltd. (the "Index Provider") is not affiliated with the Trust, the Adviser, the Sub-Adviser, the Fund's administrator, custodian, transfer agent or distributor, or any of their respective affiliates. The Adviser has entered into a license agreement with the Index Provider pursuant to which the Adviser pays a fee to

use the Underlying Index. The Adviser is sub-licensing rights to the Underlying Index to the Fund at no charge. The CSI Overseas China Internet Index is a licensed trademark of CSI (the “Index Trademark”). The Adviser is licensed to use the Index Trademark for the purpose of promoting and marketing the Fund.

The Fund is neither sponsored nor promoted, distributed or in any other manner supported by CSI. The Underlying Index is compiled and calculated by CSI. CSI will apply all necessary means to ensure the accuracy of the Underlying Index. However, neither CSI nor the Shanghai Stock Exchange nor the Shenzhen Stock Exchange shall be liable (whether in negligence or otherwise) to any person for any error in the Underlying Index and neither CSI nor the Shanghai Stock Exchange nor the Shenzhen Stock Exchange shall be under any obligation to advise any person of any error therein. All copyrights in the Underlying Index values and constituent lists vest in CSI. Neither the publication of the Underlying Index by CSI nor the granting of a license of rights relating to the Underlying Index or to the Index Trademark for the utilization in connection with the Fund, represents a recommendation by CSI for a capital investment or contains in any manner a warranty or opinion by CSI with respect to the attractiveness of an investment in the Fund.

The Adviser, the Sub-Adviser and the Fund make no representation or warranty, express or implied, to the owners of shares of the Fund or any members of the public regarding the advisability of investing in securities generally or in the Fund particularly.

COUNSEL

Bingham McCutchen LLP, 2020 K Street NW, Washington, DC 20006, serves as counsel to the Trust.

INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

PricewaterhouseCoopers LLP, Two Commerce Square, 2001 Market Street, Suite 1700, Philadelphia, Pennsylvania 19103, the Trust’s independent registered public accounting firm, provides audit and tax services and other assurance services with respect to filings with the SEC.

FINANCIAL STATEMENTS

As of the date of this SAI, the Fund has not yet commenced operations and therefore, does not have any Financial Statements. The Fund’s financial statements will be available after the Fund has completed a full year of operations.

APPENDIX A - PROXY VOTING POLICY

KRANE FUNDS ADVISORS, LLC Proxy Voting Policy and Procedures

Proxy Voting Policy

Krane Funds Advisors, LLC (“Krane” or the “Adviser”) votes proxies for the securities in the Funds it manages and votes proxies for securities held in a client’s account using the following guidelines to comply with Rule 206(4)-6 under the Advisers Act. Specifically, Rule 206(4)-6 requires that the Adviser:

- Adopt and implement written policies and procedures reasonably designed to ensure that we vote client securities in the best interest of clients;
- Disclose to clients how they may obtain information from us about how we voted proxies for their securities; and
- Describe our proxy voting policies and procedures to clients and furnish them a copy of our policies and procedures on request.

A. Objective

Where the Adviser is given responsibility for voting proxies, we must take reasonable steps under the circumstances to ensure that proxies are received and voted in the best interest of our clients, which generally means voting proxies with a view to enhancing the value of the shares of stock held in client accounts.

The financial interest of our clients is the primary consideration in determining how proxies should be voted. In the case of social and political responsibility issues that in our view do not primarily involve financial considerations, it is not possible to represent fairly the diverse views of our clients and, thus, unless a client has provided other instructions, the Adviser generally votes in accordance with the recommendations of the proxy vendor (see discussion below) on these issues, although, on occasion the Adviser abstains from voting on these issues.

When making proxy-voting decisions, the Adviser generally adheres to its Proxy Voting Guidelines (the “**Guidelines**”), as revised from time to time by the Adviser. The Guidelines, which have been developed with reference to the positions of the proxy vendor, set forth the Adviser’s positions on recurring issues and criteria for addressing non-recurring issues and incorporates many of proxy vendor’s standard operating policies.

B. Accounts for Which the Adviser Has Proxy Voting Responsibility

The Adviser generally is responsible for voting proxies with respect to securities selected by the Adviser and held in client accounts. The Adviser’s form of Investment Advisory Agreement provides clients with an alternative as to whether the client or the Adviser will be responsible for proxy voting. However, the Adviser does not vote proxies for securities not selected by the Adviser but that are nevertheless held in a client account or where the Adviser otherwise is not vested with discretionary authority over securities held in a client account.

C. Adherence to Client Proxy Voting Policies

Although clients do not always have proxy-voting policies, if a client has such a policy and instructs the Adviser to follow it, the Adviser is required to comply with it except in any instance in which doing so would be contrary to the economic interests of the client or otherwise imprudent or unlawful.

The Adviser must, to the extent possible, comply with each client's proxy voting policy. If such policies conflict, the Adviser may vote proxies to reflect each policy in proportion to the respective client's interest in any pooled account, for example (unless in the particular situation voting in such a manner would be imprudent or otherwise inconsistent with applicable law).

D. Conflicts

From time to time, proxy voting proposals may raise conflicts between the interests of the Adviser's clients and the interests of the Adviser and its employees. **The Adviser must take certain steps designed to ensure, and must be able to demonstrate that those steps resulted in, a decision to vote the proxies that was based on the clients' best interest and was not the product of the conflict.** For example, conflicts of interest may arise when:

- proxy votes regarding non-routine matters are solicited by an issuer that has an institutional separate account relationship with the Adviser;^[1]
- a proponent of a proxy proposal has a business relationship with the Adviser; or
- the Adviser has business relationships with participants in proxy contests, corporate directors or director candidates.

The Adviser's Executive Committee is primarily responsible for monitoring and resolving possible material conflicts with respect to proxy voting. Any person with knowledge of a personal conflict of interest relating to a particular matter shall disclose that conflict to the Chief Compliance Officer and may be required to recuse him or herself from the proxy voting process. Issues raising possible conflicts of interest are referred to the Executive Committee for resolution. Application of the Guidelines or voting in accordance with the proxy vendor vote recommendation should, in most cases, adequately address any possible conflicts of interest.

E. Special Issues with Voting Foreign Proxies

Although the Adviser has arrangements with the proxy vendor, voting proxies with respect to shares of foreign stocks may involve significantly greater effort and corresponding cost due to the variety of regulatory schemes and corporate practices in foreign countries with respect to proxy voting. Logistical problems in voting foreign proxies include the following:

- Each country has its own rules and practices regarding shareholder notification, voting restrictions, registration conditions and share blocking.
- To vote shares in some countries, the shares may be "blocked" by the custodian or depository (or bearer shares deposited with a specified financial institution) for a specified number of days (usually five or fewer but sometimes longer) before or after the shareholder meeting. When blocked, shares typically may not be traded until the day after the blocking period. The Adviser may refrain from voting shares of foreign stocks subject to blocking restrictions where, in the Adviser's judgment, the benefit from voting the shares is outweighed by the interest of maintaining client liquidity in the shares. This decision generally is made on a case-by-case basis based on relevant factors, including the length of the blocking period, the significance of the holding, and whether the stock is considered a long-term holding.

^[1] For this purpose, Adviser generally will consider as "non-routine" any matter listed in New York Stock Exchange Rule 452.11, relating to when a member adviser may not vote a proxy without instructions from its customer (for example, contested matters are deemed non-routine).

- Often it is difficult to ascertain the date of a shareholder meeting because certain countries, such as France, do not require companies to publish announcements in any official stock exchange publication.
- Time frames between shareholder notification, distribution of proxy materials, book-closure and the actual meeting date may be too short to allow timely action.
- Language barriers will generally mean that an English translation of proxy information must be obtained or commissioned before the relevant shareholder meeting.
- Some companies and/or jurisdictions require that, in order to be eligible to vote, the shares of the beneficial holders be registered in the company's share registry.
- Lack of a "proxy voting service" by custodians in certain countries.

Because the cost of voting on a particular proxy proposal could exceed the expected benefit to a client (including an ERISA plan), the Adviser may weigh the costs and benefits of voting on proxy proposals relating to foreign securities and make an informed decision on whether voting a given proxy proposal is prudent.

F. Reports

Clients may obtain information from the Adviser about how we voted proxies with respect to their securities. If requested, the Adviser provides clients with periodic reports on the Adviser's proxy voting decisions and actions for securities in their accounts, in such forms or intervals as the clients reasonably request.

G. Operational Procedures

The Adviser's Chief Executive Officer is responsible for administering the proxy voting process as set forth in these procedures. The CEO works with the proxy vendor, the proxy voting service, and is responsible for ensuring that meeting notices are reviewed. The CEO will process proxies of a routine nature in accordance with the Adviser's Proxy Voting Guidelines when the vote recommendation from the proxy vendor and company management are in agreement on how the proposal should be voted. A response or feedback from the CEO will be provided in writing when proposals are not covered by the Guidelines, the proxy vendor recommends a vote contrary to company management, or the Guidelines are unclear on how a proxy should be voted. A response from the CEO is required to be in writing and will be maintained by the Adviser. The CEO is responsible for the actual submission of the proxies in a timely fashion.

The CEO may submit a proxy recommendation that is contrary to the Guidelines or the proxy vendor vote recommendation if he determines that it is in the best interest of clients. If the CEO submits voting recommendations that are inconsistent with the Guidelines or the proxy vendor vote recommendations, then the CEO is required to document the rationale for his recommendation. The Executive Committee will review the recommendation in order to determine whether the CEO's voting rationale appears reasonable and in the best interests of clients. If the Executive Committee does not agree that the CEO's rationale is reasonable and in the best interests of clients, the Executive Committee will vote the proxy and document the reason(s) for its decision. The Adviser is responsible for maintaining the documentation provided by the CEO and the Executive Committee and assuring that it adequately reflects the basis for any recommendation or vote that is cast in opposition to the Guidelines or proxy vendor vote recommendation.

H. Securities Subject to Lending Arrangements

For various legal or administrative reasons, the Adviser, customarily and typically does not, and is often unable to vote securities that are, at the time of such vote, on loan pursuant to a client's securities lending arrangement with

the client's custodian. The Adviser will refrain from voting such securities where the costs to the client and/or administrative inconvenience of retrieving securities then on loan outweighs the benefit of voting, assuming retrieval under such circumstances is even feasible and/or possible. In certain extraordinary situations, the Adviser may seek to have securities then on loan pursuant to such securities lending arrangements retrieved by the clients' custodians for voting purposes. This decision will generally be made on a case-by-case basis depending on whether, in the Adviser's judgment, the matter to be voted on has critical significance to the potential value of the securities in question, the relative cost and/or administrative inconvenience of retrieving the securities, the significance of the holding and whether the stock is considered a long-term holding. There can be no guarantee that any such securities can be retrieved for such purpose.

APPENDIX B - DESCRIPTION OF RATINGS

Bond Ratings

Below is a description of Standard & Poor's Ratings Group ("Standard & Poor's") and Moody's Investors Service, Inc. ("Moody's") bond rating categories.

Standard & Poor's Ratings **Group Corporate Bond Ratings**

AAA - This is the highest rating assigned by Standard & Poor's to a debt obligation and indicates an extremely strong capacity to pay principal and interest.

AA - Bonds rated "AA" also qualify as high-quality debt obligations. Capacity to pay principal and interest is very strong, and in the majority of instances they differ from "AAA" issues only in small degree.

A - Bonds rated "A" have a strong capacity to pay principal and interest, although they are somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than bonds in higher rated categories.

BBB - Bonds rated "BBB" are regarded as having an adequate capability to pay principal and interest. Whereas they normally exhibit adequate protection parameters, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity to pay principal and interest for bonds in this category than for bonds in higher rated categories.

BB - Bonds rated "BB" have less near-term vulnerability to default than other speculative issues. However, they face major ongoing uncertainties or exposure to adverse business, financial, or economic conditions which could lead to inadequate capacity to meet timely interest and principal payments.

B - Bonds rated "B" have a greater vulnerability to default but currently have the capacity to meet interest payments and principal repayments. Adverse business, financial, or economic conditions will likely impair capacity or willingness to pay interest and repay principal.

CCC - Bonds rated "CCC" have a currently identifiable vulnerability to default and are dependent upon favorable business, financial, and economic conditions to meet timely payment of interest and repayment of principal. In the event of adverse business, financial, or economic conditions, they are not likely to have the capacity to pay interest and repay principal.

Moody's Investors Service, Inc. **Corporate Bond Ratings**

Aaa - Bonds rate "Aaa" are judged to be of the best quality. They carry the smallest degree of investment risk and are generally referred to a "gilt-edged." Interest payments are protected by a large or by an exceptionally stable margin, and principal is secure. While the various protective elements are likely to change, such changes as can be visualized are most unlikely to impair the fundamentally strong position of such issues.

Aa - Bonds rate "Aa" are judged to be of high quality by all standards. Together with the Aaa group, they comprise what are generally known as high-grade bonds. They are rated lower than the best bonds because margins of protections may not be as large as in "Aaa" securities or fluctuation of protective elements may be of greater amplitude or there may be other elements present which make the long term risk appear somewhat larger than in Aaa securities.

A - Bonds rated “A” possess many favorable investment attributes, and are to be considered as upper medium grade obligations. Factors giving security principal and interest are considered adequate but elements may be present which suggest a susceptibility to impairment sometime in the future.

Baa - Bonds rated “Baa” are considered as medium grade obligations (*i.e.*, they are neither highly protected nor poorly secured). Interest payments and principal security appear adequate for the present but certain protective elements may be lacking or may be characteristically unreliable over any great length of time. Such bonds lack outstanding investment characteristics and in fact have speculative characteristics as well.

Ba - Bonds rated “Ba” are judged to have speculative elements. Their future cannot be considered as well assured. Often the protection of interest and principal payments may be very moderate and thereby not well safeguarded during both good and bad times over the future. Uncertainty of position characterizes bonds in this class.

B - Bonds rated “B” generally lack characteristics of the desirable investment. Assurance of interest and principal payments or maintenance of other terms of the contract over any longer period of time may be small.

Caa – Bonds rated “Caa” are of poor standing. Such issues may be in default or there may be present elements of danger with respect to principal or interest.
