Prospectus

June 30, 2020

KroneShares MSCI China ESG Leaders Index ETF

Ticker Symbol: **KESG**

Fund shares are not individually redeemable. Fund shares will be listed on NYSE Arca, Inc. ("Exchange").

These securities have not been approved or disapproved by the U.S. Securities and Exchange Commission ("SEC"), nor has the SEC passed upon the adequacy of this Prospectus. Any representation to the contrary is a criminal offense.

Beginning on January 1, 2021, as permitted by regulations adopted by the Securities and Exchange Commission, paper copies of the Fund's shareholder reports will no longer be sent by mail, unless you specifically request paper copies of the reports from the Fund (if you hold your Fund shares directly with the Fund) or from your financial intermediary, such as a broker-dealer or bank (if you hold your Fund shares through a financial intermediary). Instead, the reports will be made available on a website, and you will be notified by mail each time a report is posted and provided with a website link to access the report.

If you already elected to receive shareholder reports electronically, you will not be affected by this change and you need not take any action. If you hold your Fund shares directly with the Fund, you may elect to receive shareholder reports and other communications electronically from the Fund by contacting the Fund at 855-857-2638 or, if you hold your Fund shares through a financial intermediary, contacting your financial intermediary.

You may elect to receive all future reports in paper free of charge. If you hold your Fund shares directly with the Fund, you can inform the Fund that you wish to continue receiving paper copies of your shareholder reports at 855-857-2638 or, if you hold your Fund shares through a financial intermediary, contacting your financial intermediary. Your election to receive reports in paper will apply to all of the KroneShares Funds you hold directly with series of the Trust or through your financial intermediary, as applicable.

Fund Summary

KraneShares MSCI China ESG Leaders Index ETF

Investment Objective

The KraneShares MSCI China ESG Leaders Index ETF (the “Fund”) seeks to provide investment results that, before fees and expenses, correspond generally to the price and yield performance of a specific equity securities index. The Fund’s current index is the MSCI China ESG Leaders 10/40 Index (the “Underlying Index”).

Fees and Expenses of the Fund

The following table describes the fees and expenses you may pay if you buy and hold shares of the Fund. The table and Example below do not include the brokerage commissions or bid-ask spread that you may pay when purchasing or selling shares of the Fund.

Shareholder Fees (fees paid directly from your investment)	None
Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)	
Management Fees	0.58%
Distribution and/or Service (12b-1) Fees*	0.00%
Other Expenses**	0.01%
Total Annual Fund Operating Expenses.	0.59%

* Pursuant to a Distribution Plan, the Fund may bear a Rule 12b-1 fee not to exceed 0.25% per year of the Fund’s average daily net assets. However, no such fee is currently paid by the Fund, and the Board of Trustees has not currently approved the commencement of any payments under the Distribution Plan.

** Based on estimated amounts for the current fiscal year.

Example

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated. The Example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions, whether you do or do not sell your shares, your costs would be:

<u>1 Year</u>	<u>3 Years</u>
\$60	\$189

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in the Annual Fund Operating Expenses or in the Example, affect the Fund’s performance. Because the Fund had not commenced investment operations prior to its fiscal year ended March 31, 2020, it does not have portfolio turnover information for the prior fiscal year to report.

Fund Summary

KraneShares MSCI China ESG Leaders Index ETF

Principal Investment Strategies

Under normal circumstances, the Fund will invest at least 80% of its total assets in components of the Underlying Index, depository receipts, including American depository receipts, representing such components and securities underlying depository receipts in the Underlying Index. The Underlying Index is a modified, free float adjusted market capitalization weighted index (subject to the modifications below) designed to track the equity market performance of Chinese companies that have high environmental, social and governance (“ESG”) ratings relative to their sector peers, as determined by MSCI Inc., the provider of the Underlying Index (“Index Provider”). The securities eligible for inclusion in the Underlying Index include all types of publicly issued shares of Chinese issuers, such as A-Shares, B-Shares, H-Shares, P-Chips and Red Chips, which are described below. The issuers included in the Underlying Index may include small-cap, mid-cap and large-cap companies.

In determining the securities eligible for inclusion in the Underlying Index, the Index Provider uses three screens. First, the Index Provider rates companies within each industry depending on how well they manage ESG risks and opportunities facing the company, such as climate change, product liability, corporate governance and corporate behavior, relative to the company's industry peers. Second, the Index Provider conducts an assessment of controversies concerning the negative ESG impact of the company's operations, products and services. The evaluation framework used assessing controversies is designed to be consistent with international norms represented by the UN Declaration of Human Rights, the International Labor Organization Declaration on Fundamental Principles and Rights at Work, and the UN Global Compact. Third, the Index Provider identifies companies are involved in certain business activities, such as production of alcohol, tobacco and civilian firearms, gambling, nuclear power, and conventional and controversial weapons, with certain minimum business involvement for identification with such activities. Eligible securities in the Underlying Index must meet certain ratings in the first two screens and must not be identified as being involved in the excluded activities from the third screen. Securities that do not meet the criteria for either of the first two screens are excluded from the Underlying Index. The Underlying Index may include issuers in the following sectors: Consumer Discretionary, Financials, Industrials, Health Care, Communication Services, Real Estate, Utilities, Information Technology, Consumer Staples, Materials, and Energy. For each sector, the Index Provider ranks each eligible security and include securities with the highest ESG ratings representing 50% of the market capitalization in each sector, with a minimum cumulative sector coverage of 45%.

The Underlying Index is modified so that, as of the rebalance date, no issuer constitutes more than 10% of the Underlying Index and so that the cumulative weight of all components with a weight of over 5% does not exceed 40% of the Underlying Index (the “10/40 Constraint”).

The Fund may invest up to 20% of its assets in instruments that are not included in the Underlying Index, but that Krane believes will help the Fund track the Underlying Index. These investments are subject to the ESG screens and may include equity securities and depository receipts of issuers whose securities are not components of the Underlying Index, derivative instruments (including swaps, futures, forwards, structured notes and options), other investment companies (including exchange traded funds or “ETFs”) and cash or cash equivalents (including money market funds). The other investment companies in which the Fund may invest may be advised, sponsored or otherwise serviced by Krane and/or its affiliates. The Fund will not purchase shares of an investment company if it would cause the Fund to (i) own more than 3% of such investment company's voting shares; (ii) invest more than 5% of its total assets in such investment company; or (iii) invest more than 10% of its total assets in investment companies.

Fund Summary

KraneShares MSCI China ESG Leaders Index ETF

The following China-related securities may be included in the Underlying Index and/or represent investments of the Fund:

- China A-Shares, which are shares of companies incorporated in mainland China that are traded on the Chinese exchanges and denominated in domestic renminbi. China A-Shares are primarily purchased and sold in the domestic Chinese market. To the extent the Fund invests in China A-Shares, it expects to do so through the trading and clearing facilities of a participating exchange located outside of mainland China (“Stock Connect Programs”). A Renminbi Qualified Foreign Institutional Investor (“RQFII”) or Qualified Foreign Institutional Investor (“QFII”) license may also be acquired to invest directly in China A-Shares.
- China B Shares, which are shares of companies listed on the Shanghai or Shenzhen Stock Exchange but quoted and traded in foreign currencies (such as Hong Kong Dollars or U.S. Dollars), which were primarily created for trading by foreign investors.
- China H Shares, which are shares of companies incorporated in mainland China and listed on the Hong Kong Stock Exchange (“H-Shares”), where they are traded in Hong Kong dollars and may be traded by foreign investors.
- China N Shares, which are shares of companies with business operations in mainland China and listed on an American stock exchange, such as NYSE or NASDAQ (“N-Shares”).
- P-Chips, which are shares of private sector companies with a majority of their business operations in mainland China and controlling private Chinese shareholders, which are incorporated outside of mainland China and traded on the Hong Kong Stock Exchange in Hong Kong dollars.
- Red Chips, which are shares of companies with a majority of their business operations in mainland China and controlled by the central, provincial or municipal governments of the PRC, whose shares are traded on the Hong Kong Stock Exchange in Hong Kong dollars.
- S-Chips, which are shares of companies with business operations in mainland China and listed on the Singapore Exchange. S-Chip shares are issued by companies incorporated anywhere, but many are registered in Singapore, the British Virgin Islands, the Cayman Islands, or Bermuda.

Although the Fund reserves the right to replicate (or hold all components of) the Underlying Index, the Fund expects to use representative sampling to track the Underlying Index. “Representative sampling” is a strategy that involves investing in a representative sample of securities that collectively have an investment profile similar to the Underlying Index.

As of April 30, 2020, the Underlying Index included 135 securities of companies with a market capitalization range of approximately \$523 million to \$542 billion and had an average market capitalization of approximately \$17 billion. The Underlying Index is rebalanced quarterly.

Fund Summary

KraneShares MSCI China ESG Leaders Index ETF

The Fund is non-diversified. To the extent the Underlying Index is concentrated in a particular industry, the Fund is expected to be concentrated in that industry. As of April 30, 2020, issuers in the Consumer Discretionary sector (23.9%), Financials sector (16.13%) and Industrials sector (13.56%) each represented a significant portion of the Underlying Index.

The Fund may engage in securities lending.

Principal Risks

As with all ETFs, a shareholder of the Fund is subject to the risk that his or her investment could lose money. The Fund may not achieve its investment objective and an investment in the Fund is not by itself a complete or balanced investment program. An investment in the Fund is not a deposit with a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. An investment in the Fund involves the risk of total loss. In addition to these risks, the Fund is subject to a number of additional principal risks that may affect the value of its shares, including:

China Risk – General. The Chinese economy is generally considered an emerging market and can be significantly affected by economic and political conditions in China and surrounding Asian countries. In addition, the Chinese economy is export-driven and highly reliant on trade. A downturn in the economies of China's primary trading partners could slow or eliminate the growth of the Chinese economy and adversely impact the Fund's investments. The Chinese government strictly regulates the payment of foreign currency denominated obligations and sets monetary policy. The Chinese government may introduce new laws and regulations that could have an adverse effect on the Fund. Although China has begun the process of privatizing certain sectors of its economy, privatized entities may lose money and/or be re-nationalized.

In the Chinese securities markets, a small number of issuers may represent a large portion of the entire market. The Chinese securities markets are subject to more frequent trading halts, low trading volume and price volatility. Further, the Chinese economy is heavily dependent upon trading with key partners. Recent developments in relations between the United States and China have heightened concerns of increased tariffs and restrictions on trade between the two countries. An increase in tariffs or trade restrictions, or even the threat of such developments, could lead to a significant reduction in international trade, which could have a negative impact on China's export industry and a commensurately negative impact on the Fund.

In recent years, Chinese entities have incurred significant levels of debt and Chinese financial institutions currently hold relatively large amounts of non-performing debt. Thus, there exists a possibility that widespread defaults could occur, which could trigger a financial crisis, freeze Chinese debt and finance markets and make Chinese securities illiquid.

In addition, trade relations between the U.S. and China have recently been strained. Worsening trade relations between the two countries could adversely impact the Fund, particularly to the extent that the Chinese government restricts foreign investments in on-shore Chinese companies or the U.S. government restricts investments by U.S. investors in China. Worsening trade relations may also result in market volatility and volatility in the price of Fund shares.

Tax Risk. Per a circular (Caishui [2014] 79), the Fund is temporarily exempt from the Chinese tax on capital gains on trading in A-Shares as a QFII or RQFII or the Shanghai Stock Exchange through the Shanghai-Hong Kong Stock Connect as of November 17, 2014, and the Shenzhen Stock Exchange through the Shenzhen-Hong Kong Stock Connect as of December 5, 2016. There is no indication as to how long the temporary exemption will remain in effect. Accordingly, the Fund

Fund Summary

KraneShares MSCI China ESG Leaders Index ETF

may be subject to such taxes in the future. In addition, there is uncertainty as to the application and implementation of China's value added tax to the Fund's activities. The Fund reserves the right to establish a reserve for taxes which present uncertainty as to whether they will be assessed, although it currently does not do so. If the Fund establishes such a reserve but is not ultimately subject to these taxes, shareholders who redeemed or sold their shares while the reserve was in place will effectively bear the tax and may not benefit from the later release, if any, of the reserve. Conversely, if the Fund does not establish such a reserve but ultimately is subject to the tax, shareholders who redeemed or sold their shares prior to the tax being withheld, reserved or paid will have effectively avoided the tax. Investors should note that such provision, if any, may be excessive or inadequate to meet actual tax liabilities (which could include interest and penalties) on the Fund's investments. Any taxes imposed in connection with the Fund's activities will be borne by the Fund. As a result, investors may be advantaged or disadvantaged depending on the final rules of the relevant tax authorities.

Hong Kong Risk. The economy of Hong Kong has few natural resources and any fluctuation or shortage in the commodity markets could have a significant adverse effect on the Hong Kong economy. Hong Kong is also heavily dependent on international trade and finance. Additionally, the continuation and success of the current political, economic, legal and social policies of Hong Kong is dependent on and subject to the control of the Chinese government.

China Equity Investing Risks.

A-Shares Risk. A-Shares are issued by companies incorporated in mainland China and are traded on Chinese exchanges. Investments in A-Shares are made available to domestic Chinese investors and certain foreign investors, including those who have been approved as a QFII or a RQFII and through the Stock Connect Programs, which currently include the Shanghai-Hong Kong Stock Connect, Shenzhen-Hong Kong Stock Connect, Shanghai-London Stock Connect, and China-Japan Stock Connect. Investments by foreign investors in A-Shares are subject to various restrictions, regulations and limits. The Fund currently intends to gain exposure to A-Shares through the Stock Connect Programs. The Fund may also gain exposure to A-Shares by investing in investments that provide exposure to A-Shares, such as other investment companies, or Krane may acquire a QFII or RQFII license to invest in A-Shares for the Fund. Investments in A-Shares are heavily regulated and the recoupment and repatriation of assets invested in A-Shares is subject to restrictions by the Chinese government. A-Shares may be subject to frequent and widespread trading halts and may become illiquid. This could cause volatility in the Fund's share price and subject the Fund to a greater risk of trading halts.

Stock Connect Program Risk. The Stock Connect Programs are subject to daily and aggregate quota limitations, and an investor cannot purchase and sell the same security on the same trading day, which may restrict the Fund's ability to invest in A-Shares through the Programs and to enter into or exit trades on a timely basis. The Shanghai and Shenzhen markets may be open at a time when the participating exchanges located outside of mainland China are not active, with the result that prices of A-Shares may fluctuate at times when the Fund is unable to add to or exit its positions. Only certain China A-Shares are eligible to be accessed through the Stock Connect Programs. Such securities may lose their eligibility at any time, in which case they could be sold but could no longer be purchased through the Stock Connect Programs. Because the Stock Connect Programs are still evolving, the actual effect on the market for trading A-Shares with the introduction of large numbers of foreign investors is still relatively unknown. Further, regulations or restrictions, such as limitations on redemptions or suspension of trading, may adversely impact the program. There is no guarantee that the participating exchanges will continue to support the Stock Connect Programs in the future.

Fund Summary

KraneShares MSCI China ESG Leaders Index ETF

Investments in China A-Shares may not be covered by the securities investor protection programs of either exchange and, without the protection of such programs, will be subject to the risk of default by the broker. Because of the way in which China A-Shares are held in the Stock Connect Programs, the Fund may not be able to exercise the rights of a shareholder and may be limited in its ability to pursue claims against the issuer of a security, and may suffer losses in the event the depository of the Chinese exchange becomes insolvent.

B-Shares Risk. The China B-Share market is generally smaller, less liquid and has a smaller issuer base than the China A-Share market. The issuers that compose the B-Share market include a broad range of companies, including companies with large, medium and small capitalizations. Further, the B-Shares market may behave very differently from other portions of the Chinese equity markets, and there may be little to no correlation between the performance of the two.

H-Shares Risk. H-Shares are foreign securities which, in addition to the risks described herein, are subject to the risk that the Hong Kong stock market may behave very differently from the mainland Chinese stock market. There may be little to no correlation between the performance of the Hong Kong stock market and the mainland Chinese stock market.

N-Shares Risk. N-Shares are securities of companies with business operations in mainland China and listed on an American stock exchange, such as the NYSE or NASDAQ. Because companies issuing N-Shares have business operations in China, they are subject to certain political and economic risks in China. The American stock market may behave very differently from the mainland Chinese stock market, and there may be little to no correlation between the performance of the two.

P-Chip Companies Risk. P-Chip companies are often run by the private sector and have a majority of their business operations in mainland China. P-Chip shares are traded in Hong Kong dollars on the Hong Kong Stock Exchange, and may also be traded by foreigners. Because they are traded on the Hong Kong Stock Exchange, P-Chips are also subject to risks similar to those associated with investments in H Shares. They are also subject to risks affecting their jurisdiction of incorporation, including any legal or tax changes.

Red Chip Companies Risk. Red Chip companies are controlled, either directly or indirectly, by the central, provincial or municipal governments of the PRC. Red Chip shares are traded in Hong Kong dollars on the Hong Kong Stock Exchange and may also be traded by foreigners. Because Red Chip companies are controlled by various PRC governmental authorities, investing in Red Chips involves risks that political changes, social instability, regulatory uncertainty, adverse diplomatic developments, asset expropriation or nationalization, or confiscatory taxation could adversely affect the performance of Red Chip companies. Red Chip companies may be less efficiently run and less profitable than other companies.

S-Chip Companies Risk. The Fund may invest in shares of companies with business operations in mainland China and listed on the Singapore Exchange ("S-Chips"). S-Chip shares are issued by companies incorporated anywhere, but many are registered in Singapore, the British Virgin Islands, the Cayman Islands, or Bermuda. They are subject to risks affecting their jurisdiction of incorporation, including any legal or tax changes. S-Chip companies may or may not be owned at least in part by a Chinese central, provincial or municipal government and be subject to the types of risks that come with such ownership described herein. There may be little or no correlation between the performance of the Singapore stock market and the mainland Chinese stock market.

Fund Summary

KraneShares MSCI China ESG Leaders Index ETF

China Risk – Onshore Investing Risks.

Custody Risks. In accordance with Chinese regulations and the terms of a QFII or RQFII license, as applicable, and insofar as Krane acquires a QFII or RQFII license, A-Shares will be held in the joint names of the Fund and Krane. While Krane may not use such an account for any purpose other than for maintaining the Fund's assets, the Fund's assets may not be as well protected as they would be if it were possible for them to be registered and held solely in the name of the Fund. There is a risk that creditors of Krane may assert that the securities are owned by Krane and that regulatory actions taken against Krane may affect the Fund. The risk is particularly acute in the case of cash deposited with a People's Republic of China ("PRC") sub-custodian ("PRC Custodian") because it may not be segregated, and it may be treated as a debt owing from the PRC Custodian to the Fund as a depositor. Thus, in the event of a PRC Custodian bankruptcy, liquidation, or similar event, the Fund may face difficulties and/or encounter delays in recovering its cash.

Capital Controls Risk. Economic conditions, such as volatile currency exchange rates and interest rates, political events and other conditions may, without prior warning, lead to intervention by government actors and the imposition of "capital controls." Capital controls include the prohibition of, or restrictions on, the ability to transfer currency, securities or other assets. Levies may be placed on profits repatriated by foreign entities (such as the Fund). Although the RMB is not presently freely convertible, rather it is subject to the approval of the State Administration of Foreign Exchange ("SAFE") and other relevant authorities, repatriations by RQFIIs or through the Stock Connect Programs are currently permitted daily and Chinese authorities have indicated their plans to move to a fully freely convertible RMB. There is no assurance, however, that repatriation restrictions will not be (re-)imposed in the future.

Equity Securities Risk. The values of equity securities are subject to factors such as market fluctuations, changes in interest rates and perceived trends in stock prices. Equity securities may be more volatile than other asset classes and are generally subordinate in rank to debt and other securities of the same issuer.

Emerging Markets Risk. The Fund's investments in emerging markets are subject to greater risk of loss than investments in developed markets. This is due to, among other things, greater market volatility, greater risk of asset seizures and capital controls, lower trading volume, political and economic instability, greater risk of market shutdown, and more governmental limitations on foreign investments than typically found in developed markets. The economies of emerging markets, and China in particular, may be heavily reliant upon international trade and may suffer disproportionately if international trading declines or is disrupted.

Foreign Securities Risk. Investments in securities of non-U.S. issuers may be less liquid than investments in U.S. issuers, may have less governmental regulation and oversight, and are typically subject to different investor protection standards than U.S. issuers. Investments in non-U.S. securities entail the risk of loss due to foreign currency fluctuations and political or economic instability. Foreign market trading hours, clearance and settlement procedures, and holiday schedules may limit the Fund's ability to buy and sell securities. These factors could result in a loss to the Fund.

Geographic Focus Risk. The Fund's investments are expected to be focused in a particular country, countries, or region to the same extent as the Underlying Index and therefore the Fund may be susceptible to adverse market, political, regulatory, and geographic events affecting that country, countries or region. Such geographic focus also may subject the Fund to a higher degree of volatility than a more geographically diversified fund.

Fund Summary

KraneShares MSCI China ESG Leaders Index ETF

Currency Risk. The Fund's net asset value ("NAV") is determined on the basis of the U.S. dollar, therefore, the Fund may lose value if the local currency of a foreign market depreciates against the U.S. dollar, even if the local currency value of the Fund's holdings goes up. Currency exchange rates can be very volatile and can change quickly and unpredictably, which may adversely affect the Fund. The Fund may also be subject to delays in converting or transferring U.S. dollars to foreign currencies for the purpose of purchasing portfolio investments. This may hinder the Fund's performance, including because any delay could result in the Fund missing an investment opportunity and purchasing securities at a higher price than originally intended, or incurring cash drag.

Non-Diversified Fund Risk. Because the Fund is non-diversified and may invest a greater portion of its assets in fewer issuers than a diversified fund, changes in the market value of a single portfolio holding could cause greater fluctuations in the Fund's share price than would occur in a diversified fund. This may increase the Fund's volatility and cause the performance of a single portfolio holding or a relatively small number of portfolio holdings to have a greater impact on the Fund's performance.

ETF Risk. As an ETF, the Fund is subject to the following risks:

Authorized Participants Concentration Risk. The Fund has a limited number of financial institutions that may act as Authorized Participants. To the extent they cannot or are otherwise unwilling to engage in creation and redemption transactions with the Fund and no other Authorized Participant steps in, shares of the Fund may trade like closed-end fund shares at a significant discount to NAV and may face delisting from the Exchange.

Cash Transactions Risk. Like other ETFs, the Fund sells and redeems its shares only in large blocks called Creation Units and only to "Authorized Participants." Unlike many other ETFs, however, the Fund expects to effect its creations and redemptions at least partially or fully for cash, rather than in-kind securities. Thus, an investment in the Fund may be less tax-efficient than an investment in other ETFs as the Fund may recognize a capital gain that it could have avoided by making redemptions in-kind. As a result, the Fund may pay out higher capital gains distributions than ETFs that redeem in-kind. Further, paying redemption proceeds in cash rather than through in-kind delivery of portfolio securities may require the Fund to dispose of or sell portfolio investments to obtain the cash needed to distribute redemption proceeds at an inopportune time.

International Closed Market Trading Risk. Because substantially all of the Fund's investments trade in markets that are closed when the Fund and Exchange are open, there are likely to be deviations between current pricing of an underlying security and stale pricing, resulting in the Fund trading at a discount or premium to NAV greater than those incurred by other ETFs.

Premium/Discount Risk. There may be times when the market price of the Fund's shares is more than the NAV intra-day (at a premium) or less than the NAV intra-day (at a discount). As a result, shareholders of the Fund may pay more than NAV when purchasing shares and receive less than NAV when selling Fund shares. This risk is heightened in times of market volatility or periods of steep market declines. In such market conditions, market or stop loss orders to sell Fund shares may be executed at prices well below NAV.

Secondary Market Trading Risk. Investors buying or selling shares in the secondary market will normally pay brokerage commissions, which are often a fixed amount and may be a significant proportional cost for investors buying or selling relatively small amounts of shares. Secondary market trading is subject to bid-ask spreads and trading in Fund shares may be halted by the Exchange because of market conditions or other reasons. If a trading halt occurs, a shareholder may temporarily

Fund Summary

KraneShares MSCI China ESG Leaders Index ETF

be unable to purchase or sell shares of the Fund. In addition, although the Fund's shares are listed on the Exchange, there can be no assurance that an active trading market for shares will develop or be maintained or that the Fund's shares will continue to be listed.

Small Fund Risk. The Fund is small and does not yet have a significant number of shares outstanding. Small funds are at greater risk than larger funds of wider bid-ask spreads for its shares, trading at a greater premium or discount to NAV, liquidation and/or a stop to trading.

New Fund Risk. The Fund is new and does not yet have shares outstanding. If the Fund does not grow large in size once it commences trading, it will be at greater risk than larger funds of wider bid-ask spreads for its shares, trading at a greater premium or discount to NAV, liquidation and/or a trading halt.

Liquidity Risk. The Fund's investments are subject to liquidity risk, which exists when an investment is or becomes difficult to purchase or sell at a reasonable time and price. If a transaction is particularly large or if the relevant market is or becomes illiquid, it may not be possible to initiate a transaction or liquidate a position, which may cause the Fund to suffer significant losses and difficulties in meeting redemptions. If a number of securities held by the Fund stop trading, it may have a cascading effect and cause the Fund to halt trading. Volatility in market prices will increase the risk of the Fund being subject to a trading halt. The Chinese markets may be subject to extended settlement delays and/or foreign holidays, during which the Fund will unlikely be able to convert holdings to cash.

ESG Risk. Issuers with businesses with high ESG ratings may be difficult to identify and investments in them may be volatile. Even companies with high ESG ratings may not necessarily compare favorably with respect to the ESG practices of other issuers. The ESG investment strategy limits the types and number of investment opportunities available and, as a result, the strategy may underperform other strategies that do not have an ESG focus. The ESG investment strategy may result in the Fund's investing in securities or industry sectors that underperform the market as a whole or underperform other funds screened for ESG standards. Investing based on ESG criteria is qualitative and subjective by nature and there is no guarantee that the criteria used by the Fund will reflect the beliefs or values of any particular investor.

Small- and Mid-Capitalization Company Risk. Investing in the securities of small and medium capitalization companies involves greater risk and the possibility of greater price volatility than investing in larger capitalization companies. Since small and medium-sized companies may have limited operating histories, product lines and financial resources, the securities of these companies may be less liquid and more volatile. They may also be sensitive to (expected) changes in interest rates and earnings.

Large Capitalization Company Risk. Large capitalization companies may be unable to respond quickly to new competitive challenges and attain the high growth rate of successful smaller companies, especially during extended periods of economic expansion. As such, returns on investments in stocks of large capitalization companies could trail the returns on investments in stocks of small and mid capitalization companies.

Passive Investment Risk. There is no guarantee that the Underlying Index will create the desired exposure and the Fund is not actively managed. It does not seek to "beat" the Underlying Index or take temporary defensive positions when markets decline. Therefore, the Fund may purchase or hold securities with current or projected underperformance.

Fund Summary

KraneShares MSCI China ESG Leaders Index ETF

Management Risk. The Fund may not fully replicate the Underlying Index and may hold less than the total number of securities in the Underlying Index. Therefore, the Fund is subject to the risk that Krane's security selection process may not produce the intended results.

Tracking Error Risk. The Fund's return may not match or achieve a high degree of correlation with the return of the Underlying Index. This may be due to, among other factors, the Fund holding cash under certain circumstances in lieu of Underlying Index securities, such as when the Fund is subject to delays converting U.S. dollars into a foreign currency to purchase foreign securities and unable to invest in certain components of the Underlying Index due to regulatory constraints, trading suspensions, and legal restrictions imposed by foreign governments. To the extent that the Fund employs a representative sampling strategy or calculates its NAV based on fair value prices and the value of the Underlying Index is based on securities' closing prices on local foreign markets, the Fund's ability to track the Underlying Index may be adversely affected.

Market Risk. The values of the Fund's holdings could decline generally or could underperform other investments. In addition, there is a risk that policy changes by the U.S. Government, Federal Reserve, and/or other government actors could cause volatility in global financial markets, negative sentiment and higher levels of Fund redemptions, which could have a negative impact on the Fund and could result in losses. Geopolitical and other risks, including environmental and public health risks may add to instability in world economies and markets generally. Changes in value may be temporary or may last for extended periods. Further, the Fund is susceptible to the risk that certain investments may be difficult or impossible to sell at a favorable time or price. Market developments may also cause the Fund's investments to become less liquid and subject to erratic price movements. Such market developments may also cause the Fund to encounter difficulties in timely honoring redemptions, especially if market events cause an increased incidence of shareholder redemptions.

High Portfolio Turnover Risk. The Fund may incur high portfolio turnover rates, which may increase the Fund's brokerage commission costs and negatively impact the Fund's performance. Such portfolio turnover also may generate net short-term capital gains.

Valuation Risk. Independent market quotations for certain investments held by the Fund may not be readily available, and such investments may be fair valued or valued by a pricing service at an evaluated price. These valuations involve subjectivity and different market participants may assign different prices to the same investment. As a result, there is a risk that the Fund may not be able to sell an investment at the price assigned to the investment by the Fund. In addition, the securities in which the Fund invests may trade on days that the Fund does not price its shares; as a result, the value of Fund shares may change on days when investors cannot purchase or sell their Fund holdings.

Tax Risk. In order to qualify for the favorable tax treatment available to regulated investment companies, the Fund must satisfy certain income, asset diversification and distribution requirements each year. The Fund's investments in issuers whose control persons are not certain creates a risk that tax authorities may retrospectively deem the Fund to have failed the asset diversification requirements. If the Fund were to fail the favorable tax treatment requirements, it would be taxed in the same manner as an ordinary corporation, which would adversely affect its performance.

Depository Receipts Risk. The Fund may hold the securities of foreign companies in the form of depository receipts, including American Depository Receipts and Global Depository Receipts. Investing in depository receipts entails the risks associated with foreign investments, such as

Fund Summary

KraneShares MSCI China ESG Leaders Index ETF

fluctuations in foreign currency exchange rates and political and economic risks distinct from those associated with investing in the securities of U.S. issuers. In addition, the value of the securities underlying the depositary receipts may change materially when the U.S. markets are not open for trading, which will affect the value of the depositary receipts.

Derivatives Risk. The use of derivatives (including swaps, futures, forwards, structured notes and options) involve risks, such as possible default by a counterparty, potential losses if markets do not move as expected, and the potential for greater losses than if these techniques had not been used. Investments in derivatives may expose the Fund to leverage, which may cause the Fund to be more volatile than if it had not been leveraged. By investing in derivatives, the Fund could lose more than the amount it invests; some derivatives can have the potential for unlimited loss. Derivatives may also be subject to valuation risk, which is the risk that valuation sources for the derivative will not be readily available in the market which is especially possible in times of market distress, during which market participants may be reluctant to purchase complex instruments or provide price quotes for them. In addition, derivatives can be difficult or impossible to sell at the time of and at the price desired by the seller.

Investments in Investment Companies Risk. The Fund may invest in other investment companies, including those that are advised, sponsored or otherwise serviced by Krane and/or its affiliates. The Fund will indirectly be exposed to the risks of investments by such funds and will incur its pro rata share of the underlying fund's expenses. Additionally, investments in ETFs are subject to ETF Risk. Krane is subject to conflicts of interest in allocating Fund assets to investment companies that are advised, sponsored or otherwise serviced by Krane and/or its affiliates. To the extent that the Fund invests in investment companies or other pooled investment vehicles that are not registered pursuant to the 1940 Act, including foreign investment companies, it will not enjoy the protections of the U.S. law.

Securities Lending Risk. To the extent the Fund lends its securities, it may be subject to the following risks: (1) the securities in which the collateral is invested may not perform sufficiently to cover the return collateral payments owed to borrowers; (2) delays may occur in the recovery of securities from borrowers, which could interfere with the Fund's ability to vote proxies or to settle transactions; and (3) although borrowers of the Fund's securities typically provide collateral in the form of cash that is reinvested in securities, there is the risk of possible loss of rights in the collateral should the borrower fail financially.

Cash and Cash Equivalents Risk. The Fund may hold cash or cash equivalents. Generally, such positions offer less potential for gain than other investments. This is particularly true when the market for other investments in which the Fund may invest is rapidly rising. If the Fund holds cash uninvested it will be subject to the credit risk of the depositing institution holding the cash.

Performance Information

Once the Fund has completed a full calendar year of operations, a bar chart and table will be included in this Prospectus that will provide some indication of the risks of investing in the Fund by showing the variability of the Fund's return based on net assets and comparing the variability of the Fund's return to a broad measure of market performance. Once available, the Fund's current performance information will be available at www.kraneshares.com. Past performance does not necessarily indicate how the Fund will perform in the future.

Fund Summary

KraneShares MSCI China ESG Leaders Index ETF

Management

Investment Adviser

Krane Funds Advisors, LLC serves as the investment adviser to the Fund.

Portfolio Managers

James Maund, Head of Capital Markets at the Adviser, has served as lead portfolio manager for the Fund since its inception in 2020. Jonathan Shelon, Chief Operating Officer of the Adviser, also serves as a portfolio manager of the Fund. Mr. Shelon supports Mr. Maund and Krane's investment team for the Fund and has been a portfolio manager of the Fund since its inception in 2020.

Purchase and Sale of Fund Shares

Shares may be purchased and redeemed from the Fund only in "Creation Units" of 50,000 shares, or multiples thereof. As a practical matter, only institutions and large investors, such as market makers or other large broker-dealers, purchase or redeem Creation Units. Most investors will buy and sell shares of the Fund on the Exchange. Individual shares can be bought and sold throughout the trading day like other publicly traded securities through a broker-dealer on the Exchange. These transactions do not involve the Fund. The price of an individual Fund share is based on market prices, which may be different from its NAV. As a result, the Fund's shares may trade at a price greater than the NAV (at a premium) or less than the NAV (at a discount). Most investors will incur customary brokerage commissions and charges when buying or selling shares of the Fund through a broker-dealer.

Tax Information

Fund distributions are generally taxable as ordinary income, qualified dividend income or capital gains (or a combination), unless your investment is in an IRA or other tax-advantaged retirement account, which may be taxable upon withdrawal.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase Fund shares through a broker-dealer or other financial intermediary (such as a bank), the Fund and its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your sales person to recommend the Fund over another investment. Ask your sales person or visit your financial intermediary's website for more information.

Additional Information About the Fund

The policy described in this Prospectus, including the Fund's investment objective and 80% policy, with the exception of its concentration policy, which is described in further detail in the SAI, is a non-fundamental policy that may be changed by the Board of Trustees of the Trust without shareholder approval, but the Fund will provide 60 days' prior written notice to shareholders (if it has any) of any change in its 80% policy. Certain fundamental policies of the Fund are set forth in the SAI.

The Fund seeks to have a tracking error relative to the performance of its Underlying Index of less than five percent on an annualized basis.

Underlying Index

The Underlying Index is a modified, free float adjusted market capitalization weighted index (subject to the modifications below) designed to track the equity market performance of Chinese companies that have high ESG ratings relative to their sector peers, as determined by the Index Provider. The securities eligible for inclusion in the Underlying Index include all types of publicly issued shares of Chinese issuers, such as A-Shares, B-Shares, H-Shares, P-Chips and Red Chips. The issuers included in the Underlying Index may include small-cap, mid-cap and large-cap companies.

The Underlying Index is modified so that, as of the rebalance date, no issuer constitutes more than 10% of the Underlying Index and so that the cumulative weight of all components with a weight of over 5% does not exceed 40% of the Underlying Index (the "10/40 Constraint").

The securities eligible for inclusion in the Underlying Index include all types of publicly issued shares of Chinese issuers, such as A-Shares, B-Shares, H-Shares, P-Chips and Red Chips.

As of April 30, 2020, the Underlying Index included 135 securities of companies with a market capitalization range of approximately \$523 million to \$542 billion and had an average market capitalization of approximately \$17 billion. The Underlying Index is rebalanced quarterly.

To the extent the Underlying Index is concentrated in a particular industry, the Fund is expected to be concentrated in that industry. As of April 30, 2020, issuers in the Consumer Discretionary sector (23.9%), Financials sector (16.13%) and Industrials sector (13.56%) each represented a significant portion of the Underlying Index.

The Underlying Index is rebalanced quarterly. The Underlying Index is provided by MSCI Inc. (the "Index Provider") and constituent selection will be based on data provided by MSCI ESG Research. The Index Provider is not affiliated with the Fund or Krane Funds Advisors, LLC ("Krane" or "Adviser"). The Index Provider determines the components and the relative weightings of the component securities in the Underlying Index. Additional information about the Underlying Index is available on the Index Provider's website, www.msci.com.

Principal Risks

The following section provides additional information regarding certain of the risks of investing in the Fund. An investment in the Fund is not a deposit with a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. An investment in the Fund involves a risk of a total loss. There is no guarantee that the Fund will meet its investment objective.

Additional Information About the Fund

Cash and Cash Equivalents Risk. The Fund may hold cash or cash equivalents. Generally, such positions offer less potential for gain than other investments. Holding cash or cash equivalents, even strategically, may lead to missed investment opportunities. This is particularly true when the market for other investments in which the Fund may invest is rapidly rising. If the Fund holds cash uninvested it will be subject to the credit risk of the depositing institution holding the cash.

China Risk – General. The economy of China (“China” or the “PRC”) differs, sometimes unfavorably, from the U.S. economy in such respects as structure, general development, government involvement, wealth distribution, rate of inflation, growth rate, allocation of resources and capital reinvestment, among others. Under China’s political and economic system, the central government has historically exercised substantial control over virtually every sector of the Chinese economy through administrative regulation and/or state ownership. For example, the Chinese government has from time to time taken actions that influence the prices at which certain goods may be sold, encourage companies to invest or concentrate in particular industries, induce mergers between companies in certain industries and induce private companies to publicly offer their securities to increase or continue the rate of economic growth, control the rate of inflation or otherwise regulate economic expansion. It may do so in the future as well. Such actions and a variety of other centrally planned or determined activities by the Chinese government could have a significant adverse effect on economic conditions in China, the economic prospects for, and the market prices and liquidity of, the securities of Chinese companies and the payments of dividends and interest by Chinese companies.

During the last 30 years, the Chinese government has reformed its economic policies, which has resulted in less direct central and local government control over the business and production activities of Chinese enterprises and companies. Notwithstanding the economic reforms instituted by the Chinese government and the Chinese Communist Party, actions of the Chinese central and local government authorities continue to have a substantial effect on economic conditions in China, which could affect the public and private sector companies in which the Fund invests. The Chinese government may also change course and exercise greater central and local government control over Chinese firms.

In certain cases where China has begun a process of privatization of certain entities and industries, investors in newly privatized entities have suffered losses due to the inability of the newly privatized entities to adjust quickly to a competition environment or changing regulatory and legal standards, or in some cases, due to re-nationalization of such privatized entities. There is no assurance that such losses will not recur.

Export growth continues to be a major driver of China’s rapid economic growth. Reduction in spending on Chinese products and services, institution of tariffs or other trade barriers, or a downturn in any of the economies of China’s key trading partners may have an adverse impact on the Chinese economy. The Chinese economy is particularly dependent upon trading with key partners, such as the United States, Japan, South Korea and countries in the European Union. Recent developments in relations between the United States and China have heightened concerns of increased tariffs and restrictions on trade between the two countries. An increase in tariffs or trade restrictions, or even the threat of such developments, could lead to a significant reduction in international trade, which could have a negative impact on China’s export industry and a commensurately negative impact on the Fund.

In recent years, Chinese entities have incurred significant levels of debt and Chinese financial institutions currently hold relatively large amounts of non-performing debt. Thus, there exists a possibility that widespread defaults could occur, which could trigger a financial crisis, freeze Chinese debt and finance markets and make Chinese securities illiquid.

Additional Information About the Fund

Inflation Risk. Economic growth in China has historically been accompanied by periods of inflation. Beginning in 2004, the Chinese government commenced the implementation of various measures to control inflation, which included the tightening of the money supply, the raising of interest rates and more stringent control over certain industries. If inflation were to increase, the performance of the Chinese economy and the Fund's investments could be negatively impacted.

Nationalization and Expropriation Risk. Expropriation, including nationalization, confiscatory taxation, political, economic or social instability or other developments could adversely affect and significantly diminish the values of the Chinese companies in which the Fund invests. There can be no assurance that the Chinese government will not nationalize or expropriate assets in its territory or over which it otherwise has control. An investment in the Fund involves a risk of a total loss.

Moreover, the Chinese government limits foreign investment in the securities of Chinese issuers entirely. These restrictions or limitations may have adverse effects on the liquidity and performance of the Fund holdings as compared to the performance of the Underlying Index. This may increase the risk of tracking error and the Fund may not be able to achieve its investment objective.

Currency Risk. The government of China has historically maintained strict currency controls in order to achieve economic, trade and political objectives and regularly intervened in the currency market. In this regard, the Chinese government has placed strict regulation on the yuan and Hong Kong dollar and manages the yuan and Hong Kong dollar so that they have historically traded in a tight range relative to the U.S. dollar. The Chinese government has been under pressure to manage the currency in a less restrictive fashion so that it is less correlated to the U.S. dollar.

Since 2005, the exchange rate of the RMB is no longer strictly pegged to the U.S. dollar. The RMB has now moved to a managed floating exchange rate based on market supply and demand with reference to a basket of foreign currencies. The daily trading price of the RMB against other major currencies in the inter-bank foreign exchange market is allowed to float within a narrow band around the central parity published by the People's Bank of China. As the exchange rates may be based on market forces, the exchange rates for RMB against other currencies, including the U.S. dollar, are susceptible to movements based on external factors. Of course, there can be no guarantee that this will continue, or that the yuan or the Hong Kong dollar will move in relation to the U.S. dollar as expected. There can be no assurance that the RMB will not be subject to devaluation. Any devaluation of the RMB is expected to adversely affect the value of the Fund's investments.

Available Disclosure About Chinese Issuers Risk. Disclosure and regulatory standards in emerging market countries, such as China, are in many respects less stringent than U.S. standards. There is substantially less publicly available information about Chinese issuers than there is about U.S. issuers. Therefore, disclosure of certain material information may not be made, and less information may be available to the Fund and other investors than would be the case if the Fund's investments were restricted to securities of U.S. issuers. Chinese issuers are subject to accounting, auditing and financial standards and requirements that differ, in some cases significantly, from those applicable to U.S. issuers. In particular, the assets and profits appearing on the financial statements of a Chinese issuer may not reflect its financial position or results of operations in the way they would be reflected had such financial statements been prepared in accordance with U.S. Generally Accepted Accounting Principles.

Additional Information About the Fund

Such conditions may lead to potential errors in index data, index computation and/or index construction and may limit the ability to oversee the index provider's due diligence process over index data, which may adversely impact the Fund's performance and its ability to track the performance of the Underlying Index.

Chinese Corporate and Securities Law Risk. The Fund's rights with respect to its investments in China, if any, generally will not be governed by U.S. law, but rather by Chinese law. China operates under a civil law system. It is based on statutes enacted by various state bodies with authority over economic matters such as foreign investment, company organization and governance, taxation and trade. These laws are relatively recent with published court opinions based on them being limited. Further, court precedent is not binding. Thus, there is uncertainty regarding the implementation of existing law. In addition, laws pertaining to bankruptcy proceedings are generally less developed and may be different than such laws in the United States and lead to unpredictable results.

Legal principles relating to corporate affairs and the validity of corporate procedures, directors' fiduciary duties and liabilities and stockholders' rights often differ from those that may apply in the United States and other countries. In particular, Chinese laws providing protection to investors, such as laws regarding the fiduciary duties of officers and directors, are undeveloped and will not provide investors, such as the Fund, with protection in all situations where protection would be provided by comparable law in the United States. It may therefore be difficult for the Fund to enforce its rights as an investor under Chinese corporate and securities laws, and it may be difficult or impossible for the Fund to obtain a judgment in court. Moreover, as Chinese corporate and securities laws continue to develop, these developments may adversely affect foreign investors, such as the Fund.

Chinese Securities Markets Risk. China's securities markets, including the debt markets, have a limited operating history and are not as developed as those in the United States. These markets, historically, have had greater volatility than markets in the United States and some other countries, and experienced inefficiency and pricing anomalies. There is relatively less regulation and monitoring of Chinese securities markets and of the activities of investors, brokers and other participants than in the United States, including with respect to insider trading, tender offers, stockholder proxies and disclosure of information. Stock markets in China are in the process of change and further development. This may lead to additional volatility, difficulty in the settlement and recording of transactions and difficulty in interpreting and applying the relevant regulations.

Political and Economic Risk. The Chinese government continues to be an active participant in many economic sectors through ownership positions and regulation. The majority of productive assets in China are still owned by the PRC government at various levels. The allocation of resources in China is subject to a high level of government control. The Chinese government strictly regulates the payment of foreign currency denominated obligations and sets monetary policy. Through its policies, the government may provide preferential treatment to particular industries or companies. The policies set by the government could have a substantial effect on the Chinese economy and the Fund's investments.

For more than 30 years, the PRC government has carried out economic reforms to achieve decentralization and utilization of market forces to develop the economy of the PRC. These reforms have resulted in significant economic growth and social progress, but growth has been uneven both geographically and among various sectors of the economy. Economic growth has also been accompanied by periods of inflation. The PRC government has implemented various measures from time to time to control inflation and restrain the rate of economic growth.

Additional Information About the Fund

Although reforms over the last 30 years have generally been regarded as successful, there can be no assurance that the PRC government will continue to pursue such economic policies or, if it does, that those policies will continue to be successful or will not otherwise have a negative effect on the Fund. Any such adjustment and modification of those economic policies may have an adverse impact on the securities market of Chinese issuers. Further, the PRC government may from time to time adopt corrective measures to control the growth of the PRC economy which may also have an adverse impact on the capital growth and performance of the Fund.

Political changes, social instability and adverse diplomatic developments in the PRC could result in the imposition of additional government restrictions including expropriation of assets, confiscatory taxes or nationalization of some or all of the property held by Chinese issuers. Internal social unrest or confrontations with other neighboring countries, including military conflicts in response to such events, may also disrupt economic development in China and result in a greater risk of currency fluctuations, currency convertibility, interest rate fluctuations and higher rates of inflation.

In addition, trade relations between the U.S. and China have recently been strained. Worsening trade relations between the two countries could adversely impact the Fund, particularly to the extent that the Chinese government restricts foreign investments in on-shore Chinese companies or the U.S. government restricts investments by U.S. investors in China. Worsening trade relations may also result in market volatility and volatility in the price of Fund shares.

Hong Kong Risk. As part of Hong Kong's transition from British to Chinese sovereignty in 1997, China agreed to allow Hong Kong to maintain a high degree of autonomy with regard to its political, legal and economic systems for a period of at least 50 years. China controls matters that relate to defense and foreign affairs. Under the agreement, China does not tax Hong Kong, does not limit the exchange of the Hong Kong dollar for foreign currencies and does not place restrictions on free trade in Hong Kong. However, there is no guarantee that China will continue to honor the agreement and China may change its policies regarding Hong Kong in the future. Any such change may adversely affect market conditions and the performance of Chinese and Hong Kong issuers and, thus, the value of securities in the Fund's portfolio. The economy of Hong Kong has few natural resources and any fluctuation or shortage in the commodity markets could have a significant adverse effect on the Hong Kong economy. Hong Kong is also heavily dependent on international trade and finance. Additionally, the continuation and success of the current political, economic, legal and social policies of Hong Kong is dependent on and subject to the control of the Chinese government.

Tax Risk. Per a circular (Caishui [2014] 79), the Fund is temporarily exempt from the Chinese tax on capital gains on trading in A-Shares as a QFII or RQFII or the Shanghai Stock Exchange through the Shanghai-Hong Kong Stock Connect as of November 17, 2014, and the Shenzhen Stock Exchange through the Shenzhen-Hong Kong Stock Connect as of December 5, 2016. There is no indication as to how long the temporary exemption will remain in effect. Accordingly, the Fund may be subject to such taxes in the future. In addition, there is uncertainty as to the application and implementation of China's value added tax to the Fund's activities. The Fund reserves the right to establish a reserve for taxes which present uncertainty as to whether they will be assessed, although it currently does not do so. If the Fund establishes such a reserve but is not ultimately subject to these taxes, shareholders who redeemed or sold their shares while the reserve was in place will effectively bear the tax and may not benefit from the later release, if any, of the reserve. Conversely, if the Fund does not establish such a reserve but ultimately is subject to the tax, shareholders who redeemed or sold their shares prior to the tax being withheld, reserved or paid will have effectively avoided the tax. Investors should note that such provision, if any, may be excessive or inadequate to

Additional Information About the Fund

meet actual tax liabilities (which could include interest and penalties) on the Fund's investments. Any taxes imposed in connection with the Fund's activities will be borne by the Fund. As a result, investors may be advantaged or disadvantaged depending on the final rules of the relevant tax authorities.

China Risk – Onshore Investing Risks. Because the Fund may invest in the local China markets directly (also referred to herein as domestic Chinese markets or securities or onshore Chinese markets or securities), it will be subject to the following special risks:

Capital Controls Risk. RMB can be categorized into “CNY” (onshore RMB) traded in the PRC and “CNH” (offshore RMB) traded outside the PRC. CNY and CNH are traded at different exchange rates and their exchange rates may not move in the same direction. Although there has been a growing amount of RMB held offshore, CNH cannot be freely remitted into the PRC and is subject to certain restrictions, and vice versa. The Fund may be adversely affected by the exchange rates between CNY and CNH.

CNY is currently not a freely convertible currency as it is subject to foreign exchange control, fiscal policies and repatriation restrictions imposed by the Chinese government. The PRC government imposes restrictions on the remittance of RMB out of and into China. In the event a remittance by the Fund is disrupted, the Fund could be adversely affected and, among other matters, may not be able to invest those funds, which may increase the tracking error of the Fund. In addition, any delay in repatriation of RMB out of China may result in delay in payment of redemption proceeds to redeeming investors. The Chinese government's policies on exchange control and repatriation restrictions are subject to change, and such control of currency conversions and movements in the RMB exchange rates may adversely affect the operations and financial results of PRC companies and the Fund. If such control policies change in the future, the Fund may be adversely affected.

Economic conditions, such as volatile currency exchange rates and interest rates, political events and other conditions may, without prior warning, lead to intervention by Chinese government authorities and the imposition of “capital controls.” Capital controls include the prohibition of, or restrictions on, the ability to transfer currency, securities or other assets into, out of or into the country. Levies may be placed on profits repatriated by foreign entities (such as the Fund). Capital controls may impact the ability of the Fund to buy, sell or otherwise transfer securities or currency, adversely affect the trading market and price for shares of the Fund, and cause the Fund to decline in value.

The Chinese government also heavily regulates the domestic exchange of foreign currencies within China. Chinese law requires that all domestic transactions must be settled in RMB, places significant restrictions on the remittance of foreign currency and strictly regulates currency exchange from RMB. Under State Administration of Foreign Exchange (“SAFE”) regulations, Chinese corporations may only purchase foreign currencies through government approved banks. In general, Chinese companies must receive approval from or register with the Chinese government before investing in certain capital account items, including direct investments and loans, and must thereafter maintain separate foreign exchange accounts for the capital items. Foreign investors may only exchange foreign currencies at specially authorized banks after complying with documentation requirements. These restrictions may adversely affect the Fund and its investments. The PRC government may impose additional or other currency capital controls that could significant harm the Fund.

Custody Risk. The Fund is required by Chinese regulation to have a local custodian in China (“PRC Custodian”) for its investments in domestic, onshore Chinese securities, including A-Shares and mainland Chinese debt (also referred to herein as RMB Bonds). The PRC Custodian maintains the

Additional Information About the Fund

Fund's investments in China to ensure their compliance with the rules and regulations of the China Securities Regulatory Commission ("CSRC") and the People's Bank of China. Such investments, when purchased by Krane or the Fund's sub-adviser, as applicable, in its capacity as the Fund's RQFII or QFII, as applicable, will normally be received in a securities account maintained by the PRC Custodian in the joint names of the Fund and Krane or the sub-adviser, as applicable. The account may not be used for any other purpose than for maintaining the Fund's assets. However, given that the securities trading account will be maintained in the joint names of Krane or the sub-adviser, as applicable, and the Fund, the Fund's assets may not be as well protected as they would be if it were possible for them to be registered and held solely in the name of the Fund. In particular, there is a risk that creditors of Krane or the sub-adviser, as applicable, may assert that the securities are owned by Krane or the sub-adviser, as applicable, and not the Fund, and that a court would uphold such an assertion, in which case such creditors could seize assets. Because the Fund's PRC securities quota may be in the name of both Krane or the sub-adviser, as applicable, and the Fund, there is also a risk that regulatory actions taken against Krane or the sub-adviser, as applicable, by PRC government authorities may affect the Fund. This is particularly acute in the case of cash deposited with the PRC Custodian because it may not be segregated, and it may be treated as a debt owing from the PRC Custodian to the Fund as a depositor. Thus, in the event of a PRC Custodian bankruptcy, liquidation, or similar event, the Fund may face difficulties and/or encounter delays in recovering its cash.

RQFII and QFII Risk. A RQFII or QFII license and quota may be acquired to invest directly in domestic, onshore Chinese securities. To qualify for a QFII license, an applicant must meet strict requirements on asset management experience, assets under management, and firm capital. The Fund's investments may be limited to the quota obtained by Krane or a Fund's sub-adviser, as applicable, in its capacity as a RQFII or QFII on behalf of the Fund. A reduction in or elimination of the quota may have a material adverse effect on the ability of the Fund to achieve its investment objective. On September 10, 2019, the PRC government announced that it would scrap QFII and RQFII quotas, meaning that entities registered with the appropriate Chinese regulator will no longer be subject to quotas when investing in PRC securities (but will remain subject to foreign shareholder limits). It is currently unclear when this change will take effect.

The RQFII rules continue to evolve. The RQFII program is substantially similar to the QFII program, but provides for greater flexibility in repatriating assets, as discussed below. Chinese regulators may revise or discontinue the RQFII program at any time. There is no guarantee that the CSRC will ultimately grant or enlarge the quota allowed to a RQFII or QFII licensee, and the application process may take a significant amount of time. Should the amount of securities that the Fund is eligible to invest in be or become inadequate to meet its investment needs, it may not be able to gain sufficient exposure to the Underlying Index and the Fund may need to rely exclusively on investments through other channels, such as Stock Connect Programs or Bond Connect Program (for equities) and the CIBM Program (for fixed income securities), which may be insufficient to meet its needs.

Repatriations by RQFIIs are currently permitted daily and are not subject to repatriation restrictions or prior regulatory approval. However, there is no assurance that PRC rules and regulations will not change or that repatriation restrictions will not be imposed in the future. Further, such changes to the PRC rules and regulations may be applied retroactively. If a QFII license is obtained and used, all repatriations of gains and income would require the approval of SAFE. These limitations may also prevent the Fund from making certain distributions to shareholders. Further, no single underlying foreign investor investing through a QFII may hold more than 10% of the total outstanding shares in

Additional Information About the Fund

one listed company and all foreign investors investing through QFIs may not hold, in aggregate, more than 30% of the total outstanding shares in one listed company. Such limits may not apply where foreign investors make strategic investment in listed companies in accordance with the Measures for the Administration of Strategic Investments in Listed Companies by Foreign Investors.

If the Fund invests directly in domestic Chinese securities with a QFI license, Krane and/or the Fund's sub-adviser, as applicable, will be required to transfer the entire investment principal for the quota into a local sub-custodian account within such time period as specified by SAFE (up to six months). Following this, investment capital will be subject to an initial lock-up period (currently three months if the Fund is deemed to be an "open end fund" under Chinese regulations), during which the assets may not be repatriated to the United States, even if they are never invested. Following that time, investment principal and earnings may generally only be repatriated with the approval of SAFE, although up to \$50 million may be repatriated each week without SAFE approval if the Fund is deemed to be an "open end fund" under Chinese regulations.

China Equity Investing Risks.

A-Shares Risk. The ability of the Fund to invest in China A-Shares is dependent, in part, on the availability of A-Shares either through the trading and clearing facilities of a participating exchange located outside of mainland China ("Stock Connect Programs") which currently include the Shanghai-Hong Kong Stock Connect, Shenzhen-Hong Kong Stock Connect, Shanghai-London Stock Connect, and China-Japan Stock Connect, and/or through a QFI or RQFI license and quota allocation from the Chinese regulator. Thus, the Fund's investment in A-Shares will be limited by the A-Shares quota obtained by the RQFI or QFI licensee and allocated to the Fund and by the amount of A-Shares available through the Stock Connect Programs. On September 10, 2019, the PRC government announced that it would scrap QFI and RQFI quotas, meaning that entities registered with the appropriate Chinese regulator will no longer be subject to quotas when investing in PRC securities (but will remain subject to foreign shareholder limits). It is currently unclear when this change will take effect. Investments in A-Shares are heavily regulated and the recoupment and repatriation of assets invested in A-Shares is subject to restrictions by the Chinese government.

Currently, there are two stock exchanges in mainland China, the Shanghai and Shenzhen Stock Exchanges. The Shanghai and Shenzhen Stock Exchanges are supervised by the CSRC and are highly automated with trading and settlement executed electronically. The Shanghai and Shenzhen Stock Exchanges are substantially smaller, less liquid and more volatile than the securities markets in the United States.

The Shanghai Stock Exchange commenced trading on December 19, 1990, and the Shenzhen Stock Exchange commenced trading on July 3, 1991. The Shanghai and Shenzhen Stock Exchanges divide listed shares into two classes: A-Shares and B shares. Companies whose shares are traded on the Shanghai and Shenzhen Stock Exchanges that are incorporated in mainland China may issue both A-Shares and B-Shares. In China, the A-Shares and B-Shares of an issuer may only trade on one exchange. A-Shares and B-Shares may both be listed on either the Shanghai or Shenzhen Stock Exchanges. Both classes represent an ownership interest comparable to a share of common stock. A-Shares are traded on the Shanghai and Shenzhen Stock Exchanges in RMB. A-Shares may be subject to more frequent and/or extended trading halts than other exchange-traded securities and may become illiquid. The A-Shares market may behave very differently from other Chinese equity markets, and there may be little to no correlation between them.

Additional Information About the Fund

Restrictions continue to exist on investments in A-Shares and capital therefore cannot flow freely into the A-Share market, making it possible that, in the event of a market disruption, the liquidity of the A-Share market and trading prices of A-Shares could be more severely affected than the liquidity and trading prices of markets where securities are freely tradable and capital therefore flows more freely. The Fund cannot predict the nature or duration of such a market disruption or the impact that it may have on the A-Share market and the short-term and long-term prospects of its investments in the A-Share market.

The Chinese government has in the past taken actions that benefitted holders of A-Shares. As A-Shares become more available to foreign investors, such as the Fund, the Chinese government may be less likely to take action that would benefit holders of A-Shares. In addition, there is no guarantee that a QFII or RQFII licensee will continue to maintain its existing A-Share quota or be able to obtain additional A-Share quota if the A-Share quota is reduced or eliminated by SAFE or if a QFII or RQFII license is revoked by CSRC at some point in the future. The Fund cannot predict what would occur if the A-Share quota were reduced or eliminated or if a QFII or RQFII license were to be revoked, although such an occurrence could likely have a material adverse effect on the Fund. On September 10, 2019, the PRC government announced that it would scrap QFII and RQFII quotas, meaning that entities registered with the appropriate Chinese regulator will no longer be subject to quotas when investing in PRC securities (but will remain subject to foreign shareholder limits). It is currently unclear when this change will take effect.

Repatriations by RQFIIs for investors such as registered funds are permitted daily and are not subject to lockup periods. There is no assurance, however, that PRC rules and regulations will not change or that repatriation restrictions will not be imposed in the future. Any restrictions on repatriation of the Fund's assets may adversely affect the Fund's ability to meet redemption requests and/or may cause the Fund to borrow money in order to meet its obligations. These limitations may also prevent a Fund from making certain distributions to shareholders.

If the Fund is unable to obtain sufficient exposure to the components of its Underlying Index, the Fund could seek exposure to the component securities of the Underlying Index in other ways, such as by investing in depositary receipts of the component securities and Hong Kong listed versions of the component securities. Consistent with its exemptive relief, the Fund may, to a limited extent, where applicable, also invest in B-Shares issued by the same companies that issue A-Shares that are in the Underlying Index. The A-Shares market may behave very differently from the B-Shares market, and there may be little to no correlation between the performances of the two. The Fund may also use derivatives or invest in ETFs that can obtain comparable exposures. If necessary, the Fund may limit or suspend purchases of Creation Units of the Fund until the Fund determines that the requisite exposure to the Underlying Index is obtainable. During the period that creations are limited or suspended, the Fund could trade at a significant premium or discount to the NAV and could experience substantial redemptions. Alternatively, the Fund could change its investment objective by, for example, seeking to track an alternative index that does not include A-Shares as component securities, or decide to liquidate the Fund. In circumstances beyond the control of the Fund, the Fund may incur significant losses due to limited investment capabilities, including based on investment objectives or strategies, due to investment restrictions on RQFIIs and QFIIs licenses, illiquidity of the securities markets, or delay or disruption in execution or settlement of trades. Should the A-Share quota allocated for the Fund's use be or become inadequate to meet the investment needs of the Fund and the Fund cannot invest in them through the Stock Connect Programs, the Fund is expected to be adversely affected.

Additional Information About the Fund

The Chinese government limits foreign investment in the securities of Chinese issuers entirely. China may also impose higher local tax rates on transactions involving certain companies. These restrictions or limitations may have adverse effects on the liquidity and performance of the Fund holdings as compared to the performance of the Underlying Index. This may increase the risk of tracking error and the Fund may not be able to achieve its investment objective.

Per a circular (Caishui [2014] 79), the Fund is temporarily exempt from the Chinese tax on capital gains (“CGT”) on trading in A-Shares as a QFII or RQFII on the Shanghai Stock Exchange through the Shanghai-Hong Kong Stock Connect as of November 17, 2014, and the Shenzhen Stock Exchange through the Shenzhen-Hong Kong Stock Connect as of December 5, 2016. There is no indication as to how long the temporary exemption will remain in effect. Accordingly, the Fund may be subject to such taxes in the future. In addition, there is uncertainty as to the application and implementation of China’s value added tax to the Fund’s activities. As a result, investors may be advantaged or disadvantaged depending on the final rules of the relevant tax authorities.

Investors should note that such provision may be excessive or inadequate to meet actual CGT tax liabilities (which could include interest and penalties) on the Fund’s investments. As a result, investors may be advantaged or disadvantaged depending on the final rules of the relevant tax authorities.

It is also unclear how China’s value added tax may apply to the activities of a participant in the Stock Connect Programs or QFII or RQFII licensee and how such application may be affected by tax treaty provisions. If such a tax is collected, the expense will be passed on and borne by the Fund. The imposition of such taxes, as well as future changes in applicable PRC tax law, may adversely affect the Fund.

The Fund reserves the right to establish a reserve for any taxes as to which it is uncertain whether they will be assessed, although it has not currently done so. If the Fund establishes such a reserve but is not ultimately subject to the tax, shareholders who redeemed or sold their shares while the reserve was in place will effectively bear the tax and may not benefit from the later release, if any, of the reserve. Conversely, if the Fund does not establish such a reserve but ultimately is subject to the tax, shareholders who redeemed or sold their shares prior to the tax being withheld, reserved or paid will have effectively avoided the tax, even if they benefited from the trading that precipitated the Fund’s payment of it. The Fund is responsible for any taxes on its operations or investments, including if they are applied retroactively.

In addition, urban maintenance and construction tax (currently at the rate ranging from 1% to 7%), educational surcharges (currently at the rate of 3%) and local educational surcharges (currently at the rate of 2%) are imposed based on the business tax liabilities.

Disclosure of Interests and Short Swing Profit Rule. The Fund may be subject to regulations promulgated by the CSRC, which currently require the Fund to make certain public disclosures when the Fund and parties acting in concert with the Fund acquire 5% or more of the issued securities of a listed company (which include A-Shares of the listed company). The relevant PRC regulations presumptively treat all affiliated investors and investors under common control as parties acting in concert. As such, the Fund may be deemed as a “concert party” of other funds managed by Krane, a sub-adviser, if applicable, or their affiliates and therefore may be subject to the risk that the Fund’s holdings may be required to be reported in the aggregate with the holdings of such other funds should the aggregate holdings trigger the reporting threshold under the PRC law. If the 5% shareholding threshold is triggered, the Fund would be required to file its report within three days.

Additional Information About the Fund

During the time limit for filing the report, a trading freeze applies and the Fund would not be permitted to make subsequent trades in the invested company's securities. Any such trading freeze may impair the ability of the Fund to achieve its investment objective and undermine the Fund's performance.

Further, subject to the interpretation of PRC courts and PRC regulators, the operation of the PRC short swing profit rule may prevent the Fund from reducing its holdings in a PRC company within six months of the last purchase of shares of the company if the Fund's holding in that company exceeds the threshold prescribed by the relevant exchange on which the PRC company's shares are listed. The Fund could be subject to these restrictions even though an entity deemed to be an affiliate (and not the Fund) may have triggered the restrictions. Nonetheless, if the Fund violates the rule, it may be required by the listed company to return any profits realized from such trading to the company. In addition, the Fund could not repurchase securities of the listed company within six months of such sale. Finally, under PRC civil procedures, the Fund's assets may be frozen to the extent of the claims made by the company in question.

PRC Broker Risk. Currently, only a limited number of brokers are available to trade A-Shares with the Fund. As a result, Krane or a sub-adviser will have limited flexibility to choose among brokers on behalf of the Fund than is typically the case for investment advisers. If Krane or a sub-adviser is unable to use a particular broker in the PRC, the operation of the Fund may be adversely affected. Further, the operation of the Fund may be adversely affected in case of any acts or omissions of the PRC broker, which may result in higher tracking error or the Fund being traded at a significant premium or discount to its NAV. If a single PRC broker is appointed, the Fund may not necessarily pay the lowest commission available in the market. There is also a risk that the Fund may suffer losses from the default, bankruptcy or disqualification of the PRC broker. Krane or a sub-adviser, however, in its selection of PRC brokers will consider such factors as the competitiveness of PRC brokers' commission rates, size of the relevant orders, and execution standards.

B-Shares Risk. The B-Share market is generally smaller, less liquid and has a smaller issuer base than the A Share market. The issuers that compose the B-Share market include a broad range of companies, including companies with large, medium and small capitalizations. The B Shares market may behave very differently from other portions of the Chinese equity markets, and there may be little to no correlation between their performance.

H-Shares Risk. The Fund may invest in shares of companies incorporated in mainland China and listed on the Hong Kong Stock Exchange ("H-Shares"). H-Shares are traded in Hong Kong dollars on the Hong Kong Stock Exchange, and must meet Hong Kong's listing and disclosure requirements. H-Shares may be traded by foreigners and can be used to gain exposure to Chinese securities. Because they are traded on the Hong Kong Stock Exchange, H-Shares involve a number of risks not typically associated with investing in countries with more democratic governments or more established economies or securities markets. Such risks may include the risk of nationalization or expropriation; greater social, economic and political uncertainty; increased competition from Asia's low-cost emerging economies; currency exchange rate fluctuations; higher rates of inflation; controls on foreign investment and limitations on repatriation of invested capital; and greater governmental involvement in and control over the economy. Fluctuations in the value of the Hong Kong dollar will affect the Fund's holdings of H-Shares. The Hong Kong stock market may behave very differently from the domestic Chinese stock market and there may be little to no correlation between the performance of the Hong Kong stock market and the domestic Chinese stock market.

Additional Information About the Fund

N-Shares Risk. The Fund may invest in shares of companies with business operations in mainland China and listed on an American stock exchange, such as the NYSE or NASDAQ (“N-Shares”). N-Shares are traded in U.S. dollars. N-Shares are issued by companies incorporated anywhere, but many are registered in Bermuda, the Cayman Islands, the British Virgin Islands, or the United States. Because companies issuing N-Shares have business operations in China, they are subject to certain political and economic risks in China.

P-Chip Companies Risk. The Fund may invest in shares of companies with controlling private Chinese shareholders that are incorporated outside mainland China and listed on the Hong Kong Stock Exchange (“P-Chips”). These businesses are largely run by the private sector and have a majority of their business operations in mainland China. P-Chip shares are traded in Hong Kong dollars on the Hong Kong Stock Exchange, and may also be traded by foreigners. Because they are traded on the Hong Kong Stock Exchange, P-Chips are also subject to risks similar to those associated with investments in H-Shares. They are also subject to risks affecting their jurisdiction of incorporation, including any legal or tax changes. Private Chinese companies may be more indebted, more susceptible to adverse changes in the economy, subject to asset seizures and nationalization, and negative political or legal developments.

Red Chip Companies Risk. The Fund may invest in shares of companies with controlling Chinese government shareholders that are incorporated outside mainland China, have a majority of their business operations in mainland China, and listed on the Hong Kong Stock Exchange (“Red Chips”). These businesses are controlled, either directly or indirectly, by the central, provincial or municipal governments of the PRC. Red Chip shares are traded in Hong Kong dollars on the Hong Kong Stock Exchange, may also be traded by foreigners and are subject to risks similar to those of H-Shares. Because Red Chip companies are controlled by various PRC governmental authorities, investing in Red Chips involves risks that political changes, social instability, regulatory uncertainty, adverse diplomatic developments, asset expropriation or nationalization, or confiscatory taxation could adversely affect the performance of Red Chip companies. Red Chip companies may be less efficiently run and less profitable than other companies. They are also subject to risks affecting their jurisdiction of incorporation, including any legal or tax changes.

S-Chip Companies Risk. The Fund may invest in shares of companies with business operations in mainland China and listed on the Singapore Exchange (“S-Chips”). S-Chip shares are issued by companies incorporated anywhere, but many are registered in Singapore, the British Virgin Islands, the Cayman Islands, or Bermuda. They are subject to risks affecting their jurisdiction of incorporation, including any legal or tax changes. S-Chip companies may or may not be owned at least in part by a Chinese central, provincial or municipal government and be subject to the types of risks that come with such ownership described herein. There may be little or no correlation between the performance of the Singapore stock market and the mainland Chinese stock market.

Stock Connect Program Risk. The Stock Connect Programs are subject to daily and aggregate quota limitations, and an investor cannot purchase and sell the same security on the same trading day, which may restrict the Fund’s ability to invest in A-Shares through the Stock Connect Programs and to enter into or exit trades on a timely basis. The Shanghai and Shenzhen markets may be open at a time when the participating exchanges located outside of mainland China are not active, with the result that prices of A-Shares may fluctuate at times when the Fund is unable to add to or exit its position. Only certain A-Shares are eligible to be accessed through the Stock Connect Programs. Such securities may lose their eligibility at any time, in which case they may no longer be able to be purchased or sold through the Stock Connect Programs. Because the Stock Connect Programs

Additional Information About the Fund

are still evolving, the actual effect on the market for trading A-Shares with the introduction of large numbers of foreign investors is still relatively unknown. In addition, there is no assurance that the necessary systems required to operate the Stock Connect Programs will function properly or will continue to be adapted to changes and developments in both markets. In the event that the relevant systems do not function properly, trading through the Stock Connect Programs could be disrupted. The Stock Connect Programs are subject to regulations promulgated by regulatory authorities for both exchanges and further regulations or restrictions, such as limitations on redemptions or suspension of trading, may adversely impact the Stock Connect Programs, if the authorities believe it necessary to assure orderly markets or for other reasons. There is no guarantee that the participating exchanges will continue to support the Stock Connect Programs in the future. Each of the foregoing could restrict the Fund from selling its investments, adversely affect the value of its holdings and negatively affect the Fund's ability to meet shareholder redemptions.

Investments in China A-Shares may not be covered by the securities investor protection programs of the exchanges and, without the protection of such programs, will be subject to risk of default by the broker. Because of the way in which A-Shares are held in the Stock Connect Programs, the Fund may not be able to exercise the rights of a shareholder and may be limited in its ability to pursue claims against the issuer of a security, and may suffer losses in the event the depository of the Shanghai or Shenzhen Stock Exchange becomes insolvent. Given that all trades through the Stock Connect Programs must be settled in RMB, investors must have timely access to a reliable supply of offshore RMB, which cannot be guaranteed.

Currency Risk. The Fund's NAV is determined on the basis of the U.S. dollar and, therefore, the Fund may lose value if the local currency of a foreign market to which the Fund is exposed depreciates against the U.S. dollar, even if the local currency value of the Fund's holdings goes up. The Fund's assets will be invested in the securities of foreign issuers and the income received by the Fund may be in foreign currencies. The Fund will compute and expects to distribute its income in U.S. dollars, and the computation of income will be made on the date that the income is earned by the Fund at the foreign exchange rate in effect on that date. Any gain or loss attributable to fluctuations in exchange rates between the time the Fund accrues income or gain and the time the Fund converts such income or gain from a foreign currency to the dollar is generally treated as ordinary income or loss. Therefore, if the value of a foreign currency increases relative to the U.S. dollar between the accrual of income and the time at which the Fund converts the foreign currency to U.S. dollars, the Fund will recognize ordinary income upon conversion. In such circumstances, if the Fund has insufficient cash in U.S. dollars to meet distribution requirements under the Internal Revenue Code of 1986, as amended (the "Code"), the Fund may be required to liquidate certain positions in order to make distributions. The liquidation of investments, if required, may also have an adverse impact on the Fund's performance. Furthermore, the Fund may incur costs in connection with conversions between U.S. dollars and foreign currencies. Foreign exchange dealers realize a profit based on the difference between the prices at which they are buying and selling various currencies. Thus, a dealer normally will offer to sell a foreign currency to the Fund at one rate, while offering a lesser rate of exchange should the Fund desire immediately to resell that currency to the dealer.

The Fund will conduct its foreign currency exchange transactions either on a spot (*i.e.*, cash) basis at the spot rate prevailing in the foreign currency exchange market, or through forward, futures or options contracts to purchase or sell foreign currencies. The use of currency transactions could result in the Fund's incurring losses as a result of the imposition of exchange controls, exchange rate regulation, suspension of settlements or the inability to deliver or receive a specified currency. Delays

Additional Information About the Fund

in converting or transferring U.S. dollars to foreign currencies for the purpose of purchasing foreign securities could leave the Fund with uninvested cash, may hinder the Fund's performance, including because any delay could result in the Fund missing an investment opportunity and purchasing securities at a higher price than originally intended, or incurring cash drag. Delays in converting or transferring foreign currencies to U.S. dollars could also inhibit the Fund's ability to meet shareholder redemptions or make distributions.

Depository Receipts Risk. The Fund may hold the securities of foreign companies in the form of depository receipts, including American Depository Receipts ("ADRs") and Global Depository Receipts. Investing in depository receipts entails additional risks associated with foreign investments. The underlying securities of the depository receipts in the Fund's portfolio are subject to fluctuations in foreign currency exchange rates that may affect the value of the Fund's portfolio. In addition, the value of the securities underlying the depository receipts may change materially when the U.S. markets are not open for trading, which will affect the value of the depository receipts. Like direct investments in foreign securities, investments in depository receipts involve political and economic risks distinct from those associated with investing in the securities of U.S. issuers.

ADRs are U.S. dollar-denominated receipts representing shares of foreign-based corporations. ADRs are issued by U.S. banks or trust companies, and entitle the holder to all dividends and capital gains that are paid out on the underlying foreign shares. Investment in ADRs may be less liquid than the underlying shares in their primary trading market. "Sponsored" depository receipts are established jointly by a depository and the underlying issuer, whereas "unsponsored" depository receipts may be established by a depository without participation by the underlying issuer. Holders of an unsponsored depository receipt generally bear all the costs associated with establishing the unsponsored depository receipt. In addition, the issuers of the securities underlying unsponsored depository receipts are not obligated to disclose material information in the United States and, therefore, there may be less information available regarding such issuers and there may not be a correlation between such information and the market value of the depository receipts.

Depository receipts may also be unregistered and unlisted, and may be purchased in the public markets or restricted securities that can be offered and sold only to "qualified institutional buyers" under Rule 144A of the Securities Act of 1933, as amended (the "Securities Act"). If a particular investment in such ADRs becomes illiquid, that investment will be included within the Fund's limitation on investment in illiquid securities. Moreover, if adverse market conditions were to develop during the period between the Fund's decision to sell these types of ADRs and the point at which the Fund is permitted or able to sell such security, the Fund might obtain a price less favorable than the price that prevailed when it decided to sell or may be unable to sell it at all.

Derivatives Risk. Derivatives are financial instruments, such as swaps, futures, forwards, structured notes and options, whose values are based on the value of one or more reference assets, such as a security, asset, currency, interest rate or index. Derivatives involve risks different from, and possibly greater than, the risks associated with investing directly in securities and other more traditional investments. For example, derivatives involve the risk of mispricing or improper valuation and the risk that changes in the value of a derivative may not correlate perfectly with the reference asset(s). Derivative transactions can create investment leverage, which implicates risks greater than those associated with investing directly in a reference asset, because a small investment in a derivative can result in a large impact on the Fund and may cause the Fund to be more volatile.

Additional Information About the Fund

Many derivative transactions are entered into “over-the-counter” (not on an exchange or contract market); as a result, the value of such a derivative transaction will depend on the ability and the willingness of the Fund’s counterparty to perform its obligations under the transaction. If a counterparty were to default on its obligations, the Fund’s contractual remedies against such counterparty may be subject to bankruptcy and insolvency laws, which could affect the Fund’s rights as a creditor (e.g., the Fund may not receive the net amount of payments that it is contractually entitled to receive). A liquid secondary market may not always exist for the Fund’s derivative positions at any time. If a derivative transaction is centrally cleared, it will be subject to the rules of the clearing exchange and subject to risks associated with the exchange.

Derivatives can be illiquid and imperfectly correlate with the reference asset(s), resulting in unexpected returns that could materially adversely affect the Fund. Some derivatives can have the potential for unlimited loss. Many derivatives are subject to segregation requirements, pursuant to which the Fund must segregate the market or notional value of the derivatives and which could impede the portfolio management of the Fund. It is possible that developments in the derivatives market, including ongoing or potential government regulation, could adversely affect the Fund’s ability to enter into new derivatives agreements, terminate existing derivative agreements or to realize amounts to be received under such instruments.

Counterparty Risk. Because many derivatives are an obligation of the counterparty rather than a direct investment in the reference asset, the Fund may suffer losses potentially equal to, or greater than, the full value of the derivative if the counterparty fails to perform its obligations under the derivative agreement as a result of bankruptcy or otherwise. Any loss would result in a reduction in the NAV of the Fund and will likely impair the Fund’s ability to achieve its investment objective. The counterparty risk associated with the Fund’s investments may be greater than other funds because there are only a limited number of counterparties that are willing and able to enter into certain derivatives, such as swaps on onshore Chinese securities. If there are only a few potential counterparties, the Fund, subject to applicable law, may enter into swap transactions with as few as one counterparty at any time.

Forward Currency Contracts Risk. A forward foreign currency contract involves a negotiated obligation to purchase or sell a specific currency at a future date (with or without delivery required), which may be any fixed number of days from the date of the contract agreed upon by the parties, at a price set at the time of the contract. Forward foreign currency contracts are not traded on exchanges; rather, a bank or dealer will act as agent or as principal in order to make or take future delivery, exposing the Fund to counterparty risk.

Futures Risk. In addition to the above, risks associated with the use of futures contracts include the following: (i) an imperfect correlation between movements in prices of futures contracts and movements in the value of the reference asset(s) it is designed to simulate; and (ii) the possibility of an illiquid secondary market for a futures contract and the resulting inability to close a position prior to its maturity date. When the Fund purchases or sells a futures contract, it is subject to daily variation margin calls that could be substantial. If the Fund has insufficient cash to meet daily variation margin requirements, it might need to sell securities at a time when such sales are disadvantageous.

Leveraging Risk. The Fund’s investment in derivative instruments provide leveraged exposure. The Fund’s investment in these instruments generally requires a small investment relative to the amount of investment exposure assumed. As a result, such investments may give rise to losses that

Additional Information About the Fund

exceed the amount invested in those instruments. The use of derivatives may expose the Fund to potentially dramatic losses (or gains) in the value of a derivative or other financial instrument and, thus, in the value the Fund's portfolio. The cost of investing in such instruments generally increases as interest rates increase, which will lower the Fund's return.

Swaps Risk. To the extent the Fund invests in swaps, it will be subject to the risk that the number of counterparties able to enter into swaps to provide exposure to a desired reference asset, such as onshore Chinese securities, may be limited. Swaps are of limited duration and there is no guarantee that swaps entered into with a counterparty will continue indefinitely. Accordingly, the duration of a swap depends on, among other things, the ability of the Fund to renew the expiration period of the relevant swap at agreed upon terms.

The risks of investing in swaps on onshore Chinese securities are compounded by the fact that at present there are only a limited number of potential counterparties willing and able to enter into swap transactions linked to the performance of onshore Chinese securities. To the extent a potential swap counterparty's access to onshore Chinese securities is reduced or eliminated due to actions by the Chinese government or as a result of transactions entered into by the counterparty with other investors, the counterparty's ability to continue to enter into swaps or other derivative transactions with the Fund may be reduced or eliminated, which could have a material adverse effect on the Fund. In addition, under the current regulations regarding onshore Chinese securities quotas of QFIs and RQFIs administered by SAFE, QFIs and RQFIs are prohibited from transferring or selling their quotas to any third party. However, there is uncertainty over how this prohibition is implemented. Therefore, subject to interpretation by SAFE, QFIs and RQFIs may be limited or prohibited from providing the Fund access to onshore Chinese securities quotas by entering into swap or other derivative transactions, which, in turn, could adversely affect the Fund.

Emerging Markets Risk. Investments in developing or emerging markets issuers involve additional risks relating to political, economic, or regulatory conditions not associated with investments in U.S. securities and instruments. For example, in comparison with developed markets, developing and emerging markets may be subject to greater market volatility; greater risk of asset seizures and capital controls; lower trading volume and liquidity; greater social, political and economic uncertainty; governmental controls on foreign investments and limitations on repatriation of invested capital; greater risk of market shutdown; lower disclosure, corporate governance, auditing and financial reporting standards; fewer protections of property rights; restrictions on the transfer of securities or currency; and settlement and trading practices that differ from U.S. or developed markets. Each of these factors may impact the ability of the Fund to buy, sell or otherwise transfer securities, adversely affect the trading market and price for Fund shares, and cause the Fund to decline in value.

The economies of emerging markets, and China in particular, may be heavily reliant upon international trade and may suffer disproportionately if international trading declines or is disrupted.

Equity Securities Risk. Equity securities are subject to volatile changes in value that may be attributable to market perception of a particular issuer or to general stock market fluctuations that affect all issuers. Investments in equity securities are subject to volatile changes in market value and their values may be more volatile than investments in other asset classes. In the event of liquidation, equity securities are generally subordinate in rank to debt and other securities of the same issuer.

ESG Risk. Issuers with businesses with high ESG ratings may be difficult to identify and investments in them maybe volatile. Even companies with high ESG ratings may not necessarily compare favorably with respect to the ESG practices of other issuers. The ESG investment strategy limits the types and

Additional Information About the Fund

number of investment opportunities available and, as a result, the strategy may underperform other strategies that do not have an ESG focus. The ESG investment strategy may result in the Fund's investing in securities or industry sectors that underperform the market as a whole or underperform other funds screened for ESG standards. Investing based on ESG criteria is qualitative and subjective by nature and there is no guarantee that the criteria used by the Fund will reflect the beliefs or values of any particular investor

ETF Risk. As an ETF, the Fund is subject to the following risks:

Authorized Participants Concentration Risk. The Fund has a limited number of financial institutions that may act as Authorized Participants. To the extent they cannot or are otherwise unwilling to engage in creation and redemption transactions with the Fund and no other Authorized Participant steps in, shares of the Fund may trade like closed-end fund shares at a significant discount to NAV and may face delisting from the Exchange.

Cash Transactions Risk. Like other ETFs, the Fund sells and redeems its shares only in large blocks called Creation Units and only to Authorized Participants. Unlike most other ETFs, however, the Fund expects to effect its creations and redemptions at least partially or fully for cash, rather than in-kind securities.

Other ETFs generally are able to make in-kind redemptions and avoid realizing gains in connection with redemption requests. Effecting redemptions for cash may cause the Fund to sell portfolio securities in order to obtain the cash needed to distribute redemption proceeds. Such dispositions may occur at an inopportune time, resulting in potential losses to the Fund or difficulties in meeting shareholder redemptions, and involve transaction costs. If the Fund recognizes gain on these sales, this generally will cause the Fund to recognize gain it might not otherwise have recognized if it were to distribute portfolio securities in-kind or to recognize such gain sooner than would otherwise have been required. The Fund generally intends to distribute these gains to shareholders to avoid being taxed on this gain at the Fund level and otherwise comply with the special tax rules that apply to it. This strategy may cause shareholders to be subject to tax on gains they would not otherwise be subject to, or at an earlier date than, if they had made an investment in another ETF.

In addition, cash transactions may have to be carried out over several days if the securities market in which the Fund is trading is less liquid and may involve considerable transaction expenses and taxes. These brokerage fees and taxes, which will be higher than if the Fund sold and redeemed its shares principally in-kind, may be passed on to purchasers and redeemers of Creation Units in the form of creation and redemption transaction fees. However, the Fund has capped the total fees that may be charged in connection with the redemption of Creation Units at 2% of the value of the Creation Units redeemed. To the extent transaction and other costs associated with a redemption exceed that cap, those transaction costs will be borne by the Fund's remaining shareholders. These factors may result in wider spreads between the bid and the offered prices of the Fund's shares than for other ETFs.

International Closed Market Trading Risk. Because certain of the Fund's underlying securities may trade in markets that may be closed when the Fund and Exchange are open, there are likely to be deviations between current pricing of an underlying security and stale pricing, resulting in the Fund trading at a discount or premium to NAV that may be greater than those incurred by other ETFs.

Additional Information About the Fund

Premium/Discount Risk. The NAV of the Fund's shares will generally fluctuate with changes in the market value of the Fund's securities holdings. The market prices of Fund shares will generally fluctuate in accordance with changes in the Fund's NAV and supply and demand of shares on the secondary market. It cannot be predicted whether Fund shares will trade below (at a discount), at or above (at a premium) their NAV. As a result, shareholders of the Fund may pay more than NAV when purchasing shares and receive less than NAV when selling Fund shares. This risk is heightened in times of market volatility or periods of steep market declines. In such market conditions, market or stop-loss orders to sell the Fund shares may be executed at market prices that are significantly below NAV. Price differences may be due, in part, to the fact that supply and demand forces at work in the secondary trading market for shares may be closely related to, but not identical to, the same forces influencing the prices of the securities of the Underlying Index trading individually. The market prices of Fund shares may deviate significantly from the NAV of the shares during periods of market volatility or if the Fund's holdings are or become more illiquid. Disruptions to creations and redemptions may result in trading prices that differ significantly from the Fund's NAV. In addition, market prices of Fund shares may deviate significantly from the NAV if the number of Fund shares outstanding is smaller or if there is less active trading in Fund shares. Investors purchasing and selling Fund shares in the secondary market may not experience investment results consistent with those experienced by those creating and redeeming directly with the Fund.

Secondary Market Trading Risk. Investors buying or selling shares in the secondary market will normally pay brokerage commissions, which are often a fixed amount and may be a significant proportional cost for investors buying or selling relatively small amounts of shares. In addition, secondary market investors will incur the cost of the difference between the price that an investor is willing to pay for shares (the bid price) and the price at which an investor is willing to sell shares (the ask price). This difference in bid and ask prices is often referred to as the "spread" or "bid-ask spread." The bid-ask spread varies over time for shares based on trading volume and market liquidity, and is generally lower if the Fund's shares have more trading volume and market liquidity and higher if the Fund's shares have little trading volume and market liquidity. Increased market volatility may cause increased bid-ask spreads.

Although Fund shares are listed for trading on the Exchange, there can be no assurance that an active trading market for such shares will develop or be maintained or that the Fund's shares will continue to be listed. Trading in Fund shares may be halted due to market conditions or for reasons that, in the view of the Exchange, make trading in shares inadvisable. In addition, trading in shares is subject to trading halts caused by extraordinary market volatility pursuant to Exchange "circuit breaker" rules. There can be no assurance that the requirements of the Exchange necessary to maintain the listing of any Fund will continue to be met or will remain unchanged or that the shares will trade with any volume, or at all.

New Fund Risk. The Fund is new and does not yet have shares outstanding. If the Fund does not grow large in size once it commences trading, it will be at greater risk than larger funds of wider bid-ask spreads for its shares, trading at a greater premium or discount to NAV, liquidation and/or a trading halt.

Small Fund Risk. The Fund is small and does not yet have a significant number of shares outstanding. Small funds are at greater risk than larger funds of wider bid-ask spreads for its shares, trading at a greater premium or discount to NAV, liquidation and/or a trading halt. The Fund also is subject to the continued listing standards of the Exchange, with which the Fund must comply in order to continue being listed on the Exchange. Among other requirements, the continued listing standards require a minimum number of shareholders.

Additional Information About the Fund

Foreign Securities Risk. Investment in foreign securities may involve higher costs than investment in U.S. securities, including higher transaction and custody costs as well as the imposition of additional taxes by foreign governments. Foreign investments may also involve risks associated with currency exchange rates, less complete financial information about the issuers, less market liquidity, more market volatility and political and economic instability. Future political and economic developments, the possible imposition of withholding taxes on dividend income, the possible seizure or nationalization of foreign holdings, the possible establishment of exchange controls or freezes on the convertibility of currency, or the adoption of other governmental restrictions might adversely affect an investment in foreign securities. Additionally, foreign issuers, especially issuers in emerging markets, may be subject to less stringent regulation, and to different accounting, auditing, recordkeeping, financial reporting, and investor protection requirements. Investments in foreign securities typically are less liquid than investments in U.S. securities. The value of foreign securities may change materially when the U.S. markets are not open for trading.

Income from securities of non-U.S. issuers, including gains on the sale of such securities, may be subject to foreign taxes, which would be the responsibility of the Fund. Even if the Fund qualifies to pass these taxes through to shareholders, the ability to claim a credit for such taxes may be limited, particularly in the case of taxes on capital gains.

Foreign markets may have clearance and settlement procedures that make it difficult for the Fund to buy and sell securities. This could result in a loss to the Fund by causing the Fund to be unable to dispose of an investment or to miss an attractive investment opportunity, or by causing the Fund's assets to be uninvested for some period of time, or cause the Fund to face delays or difficulties in meeting shareholder redemptions.

From time to time, certain of the issuers of securities purchased by the Fund may operate in, or have dealings with, countries that may become subject to sanctions or embargoes imposed by the U.S. Government and the United Nations and/or countries identified by the U.S. Government as state sponsors of terrorism. A company may suffer damage to its reputation and value if it is identified as such a company. Any Fund investment in such companies will be indirectly subject to those risks.

Geographic Focus Risk. The Fund's investments are expected to be focused in a particular country, countries, or region to the same extent as the Underlying Index and therefore the Fund may be susceptible to adverse market, political, regulatory, and geographic events affecting that country or region. Such geographic focus also may subject the Fund to a higher degree of volatility than a more geographically diversified fund.

High Portfolio Turnover Risk. The Fund may incur high turnover rates. This may increase the Fund's brokerage commission costs. The performance of the Fund could be negatively impacted by the increased brokerage commission costs incurred by the Fund. Rapid portfolio turnover also exposes shareholders to a higher current realization of net short-term capital gains, distributions of which would generally be taxed to you as ordinary income and thus cause you to pay higher taxes.

Investments in Investment Companies Risk. The Fund may purchase shares of investment companies, such as ETFs, unit investment trusts, closed-end investment companies and foreign investment companies, including those that are advised, sponsored or otherwise serviced by Krane and/or its affiliates, to gain exposure to particular component securities of the Underlying Index or when such investments present a more cost efficient alternative to investing directly in securities. When the Fund invests in an investment company, in addition to directly bearing the expenses associated with its own operations, it will bear a pro rata portion of the underlying fund's expenses. An investor

Additional Information About the Fund

in the Fund may receive taxable gains as a result of an underlying fund's portfolio transactions in addition to the taxable gains attributable to the Fund's transactions in shares of the underlying fund. Further, in part because of these additional expenses, the performance of an investment company may differ from the performance the Fund would achieve if it invested directly in the underlying investments of the investment company. In addition, while the risks of owning shares of an investment company generally reflect the risks of owning the underlying investments of the investment company, the Fund may be subject to additional or different risks than if the Fund had invested directly in the underlying investments. For example, shares of an ETF are traded at market prices, which may vary from the NAV of its underlying investments. Also, the lack of liquidity in an ETF can contribute to the increased volatility of its value in comparison to the value of the underlying portfolio securities. To the extent that the Fund invests in investment companies or other pooled investment vehicles that are not registered pursuant to the 1940 Act, including foreign investment companies, it will not enjoy the protections of the 1940 Act. In addition, to the extent the Fund invests in other investment companies, including ETFs, sponsored, advised or otherwise serviced by Krane, its sub-adviser, as applicable, or their affiliates, they may be subject to conflicts of interest in allocating Fund assets, particularly if they are paid an advisory fee both by the Fund and the fund in which the Fund invests.

Large Capitalization Company Risk. Investments in large capitalization companies may go in and out of favor based on market and economic conditions and may underperform other market segments. Some large capitalization companies may be unable to respond quickly to new competitive challenges and attain the high growth rate of successful smaller companies, especially during extended periods of economic expansion. As such, returns on investments in stocks of large capitalization companies could trail the returns on investments in stocks of small and mid capitalization companies.

Liquidity Risk. The Fund's investments are subject to liquidity risk, which exists when an investment is or becomes difficult to purchase or sell at a reasonable time and price. If a transaction is particularly large or if the relevant market is or becomes illiquid, it may reduce the potential returns of the Fund because it may be unable to sell the illiquid securities at an advantageous time or price, which may cause the Fund to suffer significant losses and difficulties in meeting redemptions. This is especially true given the limited number of market participants in certain markets in which the Fund may invest. Certain countries in which the Fund may invest may be subject to extended settlement delays and/or foreign holidays, during which the Fund will unlikely be able to convert such holdings to cash and may make it additionally difficult for the Fund to meet redemptions in a timely fashion.

Market developments may cause the Fund's investments to become less liquid and subject to erratic price movements, and may also cause the Fund to encounter difficulties in timely honoring redemptions, especially if market events cause an increased incidence of shareholder redemptions. If a number of securities held by the Fund stop trading or become illiquid, it may have a cascading effect and cause the Fund to halt trading. Volatility in market prices will increase the risk of the Fund being subject to a trading halt.

In October 2016, the Securities and Exchange Commission ("SEC") adopted Rule 22e-4 (the "Liquidity Rule"), which requires open-end funds to establish a liquidity risk management program ("Liquidity Program") and enhance disclosures regarding fund liquidity. As required by the Liquidity Rule, the Fund's Board appointed a liquidity risk program administrator to assess, manage and periodically review the liquidity risk of the Fund. The liquidity of a Fund's portfolio investments is determined based on relevant market, trading and investment-specific considerations under the Liquidity Program. To the extent that an investment is deemed to be an illiquid investment or a less liquid investment, a Fund can expect to be exposed to greater liquidity risk.

Additional Information About the Fund

Management Risk. To the extent the Fund may not fully replicate the Underlying Index and may hold less than the total number of securities in the Underlying Index, the Fund is subject to management risk. This is the risk that Krane or its sub-adviser's, as applicable, security selection process, which is subject to a number of constraints, may not produce the intended results. Alternatively, to the extent Krane or its sub-adviser, as applicable, determines to manage the Fund by replicating the Underlying Index, it is likely to experience higher portfolio turnover and brokerage costs, which erode performance.

Market Risk. The values of the Fund's holdings could decline generally or could underperform other investments. Market fluctuations could be caused by such factors as economic and political developments, changes in interest rates and perceived trends in securities prices. Recent developments in relations between the United States and its trading partners have heightened concerns of increased tariffs and restrictions on trade between the U.S. and other countries. An increase in tariffs or trade restrictions, or even the threat of such developments, could lead to a significant reduction in international trade, which could have a negative impact on the world's export industry and a commensurately negative impact on financial markets. Different types of securities tend to go through cycles of outperformance and under-performance in comparison to the general securities markets. In addition, securities may decline in value due to factors affecting a specific issuer, market or securities markets generally. Therefore, the Fund is susceptible to the risk that certain holdings may be difficult or impossible to sell at a favorable time or price.

Turbulence in the financial markets and reduced liquidity in equity, credit and fixed-income markets may negatively affect issuers worldwide, which could have an adverse effect on the Fund. The Federal Reserve and other domestic and foreign government agencies may attempt to stabilize the global economy. These actions may expose markets to heightened volatility and may reduce liquidity for certain Fund investments, causing the value of the Fund's investments and share price to decline. To the extent that the Fund experiences high redemptions because of these actions, the Fund may experience increased portfolio turnover, which will increase the costs that the Fund incurs and will lower the Fund's performance.

Geopolitical risks, including terrorism, tensions or open conflict between nations, or political or economic dysfunction within some nations that are major players on the world stage or major producers of oil, may lead to overall instability in world economies and markets generally and have led, and may in the future lead, to increased market volatility and may have adverse long-term effects. Similarly, environmental and public health risks, such as natural disasters or pandemics/epidemics, or widespread fear that such events may occur, may impact markets adversely and cause market volatility in both the short- and long-term.

Certain illnesses spread rapidly and have the potential to significantly and adversely affect the global economy. Epidemics and/or pandemics have and may further result in, among other things, closing borders, enhanced health screenings, healthcare service preparation and delivery, quarantines, cancellations, disruptions to supply chains and customer activity, as well as general concern and uncertainty. The impact of such epidemics and/or pandemics that may arise in the future, have the potential to affect the economies of many nations, individual companies and the global securities and commodities markets, including liquidity, in ways that cannot necessarily be foreseen at the present time. The impact of infectious diseases in developing or emerging market countries may be greater due to less established health care systems. Health crises caused by the recent coronavirus outbreak may exacerbate other preexisting political, social and economic risks in certain countries. The impact of the outbreak may be short term or may last for an extended period of time and may have material adverse impacts on the Fund.

Additional Information About the Fund

Non-Diversified Fund Risk. Because the Fund is non-diversified and may invest a greater portion of its assets in fewer issuers than a diversified fund, changes in the market value of a single portfolio holding could cause greater fluctuations in the Fund's share price than would occur in a diversified fund. This may increase the Fund's volatility and cause the performance of a single portfolio holding or a relatively small number of portfolio holdings to have a greater impact on the Fund's performance.

Passive Investment Risk. The Fund is not actively managed, does not seek to "beat" the Underlying Index, and does not take temporary positions when markets decline. Therefore, the Fund may not sell a security due to current or projected underperformance of a security, industry or sector. If a specific security is removed from the Underlying Index, the Fund may be forced to sell such security at an inopportune time or for a price other than the security's current market value. It is expected that the value of Fund shares will decline, more or less, in correspondence with any decline in value of the Underlying Index. The Underlying Index may not contain the appropriate mix of securities for any particular economic cycle, and the timing of movements from one type of security to another in seeking to track the Underlying Index could have a negative effect on the Fund. However, the Fund's investment objective and principal investment strategies impose limits on the Fund's ability to invest in securities not included in the Underlying Index. There is no guarantee that the Underlying Index will create the desired exposure.

Unlike an actively managed fund, the Fund does not use techniques or defensive strategies designed to lessen the effects of market volatility or to reduce the impact of periods of market decline. This means that, based on market and economic conditions, the Fund's performance could be lower than other types of registered investment companies that may actively shift their portfolio assets to take advantage of market opportunities or to lessen the impact of a market decline. To the extent the Fund employs a representative sampling approach, it will hold a smaller number of securities than are in the Underlying Index. As a result, an adverse development to an issuer of securities that the Fund holds could result in a greater decline in NAV than would be the case if the Fund held more of the securities in the Underlying Index.

Securities Lending Risk. The Fund may lend its portfolio securities to brokers, dealers and financial institutions to seek income. There is a risk that a borrower may default on its obligations to return loaned securities. There is a risk that the assets of the Fund's securities lending agent may be insufficient to satisfy any contractual indemnification requirements to that Fund. Borrowers of the Fund's securities typically provide collateral in the form of cash that is reinvested. The Fund will be responsible for the risks associated with the investment of cash collateral, including any collateral invested in a money market fund. The Fund may lose money on its investment of cash collateral or may fail to earn sufficient income on its investment to meet obligations to the borrower. In addition, delays may occur in the recovery of securities from borrowers, which could interfere with the Fund's ability to vote proxies or to settle transactions and there is the risk of possible loss of rights in the collateral should the borrower fail financially. Krane and its sub-adviser, if applicable, are subject to potential conflicts of interest because the compensation paid to them increases in connection with any net income received by the Fund from a securities lending program.

Small- and Mid-Capitalization Company Risk. Investing in the securities of small- and mid-capitalization companies involves greater risk and the possibility of greater price volatility than investing in larger capitalization companies and more established companies. Since small- and medium-sized companies may have limited operating histories, product lines and financial resources, the securities of these companies may lack sufficient market liquidity and can be sensitive to expected

Additional Information About the Fund

changes in interest rates, borrowing costs and earnings. These companies' securities may be more volatile and less liquid than those of more established companies, and they may be more sensitive to market conditions.

Tax Risk. In order to qualify for the favorable tax treatment generally available to regulated investment companies, a Fund must satisfy certain income, distribution and asset diversification requirements. With respect to the latter, a Fund generally may not acquire a security if, as a result of the acquisition, more than 50% of the value of the Fund's assets would be invested in (a) issuers in which the Fund has, in each case, invested more than 5% of the Fund's assets and (b) issuers more than 10% of whose outstanding voting securities are owned by the Fund. If the Fund were to fail to qualify as a regulated investment company, it would be taxed in the same manner as an ordinary corporation, and distributions to its shareholders would not be deductible by the Fund in computing its taxable income, which would adversely affect its performance. Because there is limited transparency into state ownership of Chinese issuers, there is a risk of such issuers being deemed to be a single issuer, which could result in the Fund falling out of compliance with the asset diversification requirements.

In order to qualify for the favorable tax treatment generally available to regulated investment companies and avoid Fund-level taxes, a Fund must also satisfy certain distribution requirements. Capital controls and currency controls may affect a Fund's ability to meet the applicable distribution requirements. If a Fund fails to satisfy the distribution requirement necessary to qualify for treatment as a regulated investment company for any taxable year, the Fund would be treated as a corporation subject to U.S. federal income tax, thereby subjecting any income earned by the Fund to tax at the corporate level. If a Fund fails to satisfy a separate distribution requirement, it will be subject to a Fund-level excise tax. These Fund-level taxes will apply in addition to taxes payable at the shareholder level on distributions.

To the extent a Fund does not distribute to shareholders all of its investment company taxable income and net capital gain in a given year, it will be required to pay U.S. federal income tax on the retained income and gains, thereby reducing the Fund's return. A Fund may elect to treat its net capital gain as having been distributed to shareholders. In that case, shareholders of record on the last day of the Fund's taxable year will be required to include their attributable share of the retained gain in income for the year as a long-term capital gain despite not actually receiving the dividend, and will be entitled to a tax credit or refund for the tax deemed paid on their behalf by the Fund as well as an increase in the basis of their shares to reflect the difference between their attributable share of the gain and the related credit or refund.

Investments in swaps and other derivatives may be subject to special U.S. federal income tax rules that could adversely affect the character, timing and amount of income earned by a Fund (e.g., by causing amounts that would be capital gain to be taxed as ordinary income or to be taken into income earlier than would otherwise be necessary). Also, a Fund may be required to periodically adjust its positions in its swaps and derivatives to comply with certain regulatory requirements which may further cause these investments to be less efficient than a direct investment in the securities themselves. For example, swaps in which the Fund may invest may need to be reset on a regular basis in order to maintain compliance with the 1940 Act, which may increase the likelihood that the Fund will generate short-term capital gains. In addition, because the application of these special rules may be uncertain, it is possible that the manner in which they are applied by a Fund may be determined to be incorrect. In that event, the Fund may be found to have failed to maintain its qualification as a RIC or to be subject to additional U.S. tax liability. Moreover, a Fund may make investments, both directly and through swaps or other derivative positions, in companies classified

Additional Information About the Fund

as passive foreign investment companies for U.S. federal income tax purposes (“PFICs”). Investments in PFICs are subject to special tax rules which may result in adverse tax consequences to the Fund and its shareholders.

Tracking Error Risk. Tracking error refers to the risk that the Fund’s performance may not match or correlate to that of its Underlying Index, either on a daily or aggregate basis. Tracking error may cause the Fund’s performance to be less than expected. There are a number of factors that may contribute to the Fund’s tracking error, such as Fund expenses, imperfect correlation between the Fund’s investments and those of the Underlying Index, the use of representative sampling strategy, if applicable, asset valuation differences, tax considerations, the unavailability of securities in the Underlying Index from time to time, holding cash and cash equivalents, and other liquidity constraints. In addition, securities included in the Underlying Index may be suspended from trading. To the extent the Fund calculates its NAV based on fair value prices and the value of the Underlying Index is based on securities’ closing prices on local foreign markets, the Fund’s ability to track the Underlying Index may be adversely affected. Mathematical compounding may prevent the Fund from correlating with the monthly, quarterly, annual or other period performance of its Underlying Index. In addition, the Fund may not invest in certain securities and other instruments included in the Underlying Index, or invest in them in the exact proportions they represent of the Underlying Index, including due to legal restrictions or limitations imposed by a foreign government or a lack of liquidity in certain securities. Moreover, the Fund may be delayed in purchasing or selling securities and other instruments included in the Underlying Index. Any issues the Fund encounters with regard to currency convertibility (including the cost of borrowing funds, if any) and repatriation may also increase the Fund’s tracking error.

Valuation Risk. Financial information about the Fund’s portfolio holdings may not always be reliable, which may make it difficult to obtain a current price for the investments held by the Fund. Independent market quotations for such investments may not be readily available, such as on days during which a security does not trade or a foreign holiday, and securities may be fair valued or valued by a pricing service at an evaluated price. These valuations are subjective and different funds may assign different fair values to the same investment. Such valuations also may be different from what would be produced if the security had been valued using market quotations. As a result, there is a risk that the Fund may not be able to sell an investment at the price assigned to the investment by the Fund. Additionally, Fund securities that are valued using techniques other than market quotations, including “fair valued” securities, may be subject to greater fluctuations in their value from one day to the next. Because securities in which the Fund invests may trade on days when the Fund does not price its shares, the value of the securities in the Fund’s portfolio may change on days when shareholders will not be able to purchase or sell the Fund’s shares.

Non-Principal Risks

Asia-Pacific Risk. Investments in securities of issuers in Asia-Pacific countries involve risks that are specific to the Asia-Pacific region, including certain legal, regulatory, political and economic risks. Certain Asia-Pacific countries have experienced expropriation and/or nationalization of assets, confiscatory taxation, political instability, armed conflict and social instability as a result of religious, ethnic, socio-economic and/or political unrest. Some economies in this region are dependent on a range of commodities and are strongly affected by international commodity prices and are particularly vulnerable to price changes for these products. The market for securities in this region may also be directly influenced by the flow of international capital, and by the economic and market

Additional Information About the Fund

conditions of neighboring countries. Many Asia-Pacific economies have experienced rapid growth and industrialization, and there is no assurance that this growth rate will be maintained. Some Asia-Pacific economies are highly dependent on trade and economic conditions in other countries.

Counterparty Risk. Because many derivatives are an obligation of the counterparty rather than a direct investment in the reference asset, the Fund may suffer losses potentially equal to, or greater than, the full value of the derivative if the counterparty fails to perform its obligations under the derivative agreement as a result of bankruptcy or otherwise. Any loss would result in a reduction in the NAV of the Fund and will likely impair the Fund's ability to achieve its investment objective. If there are only a few potential counterparties, the Fund, subject to applicable law, may enter into swap transactions with as few as one counterparty at any time.

Operational and Cybersecurity Risk. The Fund, Krane and their service providers and your ability to transact with the Fund may be negatively impacted due to operational matters arising from, among other problems, human errors, systems and technology disruptions or failures, or cybersecurity incidents. Cybersecurity incidents may allow an unauthorized party to gain access to fund assets, customer data, or proprietary information, or cause the Fund or its service providers, as well as the securities trading venues and their service providers, to suffer data corruption or lose operational functionality. It is not possible for Krane or the other Fund service providers to identify all of the cybersecurity or other operational risks that may affect the Fund or to develop processes and controls to completely eliminate or mitigate their occurrence or effects.

Management

Investment Adviser

Krane is a registered investment adviser located at 280 Park Avenue, 32nd Floor, New York, NY 10017 and serves as investment adviser of the Fund. Krane has served as the investment adviser of the Fund since its inception.

Under the Investment Advisory Agreement between the Trust and Krane, Krane is responsible for reviewing, supervising and administering the Fund's investment program and the general management and administration of the Trust. In this regard, among other things, Krane arranges for transfer agency, custody, fund administration and accounting, and other non-distribution related services necessary for the Fund to operate. Krane may engage a subadviser to assist it in managing the Fund's investments, but will be responsible for overseeing any subadvisers. Krane manages the Fund's business affairs, provides office facilities and equipment and certain clerical, bookkeeping and administrative services, and permits its officers and employees to serve as officers or Trustees of the Trust. Under the Investment Advisory Agreement, Krane bears all of its own costs associated with providing advisory services to the Fund. In addition, Krane has contractually agreed to pay all operating expenses of the Fund, except (i) interest and taxes (including, but not limited to, income, excise, transaction, transfer and withholding taxes); (ii) expenses of the Fund incurred with respect to the acquisition and disposition of portfolio securities and the execution of portfolio transactions, including brokerage commissions and short sale dividend or interest expense; (iii) expenses incurred in connection with any distribution plan adopted by the Trust in compliance with Rule 12b-1 under the 1940 Act, including distribution fees; (iv) Acquired Fund Fees and Expenses; (v) litigation expenses; (vi) the compensation payable to the Adviser under the investment advisory agreement; (vii) compensation and expenses of the Independent Trustees (including any Trustees' counsel fees); and (viii) any expenses determined to be extraordinary expenses by the Board. Nevertheless, there exists a risk that a Trust service provider will seek recourse against the Trust if is not timely paid by Krane for the fees and expenses for which it is responsible, which could materially adversely affect the Fund.

Under the Investment Advisory Agreement, the Fund pays Krane the fee shown in the table below (in addition to the securities lending compensation Krane receives under the Agreement discussed below), which is calculated daily and paid monthly, at an annual rate based on a percentage of the average daily net assets of the Fund.

KraneShares MSCI China ESG Leaders Index ETF	0.58%
--	-------

The Investment Advisory Agreement has been approved by the Board of Trustees and shareholders of the Fund (in this regard, Krane as the sole initial shareholder of the Fund will approve various matters and agreements, including the Investment Advisory Agreement for the Fund prior to its public offering).

In addition to the above-described services, to the extent the Fund engages in securities lending, Krane will: (i) determine which securities are available for loan and notify the securities lending agent for the Fund (the "Agent"), (ii) monitor the Agent's activities to ensure that securities loans are effected in accordance with Krane's instructions and in accordance with applicable procedures and guidelines adopted by the Board, (iii) make recommendations to the Board regarding the Fund's participation in securities lending; (iv) prepare appropriate periodic reports for, and seek appropriate periodic approvals from, the Board with respect to securities lending activities, (v) respond to Agent inquiries concerning Agent's activities, and (vi) such other related duties as Krane deems necessary or appropriate.

Management

Under the agreement, while the fees and expenses related to the Fund's securities lending-related activities reduce the revenues and income of the Fund from such activities, they are not fees and expenses for which Krane is responsible. Further, as compensation for the services provided by Krane in connection with any securities lending-related activities, the Fund pays Krane 10% of the monthly investment income received from the investment of cash collateral and loan fees received from borrowers in respect of securities loans (net of any amounts paid to the custodian and/or securities lending agent or rebated to borrowers).

Because the Fund had not commenced operations prior to the end of the fiscal year ended March 30, 2020, Krane did not receive any advisory fees or fees from securities lending activities from the Fund during the prior fiscal year. A discussion regarding the basis for the Board's approval of the Fund's investment advisory agreement with Krane will be available in the Fund's first Annual or Semi-Annual Report to Shareholders. Krane, as the sole shareholder of the Fund, has approved or will approve the Investment Advisory Agreement for the Fund and various other matters and agreements for the Fund.

China International Capital Corporation (USA) Holdings Inc., a wholly-owned, indirect subsidiary of China International Capital Corporation Limited owns a majority stake in Krane. As of February 29, 2020, Central Huijin Investment Limited, a mainland Chinese-domiciled entity, held approximately 44.32% of the shares of China International Capital Corporation Limited. Central Huijin Investment Limited is a wholly-owned subsidiary of China Investment Corporation, which is a mainland Chinese sovereign wealth fund. KFA One Holdings, LLC, located at 280 Park Avenue, 32nd Floor, New York, NY 10017, holds the remaining equity interests in Krane and Jonathan Krane, through his equity interests in KFA One Holdings, LLC, beneficially owns more than 10% of the equity interests in Krane.

Krane has received "manager of managers" exemptive relief from the SEC that permits Krane, subject to the approval of the Board of Trustees, to appoint a "wholly-owned" or unaffiliated sub-adviser, as defined in the exemptive relief, or to change the terms of a sub-advisory agreement with a "wholly-owned" or unaffiliated sub-adviser without first obtaining shareholder approval. The exemptive order further permits Krane to add or to change a "wholly-owned" or unaffiliated sub-adviser or to change the fees paid to such parties from time to time without the expense and delays associated with obtaining shareholder approval of the change and to disclose sub-advisers' fees only in the aggregate in its registration statement. Any increase in the aggregate advisory fee paid by the Fund remains subject to shareholder approval. Krane continues to have ultimate responsibility (subject to oversight by the Board of Trustees) to oversee the sub-advisers and recommend their hiring, termination, and replacement. The Fund will notify shareholders of any change of the Fund sub-adviser.

Portfolio Managers

James Maund, Head of Capital Markets at the Adviser, has served as the lead portfolio manager of the Fund since its inception in 2020. He joined the Adviser in 2020 and has over 15 years of experience in the investment management industry. Previously, he was a Vice President in the Institutional ETF Group and a member of the ETF Capital Markets Group at State Street Global Advisors (2010-2019); and an ETF trader at Goldman Sachs & Co (2005-2010). Mr. Maund graduated with a bachelor's degree in economics from Wesleyan University.

Jonathan Shelon, Chief Operating Officer of the Adviser, also serves as a portfolio manager of the Fund and supports Mr. Maund and Krane's investment team with respect to the Fund. Mr. Shelon has been a portfolio manager of the Fund since inception in 2020. Mr. Shelon joined Krane in 2015 as a Managing Partner. Mr. Shelon has spent the majority of his career managing investment portfolios and diverse teams at leading asset management organizations. Prior to joining Krane, he

Management

was the Chief Investment Officer of a 40-person global Specialized Strategies Team at J.P. Morgan with \$40 billion AUM. Prior to joining J.P. Morgan, Mr. Shelon spent ten years as a portfolio manager at Fidelity Investments where he was responsible for the investment performance, process and evolution of their target-date strategies for retirement savings, college savings and income generation.

Additional information about the Portfolio Manager's compensation, other accounts managed by the Portfolio Manager and the Portfolio Manager's ownership of Fund shares is available in the SAI.

Other Service Providers

SEI Investments Global Funds Services ("Administrator") serves as administrator for the Fund. The Administrator provides necessary administrative and accounting services for the maintenance and operations of the Trust and the Fund, and makes available the office space, equipment, personnel and facilities required to provide such services.

SEI Investments Distribution Co. ("Distributor"), an affiliate of the Administrator, serves as the Fund's distributor. Shares in less than Creation Units are not distributed by the Distributor, and the Distributor does not maintain a secondary market in the shares of the Fund.

Brown Brothers Harriman & Co. ("BBH") serves as custodian and transfer agent for the Fund. BBH maintains in separate accounts cash, securities and other assets of the Fund, keeps all necessary accounts and records, and provides other services.

PRC securities, such as China A-Shares, purchased by Krane in its capacity as RQFII or QFII are received in a securities account maintained by a Chinese sub-custodian in the joint names of the Fund and Krane. Pursuant to a sub-custodian agreement and a supplementary control agreement, the Fund is or would be recognized as the beneficial owner, and control the disposition, of assets in the account, even though, pursuant to Chinese law and regulations, the RQFII or QFII holder (in addition to the Fund) is the legal owner of the account.

Calculating NAV

The Fund calculates its NAV by:

- Taking the current market value of its total assets
- Subtracting any liabilities and withholdings (if any)
- Dividing that amount by the total number of shares owned by the shareholders

The Fund normally calculates NAV as of the regularly scheduled close of normal trading on each day that the NYSE is scheduled to be open for business (a “Business Day”) (normally, 4:00 p.m., Eastern time). Any assets or liabilities denominated in currencies other than the U.S. dollar are converted into U.S. dollars at the current market rates on the date of valuation as quoted by one or more sources.

In calculating the values of the Fund’s portfolio securities, securities listed on a securities exchange, market or automated quotation system for which quotations are readily available (except for securities traded on NASDAQ), including securities traded over the counter, are valued at the last reported sale price on the primary exchange or market (foreign or domestic) on which they are traded (or at the time as of which the Fund’s NAV is calculated if a security’s exchange is normally open at that time). If there is no such reported sale, such securities are valued at the most recently reported bid price. For securities traded on NASDAQ, the NASDAQ Official Closing Price will be used. If available, debt securities are priced based upon valuations provided by independent, third-party pricing agents. Such values generally reflect the last reported sales price if the security is actively traded. The third-party pricing agents may also value debt securities at an evaluated bid price by employing methodologies that utilize actual market transactions, broker-supplied valuations, or other methodologies designed to identify the market value for such securities. Debt obligations with remaining maturities of sixty days or less may be valued at their amortized cost, which approximates market value. The prices for foreign securities are reported in local currency and converted to U.S. dollars using currency exchange rates. The value of a swap contract is equal to the obligation (or rights) under the swap contract, which will generally be equal to the net amounts to be paid or received under the contract based upon the relative values of the positions held by each party to the contract as determined by the applicable independent, third party pricing agent. Exchange-traded options are valued at the last reported sales price on the exchange on which they are listed. If there is no such reported sale on the valuation date, long positions are valued at the most recent bid price, and short positions are valued at the most recent ask price. OTC options are valued based upon prices determined by the applicable independent, third party pricing agent. Futures are valued at the settlement price established by the board of trade on which they are traded. Foreign currency forward contracts are valued at the current day’s interpolated foreign exchange rate, as calculated using the current day’s spot rate and the 30-, 60-, 90- and 180-day forward rates provided by an Independent Pricing Agent. The exchange rates used for valuation are captured as of the close of the London Stock Exchange each day normally at 4:00 p.m. Greenwich Mean Time. Prices for most securities held by the Fund are provided daily by independent pricing agents. If a security price cannot be obtained from an independent, third-party pricing agent, the Fund seeks to obtain bid and ask prices from two broker-dealers who make a market in the portfolio instrument and determines the average of the two.

Investments in open-end investment companies that do not trade on an exchange are valued at the end of day NAV per share. Investments in open-end investment companies that trade on an exchange are valued at the last reported sale price or official closing price as of the close of the customary

Shareholder Information

trading session on the exchange where the security is principally traded. If there is no such reported sale, such securities are valued at the most recently reported bid price.

Securities issued by a wholly owned subsidiary of the Fund will be valued at the subsidiary's net asset value, which will be determined using the same pricing policies and procedures applicable to the Fund.

Investments for which market prices are not "readily available," or are not deemed to reflect current market values, or are instruments where no evaluated price is available from the Trust's third-party pricing agents pursuant to established methodologies, are fair valued in accordance with the Trust's valuation policies and procedures approved by the Board of Trustees. Some of the more common reasons that may necessitate that a security be valued using "fair value" pricing may include, but are not limited to: the security's trading has been halted or suspended; the security's primary trading market is temporarily closed; or the security has not been traded for an extended period of time. The Fund may fair value certain of the foreign securities held by the Fund each day the Fund calculates its NAV.

In addition, the Fund may fair value its securities if an event that may materially affect the value of the Fund's securities that trade outside of the United States (a "Significant Event") has occurred between the time of the security's last close and the time that the Fund calculates its NAV. A Significant Event may relate to a single issuer or to an entire market sector, country or region. Events that may be Significant Events may include: government actions, natural disasters, armed conflict, acts of terrorism and significant market fluctuations. If Krane becomes aware of a Significant Event that has occurred with respect to a portfolio instrument or group of portfolio instruments after the closing of the exchange or market on which the portfolio instrument or portfolio instruments principally trade, but before the time at which the Fund calculates its NAV, it will notify the Administrator and may request that an ad hoc meeting of the Fair Valuation Committee be called.

With respect to trade-halted securities, the Trust typically will fair value a trade-halted security by adjusting the security's last market close price by the security's sector performance, as measured by a predetermined index, unless Krane recommends and the Trust's Fair Valuation Committee determines to make additional adjustments. Certain foreign securities exchanges have mechanisms in place that confine one day's price movement in an individual security to a pre-determined price range based on that day's opening price ("Collared Securities"). Fair value determinations for Collared Securities will generally be capped by Krane based on any applicable pre-determined "limit down" or "limit up" prices established by the relevant foreign securities exchange. As an example, China A-Shares can only be plus or minus ten percent in one day of trading in the relevant mainland China equity market. As a result, the fair value price determination on a given day will generally be capped at plus or minus ten percent.

Fair value pricing involves subjective judgments and it is possible that a fair value determination for a security is materially different than the value that could actually be realized upon the sale of the security or that another fund that uses market quotations or its own fair value procedures to price the same securities. In addition, fair value pricing could result in a difference between the prices used to calculate the Fund's NAV and the prices used by the Underlying Index. This may adversely affect a Fund's ability to track the Underlying Index.

Trading in securities on many foreign exchanges is normally completed before the close of business on each Business Day. In addition, securities trading in a particular country or countries may not take place on each Business Day, such as during a foreign market holiday, or may take place on days that

Shareholder Information

are not Business Days. Changes in valuations on certain securities may occur at times or on days on which the Fund's NAV is not calculated and on which Fund shares do not trade and sales and redemptions of shares do not occur. As a result, the value of the Fund's portfolio securities and the net asset value of its shares may change on days when you will not be able to purchase or sell your shares.

Buying and Selling Fund Shares

Shares of the Fund may be purchased or redeemed directly from the Fund only in Creation Units or multiples thereof. Only a broker-dealer ("Authorized Participant") that enters into an Authorized Participant Agreement with the Fund's distributor, SEI Investments Distribution Co. (the "Distributor"), may engage in creation and redemption transactions directly with the Fund. Purchases and redemptions directly with a Fund must follow the Fund's procedures, and are subject to transaction fees, which are described in the SAI. The transaction fee will not exceed 2.00% of the value of the Creation Units purchased or redeemed, which is used to compensate the Fund for any difference for the expenses incurred by it in connection with the purchase or redemption order. Orders for such transactions may be rejected or delayed if they are not submitted in good order and subject to the other conditions set forth in this prospectus and the SAI.

Purchases and redemptions of Creation Units will take place in-kind and/or for cash at the discretion of the Fund. The determination of whether purchases and redemptions of Creation Units will be for cash or in-kind depends primarily on the regulatory requirements and settlement mechanisms relevant to the Fund's portfolio holdings and the Fund is not limited to engaging in in-kind transactions to any particular market circumstances. As further described in the SAI, Creation Units typically are issued on a two Business Days ("T+2") basis after a purchase order has been received in good order and the transfer of good title to the Fund of any in-kind securities and/or cash required to purchase a Creation Unit have been completed (subject to certain exceptions). Similarly, and also as further described in the SAI, deliveries of redemption proceeds by a Fund generally will be made on a T+2 basis after a redemption order has been received in good order and the requisite number of Fund shares have been delivered (subject to certain exceptions). The Fund reserves the right to settle Creation Unit transactions on a basis other than T+2 in order to, among other matters, accommodate non-U.S. market holiday schedules, closures and settlement cycles, to account for different treatment among non-U.S. and U.S. markets of dividend record dates and ex-dividend dates (i.e., the last day the holder of a security can sell the security and still receive dividends payable on the security) and in certain other circumstances. The Fund has received exemptive relief to delay such settlement for up to 14 days from the date an order has been submitted in good order and the requisite cash and/or assets delivered to the Fund to accommodate foreign holidays, as further described in the SAI, and otherwise may delay redemptions up to 7 days or longer as permitted by applicable law, regulations and interpretations such as where unusual market conditions affect the NYSE or an emergency exists which makes it impracticable for the Fund to dispose of or value securities it owns or the Fund has received an SEC order.

The Fund intends to comply with the U.S. federal securities laws in accepting securities for deposit and satisfying redemptions with redemption securities by, among other means, assuring that any securities accepted for deposit and any securities used to satisfy redemption requests will be sold in transactions that would be exempt from registration under the Securities Act. Further, an Authorized Participant that is not a "qualified institutional buyer," as such term is defined under Rule 144A of the Securities Act, will not be able to receive restricted securities eligible for resale under Rule 144A.

Shareholder Information

Once created, shares are listed on the Exchange and trade in the secondary market. When you buy or sell the Fund's shares in the secondary market, you will pay or receive the market price. Shares can be bought and sold throughout the trading day like other publicly traded securities. Most investors will buy and sell shares through a broker and, thus, will incur customary brokerage commissions and charges when buying or selling shares.

The secondary markets are closed on weekends and also are generally closed on the following holidays: New Year's Day, Martin Luther King, Jr. Day, Presidents' Day, Good Friday, Memorial Day (observed), Independence Day, Labor Day, Columbus Day, Veterans' Day, Thanksgiving Day, and Christmas Day.

For more information on how to buy and sell shares of the Fund, call 1.855.857.2638 or visit www.kraneshares.com.

Share Trading Prices and Intraday Indicative Value

The trading prices of the Fund's shares listed on its Exchange may differ from the Fund's daily NAV and can be affected by market forces of supply and demand, economic conditions and other factors. The Exchange intends to disseminate an "intraday indicative value" ("IIV") for the Fund every fifteen seconds during the trading hours of each Business Day. The IIV is calculated for the Fund by: (i) calculating the current value of the deposit instruments and any short positions; (ii) calculating the estimated amount of cash and/or money market instruments per creation unit held in the Fund's portfolio; (iii) calculating the current in-the-money or out-of-the-money value of the financial instruments held by the Fund, if any, (iv) adding (i) through (iii) to arrive at a value and (v) dividing that value by the number of shares in a Fund creation unit. The IIV should not be viewed as a "real-time" update of the NAV of the Fund because the approximate value may not be calculated in the same manner as the NAV, which is computed once a day, and may include stale values. The Fund is not involved in, or responsible for, the calculation or dissemination of the IIVs and make no warranty as to their accuracy.

Premium/Discount Information

Information showing the number of days the market price of the Fund's shares was greater than the Fund's NAV per share (*i.e.*, at a premium) and the number of days it was less than the Fund's NAV per share (*i.e.*, at a discount) for various time periods is available by visiting the Fund's website at www.kraneshares.com. The premium and discount information contained on the website represents past performance and cannot be used to predict future results.

Portfolio Holdings Information

A description of the Fund's policies and procedures with respect to the disclosure of Fund portfolio securities is available in the Fund's Statement of Additional Information ("SAI"). The holdings of the Fund can be found on the Fund's website at www.kraneshares.com.

Active Investors and Market Timing

The Trust's Board of Trustees has determined not to adopt policies and procedures designed to prevent or monitor for frequent purchases and redemptions of the Fund's shares because the Fund sells and redeems its shares at NAV only in Creation Units pursuant to the terms of an Authorized Participant Agreement between the Authorized Participant and the Distributor, and such direct trading between the Fund and Authorized Participants is critical to ensuring that the Fund's shares trade at

Shareholder Information

or close to NAV. Further, the vast majority of trading in Fund shares occurs on the secondary market, which does not involve the Fund directly and therefore does not cause the Fund to experience many of the harmful effects of market timing, such as dilution and disruption of portfolio management. In addition, the Fund imposes a transaction fee on Creation Unit transactions, which is designed to offset transfer and other transaction costs incurred by the Fund in connection with the issuance and redemption of Creation Units and may employ fair valuation pricing to minimize potential dilution from market timing. The Fund reserves the right to reject any purchase order at any time and reserves the right to impose restrictions on disruptive, excessive, or short-term trading.

Investments by Registered Investment Companies

Section 12(d)(1) of the 1940 Act restricts investments by investment companies in the securities of other investment companies, including shares of the Fund. Provided, generally, that the Fund's investments comply with Section 12(d)(1)(A), registered investment companies are permitted to invest in the Fund beyond the limits set forth in Section 12(d)(1) subject to certain terms and conditions, including that such investment companies enter into an agreement with the Fund.

Continuous Offering

The method by which Creation Units of Fund shares are created and traded may raise certain issues under applicable securities laws. Because new Creation Units of shares are issued and sold by the Fund on an ongoing basis, a "distribution," as such term is used in the Securities Act, may occur at any point. Broker-dealers and other persons are cautioned that some activities on their part may, depending on the circumstances, result in their being deemed participants in a distribution in a manner which could render them statutory underwriters and subject them to the prospectus delivery requirement and liability provisions of the Securities Act.

For example, a broker-dealer firm or its client may be deemed a statutory underwriter if it takes Creation Units after placing an order with the Distributor, breaks them down into constituent shares and sells the shares directly to customers or if it chooses to couple the creation of a supply of new shares with an active selling effort involving solicitation of secondary market demand for shares. A determination of whether one is an underwriter for purposes of the Securities Act must take into account all the facts and circumstances pertaining to the activities of the broker-dealer or its client in the particular case, and the examples mentioned above should not be considered a complete description of all the activities that could lead to a characterization as an underwriter.

Broker-dealer firms should also note that dealers who are not "underwriters" but are effecting transactions in shares, whether or not participating in the distribution of shares, are generally required to deliver a prospectus. This is because the prospectus delivery exemption in Section 4(3) of the Securities Act is not available in respect of such transactions as a result of Section 24(d) of the 1940 Act. As a result, broker-dealer firms should note that dealers who are not "underwriters" but are participating in a distribution (as contrasted with engaging in ordinary secondary market transactions) and thus dealing with the shares that are part of an overallotment within the meaning of Section 4(3)(C) of the Securities Act, will be unable to take advantage of the prospectus delivery exemption provided by Section 4(3) of the Securities Act. For delivery of prospectuses to exchange members, the prospectus delivery mechanism of Rule 153 under the Securities Act is only available with respect to transactions on a national exchange.

Shareholder Information

Dealers effecting transactions in the Fund's shares, whether or not participating in this distribution, are generally required to deliver a Prospectus. This is in addition to any obligation of dealers to deliver a Prospectus when acting as underwriters.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank), Krane, the Fund sub-adviser, as applicable, or an affiliate may pay the intermediary for marketing activities or other services related to the sale or promotion of the Fund. These payments may create a conflict of interest by influencing the broker-dealer or other financial intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.

Distribution Plan

The Fund has adopted a Distribution Plan (the "Plan") that allows the Fund to pay distribution fees to the Distributor and other firms that provide distribution services ("Service Providers"). Under the Plan, if a Service Provider provides distribution services, the Fund would pay distribution fees to the Distributor at an annual rate not to exceed 0.25% of average daily net assets, pursuant to Rule 12b-1 under the 1940 Act. The Distributor would, in turn, pay the Service Provider out of its fees. The Board of Trustees currently has determined not to implement any 12b-1 fees pursuant to the Plan. 12b-1 fees may only be imposed after approval by the Board of Trustees. Because any distribution fees would be paid out of the Fund's assets on an on-going basis, if payments are made in the future, the distribution fees would increase the cost of your investment and may cost you more than paying other types of sales charges.

Householding Policy

To reduce expenses, we mail only one copy of the prospectus or summary prospectus, each annual and semi-annual report, and any proxy statements to each address shared by two or more accounts with the same last name or that the Trust reasonably believes are members of the same family. If you wish to receive individual copies of these documents, please call the Trust at 1.855.857.2638 between the hours of 8:30 a.m. and 6:00 p.m. Eastern Time on days the Fund is open for business or contact your financial institution. We will begin sending you individual copies thirty days after receiving your request. **Investors who hold their shares through an intermediary are subject to the intermediary's policies. Contact your financial intermediary for any questions you may have.**

Dividends and Distributions

The Fund pays out dividends to shareholders at least annually. The Fund distributes its net capital gains, if any, to shareholders annually. The Fund may make distributions on a more frequent basis. The Fund reserves the right to declare special distributions, including if, in its reasonable discretion, such action is necessary or advisable to preserve the status of the Fund as a regulated investment company under Subchapter M of the Code, to avoid imposition of income or excise taxes on undistributed income.

Additional Tax Information

The following is a summary of some important tax issues that affect the Fund and its shareholders. The summary is based on current tax laws, which may be changed by legislative, judicial or administrative action. You should not consider this summary to be a detailed explanation of the tax treatment of the Fund, or the tax consequences of an investment in the Fund. **More information about taxes is located in the SAI. You are urged to consult your tax adviser regarding specific questions as to federal, state and local income taxes.**

Tax Status of the Fund

The Fund is treated as a separate entity for federal tax purposes, and intends to qualify for the special tax treatment afforded to regulated investment companies. As long as the Fund qualifies for treatment as a regulated investment company, it pays no federal income tax on the earnings it distributes to shareholders.

Tax Status of Distributions

The Fund will, at least annually, distribute substantially all of its net investment taxable income and net capital gains income.

The income dividends you receive from the Fund (which include the Fund's short-term capital gains) will be taxed as either ordinary income or qualified dividend income. For non-corporate shareholders, dividends that are reported as qualified dividend income are generally taxable at reduced maximum tax rates to the extent that the Fund receives qualified dividend income and subject to certain limitations and holding period requirements.

Distributions of the Fund's short-term capital gains are generally taxable as ordinary income. Any distributions of net capital gain (the excess of the Fund's net long-term capital gains over its net short-term capital losses) are taxable as long-term capital gains regardless of how long you have owned your shares. Long-term capital gains are taxable at reduced maximum tax rates.

If the Fund makes distributions to a shareholder in excess of the Fund's current and accumulated earnings and profits in any taxable year, the excess distribution will be treated as a return of capital to the extent of the shareholder's tax basis in its shares, and thereafter as capital gain. A return of capital is not taxable, but reduces a shareholder's tax basis in its shares, thus reducing any loss or increasing any gain on a subsequent taxable disposition by the shareholder of its shares.

The Fund may invest in complex securities. These investments may be subject to numerous special and complex rules. These rules could affect whether gains and losses recognized by the Fund are treated as ordinary income or capital gain, accelerate the recognition of income to the Fund and/or defer the Fund's ability to recognize losses. In turn, these rules may affect the amount, timing or character of distributions you receive from the Fund.

Dividends and distributions are generally taxable to you whether you receive them in cash or in additional shares. Corporate shareholders may be entitled to a dividends-received deduction for the portion of dividends they receive that is attributable to dividends received by the Fund from U.S. corporations, subject to certain limitations. The Fund does not expect to distribute dividends eligible for qualified dividend income treatment or the dividends received deduction.

Distributions paid in January but declared by the Fund in October, November or December of the previous year may be taxable to you in the previous year. Your broker will inform you of the amount of your ordinary income dividends, qualified dividend income, and capital gains distributions shortly after the close of each calendar year.

Additional Tax Information

If you lend your Fund shares pursuant to securities lending arrangements, you may lose the ability to treat the Fund's dividends (paid while the shares are held by the borrower) as qualified dividend income. Consult your financial intermediary or tax adviser.

Some foreign governments levy withholding taxes against dividend and interest income. Although in some countries a portion of these withholding taxes is recoverable, the non-recovered portion will reduce the income received from the securities in the Fund. If more than 50% of the total assets of the Fund at the close of a year consist of non-U.S. stocks or securities, then the Fund may elect, for U.S. federal income tax purposes, to treat certain non-U.S. income taxes (including withholding taxes) paid by the Fund as paid by its shareholders.

If you hold your shares in a tax-qualified retirement account, you generally will not be subject to federal taxation on income received with respect to the shares (including Fund dividends and distributions, and any gain on the sale of shares), until you begin receiving payments from your retirement account. You should consult your tax adviser regarding the tax rules that apply to your retirement account.

Tax Status of Share Transactions

Any capital gain or loss upon a sale of the Fund's shares is generally treated as a long-term gain or loss if the shares have been held for more than one year and as a short-term gain or loss if held for one year or less. Any capital loss on the sale of the Fund's shares held for six months or less is treated as a long-term capital loss to the extent that any capital gain distributions were paid with respect to such shares.

Medicare Contribution Tax

U.S. individuals with income exceeding \$200,000 (\$250,000 if married and filing jointly) are subject to a 3.8% Medicare contribution tax on all or a portion of their "net investment income," including interest, dividends, and certain capital gains (including capital gains realized on the sale or exchange of shares of the Fund). This 3.8% tax also applies to all or a portion of the undistributed net investment income of certain shareholders that are estates and trusts.

Back-Up Withholding

The Fund will be required in certain cases to withhold at applicable withholding rates (currently 24%) and remit to the U.S. Treasury the amount withheld on amounts payable to any shareholder who (1) has provided the Fund either an incorrect tax identification number or no number at all, (2) is subject to back-up withholding by the Internal Revenue Service ("IRS") for failure to properly report payments of interest or dividends, (3) has failed to certify to the Fund that such shareholder is not subject to back-up withholding, or (4) has not certified that such shareholder is a U.S. person (including a U.S. resident alien).

Non-U.S. Investors

If you are not a citizen or permanent resident of the United States or if you are a non-U.S. entity, the Fund's ordinary income dividends (which include distributions of net short-term capital gains) will generally be subject to a 30% U.S. withholding tax, unless a lower treaty rate applies, provided that withholding tax will generally not apply to any gain or income realized by a non-U.S. shareholder in respect of any distributions of long-term capital gains or upon the sale or other disposition of shares of the Fund. You also may potentially be subject to U.S. federal estate taxes.

Additional Tax Information

A 30% withholding tax will generally be imposed on dividends paid by the Fund to (i) foreign financial institutions including non-U.S. investment funds unless they agree to collect and disclose to the IRS, or the tax authorities in their home jurisdictions, information regarding their direct and indirect U.S. account holders and (ii) certain other foreign entities, unless they certify certain information regarding their direct and indirect U.S. owners. A non-U.S. shareholder may be exempt from the withholding described in this paragraph under an intergovernmental agreement between the United States and a foreign government, provided that the shareholder and the applicable foreign government comply with the terms of such agreement. Recently issued proposed regulations (which are effective while pending) eliminate the application of the Foreign Account Tax Compliance Act ("FATCA") withholding tax to capital gain dividends and redemption proceeds that was scheduled to take effect in 2019.

State Tax Considerations

In addition to federal taxes, distributions by the Fund and ownership of the Fund's shares may be subject to state and local taxes. You should consult your tax adviser regarding how state and local tax laws affect your investment in the Fund's shares.

Chinese Tax Considerations

Although Chinese law provides for a 10% tax on capital gains realized by non-residents ("CGT"), significant uncertainties remain regarding the implementation of this law. Such uncertainties may result in capital gains imposed upon the Fund relative to debt securities of companies headquartered, managed or listed in China. While the application and enforcement of this law with respect to the Fund remain subject to clarification, to the extent that such taxes are imposed on any capital gains of the Fund, the Fund's NAV or returns may be adversely impacted.

Per a circular (Caishui [2014] 79), the Fund is temporarily exempt from the Chinese tax on capital gains ("CGT") on trading in A-Shares as a QFII or RQFII on the Shanghai Stock Exchange through the Shanghai-Hong Kong Stock Connect as of November 17, 2014, and the Shenzhen Stock Exchange through the Shenzhen-Hong Kong Stock Connect as of December 5, 2016. There is no indication as to how long the temporary exemption will remain in effect. Accordingly, a Fund may be subject to such taxes in the future. On November 7, 2018, the Chinese government announced a three-year exemption from the corporate income tax withholding tax and value added tax for China-sourced bond interest derived by overseas institutional investors, but its application, such as with respect to the type of debt issuers covered by the exemption, and whether such taxes will be implemented again after November 6, 2021, remains unclear in certain respects. The Fund reserves the right to establish reserves for taxes which present uncertainty as to whether they will be assessed, although they currently do not do so. If a Fund establishes such a reserve but is not ultimately subject to these taxes, shareholders who redeemed or sold their shares while the reserve was in place will effectively bear the tax and may not benefit from the later release, if any, of the reserve. Conversely, if a Fund does not establish such a reserve but ultimately is subject to the tax, shareholders who redeemed or sold their shares prior to the tax being withheld, reserved or paid will have effectively avoided the tax. Investors should note that such provision, if any, may be excessive or inadequate to meet actual tax liabilities (which could include interest and penalties) on a Fund's investments. As a result, investors may be advantaged or disadvantaged depending on the final rules of the relevant tax authorities.

Additional Tax Information

Taxes on Creations and Redemptions of Creation Units

A person who purchases a Creation Unit by exchanging securities in-kind generally will recognize a gain or loss equal to the difference between (i) the sum of the market value of the Creation Units at the time of the exchange and any net amount of cash received by the Authorized Participant in the exchange and (ii) the sum of the purchaser's aggregate basis in the securities surrendered and any net amount of cash paid for the Creation Units. A person who redeems Creation Units and receives securities in-kind from a Fund will generally recognize a gain or loss equal to the difference between the redeemer's basis in the Creation Units, and the aggregate market value of the securities received and any net cash received. The IRS, however, may assert that a loss realized upon an in-kind exchange of securities for Creation Units or an exchange of Creation Units for securities cannot be deducted currently under the rules governing "wash sales," or on the basis that there has been no significant change in economic position. Persons effecting in-kind creations or redemptions should consult their own tax adviser with respect to these matters.

The Fund has the right to reject an order for Creation Units if the purchaser (or a group of purchasers) would, upon obtaining the shares so ordered, own 80% or more of the outstanding shares of the Fund and if, pursuant to section 351 of the Code, the Fund would have a basis in the deposit securities different from the market value of such securities on the date of deposit. The Fund also has the right to require information necessary to determine beneficial share ownership for purposes of the 80% determinations.

Index Provider Information and Disclaimers

MSCI Inc. is a leading provider of global indexes. MSCI is not affiliated with the Trust, Krane, the Trust's administrator, custodian, transfer agent or Distributor, or any of their respective affiliates. Krane has entered into a license agreement with MSCI to use the relevant Underlying Indexes and MSCI marks, and sublicenses such rights to the relevant Fund at no charge. Krane uses the marks for the purpose of promoting and marketing the Fund.

The Fund is not sponsored, endorsed, sold or promoted by MSCI Inc. ("MSCI"), any of its affiliates, any of its information providers or any other third party involved in, or related to, compiling, computing or creating any MSCI index (collectively, the "MSCI Parties"). The MSCI indexes are the exclusive property of MSCI. MSCI and the MSCI index names are service mark(s) of MSCI or its affiliates and have been licensed for use for certain purposes by Krane. None of the MSCI parties makes any representation or warranty, express or implied, to the issuer or owners of the Fund or any other person or entity regarding the advisability of investing in funds generally or in this fund particularly or the ability of any MSCI index to track corresponding stock market performance. MSCI or its affiliates are the licensors of certain trademarks, service marks and trade names and of the MSCI indexes which are determined, composed and calculated by MSCI without regard to the Fund or the issuer or owners of the Fund or any other person or entity. None of the MSCI Parties has any obligation to take the needs of the issuer or owners of the Fund or any other person or entity into consideration in determining, composing or calculating the MSCI indexes. None of the MSCI Parties is responsible for or has participated in the determination of the timing of, prices at, or quantities of the Fund to be issued or in the determination or calculation of the equation by or the consideration into which the Fund are redeemable. Further, none of the MSCI Parties has any obligation or liability to the issuer or owners of the Fund or any other person or entity in connection with the administration, marketing or offering of the Fund.

Although MSCI shall obtain information for inclusion in or for use in the calculation of the MSCI indexes from sources that MSCI considers reliable, none of the MSCI Parties warrants or guarantees the originality, accuracy and/or the completeness of any MSCI index or any data included therein. None of the MSCI Parties makes any warranty, express or implied, as to results to be obtained by the issuer of the Fund, owners of the Fund, or any other person or entity, from the use of any MSCI Index or any data included therein. None of the MSCI Parties shall have any liability for any errors, omissions or interruptions of or in connection with any MSCI index or any data included therein. Further, none of the MSCI Parties makes any express or implied warranties of any kind, and the MSCI Parties hereby expressly disclaim all warranties of merchantability and fitness for a particular purpose, with respect to each MSCI index and any data included therein. Without limiting any of the foregoing, in no event shall any of the MSCI Parties have any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages. No purchaser, seller or holder of this security, product or fund, or any other person or entity, should use or refer to any MSCI trade name, trademark or service mark to sponsor, endorse, market or promote this security without first contacting MSCI to determine whether MSCI's permission is required. Under no circumstances may any person or entity claim any affiliation with MSCI without the prior written permission of MSCI.

More information about the Index Provider is located in the SAI.

Additional Disclaimers

Krane and Trust Disclaimer

Neither Krane nor the Trust guarantees the accuracy or the completeness of the Underlying Index or any data included therein and neither shall have any liability for any errors, omissions or interruptions therein. Krane and the Fund further make no representation or warranty, express or implied, to the owners of shares of the Fund or any members of the public as to results to be obtained by the Fund from the use of the Underlying Index, as to any data included therein, or as to the advisability of investing in securities generally or in the Funs particularly. Krane expressly disclaims all warranties of merchantability or fitness for a particular purpose or use with respect to the Underlying Index the Fund. Without limiting any of the foregoing, in no event shall Krane have any liability for any special, punitive, direct, indirect or consequential damages (including lost profits), even if notified of the possibility of such damages.

NYSE Arca, Inc. Disclaimer

Shares of the Fund are not sponsored, endorsed or promoted by NYSE Arca, Inc. ("NYSE Arca"). NYSE Arca makes no representation or warranty, express or implied, to the owners of the shares of the Fund or any member of the public regarding the ability of the Fund to track the total return performance of the Underlying Index or the ability of the Underlying Indexes to track stock market performance. NYSE Arca is not responsible for, nor has it participated in, the determination of the compilation or the calculation of the Underlying Index, nor in the determination of the timing of, prices of, or quantities of shares of the Fund to be issued, nor in the determination or calculation of the equation by which the shares are redeemable. NYSE Arca has no obligation or liability to owners of the shares of the Funs in connection with the administration, marketing or trading of the shares of the Fund.

NYSE Arca does not guarantee the accuracy and/or the completeness of the Underlying Index or any data included therein. NYSE Arca makes no warranty, express or implied, as to results to be obtained by the Trust on behalf of the Fund as licensee, licensee's customers and counterparties, owners of the shares of the Fund, or any other person or entity from the use of the subject index or any data included therein in connection with the rights licensed as described herein or for any other use. NYSE Arca makes no express or implied warranties and hereby expressly disclaims all warranties of merchantability or fitness for a particular purpose with respect to the Underlying Index or any data included therein. Without limiting any of the foregoing, in no event shall NYSE Arca have any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages.

Financial Highlights

No financial highlights are available for the Fund because the Fund had not commenced operations prior to the end of the prior fiscal year.

KraneShares

Additional Information

Additional and more detailed information about the Fund is included in the SAI dated June 30, 2020. The SAI has been filed with the SEC and is incorporated by reference into this Prospectus and, therefore, legally forms a part of this Prospectus. The SEC maintains the EDGAR database on its website ("<http://www.sec.gov>") that contains the SAI, material incorporated by reference, and other information regarding registrants that file electronically with the SEC and copies of this information may be obtained, after paying a duplicating fee, by electronic request at the following e-mail address: publicinfo@sec.gov.

You may obtain a copy of the SAI or the Annual or Semi-Annual Reports or make inquiries, without charge by calling 1.855.857.2638, visiting www.kraneshares.com, or writing the Trust at 280 Park Avenue, 32nd Floor, New York, NY 10017. Additional information about the Fund's investments will be available in the Annual and Semi-Annual Reports. Also, in the Fund's Annual Report, you will find a discussion of the market conditions and investment strategies that significantly affected the Fund's performance during its last fiscal year.

No one has been authorized to give any information or to make any representations not contained in this Prospectus or in the Fund's SAI in connection with the offering of Fund shares. Do not rely on any such information or representations as having been authorized by the Fund, Krane or the sub-adviser, as applicable. This Prospectus does not constitute an offering by the Fund in any jurisdiction where such an offering is not lawful.

The Trust enters into contractual arrangements with various parties, including among others, the Fund's investment adviser, sub-adviser(s) (if applicable), distributor, custodian, and transfer agent who provide services to the Fund. Shareholders are not parties to any such contractual arrangements or intended beneficiaries of those contractual arrangements, and those contractual arrangements are not intended to create in any shareholder any right to enforce them against the service providers or to seek any remedy under them against the service providers, either directly or on behalf of the Trust.

This prospectus provides information concerning the Fund that you should consider in determining whether to purchase Fund shares. Neither this prospectus nor the SAI is intended, or should be read, to be or give rise to an agreement or contract between the Trust, the Trustees, or the Fund and any investor, or to give rise to any rights in any shareholder or other person other than any rights under federal or state law that may not be waived.

The Trust's Investment Company Act file number is 811-22698.
