

KraneShares CSI China Internet ETF

Investment Strategy:

KWEB tracks the CSI Overseas China Internet Index, a free float market capitalization weighted index consisting of China based companies whose primary business or businesses are focused on internet and internet-related technology. These companies are publicly traded on either the Hong Kong Stock Exchange, NASDAQ Stock Market, or New York Stock Exchange.

KWEB Provides:

- Access to Chinese internet companies that provide similar services as Google, Facebook, Twitter, eBay, Amazon, etc.
- Exposure to companies benefitting from increasing domestic consumption by China's growing middle class
- Exposure to Chinese internet companies listed in both the United States and Hong Kong

China Internet Sector Highlights:

- Chinese retail web sales totaled \$1.8 trillion¹ in 2020 (compared to \$861 billion² in the United States).
- China's internet population reached 904 million people in 2020, a penetration rate of only 64.5%³. The U.S. internet population reached 297 million people, a penetration rate of 85.8% in June 2020⁴.
- Total Chinese retail sales reached US\$6 trillion in 2020¹
- Online shopping accounted for 30% of retail purchases in China in 2020¹

Carefully consider the Funds' investment objectives, risk factors, charges and expenses before investing. This and additional information can be found in the Funds' full and summary prospectus, which may be obtained by visiting www.kraneshares.com. Read the prospectus carefully before investing.

Risk Disclosures:

Investing involves risk, including possible loss of principal. There can be no assurance that a Fund will achieve its stated objectives. The Funds are subject to political, social or economic instability within China which may cause decline in value. Variable-interest entities (VIEs) do not give investors ownership in the operating company as stock does. The enforceability of the VIE structure is not guaranteed by Chinese law. Fluctuations in currency of foreign countries may have an adverse effect to domestic currency values. Emerging markets involve heightened risk related to the same factors as well as increase volatility and lower trading volume.

Narrowly focused investments typically exhibit higher volatility. Internet companies are subject to rapid changes in technology, worldwide competition, rapid obsolescence of products and services, loss of patent protections, evolving industry standards and frequent new product productions. Such changes may have an adverse impact on performance. The fund is non-diversified.

Fund shares are bought and sold on an exchange at market price (not NAV) and are not individually redeemed from the Fund. However, shares may be redeemed at NAV directly by certain authorized broker-dealers (Authorized Participants) in very large creation/redemption units. The returns shown do not represent the returns you would receive if you traded shares at other times. Shares may trade at a premium or discount to their NAV in the secondary market. Brokerage commissions will reduce returns. Beginning 12/23/2020, market price returns are based on the official closing price of an ETF share or, if the official closing price isn't available, the midpoint between the national best bid and national best offer ("NBBO") as of the time the ETF calculates the current NAV per share. Prior to that date, market price returns were based on the midpoint between the Bid and Ask price. NAVs are calculated using prices as of 4:00 PM Eastern Time.

Although the information provided in this document has been obtained from sources which Krane Funds Advisors, LLC believes to be reliable, it does not guarantee accuracy of such information and such information may be incomplete or condensed.
