

## KRANESHARES PRESENTS: CHINA A-SHARE INCLUSION ROADSHOW

- The roadshow will be held in late April through May 2018 and be comprised of educational events geared toward institutions and financial advisors across eight US cities.
- MSCI will partially include China A-Shares into their Global Standard Indexes starting June 1<sup>st</sup>, 2018. This has the potential to be a significant asset rebalance.
- Longer term, A-shares are projected to comprise 17%<sup>1</sup> of the \$1.5 trillion in assets tracking the MSCI Emerging Markets Index<sup>2</sup>.
- Similar past rebalances have provided a strong catalyst for performance of the affected markets.
- Each regional event will feature speakers from KraneShares, MSCI, CICC, and Bosera Asset Management.

## **Important Notes**

**Carefully consider the Funds' investment objectives, risk factors, charges and expenses before investing. This and additional information can be found in the Funds' full and summary prospectus, which may be obtained by visiting [www.kraneshares.com](http://www.kraneshares.com). Read the prospectus carefully before investing.**

ETF shares are not redeemable with the issuing fund other than in large Creation Unit aggregations. Instead, investors must buy or sell ETF Shares in the secondary market with the assistance of a stockbroker. In doing so, the investor may incur brokerage commissions and may pay more than net asset value (NAV) when buying and receive less than net asset value when selling. The NAV of the Fund's shares is calculated each day the national securities exchanges are open for trading as of the close of regular trading on the New York Stock Exchange ("NYSE"), normally 4:00 P.M. Eastern time (the "NAV Calculation Time"). Shares are bought and sold at market price not NAV. Closing price returns are based on the midpoint of the bid/ask spread at 4:00 P.M. Eastern Time (when NAV is normally determined).

Investing involves risk, including possible loss of principal. There can be no assurance that a Fund will achieve its stated objectives. The Funds are subject to political, social or economic instability within China which may cause decline in value. Fluctuations in currency of foreign countries may have an adverse effect to domestic currency values. Emerging markets involve heightened risk related to the same factors as well as increase volatility and lower trading volume.

The ability of the KraneShares Boserá MSCI China A ETF to achieve its investment objective is dependent on the continuous availability of A Shares and the ability to obtain, if necessary, additional A Shares quota. If the Fund is unable to obtain sufficient exposure due to the limited availability of A Share quota, the Fund could seek exposure to the component securities of the Underlying Index by investing in other types of securities. The Fund may invest in derivatives, which are often more volatile than other investments and may magnify the Fund's gains or losses.
