Finding Quality Income

An Overview of Opportunities Within
China's Interbank Bond Market

Introduction to KraneShares

About KraneShares

Krane Funds Advisors, LLC is the investment manager for KraneShares ETFs. Our suite of China focused ETFs provides investors with solutions to capture China's importance as an essential element of a well-designed investment portfolio. We strive to provide innovative, first to market strategies that have been developed based on our strong partnerships and our deep knowledge of investing. We help investors stay up to date on global market trends and aim to provide meaningful diversification. Krane Funds Advisors, LLC is majority owned by China International Capital Corporation (CICC).

KraneShares E Fund China Commercial Paper ETF

Investment Strategy:

The KraneShares E Fund China Commercial Paper ETF (NYSE: KCNY) seeks to track the CSI Diversified High Grade Commercial Paper Index. The Fund seeks to invest at least 80% of its total assets in a diversified basket of investment-grade¹ commercial paper denominated in on-shore renminbi issued by sovereign, quasi-sovereign and corporate issuers in the People's Republic of China and traded in the inter-bank bond market. Commercial paper in the Fund is investment-grade and has a remaining term to final maturity of no more than one year and no less than one month.

KCNY features:

- Invests in money market securities (i.e. commercial paper) and attempts to preserve principal investment while providing attractive monthly distributions
- The average maturity of the securities held by the fund is less than six months
- Invests into commercial paper that has received an investment grade credit rating¹

China commercial paper may be appropriate for investors who...

- Require an allocation to investment products that only invest in short-term securities
- Have an investment goal with a short time horizon
- Seek a daily liquidity requirement

¹ Investment grade commercial paper is commercial paper that is issued by an issuer whose long-term bonds are rated AAA or equivalent by one or more Chinese credit rating agencies; or commercial paper that is issued by an issuer whose long-term bonds are rated AA+ or equivalent by one or more Chinese credit rating agencies and commercial paper is rated A-1 or equivalent by one or more Chinese credit rating agencies.

E Fund Asset Management is the sub-adviser to the KraneShares E Fund China Commercial Paper ETF (ticker: KCMY)

\$200b AUM

E Fund Quick Facts

- **Located:** Headquartered in Guangzhou with offices in Beijing, Shanghai and Hong Kong

- **\$200b** in assets under management; one of the top three asset managers by assets in Mainland China
- Serves more than **67 million investors**

China's Bond Market is the second largest in the world, yet it has little foreign ownership.

Data from the Bank for International Settlements as of 9/30/2019. Retrieved on 6/30/2020

Data from Bloomberg as of 6/30/2020.

On April 1, 2019, Bloomberg Barclays began including RMB-denominated bonds issued by the Chinese government and policy banks into their Global Aggregate Index, which is tracked by \$2.5 trillion in assets,¹ as well as their Global Treasury and Emerging Markets Local Currency Government Bond Indexes.

- 322 onshore Chinese bonds are being added to the Bloomberg Barclays Global Aggregate Index
- New regulations have provided global investors with the fundamental rules of engagement and foundation for enhanced market access and participation through CIBM Direct and Bond Connect.
- Currently, foreign investors only represent about 3% of the Chinese interbank bond market²

Chinese Treasury and Policy Bank Debt Being Included in the Bloomberg Barclays Global Aggregate Index³

Issuer	Count	Total Market Value (MV) (US\$ trillion)	Total Amount Outstanding (US\$ trillion)	Average Modified Duration (Years)	Average Yield to Worst (%)
China Government Bond	148	12.07	12.11	8.97	2.98
China Development Bank	89	7.14	7.26	4.47	3.17
Agricultural Development Bank	46	3.72	3.86	3.84	3.16
Export-Import Bank of China	39	2.49	2.59	3.31	3.09
Total/Average (non-weighted)	322	25.42	25.82	6.31	3.07

1. "Explainer: Why China's inclusion in global bond benchmarks matters", Reuters. March 29, 2019. Retrieved 6/30/2020.
2. Shu, Chang. "China's bond market is too-big-to-ignore," Bloomberg Professional Services. April 18, 2019. Retrieved 6/30/2020.
3. Data from Bloomberg as of 7/28/2020.

When Chinese bonds are fully added into the Global Aggregate Index, China's weight will increase to about 6% of the Index, and the Chinese RMB will become the fourth-largest currency component.¹

Full inclusion is likely to bring at least \$150 billion of fund inflows² into China's \$13 trillion bond market.³

Global Aggregate Index by Currency

1. Data from Bloomberg as of 6/30/2020.
2. "Explainer: Why China's inclusion in global bond benchmarks matters", Reuters. 29 March 2019.
3. Financial Times, "Bloomberg adds Chinese government bonds to flagship index" 6/30/2020.

The fast pace of China government bond inclusion reflects the underlying investment opportunity it offers. China went from having no representation in the EM Government Bond Index in 2018 to being the top issuer in the index by weight.

In 2019, China replaced South Korea as the top issuer in the index by weight.

Issuer Breakdown of Bloomberg Barclays Emerging Market Local Currency Government Bond Index

Data from Bloomberg as of 6/30/2020

Historical evolution of CNY dynamics & reasons for a stable outlook

- The RMB steadily depreciated against the dollar for much of the 1980s and 1990s, as China gained its competitive export edge.
- In 1997, a peg to the dollar was initiated at 8.3 CNY for every dollar and lasted until 2005, resulting in appreciation that aligned with China's plan to shift the economy away from an exporting economy to a consumer led economy.
- 2015-2016 saw concerns about capital flight, an economic hard landing, banking crisis and FX reserve depletion, leading to a 7% decline. Incidentally, only a brief period of FX reserve depletion was experienced.
- The International Monetary Fund (IMF) launched a new Special Drawing Rights (SDR) basket including CNY on October 1, 2016.
- In July 2017, the Bond Connect mutual market access program was established, allowing global investors to invest directly into China's fixed income market.
- China's currency is likely to see stability going forward due to relatively stable interest rates, high foreign reserve levels, the government's desire to de-dollarize trade, and China's recent transformation into a creditor nation.

*Spot rate refers to the immediate settlement price for a currency at a given time. Spot rates for currencies reflect the current market value of a unit of a given currency (usually in USD).

**Pegged indicates that a given currency is tied to the value of another such that any fluctuations in the value of that currency parallel fluctuations in the currency to which it was pegged.

China maintains over \$3 trillion in Foreign Exchange Reserves.

Data from Bloomberg as of 6/30/2020.

PBoC's new CFETS Basket approach has created stability.

China Foreign Exchange Trade System (CFETS) was created by People's Bank of China (PBoC) to manage the RMB risk. In December of 2015, CFETS adopted a 13-currency basket for managing the RMB. The basket was expanded to 24 currencies in 2017. Since the basket approach was implemented, the RMB basket index has been stable relative to the US dollar.

	Currency	2016	2017
US Dollar	USD	26.40%	22.40%
Euro	EUR	21.40%	16.30%
Japanese Yen	JPY	14.70%	11.50%
Australian Dollar	AUD	6.30%	4.40%
Hong Kong Dollar	HKD	6.60%	4.30%
Malaysian Ringgit	MYR	4.70%	3.80%
British Pound	GBP	3.90%	3.20%
Singapore Dollar	SGD	3.80%	3.20%
Thai Baht	THB	3.30%	2.90%
Russian Rubble	RUB	4.40%	2.60%
Canadian Dollar	CAD	2.50%	2.20%
Swiss Franc	CHF	1.50%	1.70%
New Zealand Dollar	NZD	0.70%	0.40%
South Korean Won	KRW		10.80%
Saudi Riyal	SAR		2.00%
United Arab Emirates Dirham	AED		1.90%
South African Rand	ZAR		1.80%
Mexican Peso	MXN		1.70%

Chinese Onshore Renminbi (CNY) had lower volatility than many emerging market currencies over the past year.

Investors are paid a premium for investing in China's government bonds.

- China's government bonds offer higher yields than many riskier global assets such as Southern European government debt.
- China's GDP growth rate of 6.11% in 2019 was higher than those of Spain (1.98%), Portugal (2.16%), Italy (0.30%), and Greece (1.87%)¹ and China's debt-to-GDP ratio is significantly lower than all four of those countries. Therefore, debt issued by these governments carries more risk than that issued by China.
- Nonetheless, investors are better compensated for investing in China's government debt.

RMB Basket Index (CEFTS): This index tracks the performance of CNY (RMB, Chinese Yuan) against the 24 currencies accepted by the China Foreign Exchange Trade System (CEFTS) for its currency basket. The currencies were selected based on international trade-weights with adjustments of re-export trade factors. The purpose of this index is to help guide market participants to refer not only to the CNY/USD exchange rate, but also to the effective exchange rate based on the aforementioned basket of currencies.

Bloomberg Dollar Index (DXY): This index tracks the performance of a basket of leading global currencies versus the US Dollar. The currency basket is updated annually based on their importance in terms of trade and liquidity.

Important Notes

Carefully consider the Funds' investment objectives, risk factors, charges and expenses before investing. This and additional information can be found in the Funds' full and summary prospectus, which may be obtained by visiting www.kraneshares.com. Read the prospectus carefully before investing.

ETF shares are not redeemable with the issuing fund other than in large Creation Unit aggregations. Instead, investors must buy or sell ETF Shares in the secondary market with the assistance of a stockbroker. In doing so, the investor may incur brokerage commissions and may pay more than net asset value when buying and receive less than net asset value (NAV) when selling. The NAV of the Fund's shares is calculated each day the national securities exchanges are open for trading as of the close of regular trading on the New York Stock Exchange ("NYSE"), normally 4:00 P.M. Eastern time (the "NAV Calculation Time"). Shares are bought and sold at market price not NAV. Closing price returns are based on the midpoint of the bid/ask spread at 4:00 P.M. Eastern Time (when NAV is normally determined).

Investing involves risk, including possible loss of principal. There can be no assurance that a Fund will achieve its stated objectives. The Funds are subject to political, social or economic instability within China which may cause a decline in value. Fluctuations in currency of foreign countries may have an adverse effect on domestic currency values. Emerging markets involve heightened risk related to the same factors as well as increased volatility and lower trading volume.

The KraneShares E Fund China Commercial Paper ETF is subject to interest rate risk, which is the chance that bonds will decline in value as interest rates rise. The components of the securities held by the Fund will be rated by Chinese credit rating agencies, which may use different criteria and methodology than U.S. entities or international credit rating agencies. The Fund may invest in high yield and unrated securities, whose prices are generally more sensitive to adverse economic changes and consequently more volatile. The Fund is subject to industry concentration risk and is non-diversified. Narrowly focused investments typically exhibit higher volatility.

Although the information provided in this document has been obtained from sources which Krane Funds Advisors, LLC believes to be reliable, it does not guarantee accuracy of such information and such information may be incomplete or condensed.

The KraneShares ETFs are distributed by SEI Investments Distribution Company (SIDCO), which is not affiliated with Krane Funds Advisors, LLC, the Investment Adviser for the Fund, or E Fund Asset Management, the sub-adviser. [R_US_KS_SEI]
