

# KraneShares CICC China Leaders 100 Index ETF<sup>1</sup>

Data as of 6/30/2019

## Investment Strategy:

KFYP tracks the CSI CICC Select 100 Index, which takes a smart-beta<sup>2</sup> approach to systematically invest in companies listed in Mainland China. The strategy is based on China International Capital Corporation (CICC)'s latest research on China's capital markets. This quantitative approach reflects CICC's top down and bottom up research process, seeking to deliver the 100 leading companies in Mainland China.

## KFYP Features:

- Smart-beta strategy which seeks to deliver cost effective alpha<sup>3</sup>.
- Exposure to the top 100 industry leaders within China's A-share market identified through the CICC Research team's quantitative methodology.
- Seeks to provide exposure to performance leaders through a Return on Equity (ROE)<sup>4</sup> filter which is further refined through bottom-line growth and valuation criteria.

1. Formerly the KraneShares Zacks New China ETF
2. Smart-beta is an investment style where a manager passively follows an index designed to take advantage of perceived systematic biases or inefficiencies in the market.
3. Alpha is the active return on an investment, gauges the performance of an investment against a market index or benchmark which is considered to represent the market's movement as a whole.
4. Return on equity (ROE) is a measure of financial performance calculated by dividing net income by shareholders' equity

†The Hybrid KFYP Index (noted as "Index" above in the chart) consists of the CSI China Overseas Five Year Plan Index from the inception of the Fund through May 31, 2016, the Zacks New China Index from June 1, 2016 through November 1, 2018, and the CSI CICC Select 100 Index going forward..

**The performance data quoted represents past performance. Past performance does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when sold or redeemed, may be worth more or less than their original cost and current performance may be lower or higher than the performance quoted. For performance data current to the most recent month end, please visit [www.kraneshares.com](http://www.kraneshares.com)**

ETF shares are not redeemable with the issuing fund other than in large Creation Unit aggregations. Instead, investors must buy or sell ETF Shares in the secondary market with the assistance of a stockbroker. In doing so, the investor may incur brokerage commissions and may pay more than net asset value (NAV) when buying and receive less than net asset value when selling. The NAV of the Fund's shares is calculated each day the national securities exchanges are open for trading as of the close of regular trading on the New York Stock Exchange ("NYSE"), normally 4:00 P.M. Eastern time (the "NAV Calculation Time"). Shares are bought and sold at market price not NAV. Closing price returns are based on the midpoint of the bid/ask spread at 4:00 P.M. Eastern Time (when NAV is normally determined).

**Index returns are for illustrative purposes only. Index performance returns do not reflect any management fees, transaction costs or expenses. Indexes are unmanaged and one cannot invest directly in an index.**

8. Alexandra DeLuca, "The Firms Helping Investors Navigate a Trade War in China", Institutional Investor 11/1/2018.

**Carefully consider the Funds' investment objectives, risk factors, charges and expenses before investing. This and additional information can be found in the Funds' full and summary prospectus, which may be obtained by visiting [www.kraneshares.com](http://www.kraneshares.com). Read the prospectus carefully before investing.**

Narrowly focused investments typically exhibit higher volatility. Technology companies may be subject to severe competition and rapid obsolescence. The Fund is non-diversified.

Investing involves risk, including possible loss of principal. There can be no assurance that a Fund will achieve its stated objectives. The Funds are subject to political, social or economic instability within China which may cause decline in value. Fluctuations in currency of foreign countries may have an adverse effect to domestic currency values. Emerging markets involve heightened risk related to the same factors as well as increase volatility and lower trading volume.
