

## KraneShares MSCI All China Index ETF

### Investment Strategy:

KALL seeks to provide investment results that, before fees and expenses, track the price performance of the MSCI China All Shares Index. The index seeks to track the equity market performance of companies based in China and listed in Mainland China, Hong Kong, and the United States. Companies available for inclusion must be headquartered in China and meet the market capitalization minimums required by the MSCI Global Investable Market Indexes Methodology.

### China Broad Equity Market Features:

- The increased availability of Chinese equities to foreign investors over the past few years has brought about the rise of China as an asset class.
- China has the world's second largest economy and equity market, with a capitalization of over \$8.6 trillion.<sup>1</sup>
- 2018 is the first year that Chinese companies listed in Hong Kong, Mainland China, and the United States will be reflected in the MSCI Emerging Markets Index, which is tracked by over \$1.8 trillion in assets<sup>2</sup>.
- Only 3% of China's Mainland stock market is owned by foreigners<sup>3</sup>.

### KALL features:

- Diversification through strategic ownership of China as an asset class.
- Exposure to shares of Chinese companies listed in Hong Kong, Mainland China, and the United States.
- A broad exposure to the world's second largest equity market that can be used for China specific allocation in order to produce more efficient portfolios.

1.) Data from MSCI as of December 31, 2019. In order to capture the entire China opportunity, we added together the full market caps of the Shenzhen and Shanghai Stock Exchanges and then added the MSCI China Index market capitalization to arrive at the market cap for each year.

2.) As of June 30, 2018, as reported on September 30, 2018 by eVestment, Morningstar and Bloomberg.

3.) BNP Paribas. "China A-Shares: Tap into broader investment opportunities as Chinese markets open up". 12/31/2019.

**Carefully consider the Funds' investment objectives, risk factors, charges and expenses before investing. This and additional information can be found in the Funds' full and summary prospectus, which may be obtained by visiting [www.kraneshares.com](http://www.kraneshares.com). Read the prospectus carefully before investing.**

**Risk Disclosures:**

Investing involves risk, including possible loss of principal. There can be no assurance that a Fund will achieve its stated objectives. The Funds are subject to political, social or economic instability within China which may cause decline in value. Fluctuations in currency of foreign countries may have an adverse effect to domestic currency values. Emerging markets involve heightened risk related to the same factors as well as increase volatility and lower trading volume.

The ability of the KraneShares MSCI All China Index ETF to achieve its respective investment objectives is dependent, in part, on the continuous availability of A Shares and the ability to obtain, if necessary, additional A Shares quota. If the Fund is unable to obtain sufficient exposure to limited availability of A Share quota, the Fund could seek exposure to the component securities of the Underlying Index by investment in other types of securities. The fund may invest in derivatives, which are often more volatile than other investments and may magnify the Fund's gains or losses.

Diversification may not protect against market risk.

High short-term performance of the fund is unusual and investors should not expect such performance to be repeated.

Fund shares are bought and sold on an exchange at market price (not NAV) and are not individually redeemed from the Fund. However, shares may be redeemed at NAV directly by certain authorized broker-dealers (Authorized Participants) in very large creation/redemption units. The returns shown do not represent the returns you would receive if you traded shares at other times. Shares may trade at a premium or discount to their NAV in the secondary market. Brokerage commissions will reduce returns. Market price returns are based on the official closing price of an ETF share or, if the official closing price isn't available, the midpoint between the national best bid and national best offer ("NBBO") as of the time the ETF calculates the current NAV per share. NAVs are calculated using prices as of 4:00 PM Eastern Time.
