

KRANESHARES TRUST

Each series of KraneShares Trust (“Trust”) listed in Appendix A hereto
(each, a “Fund”)

Supplement dated August 1, 2026
to the currently effective Prospectus and Statement of Additional Information,
as supplemented, for each Fund

This supplement provides new and additional information beyond that contained in each currently effective Prospectus and the Statement of Additional Information listed above and should be read in conjunction with the Prospectus and Statement of Additional Information.

On June 23, 2026, certain directors, officers and employees of Krane Funds Advisors, LLC (“Krane” or “Adviser”), among others, through KFA Two Holdings, LLC, which is a wholly owned subsidiary of KFA One Holdings, LLC, each located at 280 Park Avenue, New York, New York 10017, acquired a 50.1% interest in Krane from China International Capital Corporation (USA) Holdings Inc. (“Transaction”). Under the Investment Company Act of 1940, as amended (the “1940 Act”), the closing of the Transaction (“Closing”) constituted a change in control of Krane and resulted in the automatic termination of the previous investment advisory agreement between the Trust and Krane, on behalf of each Fund (the “Prior Advisory Agreement”). To provide for continuity of management of the Funds, the Board of Trustees of the Trust (“Board”) approved a new investment advisory agreement (“New Advisory Agreement”), on behalf of each Fund, and the solicitation of shareholder approval of the New Advisory Agreement. The New Advisory Agreement is the same as the Prior Advisory Agreement, except with respect to its effective date.

Solicitation for shareholder approval of the New Advisory Agreement with respect to the Funds is ongoing (“Proxy Solicitation”). Until shareholder approval of the New Advisory Agreement is obtained with respect to a Fund, the information under (1) the section of the Prospectus titled “Management – Investment Adviser” and (2) the section of the Statement of Additional Information titled “Investment Adviser” is hereby amended to reflect that, the Trust, on behalf of such Fund, has entered into an interim advisory agreement with Krane (“Interim Advisory Agreement”), pursuant to which Krane is serving as investment adviser to the Fund until the earlier of November 20, 2026, or shareholders of the Fund approve the New Advisory Agreement. The Interim Advisory Agreement is the same as the Prior Advisory Agreement, except with respect to its effective date and term of the agreement and certain other differences required by regulation.

To the extent any Fund has an investment sub-adviser (“Sub-Adviser,” and such Fund (“Sub-Advised Fund”)) and relies on the manager-of-managers exemptive relief Krane has obtained from the SEC (“Exemptive Relief”), which permits Krane to hire and fire sub-advisers without shareholder approval, once such Fund’s shareholders approve the New Advisory Agreement, Krane will appoint the Sub-Adviser as sub-adviser pursuant to the Exemptive Relief and enter into a new investment sub-advisory agreement with the Sub-Adviser (“New Sub-Advisory Agreement”). To the extent any Sub-Advised Fund does not currently rely on the Exemptive Relief, shareholders are being asked to approve such reliance in the Proxy Solicitation so that Krane may appoint the Sub-Adviser as sub-adviser pursuant to the Exemptive Relief and enter into a New Sub-Advisory Agreement with the Sub-Adviser. The New Sub-Advisory Agreement for each Sub-Adviser is the same as its prior investment sub-advisory agreement (“Prior Sub-Advisory Agreement”), except with respect to its effective date.

To provide for the continuous management of each Sub-Advised Fund until shareholder approval of the New Advisory Agreement is obtained, the Board has approved an interim investment sub-advisory agreement (“Interim Sub-Advisory Agreement”) with each Sub-Adviser, which runs concurrent with Interim Advisory Agreement. Accordingly, until such time, the information under (1) the section of the Prospectus titled “Management – Investment Sub-Advisers” and (2) the section of the Statement of Additional Information titled “Sub-Advisers” is hereby amended to reflect that Krane and the Trust, on behalf of each Sub-Advised Fund have entered into the Interim Sub-Advisory Agreement with the relevant Sub-Adviser. The Interim Sub-Advisory Agreement for each Sub-Adviser is the same as its Prior Sub-Advisory Agreement, except with respect to its effective date and term.

Summary Prospectus

KraneShares Mount Lucas Managed Futures Index Strategy ETF

Principal Listing Exchange for the Fund: NYSE Arca, Inc. (the “Exchange”)
Ticker Symbol: KMLM

August 1, 2026

Before you invest, you may want to review the Fund’s Prospectus, which contains more information about the Fund and its risks. You can find the Fund’s Prospectus, Statement of Additional Information, recent reports to shareholders and other information about the Fund online at www.kraneshares.com. You can also get this information at no cost by calling 1-855-857-2638, by sending an e-mail request to KraneFunds@seic.com or by asking any financial intermediary that offers shares of the Fund. The Fund’s Prospectus and Statement of Additional Information, each dated August 1, 2026, as each may be amended or supplemented from time to time, are incorporated by reference into this Summary Prospectus and may be obtained, free of charge, at the website, phone number or email address noted above.

Investment Objective

The KraneShares Mount Lucas Managed Futures Index Strategy ETF (the “Fund”) seeks to provide investment results that, before fees and expenses, track the price performance of the KFA MLM Index (“Index”).

Fees and Expenses of the Fund

The following table describes the fees and expenses you may pay if you buy, hold, and sell shares of the Fund. **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the tables and examples below.**

Shareholder Fees (fees paid directly from your investment)	None
Annual Fund Operating Expenses	
(expenses that you pay each year as a percentage of the value of your investment)	
Management Fees	0.89%
Distribution and/or Service (12b-1) Fees*	0.00%
Other Expenses	0.01%
Total Annual Fund Operating Expenses.	0.90%

* Pursuant to a Distribution Plan, the Fund may bear a Rule 12b-1 fee not to exceed 0.25% per year of the Fund's average daily net assets. However, no such fee is currently paid by the Fund, and the Board of Trustees has not currently approved the commencement of any payments under the Distribution Plan.

Example

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated. The Example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions, whether you do or do not sell your shares, your costs would be:

1 Year	3 Years	5 Years	10 Years
\$92	\$287	\$498	\$1,108

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in the Annual Fund Operating Expenses or in the Example, affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 0% of the average value of its portfolio. Regulations require that the portfolio turnover rate be calculated without regard to trades of short-term cash instruments, in-kind transactions or derivatives transactions, which may comprise a significant portion of the Fund's trading. If such trades were reflected, the calculated portfolio turnover rate may be significantly higher.

Principal Investment Strategies

The Fund seeks to achieve its goal by investing in commodity, currency, and global fixed income futures contracts traded on U.S. and foreign exchanges that are the same as or similar to those included in the Index.

The Index is a modified version of the MLM Index, which is an affiliated index that measures the performance of a portfolio of commodity, currency, and global fixed income futures contracts traded on U.S. and foreign exchanges using a trend following methodology. The Index determines weightings of these three types of futures contracts by the relative historical volatility of each type of futures contract as determined by the MLM Index Committee. Within each type of futures contract, the underlying constituent markets are equal dollar weighted.

The Index will roll futures contracts forward on a market by market basis as each constituent market nears expiration. The selection of the constituent markets occurs annually. The constituent markets of the futures contracts for the Index currently consist of the following commodities (corn, crude oil, copper, gold, heating oil, cattle, natural gas, soybeans, sugar, wheat and gasoline), currencies (British pound, Canadian dollar, Australian dollar, Euro, Japanese Yen, and Swiss francs), and global bond markets (Canadian government bond, Euro bund, Japanese government bond, Long gilt and Ten-year Treasuries). Constituent markets are traded both long and short based on each market's trading signals.

The Index evaluates market trading signals on a daily basis and rebalances on the first day of the month. In addition, the Index has a target average annualized volatility of 15% over time.

The Fund invests in futures contracts on commodities, currencies and global bond markets. The Fund utilizes a subsidiary (the "Subsidiary") for purposes of investing in futures contracts on commodities. The Subsidiary is a corporation operating under Cayman Islands law that is wholly-owned and controlled by the Fund. The Subsidiary is advised by the Fund's investment adviser, Krane Funds Advisors, LLC ("Krane" or "Adviser") and is sub-advised by Mount Lucas Index Advisers LLC, the Fund's sub-adviser ("MLIA" or "Sub-Adviser"). The Fund's investment in the Subsidiary may not exceed 25% of the value of its total assets (ignoring any subsequent market appreciation in the Subsidiary's value), which limitation is imposed by the Internal Revenue Code of 1986, as amended, and is measured at the end of the quarter. The Subsidiary has the same investment objective as the Fund and follows the same investment policies and restrictions as the Fund. Except as noted, for purposes of this Prospectus, references to the Fund's investment strategies and risks include those of its Subsidiary, and references to the Fund include the Subsidiary. While the Fund generally seeks to maintain exposure to the same futures contracts as those included in the Index, the Fund and Subsidiary may not replicate the Index. For example, the Fund may invest in futures with different maturity dates, the Fund may weigh the futures differently than the Index, or the Fund may purchase futures on different dates than the rebalancing date for the Index. Fund assets not invested in futures contracts or the Subsidiary generally will be invested in debt instruments, exchange-traded funds ("ETFs"), cash or cash equivalent instruments, or money market mutual funds.

The Fund may also invest directly and indirectly in certain debt instruments. The debt instruments in which the Fund intends to invest include government securities and corporate or other non-government fixed-income securities with maturities of up to 12 months. The Fund may invest in debt instruments indirectly through short-term bond funds and ETFs. The Fund may also invest in cash and cash equivalents, including money market funds. Currently, the Fund expects to invest in ETFs to gain exposure to debt instruments.

The Fund may also invest in instruments that are not included in the Index. These investments may include equity securities, derivative instruments (including swaps, futures, forwards, structured notes and options), other investment companies (including ETFs) and cash or cash equivalents (including money market funds). The other investment companies in which the Fund may invest may be advised, sponsored or otherwise serviced by Krane and/or its affiliates.

The Commodities Futures Trading Commission (the “CFTC”) has adopted certain requirements that subject registered investment companies and their advisers to regulation by the CFTC if a registered investment company invests more than a prescribed level of its net assets in CFTC-regulated futures, options and swaps, or if a registered investment company markets itself as providing investment exposure to such instruments. Due to the Fund’s use of CFTC-regulated futures and swaps above CFTC Rule 4.5 limits, the Fund is considered a “commodity pool” under the Commodity Exchange Act.

The Fund is non-diversified. To the extent the Index is concentrated in a particular industry, the Fund is expected to be concentrated in that industry. As of March 31, 2026, the Index was invested in the futures contracts of the 11 commodities, six currencies, and five global bond markets listed above. The Index is provided by MLIA (“Index Provider”), and the Index is calculated by Fuzzy Logix, Inc. (doing business as “FastINDX”).

Principal Risks

As with all exchange traded funds (“ETFs”), a shareholder of the Fund is subject to the risk that his or her investment could lose money. The Fund may not achieve its investment objective and an investment in the Fund is not by itself a complete or balanced investment program. An investment in the Fund is not a deposit with a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. An investment in the Fund involves the risk of total loss. In addition to these risks, the Fund is subject to a number of additional principal risks that may affect the Fund’s performance, net asset value (“NAV”) and trading price, including:

Affiliated Index Provider Risk. The Index Provider is an affiliated person of the Adviser, which poses potential conflicts of interest. For example, a potential conflict could arise between an affiliated person of the Index Provider or the Adviser and each Fund if that entity attempted to use information regarding changes and composition of each Index to the detriment of each Fund. Additionally, potential conflicts could arise with respect to the personal trading activity of personnel of the affiliated person who may have access to, or knowledge of, pending changes to each Index’s composition methodology or the constituent securities in each Index prior to the time that information is publicly disseminated. If shared, such knowledge could facilitate “front-running” (which describes an instance in which other persons trade ahead of each Fund). Although the Adviser and the Index Provider have taken steps designed to ensure that these potential conflicts are mitigated (e.g., via the adoption of policies and procedures that are designed to minimize potential conflicts of interest and the implementation of informational barriers designed to minimize the potential for the misuse of information about the Index), there can be no assurance that such measures will be successful.

Futures Contract Risk. Successful use of futures contracts draws upon the Adviser’s or Sub-Adviser’s skill and experience with respect to such instruments and is subject to special risk considerations. The primary risks associated with the use of futures contracts include: (a) an imperfect correlation between the change in market value of the reference asset and the price of the futures contract; (b) possible lack of a liquid secondary market for a futures contract and the resulting inability to close a futures contract when desired; (c) losses caused by unanticipated market movements, which are potentially unlimited; and (d) the inability to predict correctly the direction of market prices,

interest rates, currency exchange rates and other economic factors. When the Fund purchases or sells a futures contract, it is subject to daily variation margin calls that could be substantial. If the Fund has insufficient cash to meet daily variation margin requirements, it might need to sell securities at a time when such sales are disadvantageous.

Commodity and Commodity-Linked Derivatives Risk. The Fund, directly or indirectly, may have significant investment exposure to the commodities markets and/or a particular sector of the commodities markets, which may subject it to greater volatility than investments in traditional securities. The commodities markets are impacted by a variety of factors, including market movements, resource availability, commodity price volatility, speculation in the commodities markets, domestic and foreign political and economic events and policies, trade policies and tariffs, war, acts of terrorism, changes in domestic or foreign interest rates and/or investor expectations concerning interest rates, domestic and foreign inflation rates and investment and trading activities in commodities. The value of a commodity-linked derivative investment typically is based upon the price movements of a physical commodity and may be affected by these same factors as well as credit and interest rate risks. In addition, investments in commodity-linked derivatives may be subject to greater volatility than non-derivative based investments.

Fixed Income Securities Risk. Fixed income securities are subject to credit risk and interest rate risk. Credit risk refers to the possibility that the issuer of a security will not make timely interest payments or repay the principal of the debt issued (i.e., default on its obligations). A downgrade or default on securities held by the Fund could adversely affect the Fund's performance. Generally, the longer the maturity and the lower the credit quality of a security, the more sensitive it is to credit risk. Interest rate risk refers to fluctuations in the value of a debt resulting from changes in the level of interest rates. When interest rates go up, the prices of most debt instruments generally go down; and when interest rates go down, the prices of most debt instruments generally go up. Debt instruments with longer durations tend to be more sensitive to interest rate changes, typically making them more volatile. Interest rates have recently increased and may continue increasing, thereby heightening the risks associated with rising interest rates.

Currency Risk. To the extent that the Fund is exposed directly or indirectly to foreign currencies, including through its investments, or invests in securities or other instruments denominated in or indexed to foreign currencies, changes in currency exchange rates could adversely impact investment gains or add to investment losses. Currency exchange rates may fluctuate significantly over short periods of time and can be affected unpredictably by intervention, or failure to intervene, by U.S. or foreign governments or central banks or by currency controls or political developments in the U.S. or abroad. The Fund may also be subject to delays in converting or transferring U.S. dollars to foreign currencies and vice versa. This may adversely affect the Fund's performance.

A forward foreign currency contract involves a negotiated obligation to purchase or sell a specific currency at a future date (with or without delivery required), which may be any fixed number of days from the date of the contract agreed upon by the parties, at a price set at the time of the contract. Forward foreign currency contracts are not traded on exchanges; rather, a bank or dealer will act as agent or as principal in order to make or take future delivery, exposing the Fund to counterparty risk.

Commodity Pool Registration Risk. Under regulations promulgated by the CFTC, the Fund and the Subsidiary are considered commodity pools, and therefore each is subject to regulation under the Commodity Exchange Act and CFTC rules. Krane and MLIA are registered as a commodity pool operator and commodity trading adviser, respectively, and manages the Fund and the Subsidiary

in accordance with CFTC rules, as well as the rules that apply to registered investment companies. Commodity pools are subject to additional laws, regulations and enforcement policies, all of which may potentially increase compliance costs and may affect the operations and financial performance of the Fund and the Subsidiary. Additionally, positions in futures and other contracts may have to be liquidated at disadvantageous times or prices to prevent the Fund from exceeding any applicable position limits established by the CFTC. Such actions may subject the Fund to substantial losses.

Derivatives Risk. The use of derivatives (including swaps, futures, forwards, structured notes and options) may involve leverage, which includes risks that are different from, and greater than, the risks associated with investing directly in a reference asset, because a small investment in a derivative can result in a large impact on the Fund and may cause the Fund to be more volatile. Derivatives may at times be highly illiquid, and the Fund may not be able to close out or sell a derivative at a particular time or at an anticipated price. Derivatives can be difficult to value and valuation may be more difficult in times of market turmoil. There may be imperfect correlation between the derivative and that of the reference asset, resulting in unexpected returns that could materially adversely affect the Fund. Certain derivatives (such as swaps and options) are bi-lateral agreements that expose the Fund to counterparty risk, which is the risk of loss in the event that the counterparty to an agreement fails to make required payments or otherwise comply with the terms of derivative. In that case, the Fund may suffer losses potentially equal to, or greater than, the full value of the derivative if the counterparty fails to perform its obligations. That risk is generally thought to be greater with over-the-counter (“OTC”) derivatives than with derivatives that are exchange traded or centrally cleared. Counterparty risks are compounded by the fact that there are only a limited number of ways available to invest in certain reference assets and, therefore, there may be few counterparties to swaps or options based on those reference assets.

Pursuant to government regulations, the Fund’s portfolio turnover rate is calculated without regard to most derivatives. As a result, the Fund’s portfolio turnover may be low despite relatively high portfolio activity. High portfolio turnover or high portfolio activity may increase the Fund’s brokerage commission costs and other transaction costs and may negatively impact the Fund’s performance. Such portfolio turnover or activity also may generate net short-term capital gains.

Geographic Focus Risk. The Fund’s investments are expected to be focused in a particular country, countries, or region to approximately the same degree as the Index and therefore the Fund may be susceptible to adverse market, political, regulatory, and geographic events affecting that country, countries or region. Such geographic focus also may subject the Fund to a higher degree of volatility than a more geographically diversified fund.

European Union Risk. The economies of the European Union are dependent to a significant extent on those of certain key trading partners, including China, the United States, and other European countries. A reduction in spending on products and services exported from the European Union, or volatility in the financial markets of member countries, may have an adverse impact on the broader European Union economy and could adversely affect the Fund. Separately, the European Union faces issues involving its membership, structure, procedures and policies. The United Kingdom (UK) officially withdrew from the European Union on January 31, 2020. Upon the UK’s withdrawal from the European Union, the European Union and the UK entered into a transition phase, which concluded on December 31, 2020, and the UK and the European Union agreed upon a Trade and Cooperation Agreement that became fully effective on May 1, 2021. The UK, European Union and broader global economy may still experience volatility in foreign exchange markets as a result of these events. The

UK's withdrawal may also destabilize some or all of the other European Union member countries and/or the Eurozone. The exit of additional member states from the European Union would subject its currency and banking system to increased risk and would likely result in increased volatility, illiquidity and potentially lower economic growth in the affected markets. Additionally, the reintroduction of national currencies in one or more European Union countries or the abandonment of the Euro as a currency could adversely affect the Fund.

Foreign Securities Risk. Investments in securities of non-U.S. issuers may be less liquid than investments in U.S. issuers, may have less governmental regulation and oversight, and are typically subject to different investor protection standards than U.S. issuers. Investments in non-U.S. securities entail the risk of loss due to foreign currency fluctuations, political or economic instability, less complete financial information about the issuers, the possible imposition of withholding or confiscatory taxes, the possible seizure or nationalization of foreign holdings, and the possible establishment of exchange controls or freezes on the convertibility of currency. Foreign market trading hours, clearance and settlement procedures, and holiday schedules may limit the Fund's ability to buy and sell securities. Additionally, foreign issuers may be subject to different accounting, auditing, recordkeeping, and financial reporting requirements. Securities of issuers traded on foreign exchanges may be suspended, either by the issuers themselves, by an exchange or by governmental authorities. If the Fund holds positions in such suspended securities, the Fund may be adversely impacted. Certain countries in which the Fund may invest may be subject to extended settlement delays and/or foreign holidays, during which the Fund will unlikely be able to convert holdings to cash. All of these factors could result in a loss to the Fund.

Concentration Risk. From time to time, based on market or economic conditions, the Fund may have significant positions in one or more sectors or industries of the market. To the extent the Fund invests more heavily in particular sectors, its performance will be especially sensitive to developments that significantly affect those sectors. Individual sectors may be more volatile, and may perform differently, than the broader market. The industries that constitute a sector may all react in the same way to economic, political or regulatory events. Thus, the Fund is subject to loss due to adverse occurrences that affect one industry or group of industries or sector. While the Fund's sector and industry exposure is expected to vary over time, the Fund is currently subject to the principal risks of the sectors and industries disclosed herein.

Short Sale Risk. Short sales, at least theoretically, present a risk of unlimited loss on an individual security basis, since the Fund may be required to buy the security sold short at a time when the security has appreciated in value, and there is potentially no limit to the amount of such appreciation. Because the Fund may invest the proceeds of a short sale, another effect of short selling on the Fund is leverage, in that it amplifies changes in the Fund's net asset value since it increases the exposure of the Fund to the market. The Fund may not always be able to close out a short position at a favorable time or price. If the Fund covers its short sale at an unfavorable price, the cover transaction is likely to reduce or eliminate any gain, or cause a loss to the Fund. When the Fund is selling a security short, it must maintain a segregated account of cash or high-grade securities equal to the margin requirement. As a result, the Fund may maintain high levels of cash or other liquid assets (such as U.S. Treasury bills, money market instruments, certificates of deposit, high quality commercial paper and long equity positions). The Fund may utilize the collateral obtained from securities lending for this cash. The need to maintain cash or other liquid assets in segregated accounts could limit the Fund's ability to pursue other opportunities as they arise.

Non-Diversified Fund Risk. Because the Fund is non-diversified and may invest a greater portion of its assets in fewer issuers than a diversified fund, changes in the market value of a single portfolio holding could cause greater fluctuations in the Fund's share price than would occur in a diversified fund. This may increase the Fund's volatility and cause the performance of a single portfolio holding or a relatively small number of portfolio holdings to have a greater impact on the Fund's performance.

ETF Risk. As an ETF, the Fund is subject to the following risks:

Premium/Discount Risk. There may be times when the market price of the Fund's shares is more than the NAV intra-day (at a premium) or less than the NAV intra-day (at a discount). As a result, shareholders of the Fund may pay more than NAV when purchasing shares and receive less than NAV when selling Fund shares. This risk is heightened in times of market volatility or periods of steep market declines. In such market conditions, market or stop loss orders to sell Fund shares may be executed at prices well below NAV.

Secondary Market Trading Risk. Investors buying or selling shares in the secondary market may pay brokerage commissions, which may be a significant proportional cost for investors buying or selling relatively small amounts of shares. Secondary market trading is subject to bid-ask spreads and trading in Fund shares may be halted by the Exchange because of market conditions or other reasons. Although the Fund's shares are listed on the Exchange, there can be no assurance that an active trading market for shares will develop or be maintained or that the Fund's shares will continue to be listed. Trading in the Fund's shares on the exchange may be halted due to market conditions or for reasons that, in the view of the exchange, make trading in the Fund's shares inadvisable, such as extraordinary market volatility. In the event of a trading halt for an extended period of time, the Fund may be unable to execute its investment strategy and shareholders may be unable to liquidate any position in Fund shares.

Authorized Participants Concentration Risk. The Fund has a limited number of financial institutions that may act as Authorized Participants. To the extent they exit the business or are otherwise unable to proceed in creation and redemption transactions with the Fund and no other Authorized Participant is able to step forward to create or redeem, shares of the Fund may be more likely to trade at a premium or discount to NAV and possibly face trading halts or delisting.

Cash Transactions Risk. Because the Fund may effect its creations and redemptions at least partially or fully for cash, rather than in-kind securities, an investment in the Fund may be less tax-efficient than an investment in other ETFs as the Fund may recognize a capital gain that it could have avoided by making redemptions in-kind. Cash transactions may involve considerable transaction expenses and taxes, including brokerage fees, that might not have occurred if the Fund utilized in-kind transactions. To the extent any costs associated with cash transactions are not offset by any transaction fees payable by an Authorized Participant, the Fund's performance could be negatively impacted.

International Closed Market Trading Risk. To the extent the Fund's investments trade in markets that are closed when the Fund and Exchange are open, there are likely to be deviations between current pricing of an underlying security and the prices at which the underlying securities are valued for purposes of the Fund's NAV. As a result, Shares may appear to trade at a significant discount or premium to NAV greater than those incurred by other ETFs. In addition, shareholders may not be able to purchase or redeem their shares of the Fund, or purchase or sell shares of the Fund on the Exchange, on days when the NAV of the Fund could be significantly affected by events in the relevant non-U.S. markets. trading in Fund shares may be halted by the Exchange because

of market conditions or other reasons. If a trading halt occurs, a shareholder may temporarily be unable to purchase or sell shares of the Fund. In addition, although the Fund's shares are listed on the Exchange, there can be no assurance that an active trading market for shares will develop or be maintained or that the Fund's shares will continue to be listed.

Liquidity Risk. The Fund's investments are subject to liquidity risk, which exists when an investment is or becomes difficult or impossible to purchase or sell at an advantageous time and price. If a transaction is particularly large or if the relevant market is or becomes illiquid, it may not be possible to initiate a transaction or liquidate a position, which may cause the Fund to suffer significant losses and difficulties in meeting redemptions. Liquidity risk may be the result of, among other things, market turmoil, the reduced number and capacity of traditional market participants, or the lack of an active trading market. Markets for securities or financial instruments could be disrupted by a number of events, including, but not limited to, an economic crisis, natural disasters, new legislation or regulatory changes inside or outside the U.S. Liquid investments may become less liquid after being purchased by the Fund, particularly during periods of market stress. In addition, if a number of securities held by the Fund stop trading, it may have a cascading effect and cause the Fund to halt trading. Volatility in market prices will increase the risk of the Fund being subject to a trading halt.

Tracking Error Risk. The Fund's return may not match or achieve a high degree of correlation with the return of the Index. This may be due to, among other factors, the Fund holding cash under certain circumstances in lieu of Index investments, such as when the Fund is subject to delays converting U.S. dollars into a foreign currency to purchase foreign investments and unable to invest in certain constituents of the Index due to regulatory constraints, trading suspensions, and legal restrictions imposed by foreign governments. To the extent that the Fund employs a representative sampling strategy or calculates its NAV based on fair value prices and the value of the Index is based on investment's closing prices on local foreign markets, the Fund's ability to track the Index may be adversely affected.

Passive Investment and Index Risk. There is no guarantee that the Index will create the desired exposure and the Fund is not actively managed. It does not seek to "beat" the Index or take temporary defensive positions when markets decline. Therefore, the Fund may purchase or hold securities with current or projected underperformance.

Management Risk. The Fund may not fully replicate the Index and may hold less than the total number of investments in the Index. Therefore, the Fund is subject to the risk that the Sub-Adviser's investment selection process may not produce the intended results.

Market Risk. The values of the Fund's holdings could decline generally or could underperform other investments. In addition, there is a risk that policy changes by the U.S. Government, Federal Reserve, and/or other government actors, including those in foreign countries, or changes in global trade relationships could cause volatility in global financial markets, negative sentiment and higher levels of Fund redemptions, which could have a negative impact on the Fund and could result in losses. Geopolitical and other risks, including environmental and public health risks may add to instability in world economies and markets generally. Changes in value may be temporary or may last for extended periods and can occur suddenly and unexpectedly. Further, the Fund is susceptible to the risk that certain investments may be difficult or impossible to sell at a favorable time or price. Market developments may also cause the Fund's investments to become less liquid and subject to erratic price movements.

Artificial intelligence, including machine learning technology and generative artificial intelligence (collectively, “artificial intelligence”), is rapidly evolving. While the full extent of current or future risks related thereto is not possible to predict, artificial intelligence could significantly disrupt the business models and markets in which the Fund invests and subject the Fund or issuers in which it invests to increased competition, legal and regulatory risks and compliance costs, any of which could have a material adverse effect on the Fund or the business, financial condition and results of operations of the issuers in which it invests. The Fund’s service providers, or the issuers of securities in which the Fund invests may utilize artificial intelligence technologies in business operations. It is possible that the information provided through the use of artificial intelligence could be insufficient, incomplete, inaccurate or biased, or constitute infringement of third-party intellectual property rights, leading to adverse effects for the Fund, including, potentially, operational errors, cybersecurity vulnerabilities and investment losses. Moreover, technological developments in, and the increasingly widespread use of, artificial intelligence technologies may pose risks to the Manager and the Fund. For instance, the Fund may be exposed to competitive risks related to the adoption of artificial intelligence or other new technologies by others within the industry. In addition, investments in technology systems and artificial intelligence by the Manager may not deliver the benefits the Fund expects.

Regulatory Risk. The Fund is subject to the risk that a change in U.S. law and related regulations will impact the way the Fund operates, increase the particular costs of the Fund’s operations and/or change the competitive landscape. Additional legislative or regulatory changes could occur that may materially and adversely affect the Fund.

Subsidiary Investment Risk. By investing in the Subsidiary, the Fund is indirectly exposed to the risks associated with the Subsidiary’s investments. Since the Subsidiary is organized under the law of the Cayman Islands and is not registered with the SEC under the Investment Company Act of 1940, as amended (the “1940 Act”), the Fund will not receive all of the protections offered to shareholders of registered investment companies. Changes in the laws of the United States and/or the Cayman Islands could result in the inability of the Fund and/or the Subsidiary to operate as intended, which may negatively affect the Fund and its shareholders.

New/Small Fund Risk. The Fund is small and does not yet have a significant number of shares outstanding or significant assets under management and, therefore, even small trading or similar errors, if experienced, may have a significant impact on NAV. Small funds are at greater risk than larger funds of wider bid-ask spreads for its shares, trading at a greater premium or discount to NAV, liquidation and/or a stop to trading.

Valuation Risk. Independent market quotations for certain investments held by the Fund may not be readily available, and such investments may be fair valued or valued by a pricing service at an evaluated price. These valuations involve subjectivity and different market participants may assign different prices to the same investment. As a result, there is a risk that the Fund may not be able to sell an investment at the price assigned to the investment by the Fund. Such differences could be significant, particularly for illiquid securities and securities that trade in relatively thin markets and/or markets that experience extreme volatility. In addition, the securities in which the Fund invests may trade on days that the Fund does not price its shares; as a result, the value of Fund shares may change on days when investors cannot purchase or sell their Fund holdings.

Large Shareholder Risk. To the extent a large number of shares of the Fund is held by a single shareholder or a small group of shareholders, the Fund is subject to the risk that redemption by those shareholders of all or a large portion of their shares will adversely affect the Fund’s performance by

forcing the Fund to sell securities, potentially at disadvantageous prices, to raise the cash needed to satisfy such redemption requests. This risk may be heightened during periods of declining or illiquid markets, or to the extent that such large shareholders have short investment horizons or unpredictable cash flow needs. Such redemptions may also increase transaction costs and/or have adverse tax consequences for remaining shareholders.

Tax Risk. In order to qualify for the favorable tax treatment available to regulated investment companies, the Fund must satisfy certain income, asset diversification and distribution requirements each year. The Fund's pursuit of its investment strategy will potentially be limited by the Fund's intention to qualify for such treatment and could adversely affect the Fund's ability to so qualify. The Fund may make certain investments, the treatment of which for these purposes is unclear. The Fund's investments in issuers whose control persons are not certain creates a risk that tax authorities may retrospectively deem the Fund to have failed the asset diversification requirements. If the Fund were to fail the favorable tax treatment requirements, it would be taxed in the same manner as an ordinary corporation, which would adversely affect its performance.

U.S. Government Obligations Risk. Obligations of U.S. Government agencies and authorities receive varying levels of support and may not be backed by the full faith and credit of the U.S. Government, which could affect the Fund's ability to recover should they default. No assurance can be given that the U.S. Government will provide financial support to its agencies and authorities if it is not obligated by law to do so. Additionally, market prices and yields of securities supported by the full faith and credit of the U.S. government may decline or be negative for short or long periods of time.

Investments in Investment Companies Risk. The Fund may invest in other investment companies, including those advised, sponsored or otherwise serviced by Krane and/or its affiliates. The Fund will indirectly be exposed to the risks of investments by such funds and will incur its pro rata share of the underlying fund's expenses. Additionally, investments in ETFs are subject to ETF Risk. Krane is subject to conflicts of interest in allocating Fund assets to investment companies that are advised, sponsored or otherwise serviced by Krane and/or its affiliates. To the extent that the Fund invests in investment companies or other pooled investment vehicles that are not registered pursuant to the 1940 Act, it will not enjoy the protections of the U.S. law.

Cash and Cash Equivalents Risk. The Fund may hold cash or cash equivalents. Generally, such positions offer less potential for gain than other investments. This is particularly true when the market for other investments in which the Fund may invest is rapidly rising. If the Fund holds cash uninvested it will be subject to the credit risk of the depositing institution holding the cash.

Operational and Cybersecurity Risk. The Fund, Krane, its service providers and your ability to transact with the Fund may be negatively impacted due to operational matters arising from, among other problems, human errors, systems and technology disruptions or failures, or cybersecurity incidents. Cybersecurity incidents may allow an unauthorized party to gain access to fund assets, customer data, or proprietary information, or cause the Fund or its service providers, as well as the securities trading venues and their service providers, to suffer data corruption or lose operational functionality. It is not possible for Krane or the other Fund service providers to identify all of the cybersecurity or other operational risks that may affect the Fund or to develop processes and controls to completely eliminate or mitigate their occurrence or effects.

Performance Information

The following bar chart and table illustrate the variability of the Fund's returns and indicate the risks of investing in the Fund by showing how the Fund's average annual total returns compare with those of a broad measure of market performance and an additional index with characteristics relevant to the Fund. All returns include the reinvestment of dividends and distributions. As always, please note that the Fund's past performance (before and after taxes) is not necessarily an indication of how it will perform in the future. Prior to April 1, 2022, the Fund was actively managed and sought to outperform the Index through investments in debt instruments. Updated performance information is available at no cost by visiting www.kraneshares.com.

As of June 30, 2026, the Fund's calendar year-to-date total return was 5.62%.

Best and Worst Quarter Returns (for the period reflected in the bar chart above)

	Return	Quarter Ended/Year
Highest Return	18.95%	3/31/2022
Lowest Return	-11.32%	12/31/2023

Average Annual Total Returns for the periods ended December 31, 2025

KraneShares Mount Lucas Managed Futures Index Strategy ETF	1 year	5 years	Since Inception (12-1-2020)
Return Before Taxes	-3.21%	4.75%	5.77%
Return After Taxes on Distributions	-5.10%	2.92%	3.96%
Return After Taxes on Distributions and Sale of Fund Shares	-1.90%	3.06%	3.88%
Bloomberg Global Aggregate Index			
(Reflects no deduction for fees, expenses or taxes)	8.17%	-2.15%	-1.83%
KFA MLM Index			
(Reflects no deduction for fees, expenses or taxes)	-1.69%	6.76%	7.77%

Management

Investment Adviser and Sub-Adviser

Krane Funds Advisors, LLC (“Krane” or “Adviser”) serves as the investment adviser to the Fund. Mount Lucas Index Advisers LLC (“MLIA” or “Sub-Adviser”) serves as the investment sub-adviser to the Fund.

Portfolio Managers

Timothy J. Rudderow Sr., Chairman; Gerald L. Prior, III, Chief Investment Officer – Managed Futures, Chief Operating Officer; and David Aspell, Chief Investment Officer – Global Macro, are the Fund’s Portfolio Managers and are jointly and primarily responsible for the day to day management of the Fund’s portfolio. Messrs. Rudderow, Prior, and Aspell have served as portfolio manager of the Fund since its inception.

Purchase and Sale of Fund Shares

Shares may be purchased and redeemed from the Fund only in a large specified number of Shares each called a “Creation Unit,” or multiples thereof. As a practical matter, only institutions and large investors, such as market makers or other large broker-dealers, purchase or redeem Creation Units. Most investors will buy and sell shares of the Fund on the Exchange. Individual shares can be bought and sold throughout the trading day like other publicly traded securities through a broker-dealer on the Exchange. These transactions do not involve the Fund. The price of an individual Fund share is based on market prices, which may be different from its NAV. As a result, the Fund’s shares may trade at a price greater than the NAV (at a premium) or less than the NAV (at a discount). An investor may incur costs attributable to the difference between the highest price a buyer is willing to pay to purchase shares of the Fund (bid) and the lowest price a seller is willing to accept for shares of the Fund (ask) when buying or selling shares in the secondary market (the “bid-ask spread”). Most investors will incur customary brokerage commissions and charges when buying or selling shares of the Fund through a broker-dealer.

Recent information regarding the Fund, including its NAV, market price, premiums and discounts, and bid ask spreads, are available on the Fund’s website at www.kraneshares.com.

Tax Information

Fund distributions are generally taxable as ordinary income, qualified dividend income or capital gains (or a combination), unless your investment is in an IRA or other tax-advantaged retirement account, which may be taxable upon withdrawal.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase Fund shares through a broker-dealer or other financial intermediary (such as a bank), the Fund and its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your sales person to recommend the Fund over another investment. Ask your sales person or visit your financial intermediary’s website for more information.
