An Overview of Opportunities Within
China's Interbank Bond Market

Introduction to KraneShares

About KraneShares

Krane Funds Advisors, LLC is the investment manager for KraneShares ETFs. Our suite of China focused ETFs provides investors with solutions to capture China's importance as an essential element of a well-designed investment portfolio. We strive to provide innovative, first to market strategies that have been developed based on our strong partnerships and our deep knowledge of investing. We help investors stay up to date on global market trends and aim to provide meaningful diversification. Krane Funds Advisors, LLC is majority owned by China International Capital Corporation (CICC).

 KCNY

KraneShares E Fund China Commercial Paper ETF

Investment Strategy:

The KraneShares E Fund China Commercial Paper ETF (NYSE: KCNY) seeks to track the CSI Diversified High Grade Commercial Paper Index. The Fund seeks to invest at least 80% of its total assets in a diversified basket of investment-grade¹ commercial paper denominated in on-shore renminbi issued by sovereign, quasi-sovereign and corporate issuers in the People's Republic of China and traded in the inter-bank bond market. Commercial paper in the Fund is investment-grade and has a remaining term to final maturity of no more than one year and no less than one month.

KCNY features:

- Invests in money market securities (i.e. commercial paper) and attempts to preserve principal investment while providing attractive monthly distributions
- The average maturity of the securities held by the fund is less than six months
- Invests into commercial paper that has received an investment grade credit rating¹

China commercial paper may be appropriate for investors who have a(n)...

- Allocation to investment products that only invest in short-term securities
- Investment goal with a short time horizon
- Daily liquidity requirement

¹ Investment grade commercial paper is commercial paper that is issued by an issuer whose long-term bonds are rated AAA or equivalent by one or more Chinese credit rating agencies; or commercial paper that is issued by an issuer whose long-term bonds are rated AA+ or equivalent by one or more Chinese credit rating agencies and commercial paper is rated A-1 or equivalent by one or more Chinese credit rating agencies.

E Fund Asset Management is the co-advisor to the KraneShares E Fund China Commercial Paper ETF (ticker: KCNY)

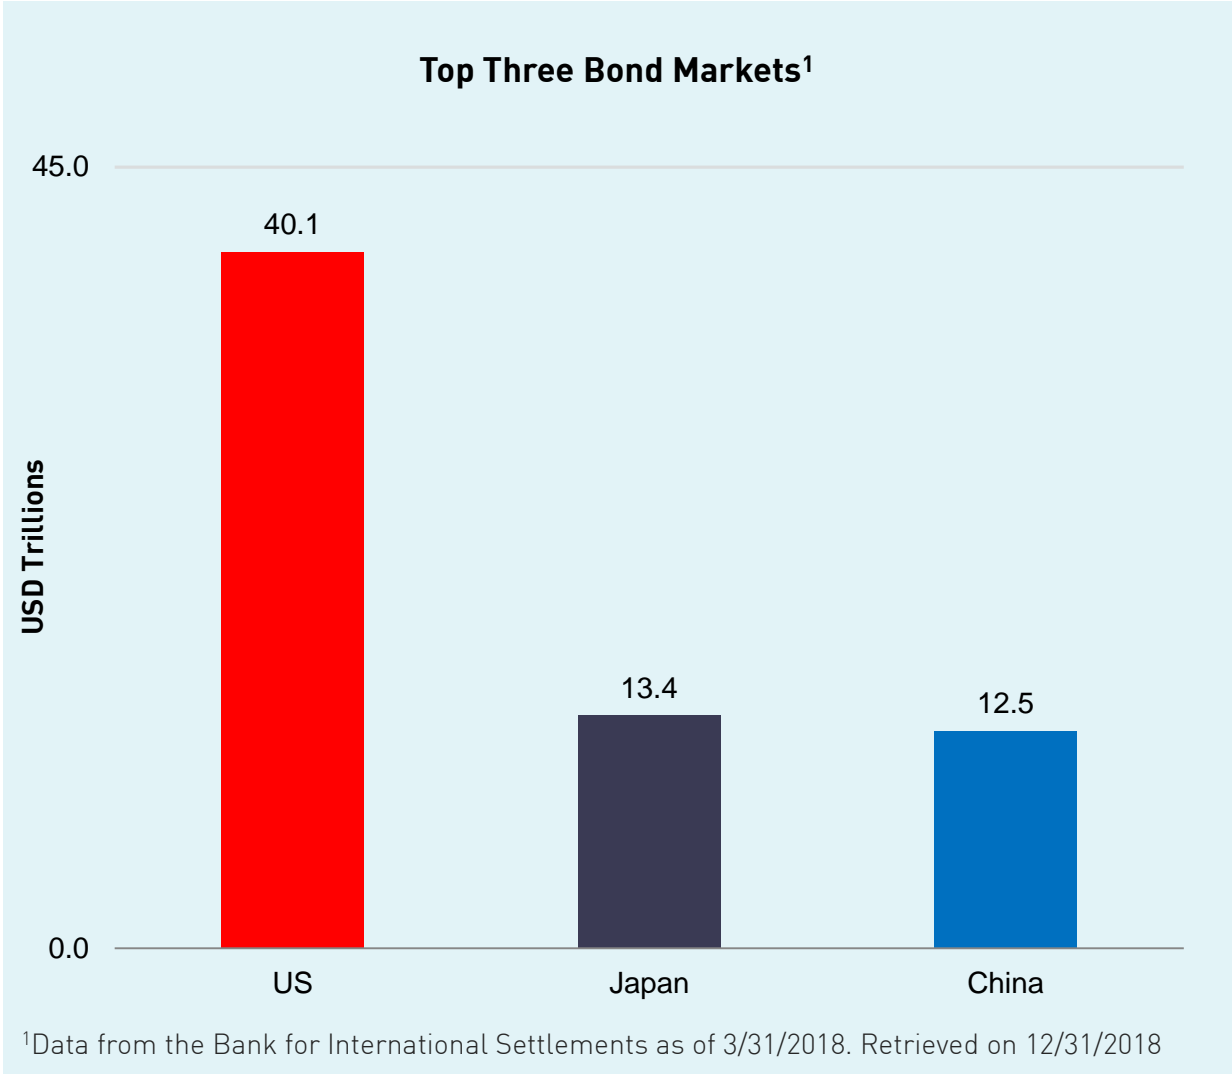

\$177b AUM

- **\$177b** in assets under management; one of the top three asset managers by assets in Mainland China
- Serves more than **80 million clients**

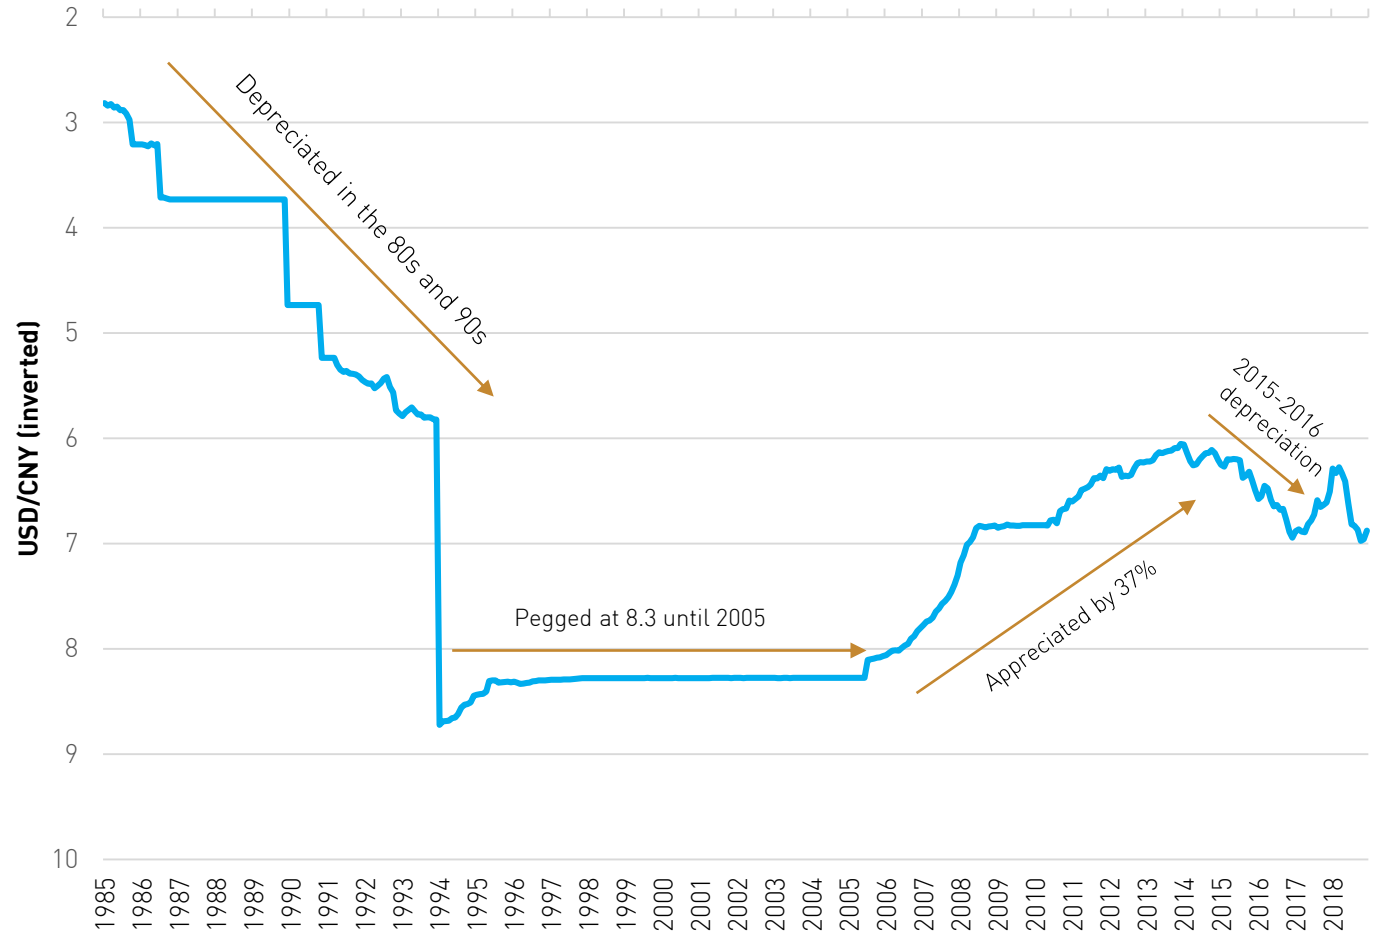

China's Interbank Bond Market is the third largest in the world, yet it has virtually no foreign ownership

RMB dynamics have been evolving historically

- The RMB steadily depreciated against the dollar for much of the 1980s and 1990s, as China gained its competitive export edge.
- In 1997, a peg to the dollar was initiated at 8.3 RMB for every dollar, and this peg stayed in place until July 2005.
- Once the peg was removed in 2005, the RMB appreciated by 37% to reach a high of 6 RMB per dollar, which remains the recent high to this day.
- The appreciation that occurred after de-pegging aligned with China's plan to shift the economy away from an exporting economy to a consumer led economy.
- August of 2015 began an RMB depreciation cycle that lasted 1.5 years, with 2015 ending down 4.5% for the currency.
- 2016 saw concerns about capital flight, an economic hard landing, banking crisis and FX reserve depletion, leading to a 7% decline. Incidentally, only a brief period of FX reserve depletion was experienced, but none of the other concerns fully materialized.
- the International Monetary Fund (IMF) launched a new Special Drawing Rights (SDR) basket including Chinese RMB on September 30, 2016.
- MSCI announced China's inclusion to the MSCI global indexes in July 2017.
- July 2017, Bond Connect established for global investors to invest into China's fixed income market directly.

PBoC's new CFETS Basket approach has created stability

China Foreign Exchange Trade System (CFETS) was created by People's Bank of China (PBoC) to manage the RMB risk. In December of 2015, CFETS adopted a 13-currency basket for managing the RMB. The basket was expanded to 24 currencies at the end 2016. Since the basket approach was implemented, the RMB basket index has been stable relative to the US dollar.

	Currency	2016	2017
US Dollar	USD	26.40%	22.40%
Euro	EUR	21.40%	16.30%

Historically, yields in China have been higher than in the US across the yield curve. Recent rapid rate increases in the US have caused yields to converge at the front-end of the curve.

US China Yield Curve 2018

Important Notes

Carefully consider the Funds' investment objectives, risk factors, charges and expenses before investing. This and additional information can be found in the Funds' full and summary prospectus, which may be obtained by visiting www.kraneshares.com. Read the prospectus carefully before investing.

ETF shares are not redeemable with the issuing fund other than in large Creation Unit aggregations. Instead, investors must buy or sell ETF Shares in the secondary market with the assistance of a stockbroker. In doing so, the investor may incur brokerage commissions and may pay more than net asset value when buying and receive less than net asset value (NAV) when selling. The NAV of the Fund's shares is calculated each day the national securities exchanges are open for trading as of the close of regular trading on the New York Stock Exchange ("NYSE"), normally 4:00 P.M. Eastern time (the "NAV Calculation Time"). Shares are bought and sold at market price not NAV. Closing price returns are based on the midpoint of the bid/ask spread at 4:00 P.M. Eastern Time (when NAV is normally determined).

Investing involves risk, including possible loss of principal. There can be no assurance that a Fund will achieve its stated objectives. The Funds are subject to political, social or economic instability within China which may cause a decline in value. Fluctuations in currency of foreign countries may have an adverse effect on domestic currency values. Emerging markets involve heightened risk related to the same factors as well as increased volatility and lower trading volume.

The KraneShares E Fund China Commercial Paper ETF is subject to interest rate risk, which is the chance that bonds will decline in value as interest rates rise. The components of the securities held by the Fund will be rated by Chinese credit rating agencies, which may use different criteria and methodology than U.S. entities or international credit rating agencies. The Fund may invest in high yield and unrated securities, whose prices are generally more sensitive to adverse economic changes and consequently more volatile. The Fund is subject to industry concentration risk and is non-diversified. Narrowly focused investments typically exhibit higher volatility.
