The Emerging Market Consumer Internet & E-Commerce Opportunity
An Overview of the KraneShares Emerging Markets Consumer Technology ETF (Ticker: KEMQ)
Introduction to KraneShares

About KraneShares
Krane Funds Advisors, LLC is the investment manager for KraneShares ETFs. Our suite of China focused ETFs provides investors with solutions to capture China’s importance as an essential element of a well-designed investment portfolio. We strive to provide innovative, first to market strategies that have been developed based on our strong partnerships and our deep knowledge of investing. We help investors stay up to date on global market trends and aim to provide meaningful diversification. Krane Funds Advisors, LLC is majority owned by China International Capital Corporation (CICC).
Investment Strategy:

KEMQ seeks to track the Solactive Emerging Markets Consumer Technology Index. The Index selects companies from 26 eligible countries within emerging markets whose primary business or businesses are internet retail, internet software/services, purchase, payment processing, or software for internet and E-Commerce transactions.

Emerging Markets Consumer Technology Highlights:

- Internet adoption is expanding rapidly within emerging markets at the same time that domestic consumption and retail sales are steadily increasing and frequently taking place online.

- According to a study from the Brookings Institution, middle class consumption could reach 50% of total global consumption by the year 2030, more than doubling from 2015.

- We believe the growth of internet adoption within emerging markets is a long term secular theme that may continue to play out over the course of decades.

KEMQ features:

- Access to emerging market internet companies that provide similar services as Google, Facebook, PayPal, Amazon, etc.

- Exposure to companies that stand to benefit from increasing domestic consumption by emerging markets’ growing middle class

- Exposure to emerging market companies facilitating mobile E-Commerce sales

Transformational growth in emerging markets is driven by the “Three P’s”

**Population**
The middle class consumer in Emerging Markets will drive global demand.

**Penetration**
Internet adoption is the catalyst for rapid innovation, and facilitates “leapfrogging”.

**Performance**
Technology firms across the emerging markets are taking global leadership positions.
Emerging markets represent a huge consumer market opportunity.

- In order to fairly compare the consumption power of different economies we use purchasing power parity (PPP).
- In terms of PPP, the top 25 economies by GDP represent 79% of the global economy\(^1\)
- 60% of these economies (or 15 out of 25 numerically) are considered emerging markets\(^1\)
- According to the World Bank, emerging markets represent a population of 4.5 billion people who spend $5 trillion a year\(^2\)

1. Data from the World Bank as of 9/30/2019.
According to a study from the Brookings Institution, middle class consumption could reach 50% of total global consumption by the year 2030, more than doubling from 2015.

Homi Kharas, "The Unprecedented Expansion of the Global Middle Class" Brookings Institution, February 2017
The rise of consumer technology goes beyond China to broader emerging markets as more of the developing world gets internet access for the first time.

Data from the World Bank as of 12/31/2017, retrieved on 9/30/2019.
For the majority of the developing world, smart phones provide the first point of internet access, bypassing traditional computers.

The proliferation of low cost smart phones across emerging markets, like the Mi Max 2 from Xiaomi pictured below, has meant much of the developing population is gaining access to the internet for the first time via smart phones.

ITU is the United Nations specialized agency for information and communication technologies. Data includes pay-as-you-go and contract renewals.
China’s rapid adoption of new technologies has produced a “leapfrogging” effect.
Money and the internet have become virtually inseparable.

Apps like Tencent’s WeChat and Alibaba’s Alipay allow users to do everything from buy a coffee, hail a cab, to make investments in wealth management products, all from a smart phone.

WeChat users can invest in mutual funds through the same app they use for social media.
Through our experience investing in the Chinese markets we identified three core themes:

- Internet adoption is expanding rapidly within China
- Domestic consumption and retail sales are steadily increasing and frequently taking place online
- The China E-Commerce sector has consistently outperformed the broader Chinese markets

### China / US Internet Statistics

1688.com (B2B Ecommerce Marketplace)
Tmall.com (B2C Online Retail Platform)
Cainiao (E-commerce Logistics Platform)
Alimama (Online Advertising Platform)

Global Marketplaces

AliExpress (Global B2B Marketplace)
Taobao (Global C2C E-commerce Website)

Other Business Ventures

Ant Financial (Mobile and Online Payments Platform)
Alibaba Cloud (Cloud Computing Services Provider to Online Businesses)

Jack Ma (Alibaba Founder)
Historically, Alibaba has consistently outperformed Amazon in terms of revenue growth and profit margins.

Past performance does not guarantee future results.
Naspers is a global internet and entertainment group that has grown into one of the largest technology investors in the world. The company’s investments span the globe and are organized into six business areas: Classifieds, Payments, B2C E-Commerce, Ventures, Video Entertainment, and Media¹.

- Naspers was founded in South Africa in 1915 as a publisher and printer of magazines.
- Naspers has become one of the world’s leading technology investors.
- Naspers owned 31.16% of Tencent
- Naspers also has a stake in significant publicly traded companies like Mail.ru and private investments such as Indian E-Commerce company Flipkart.

Emerging market internet companies around the world
In order to deliver a precise representation of the emerging markets consumer technology opportunity, we worked with Solactive to develop the Solactive Emerging Markets Consumer Technology Index.

Filtering Process for Index Constituent Selection

### Country Eligibility
- 26 eligible countries: Argentina, Brazil, Chile, Colombia, Mexico, Peru, Puerto Rico, Cyprus, Czech Republic, Egypt, Greece, Hungary, Poland, Qatar, Russia, South Africa, Turkey, United Arab Emirates, China, India, Indonesia, South Korea, Malaysia, The Philippines, Taiwan, Thailand

### Stock Size & Trading Minimums
- Minimum 3 month average daily trading volume of $1 million USD
- Minimum Market Cap of 1 billion USD

### Industry & Sub-sector Selection
- Select companies from Internet Retail and Internet Software/Services sub-sector and micro-sectors involved in the purchase, payment processing, and software for internet and e-commerce transactions

### Ensure Proper Diversification
- To mitigate exposure to any one company, constituents are capped at 3%.

### KEMQ
- KraneShares seeks to minimize tracking error and trading costs

Diversification does not ensure a profit or guarantee against a loss.
Our index filtering process results in a very different sector and country breakdown than traditional emerging markets.

**KEMQ Sector Breakdown**
- Communication Services: 55.35%
- Consumer Discretionary: 28.95%
- Information Technology: 14.10%
- Financials: 0.75%
- Health Care: 0.81%

**KEMQ Country Breakdown**
- China: 38.05%
- South Korea: 20.74%
- Brazil: 10.62%
- Greece: 5.06%
- United States: 3.61%
- Malaysia: 3.47%
- Poland: 3.02%
- Cyprus: 3.10%
- Mexico: 2.69%
- Thailand: 2.55%
- Others*: 7.10%

*Others include India and Puerto Rico

**KEMQ vs. MSCI Emerging Markets**

Data from Factset as of 9/30/2019. See page 23 for index definitions.

*Others include Indonesia, Philippines, Chile, Qatar, United Arab Emirates, Turkey, Colombia, Peru, Hungary, Czech Republic, Pakistan, Egypt, and Saudi Arabia

The performance data quoted represents past performance. Past performance does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor’s shares, when sold or redeemed, may be worth more or less than their original cost and current performance may be lower or higher than the performance quoted. For performance data current to the most recent month end, please visit www.kraneshares.com

Index returns are for illustrative purposes only. Index performance returns do not reflect any management fees, transaction costs or expenses. Indexes are unmanaged and one cannot invest directly in an index.
Key Takeaways

• Our China experience has allowed us to identify and deliver extraordinary opportunities across emerging markets

• The three P’s will shape buying behavior for decades to come
  
  o **Population**: The middle class consumer
  
  o **Penetration**: Rapid internet adoption
  
  o **Performance**: The growth of technology platforms

• Many of the themes and opportunities that we observe in China extend across the Emerging Markets and include the consumer, technology, healthcare, the environment and electric vehicles
Index Definitions:

CSI Overseas China Internet Index: Represents the Chinese internet companies listed in overseas markets (New York and Hong Kong), in order to measure the performance of the Chinese internet companies listed outside mainland China.

MSCI China Index: The MSCI China Index captures large and mid cap representation across China H shares, B shares, Red chips and P chips.

The MSCI Emerging Markets Index: Captures large and mid cap representation across 23 Emerging Markets (EM) countries.

Term Definitions:

Purchasing Power Parity (PPP): is an economic theory that compares different countries’ currencies through a market “basket of goods” approach. According to this concept, two currencies are in equilibrium or at par when a market basket of goods (taking into account the exchange rate) is priced the same in both countries.
Important Notes

Carefully consider the Funds’ investment objectives, risk factors, charges and expenses before investing. This and additional information can be found in the Funds’ full and summary prospectus, which may be obtained by visiting www.kraneshares.com. Read the prospectus carefully before investing.

ETF shares are not redeemable with the issuing fund other than in large Creation Unit aggregations. Instead, investors must buy or sell ETF Shares in the secondary market with the assistance of a stockbroker. In doing so, the investor may incur brokerage commissions and may pay more than net asset value (NAV) when buying and receive less than net asset value when selling. The NAV of the Fund’s shares is calculated each day the national securities exchanges are open for trading as of the close of regular trading on the New York Stock Exchange ("NYSE"), normally 4:00 P.M. Eastern time (the "NAV Calculation Time"). Shares are bought and sold at market price not NAV. Closing price returns are based on the midpoint of the bid/ask spread at 4:00 P.M. Eastern Time (when NAV is normally determined).

Narrowly focused investments typically exhibit higher volatility. The ability of the Emerging Markets Consumer Technology Index ETF to achieve its investment objective is dependent, in part, on the continuous availability of A Shares and the ability to obtain, if necessary, additional A Shares quota. The fund may invest in derivatives, which are often more volatile than other investments and may magnify the Fund’s gains or losses. The Fund may engage in securities lending. The Fund is non-diversified.

Investing involves risk, including possible loss of principal. There can be no assurance that a Fund will achieve its stated objectives. The Funds are subject to political, social or economic instability within China which may cause decline in value. Fluctuations in currency of foreign countries may have an adverse effect to domestic currency values. Emerging markets involve heightened risk related to the same factors as well as increase volatility and lower trading volume.
