We help investors stay up to date on global market trends and aim to provide meaningful diversification. Krane Funds Advisors, LLC is majority owned by China International Capital Corporation (CICC).

KCCB

KraneShares CCBS China Corporate High Yield Bond Index ETF

Investment Strategy:

KCCB seeks to provide investment results that, before fees and expenses, track the price and yield performance of the Solactive USD China Corporate High Yield Bond Index. The Index seeks to track the performance of outstanding high yield debt securities denominated in U.S. dollars issued by Chinese companies.

USD China Corporate High Yield Bond Market Features:

- As dollar investors seek yield globally, the U.S. dollar denominated China corporate high yield bond market has grown considerably to meet investor demand.
- Since 2014, China has accounted for more than half of all new annual USD bond issuance in Asia.¹
- The total value of Chinese USD denominated high yield bonds increased over 300% from 2017 to 2018, and the number of issuing companies increased by almost 150% over the same period.²
- By the end of 2018, the total USD China Corporate High Yield Bond market size reached \$232 billion USD with over 250 issuing companies.²

KCCB Features:

- USD-denominated exposure to China's high yield bond market.
- Low correlation to US and global markets.
- Co-managed by China Construction Bank (CCB), the second largest bank in the world by assets³.

1. Data from Bloomberg as of 12/31/17, retrieved on 3/31/2019.

2. Data from Bloomberg as of 12/31/2018, retrieved 3/31/2019.

3. Global Finance, "Biggest Banks In The World 2018", 11/1/2018, retrieved 3/31/2019.

CCB Securities Ltd (CCBS), an overseas asset management platform of China Construction Bank (CCB), is the co-manager of KCCB

\$3.4 Trillion in Assets¹

CCB Quick Facts

- **Headquartered in Beijing** with offices worldwide
- **Second largest** bank in the world by assets¹
- **Established in 1954**
- **Investment and Retail** banking divisions in China and around the world
- **Asset Management Team** with an average of 20 years of experience across asset classes including fixed income, equities, money market, FX, derivatives, fund-of-funds, etc.²

1. Global Finance, "Biggest Banks In The World 2018", 11/1/2018, retrieved 3/31/2019.
2. CCBS as of 3/31/2019.

China has the largest USD denominated bond market in Asia

Demand from yield seeking investors created a booming USD denominated bond market for Chinese companies. Strong issuance provides a solid capacity for investors to benefit from this growing credit market.

- China accounts for more than half of the new USD denominated bond issuance in Asia
- New issuance remains strong in China

Data from Bloomberg as of 12/31/2018

China high yield bonds offer comparatively higher yields and lower modified durations.

The China high yield bond market has a higher yield and lower modified duration¹ compared to other fixed income markets like the US and Europe

Global Fixed Income Yield and Mod Duration

Data from Bloomberg as of 3/31/2019

Index returns are for illustrative purposes only and do not represent actual Fund performance. Index returns do not reflect any management fees, transaction costs, or expenses. Indexes are unmanaged and one cannot invest directly in an index. Past performance does not guarantee future results'

See page 12 for index descriptions
See page 10 for 30-day SEC yield

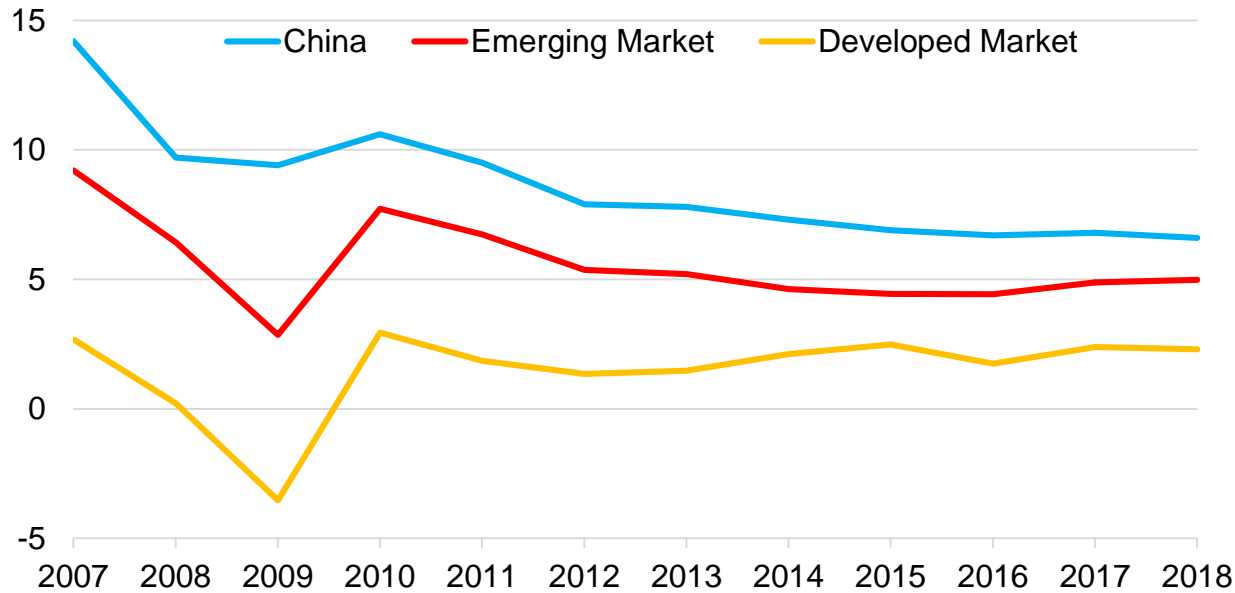

1. Modified Duration is the change in the value of a bond that occurs with each percentage (100 bps) change in interest rates.
2. Yield to worst is the lowest possible yield that can be received on a bond without the issuer actually defaulting.

A strong economy means a stable credit market.

China's economic growth has been relatively stable over the past few years years.

- China's property is supported by strict policy controls and solid demand which stands to benefit leading property developers. Moody's Investors Service forecasts the default rate for Asian high-yield corporate bonds to remain low at 2.5% for 2019.¹
- China has a good track record for maintaining stable economic growth

Real GDP Growth Rate²

China Residential Property Sales Value²

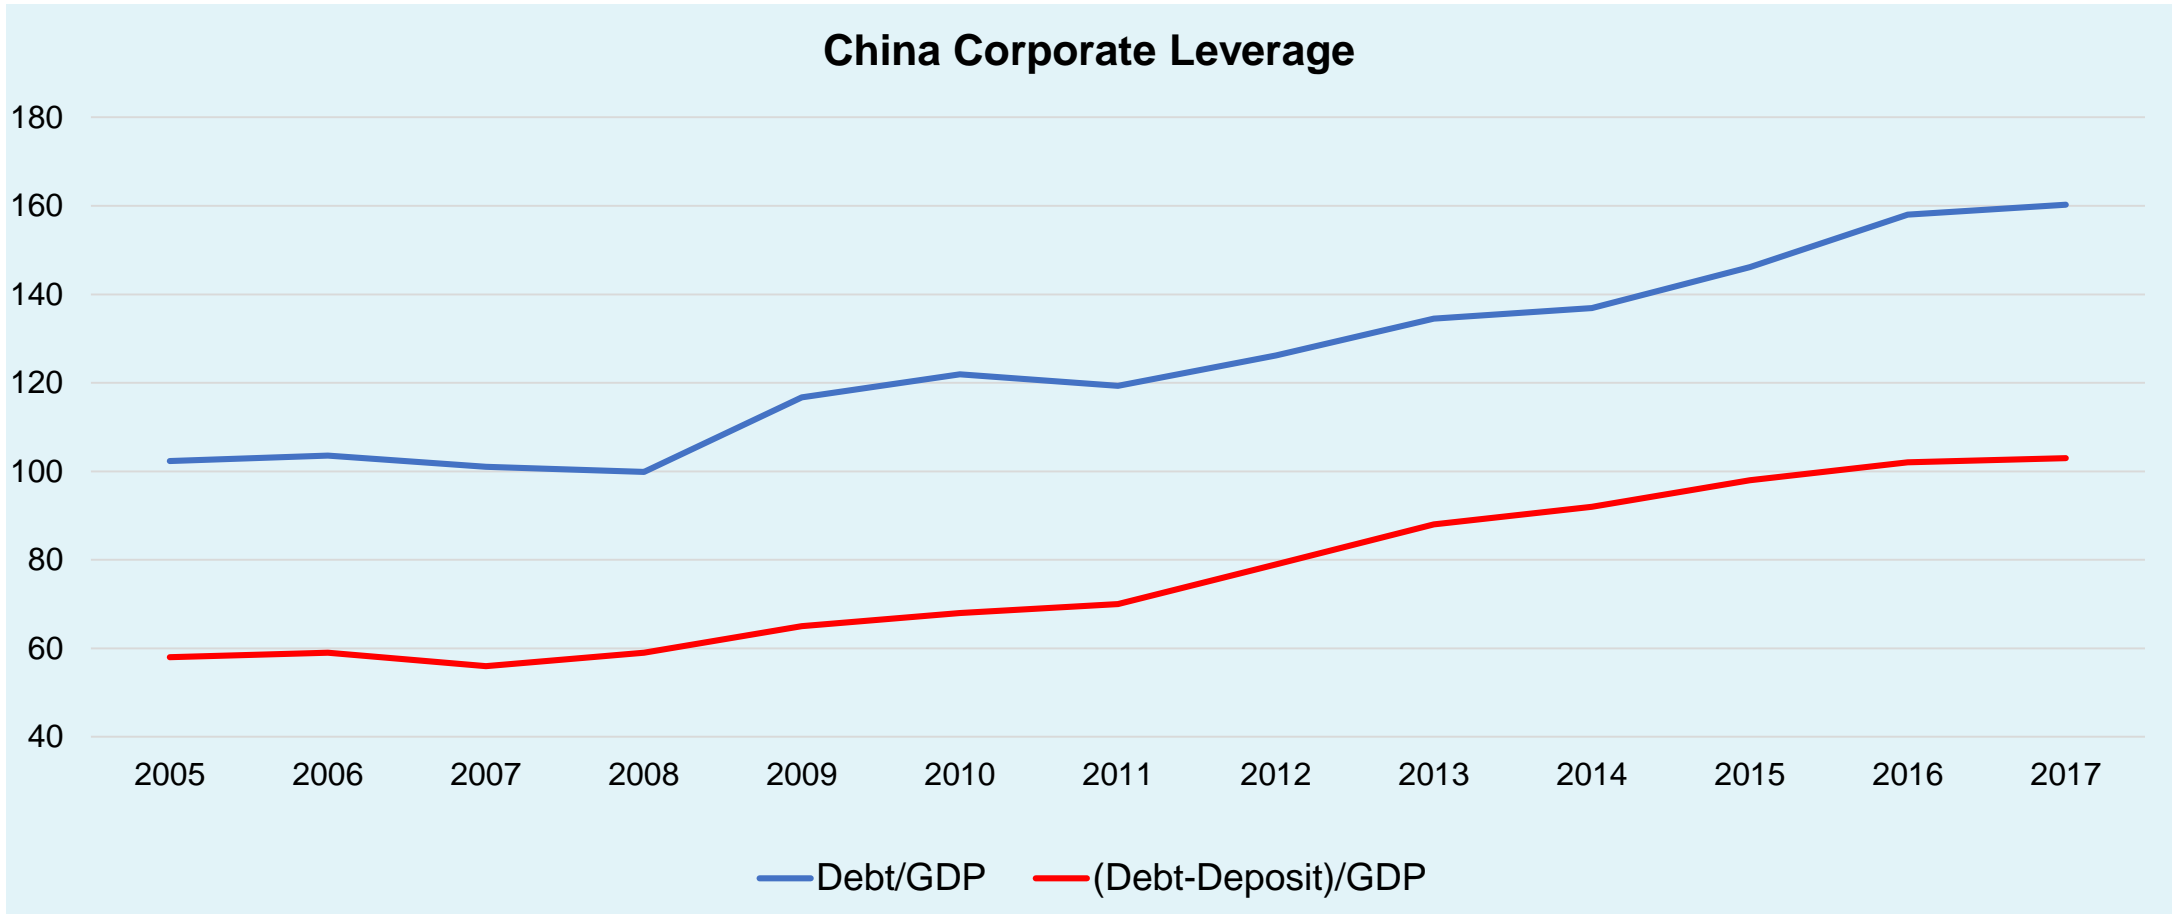

1. Moody's, "Moody's - Asian high-yield non-financial corporate default rate to stay low in 2019", 02/14/2019.

2. Data from Bloomberg as of 12/31/2018, retrieved 3/31/2019.

The China credit bubble is a misconception.

Deleveraging in 2017 created a stable credit market in 2018. China's corporates, especially SOEs, own abundant deposits, debt minus deposit shows a reasonable leverage level.

Data from Bloomberg as of 12/31/2018, retrieved 3/31/2019, Debt = Total Corporate Debt, Deposit = M1 - M0

Asia USD High Yield bonds have low correlations relative to the global bond market.

Asian USD-denominated high yield bonds have a correlation range of 15% to 43% to major global bond indexes.

Important Notes (continued)

The S&P 500 Index: is an American stock market index based on the market capitalizations of 500 large companies having common stock listed on the NYSE or NASDAQ.

The MSCI Emerging Markets Index: captures large and mid cap representation across 23 Emerging Markets (EM) countries. With 834 constituents, the index covers approximately 85% of the free float-adjusted market capitalization in each country.

FTSE China 50 Index: is a real-time tradable index comprising 50 of the largest and most liquid Chinese stocks (H Shares, Red Chips and P Chips) listed and trading on the Stock Exchange of Hong Kong (SEHK).

MSCI China Index: The MSCI China Index captures large and mid cap representation across China H shares, B shares, Red chips and P chips. With 157 constituents, the index covers about 84% of this China equity universe.

S&P China BMI Index: is a comprehensive benchmark that defines and measures the investable universe of publicly traded companies domiciled in China, but are legally available to foreign investors.

US Generic Government 10 Year Index Yield: This index tracks the yield performance of 10-year treasury bills. Treasury bills are often used as a benchmark to represent a risk-free asset. Yields are yield to maturity and pre-tax. Indices have increased in precision as of 5/20/2008 to 4 decimal places. The rates are comprised of Generic United States on-the-run government bill/note/bond indices.

Bloomberg Barclays US Aggregate Corporate Index Yield to Worst: This index tracks the yield to worst of corporate bonds in the United States. The Bloomberg Barclays US Aggregate Bond Index is a broad-based flagship benchmark that measures the investment grade, US dollar-denominated, fixed-rate taxable bond market. The index includes Treasuries, government-related and corporate securities, fixed-rate agency MBS, ABS and CMBS (agency and non-agency). The US Aggregate Index was created in 1986 with history backfilled to January 1, 1976.

Bloomberg Barclays Euro Aggregate Corporate ISMA Index: The index is a rules based benchmark measuring investment-grade, Euro denominated, fixed rate, corporate bonds. The index began tracking on June 22, 1998.

Bloomberg Barclays Emerging Markets EMEA Index: This index tracks the yield to worst of bonds issued in emerging markets in Europe, the Middle East, and Africa. The index started tracking on January 31, 2003.

Bloomberg Barclays Corporate High Yield Index: The Bloomberg Barclays US Corporate High Yield Bond Index measures the USD-denominated, high yield, fixed-rate corporate bond market. Securities are classified as high yield if the middle rating of Moody's, Fitch and S&P is Ba1/BB+/BB+ or below.

Bloomberg Barclays Asia USD Inv. Grade Bond Index: This index tracks the performance of Asian corporate bonds with an S&P rating of BBB- and/or a Moody's rating of Baa3 or higher. The index started tracking on June 30, 2009.

Bloomberg Barclays Asia USD High Yield Bond Index: This index tracks the performance of Asian junk bonds. The bonds tracked have have a higher risk of default than investment grade bonds or may currently be in default. The index started tracking on January 30, 1987.

This material represents an assessment of the market environment at a specific point in time and is not intended to be a forecast of future events, or a guarantee of future results. This information should not be relied upon by the reader as research or investment advice regarding the funds or any stock in particular.

Important Notes

Carefully consider the Funds' investment objectives, risk factors, charges and expenses before investing. This material must be preceded or accompanied by a prospectus. Read the prospectus carefully before investing.

ETF shares are not redeemable with the issuing fund other than in large Creation Unit aggregations. Instead, investors must buy or sell ETF Shares in the secondary market with the assistance of a stockbroker. In doing so, the investor may incur brokerage commissions and may pay more than net asset value (NAV) when buying and receive less than net asset value when selling. The NAV of the Fund's shares is calculated each day the national securities exchanges are open for trading as of the close of regular trading on the New York Stock Exchange ("NYSE"), normally 4:00 P.M. Eastern time (the "NAV Calculation Time"). Shares are bought and sold at market price not NAV. Closing price returns are based on the midpoint of the bid/ask spread at 4:00 P.M. Eastern Time (when NAV is normally determined).

Investing involves risk, including possible loss of principal. There can be no assurance that a Fund will achieve its stated objectives. The Funds are subject to political, social or economic instability within China which may cause decline in value. Fluctuations in currency of foreign countries may have an adverse effect to domestic currency values. Emerging markets involve heightened risk related to the same factors as well as increase volatility and lower trading volume.

The Fund is subject to interest rate risk, which is the chance that bonds will decline in value as interest rates rise. The components of the securities held by the Fund will be rated by Chinese credit rating agencies, which may use different criteria and methodology than U.S. entities or international credit rating agencies. The Fund may invest in high yield and unrated securities, whose prices are generally more sensitive to adverse economic changes and consequently more volatile. The Fund is subject to industry concentration risk and is non-diversified. Narrowly focused investments typically exhibit higher volatility. The Fund invests in perpetual bonds, which offer fixed return with no maturity date. Perpetual bonds can be more volatile than other types of bonds that have a maturity date and may be more sensitive to changes to interest rates. The Fund depends on the CIBM Program to invest directly in RMB Bonds. There is no guarantee the Fund will be able to continue to participate in the program
