

## KraneShares CICC China Leaders 100 Index ETF\*

### Investment Strategy:

KFYP tracks the CSI CICC Select 100 Index, which takes a smart-beta<sup>1</sup> approach to systematically invest in companies listed in Mainland China. The strategy is based on China International Capital Corporation (CICC)'s latest research on China's capital markets. This quantitative approach reflects CICC's top down and bottom up research process, seeking to deliver the 100 leading companies in Mainland China.

### KFYP Features:

- Smart beta strategy which seeks to deliver cost effective alpha<sup>2</sup>.
- Exposure to the top 100 industry leaders within China's Mainland A-share market identified through the CICC Research team's quantitative methodology.
- Seeks to provide exposure to performance leaders through a Return on Equity (ROE)<sup>3</sup> filter which is further refined through bottom-line growth and valuation criteria.

### About CICC & CICC Research:

- CICC is a leading, publicly traded, Chinese financial services company with expertise in research, asset management, investment banking, private equity and wealth management.
- In 2019, the CICC Research Team ranked #1 in Institutional Investor's All-China Research Category for the eighth year in a row.<sup>4</sup>
- CICC has over 200 branches across Mainland China, with offices in Hong Kong, Singapore, New York, San Francisco, and London.

\*Formerly the KraneShares Zacks New China ETF

1. Smart beta is an investment style where a manager passively follows an index designed to take advantage of perceived systematic biases or inefficiencies in the market.
2. Alpha is the active return on an investment, gauges the performance of an investment against a market index or benchmark which is considered to represent the market's movement as a whole.
3. Return on equity (ROE) is a measure of financial performance calculated by dividing net income by shareholders' equity.

Read the prospectus carefully before investing.**

**Risk Disclosures:**

The potential unavailability of liquid secondary market access relating to A-shares may have an adverse effect on the market price and the Fund's availability to dispose of particular issuers, including to honor redemptions, and may also make it more difficult for the Fund to obtain accurate market quotations in valuing these assets. In addition, uncertainties in the rules governing Chinese taxation of income and gains from investments in A-shares could result in unexpected liabilities, which may adversely impact fund returns.

ETF shares are not redeemable with the issuing fund other than in large Creation Unit aggregations. Instead, investors must buy or sell ETF Shares in the secondary market with the assistance of a stockbroker. In doing so, the investor may incur brokerage commissions and may pay more than net asset value (NAV) when buying and receive less than net asset value when selling. The NAV of the Fund's shares is calculated each day the national securities exchanges are open for trading as of the close of regular trading on the New York Stock Exchange ("NYSE"), normally 4:00 P.M. Eastern time (the "NAV Calculation Time"). Shares are bought and sold at market price not NAV. Closing price returns are based on the midpoint of the bid/ask spread at 4:00 P.M. Eastern Time (when NAV is normally determined).
